* Unless otherwise stated, the pressure base is 14.65 psia.
[1] Subject to Btu adjustment.
[2] No current sales.
[3] Rate reduction due to processing charge adjustment.
[4] Deletes nonproductive formations below the base of the Delaware Formation.
[5] Contract covering production from below the base of the Delaware Formation that was deleted by Supp. No. 5.
[6] Applicable only to production covered by Supp. No. 6.
[7] Accepted to be effective as of the date shown in the "Effective Date" column.
[8] Accepted subject to refund in Docket No. RI73-117 as of 1-1-73.

The proposed increases of Getty Oil Company and Atlantic Richfield Company do not exceed the rate limit for a one day suspension, and they are, therefore, suspended for one day from the 60 day notice period or the contractual effective date, whichever is later.

The rate reduction of Sun Oil Company is accepted subject to the existing suspension proceeding.

The remaining proposed increases exceed the rate limit for a one day suspension and are suspended for five months from the expiration of the 30 day statutory notice period or the contractual effective date, whichever is later.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR, Chapter I, Part 2, Section 2.56).

Nothing contained in this order shall relieve the respondents of any responsibility imposed by the Economic Stabilization Act of 1970, (Pub. L. 91-379, 84 Stat. 799, as amended by Pub. L. 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

[Docket No. E-7769]

DELMARVA POWER AND LIGHT CO.

Extension of Time

JULY 26, 1973.

On July 13, 1973, Interveners, through Counsel for the Cities, Cooperatives and St. Michael's Utility Commission, filed a motion for an extension of time within which to file testimony as fixed by order issued March 2, 1973. The motion states that no party had any objection to the request.

Upon consideration, notice is hereby given that the date is extended to and including August 20, 1973, within which interveners shall submit their evidence.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-16053 Filed 8-2-73;8:45 am]

[Docket No. CI73-592]

HERMAN GEO. KAISER

Order Granting Interventions and Fixing Date for Hearing

JULY 25, 1973.

The above-named Applicant has filed an application pursuant to Section 7(c) of the Natural Gas Act,[1] and pursuant to § 2.75[2] of the Commission's general policy statements, the new Optional Procedure for Certificating New Producer Sales of Natural Gas set forth in Order No. 455,[3] (hereinafter Section 2.75) for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce.

On March 21, 1973, Herman Geo. Kaiser (Kaiser) filed an application in Docket No. CI73-592 for certification of a sale of natural gas to Panhandle Eastern Pipe Line Company (Panhandle) from the Okley "A" No. 1 well, Chaney Dell Field, Major County, Oklahoma (Hugoton-Anadarko Area).

Kaiser's contract with Panhandle, dated June 1, 1972, has a term of twenty (20) years, and provides for an initial rate of 32.0 cents per Mcf at 14.65 psia with 0.25 cent per Mcf escalations every year starting on September 1, 1977. The price is subject to upward and downward Btu adjustments, and the contract further provides for reimbursement to the seller of 75.0 percent of any new or additional taxes.

Kaiser asserts that the contract with Panhandle contains no indefinite pricing clause other than the Btu price adjustment clause and the clause to reflect changes in state production taxes. However, Section 8.3 of the tendered contract contains an FPC Area Rate Clause which is prohibited in contracts submitted for certification under § 2.75 (18 C.F.R. 2.75). Since Kaiser has not waived any rights under this clause or submitted a filing stating that the clause will not be operative if a certificate is issued under § 2.75, we shall require such a filing before a certificate is issued.

Kaiser states that the Okley "A" No. 1 well was commenced after April 6, 1972, and that certification is sought only for production from this well.

Deliveries were commenced under Kaiser's small producer certificate on August 7, 1972. (See Docket No. CS71-179) and are continuing under that authorization. Kaiser seeks certification for the sale, retroactive to the date of initial delivery, because of the uncertain status of the small producer exemption. *Texaco Inc., et al.* v. *F.P.C.*, — U.S. App. D.C. —, 474 F.2d — (1972).

Notice of Kaiser's application was issued on March 21, 1973, and the notice was published in the FEDERAL REGISTER on March 28, 1973. (38 Fed. Reg. 8093). Timely petitions or petitions to intervene were due on or before April 13, 1973. Timely petitions to intervene were filed by the following parties:

Associated Gas Distributors
American Public Gas Association
Panhandle Eastern Pipe Line Company.

Having reviewed the petitions to intervene, we find that all of the above-mentioned petitioners have sufficient interest in this proceeding to warrant intervention.

A formal hearing has been requested, and we find a hearing is desirable to determine, on the record, whether the present and future public convenience and necessity will be served by certificating this sale, and whether the proposed rate is just and reasonable, taking into consideration all factors bearing on maintenance of an adequate and reliable supply of gas, delivered at the lowest reasonable cost.[4]

This hearing is not the proper forum for the relitigation of the propriety of the § 2.75 procedures; that matter is now before the Court of Appeals. See n. 3, *supra*. This hearing will be addressed solely to the issues of public convenience and necessity, and the justness and reasonableness of the particular sales and rates herein proposed.

Those parties and intervenors desiring to submit cost and non-cost data should structure their evidence to reflect the tests under § 2.75 for determining the justness and reasonableness of the rate sought,[5] bearing in mind that with respect to proceedings under § 2.75 of our Regulations, we have heretofore stated:

We will, absent a showing of special circumstances, accept as conclusive the cost findings embodied in our area rate decisions, as such may be supplemented from time to time by appropriate Commission order. (Order 455, paragraph 63, page 21.)

We do not, therefore, open this hearing to the presentation of cost data, other than that incorporated from the Belco, *et al. proceedings* as hereinafter ordered, unless, in the judgment of the Presiding Administrative Law Judge, a showing of special circumstances is made.

We also direct the attention of the parties to our recent statement in Opinion No. 639, Area Rates for the Appalachian and Illinois Basin Areas, Docket No. R-371, opinion issued December 13, 1972, wherein we stated:

We have been admonished not to rely on cost alone, but also to consider producer rate levels in the context of "non-cost" factors of supply and demand, capital formation, and probable industry response to any given level of rates. *Austral Oil, et al.* v. *F.P.C.*, 428 F. 2d 407 (CA5, 1970). Applications under § 2.75 will be so considered * * *.

No intervenor has questioned Panhandle's need for the additional supplies of natural gas that will be available to it as a result of this purchase. However, we are unable to determine Panhandle's actual need for additional natural gas supplies since it has failed to submit the certification required by § 2.75h (18 C.F.R. 2.75h). Accordingly, we will require Panhandle to present evidence concerning its natural gas supply situation and whether a comparable supply of natural gas is available to Panhandle at any rate lower than the rate sought in this application.

We have just rendered a decision in the first proceedings under § 2.75 in which a full evidentiary record was made.[6] We think it appropriate in these circumstances to incorporate by reference the record developed in that proceeding into these consolidated proceedings insofar as it may be relevant pursuant to the majority or minority views in Opinion No. 659.

The Commission finds:

(1) It is necessary and in the public interest that the above-docketed proceeding be set for hearing.

(2) It is desirable and in the public interest to allow the above-named petitioners to intervene in this proceeding in order that they may establish the facts and the law from which the nature and validity of their alleged rights and interests may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 15, and 16 thereof, The Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act (18 C.F.R., Chapter I) a public hearing shall be held concerning the issues presented by the application herein commencing September 18, 1973, at 10:00 a.m. (EDT) in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding pursuant to the Commission's Rules of Practice and Procedure.

(C) Applicant and all intervenors supporting the applications shall file their direct testimony and evidence on or before August 24, 1973. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all other parties to these proceedings.

(D) The Commission Staff and all intervenors opposing the application shall file their direct testimony and evidence on or before September 17, 1973. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, and all other parties to these proceedings.

(E) All rebuttal testimony and evidence shall be served on or before September 18, 1973. All parties submitting rebuttal testimony and evidence shall serve such testimony and evidence upon the Presiding Administrative Law Judge, the Commission Staff, and all other parties to these proceedings.

(F) The record in the *Belco* case, Docket Nos. CI73-293, *et al.*, is incorporated by reference into the subject consolidated proceedings insofar as it may be relevant pursuant to the majority or minority views in Opinion No. 659.

(G) The above-named petitioners are permitted to intervene in this proceeding subject to the rules and regulations of the Commission; *Provided, however,* that the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and *Provided, further,* that the admission of such interests shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(H) The Administrative Law Judge's decision shall be rendered on or before October 31, 1973.

(I) All parties shall submit briefs on exceptions to the Commission on or before November 12, 1973.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB.
Secretary.

[1] Chairman Nassikas concurring in part, filed a separate statement, filed as part of the original document.

V38-149 AUG 3 73 XUM

Bonds to be issued by the City of Dubuque, Iowa, in the amount of $4,850,000, which bonds, taking into account market conditions, will be sold by the City as soon as possible after obtaining approval of this Guaranty.

Applicant is incorporated under the laws of the State of Delaware, with its principal business office in Dubuque, Iowa, and is engaged principally in the electric utility business in northern and northeastern Iowa, in southern Minnesota and a few small communities in Illinois.

The bonds of the City will be sold to finance the acquisition from the Applicant of a leasehold interest in and the construction of pollution abatement equipment at Applicant's Steam Electric Generating Power Station in Dubuque, Iowa, installation of which is expected to be completed in 1974. Said equipment will be subleased by the City to the Applicant and payments under said sublease will be sufficient to pay principal, premium if any, and interest due on said bonds. The bonds will not be issued by the Applicant. The rate of interest will be negotiated at a private sale of the bonds between the City and the underwriters.

The authorization sought is for Applicant to issue an independent Secured Guaranty to the Trustee and holders of the bonds of payment of principal, premium if any, and interest on said bonds. No payments will be required under the Secured Guaranty if all payments are made pursuant to the sublease.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-103]

McCULLOCH INTERSTATE GAS CORP.

Extension of Time

JULY 26, 1973.

On July 24, 1973, Staff Counsel filed a motion to extend the procedural dates fixed by order dated May 31, 1973, in the above-designated matter. A notice of extension of time was issued on June 20, 1973, for McCulloch Interstate Gas Corporation to file monthly detail supporting Schedules A through M and Statement P. The motion states that there is no opposition to the motion.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of evidence by Staff, October 5, 1973.
Prehearing Conference, October 16, 1973 (10:00 a.m., EDT).
Service of evidence by Interveners, October 26, 1973.
Service of Company Rebuttal, November 5, 1973.
Hearing, November 13, 1973 (10:00 a.m., EST).

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16056 Filed 8-2-73;8:45 am]

NATIONAL POWER SURVEY TECHNICAL ADVISORY COMMITTEE

Notice of Meeting and Agenda

Agenda for a meeting of the Task Force—Administrative of the Technical Advisory Committee on Fuels, to be held at the Federal Power Commission Offices, 825 North Capitol St., NE., Washington, D.C. 20426 Aug. 7, 1973, 9:30 a.m., e.d.s.t., Room 5200

1. Meeting called to order.
2. Objective and purposes of meeting.
A. Approval of minutes of meeting June 26, 1973.
B. Review of draft reports submitted by task forces.
C. Outline draft report of TAC on Fuels.
D. Other business.
E. Date for next full committee meeting.
F. Date for next Task Force—Administrative meeting.
3. Adjournment.

NOTE: This will be a meeting of the Task Force—Administrative for the purpose of preparing draft report of TAC on Fuels. It is anticipated the meeting will require the better part of the day. Committee members who desire to contribute to the preparation of the report are invited to attend.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

NATIONAL POWER SURVEY TECHNICAL ADVISORY COMMITTEE

Notice of Meeting and Agenda

Agenda for a ninth meeting of the Technical Advisory Committee on Research and Development, to be held at the Federal Power Commission Offices, 825 North Capitol Street, NE, Washington, D.C., 8:30 a.m., September 12, 13, and 14, 1973, Room 5200.

1. Meeting called to order by FPC Coordinating Representative.
2. Objectives and Purposes of Meeting.

September 12

A. Approval of minutes of June 14 meeting.
B. Report of Task Force on Environmental Research (8:30 a.m.–12:30 p.m.)
C. Report of Task Force on Energy Systems Research (1:00 p.m.–5:00 p.m.)

September 13

D. Report of Task Force on Energy Conversion Research (8:30 a.m.–12:30 p.m.)
E. Report of Task Force on Energy Distribution Research (1:00 p.m.–5:00 p.m.)

September 14

F. Report of Task Force on Energy Sources Research (8:30 a.m.–12:30 p.m.)
G. Meeting among TAC Chairman and Five Task Force Chairmen (1:00 p.m.–5:00 p.m.)
H. Other business.
I. Dates of future meetings.
3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-7690]

NEPOOL POWER POOL AGREEMENT

Further Extension of Time and Postponement of Prehearing Conference and Hearing

JULY 27, 1973.

On July 24, 1973, the New England Power Pool Executive Committee filed a motion for a further extension of time for filing testimony and exhibits as required by the notice issued June 1, 1973. The motion states that counsel for each of the interveners including the Rhode Island Consumers Council have no objection to the requested extension.

Upon consideration, notice is hereby given that the time for filing testimony by Nepool is postponed to and including August 31, 1973. The other procedural dates are further modified as follows:

Service of testimony by Staff, September 21, 1973.
Service of Rebuttal testimony, October 12, 1973.
Prehearing Conference, October 24, 1973 (10:00 a.m., EDT).
Cross-Examination on all evidence, October 31, 1973.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16057 Filed 8-2-73;8:45 am]

[Docket No. RP73-22]

NORTHERN NATURAL GAS CO.

Order Granting Petition for Declaratory Order and Vacating Prior Order

Issued JULY 24, 1973.

On August 25, 1972, Northern Natural Gas Company (Northern) filed a Petition for a Declaratory Order (Petition) to terminate a controversy between Northern and Michigan Power Company (Michigan Power) regarding the proper application of the gas overrun penalty provisions of Northern's FPC Gas Tariff and the proper interpretation of an

earlier Commission Order issued December 19, 1969, purporting to authorize Northern to waive the imposition of a $22,598 penalty for Michigan Power's unauthorized takes of overrun gas.

In our opinion a discussion of the background of this proceeding will be helpful to an understanding of disposition of Northern's Petition and the pleadings relating thereto. By letter dated October 13, 1969, Michigan Power requested the Commission to authorize Northern to waive the penalty provision of Section 8.2 of Northern's Contract Demand Rate Schedule contained in Northern's FPC Gas Tariff, Second Revised Volume No. 1 for unauthorized overrun volumes taken by Michigan Power during the period July 15–17, 1969. In its letter, Michigan Power alleged that the overrun was due to an inadvertent failure on its part to curtail certain of its deliveries from Northern and that waiver of the overrun penalty provision was therefore justified. The penalty for the overrun was $22,598.

Section 8 of Northern's Contract Demand Rate Schedule deals with penalties for unauthorized takes in excess of Contract Demand volumes. The only subsection providing for any waiver of the penalty provisions is subsection 8.2—*Waiver of Penalties Under Conditions of Force Majeure*, which states in part: "Northern shall not have the right to waive the penalty for unauthorized overrun volumes under any circumstances, except where unauthorized overrun volumes were taken because of a force majeure gas operating situation of the Gas Utility."

By letter dated November 3, 1969,[1] in reply to Michigan Power's request for waiver of § 8.2 Northern stated: "that the facts herein do not present a case of force majeure and that the tariff does not empower Northern to grant a waiver." Northern further stated that the restrictions were written into Northern's tariff at the request of its jurisdictional customers to discourage the taking of unauthorized overrun volumes. Therefore, Northern stated it would not be appropriate for the Commission to require Northern to waive Section 8.2.

On December 19, 1969, the Commission issued a letter order[2] which stated that since there was

> no adverse effect to either Northern or Northern's customers, as a result of the inadvertent overrun by Michigan Power . . . (and) (l)n view of the peculiar circumstances, the requested waiver appears to be appropriate. Northern is hereby authorized to waive Section 8.2 of the Contract Demand rate schedule contained in its FPC Gas Tariff, Second Revised Volume No. 1 and to waive the penalty payment of $22,598 for unauthorized overrun volumes taken by Michigan Power during the period July 15–17, 1969.

By letter dated January 26, 1970,[3] Northern informed Michigan Power that it had "decided not to exercise the waiver authority granted by the Commission order of December 19, 1969, • • •" and requested Michigan Power to pay the $22,598 overrun penalty. By letter dated February 13, 1970,[4] Michigan Power responded by claiming that the December 19, 1969, letter order *required* Northern to waive the overrun penalty.

On August 25, 1972, Northern filed its Petition which requested, in effect, confirmation of its interpretation of Section 8.2 of its Contract Demand Rate Schedule and the letter order issued December 19, 1969, that Northern is not *required* to waive the penalties but was only authorized to do so within its discretion. Northern also argues that to grant the waiver to Michigan Power would be a discriminatory act as to Northern's other customers contrary to Section 4(b) and 4(d) of the Natural Gas Act and would set a precedent of waivers of overrun penalties which would have "drastic" consequences to Northern's system operations during "the present natural gas shortage". Northern submits that its tariff requires Northern to collect overrun penalties absent showing of a *force majeure* and that

> • • • (w)hile the Commission has the power *prospectively* to require a natural gas company to change its tariff sheets, it may not retroactively require a change in a natural gas company's practices which are required under its tariff.

On September 15, 1972, the Northern Distributor Group (NDG) filed comments supporting Northern's refusal to waive the penalty charge. On September 22, 1972, Michigan Power filed comments which included a motion to dismiss or, alternatively, to deny the petition for a declaratory order alleging that Northern was *required* to waive the penalty and that its Petition, was therefore, a collateral attack on the December 19, 1969, order which seeks to avoid the time constraints for a petition for rehearing. Alternatively, Michigan Power argues that because Northern waited for two and one-half years to file its Petition, it "is guilty of laches and does not come before the Commission with clean hands". On October 3, 1972, Michigan Power filed a response to the comments of the NDG alleging that NDG's charges of undue preference against Michigan Power were irrelevant and unsupported and that Northern's Petition was moot because the December 19, 1969, order required waiver of the overrun penalty.

On October 10, 1972, Northern filed an answer to Michigan Power's pleadings, arguing that Michigan Power's position was indefensible because the Commission cannot under Section 5 or any other portion of the Natural Gas Act retroactively change the overrun penalties of Northern's tariff, but can only make such change prospectively. Moreover, Northern alleges that "Section 5 of the Natural Gas Act makes a hearing a condition precedent to the ability of the Commission to order a change in a pipeline tariff provision". Northern also argues that its Petition is not a collateral attack on the December 19, 1969, order but instead a filing in furtherance of such order. Northern also denied that it was guilty of laches or that it came to the Commission without "clean hands".

On February 5, 1973, notice of the filing of the Petition was issued. Petitions to intervene were filed by the parties listed in Appendix B. Minnesota Natural Gas Company and the petitioners listed in Appendix B, with the exception of Michigan Power and Northern States Power Company (Wisconsin) and (Michigan), support Northern's Petition for a declaratory order. Five of the petitions to intervene also request a hearing on Northern's Petition (see Appendix B). On February 22, 1973, Michigan Power filed an answer to the petitions to intervene which incorporates by reference its arguments in Michigan Power's pleading filed October 3, 1972, in this proceeding. On February 26, 1973, Northern filed its answer to the petitions to intervene which also requested a formal hearing on the matter.

Our review of the letter order of December 19, 1969, (Appendix A) and the various pleadings associated with Northern's Petition indicates that the letter order incorrectly authorized Northern to waive Michigan Power's overrun penalty. Northern's tariff permits overrun penalties to be waived only in the case of a *force majeure*. All of the pleadings clearly indicate that the overrun penalty was incurred by an inadvertent failure by Michigan Power to curtail certain of its deliveries from Northern and not by a *force majeure*. Therefore, to permit a waiver of the penalty in this instance would require a change in Northern's tariff. However, Section 5 of the Natural Gas Act provides for a change to be made prospectively and after a hearing. Clearly, the December 19, 1969, letter order met neither of these requirements. Therefore, we find that Northern's refusal to waive the overrun penalty of $22,598 was reasonable and appropriate and that no purpose would be served by a full evidentiary hearing in this proceeding.

The Commission finds:

It is reasonable and appropriate in the public interest and to aid in the enforcement of the Natural Gas Act that the relief requested in Northern's Petition for a Declaratory Order be granted as hereinafter ordered and conditioned.

The Commission orders:

(1) Michigan Power's motion to reject is hereby denied.

(2) The requests for hearing are hereby denied.

(3) Northern's Petition for a Declaratory Order filed August 25, 1972, is hereby granted to the extent it requests approval of Northern's refusal to waive the overrun penalty of $22,598 for unauthorized overrun volumes taken by Michigan Power during the period of July 15–17, 1969.

[1] Filed November 6, 1969.
[2] See Appendix A.
[3] Appendix H to Northern's Petition.
[4] Appendix I to Northern's Petition.

V 38-149 AUG 3 73 XUM

(4) The letter order in Appendix A issued December 19, 1969, which purported to authorize waiver of the above-mentioned overrun penalty is vacated.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

APPENDIX A

NORTHERN NATURAL GAS COMPANY,
2223 Dodge Street,
Omaha, Nebraska 68102.
Attention: Gordon Severa, Group Vice President.

GENTLEMEN: Michigan Power Company has petitioned this Commission to authorize Northern Natural Gas Company to waive the penalty provisions of Section 8.2 of your Contract Demand rate schedule contained in FPC Gas Tariff, Second Revised Volume No. 1. Michigan Power has requested this waiver in order that Northern may waive the penalty payment of $22,598 for unauthorized overrun volumes inadvertently taken during the period July 15–17, 1969.

Upon analysis of Michigan Power's and Northern's statements, the Commission finds there was no adverse effect to either Northern or Northern's customers, as a result of the inadvertent overrrun by Michigan Power. It is also the understanding of this Commission that Section 8.2 was not intended by Northern to inflict economic punishment for understandable human failure. Therefore, in light of the peculiar circumstances, the requested waiver would be appropriate and Northern is hereby authorized to waive Section 8.2 of your Contract Demand rate schedule contained in FPC Gas Tariff, Second Revised Volume No. 1 and to further waive the penalty payment of $22,598 for unauthorized overrun volumes taken by Michigan Power during the period July 15–17, 1969.

By direction of the Commission.

APPENDIX B

PARTIES FILING PETITIONS TO INTERVENE

Central Telephone & Utilities Corporation
Iowa Electric Light & Power Company [1]
Iowa-Illinois Gas & Electric Company
Iowa Power and Light Company
Iowa Public Service Company
Lake Superior District Power Company [1]

[Docket No. RP72-98]

TEXAS EASTERN TRANSMISSION CORP.

Extension of Time and Postponement of Hearing

JULY 26, 1973.

The hearing date fixed by the order issued June 28, 1973, in the above-designated matter is in conflict with the schedule of Administrative Law Judge Ellis.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Evidence by Texas Eastern, September 12, 1973.
Evidence by Commission Staff and Interveners, October 1, 1973.
Rebuttal Evidence, October 17, 1973.
Hearing, October 30, 1973 (10:00 a.m., EDT).

MARY B. KIDD, *Acting Secretary.*

[FR Doc.73-16059 Filed 8-2-73;8:45 am]

[Docket No. RP72-98]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Changes in Rates and Charges

JULY 26, 1973.

Take notice that on July 13, 1973, Texas Eastern Transmission Corporation (Texas Eastern) tendered for filing revisions to Third Revised Volume No. 1 of its FPC Gas Tariff, to wit:

Second Revised Sheet No. 13
Second Revised Sheet No. 13A
Second Revised Sheet No. 13B
Second Revised Sheet No. 13C
Second Revised Sheet No. 13D

Texas Eastern asserts that these revisions are made pursuant to the Purchased Gas Adjustment Clause contained in § 23.5 of its FPC Gas Tariff. This provision was approved, Texas Eastern states, by Commission order on August 9, 1972 in Docket No. RP72-98. The proposed changes result from increase in gas cost to Texas Eastern by one of its suppliers, Texas Gas Transmission Corporation (Texas Gas).

Texas Eastern also requests waiver of the notice provisions of the Commission's rules and regulations so that the proposed rates may become effective August 1, 1973, the date that Texas Gas' requested increase would become effective.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 6, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-16060 Filed 8-2-73;8:45 am]

(Docket No. CI73-749)

WESTERN OIL PRODUCERS, INC.

Further Extension of Time and Postponement of Hearing

JULY 26, 1973.

On July 25, 1973, Western Oil Producers, Inc. requested a further extension of the procedural dates as set by notice issued July 11, 1973, in the above-designated matter. The request states that neither Staff Counsel nor El Paso Natural Gas Company objects to the motion.

Upon consideration, notice is hereby given that the procedural dates are postponed as follows:

Service of testimony and exhibits, August 2, 1973.
Hearing, August 9, 1973 (10:00 a.m., EDT).

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-16061 Filed 8-2-73;8:45 am]

[Docket No. E-8318]

CENTRAL LOUISIANA ELECTRIC CO.

Amendment to Agreement

JULY 27, 1973.

Take notice that on July 16, 1973, Central Louisiana Electric Company (CLEC) tendered for filing supplements to CLEC Rate Schedule FPC No. 30 containing the following:

(1) Revised Page 2 to original Exhibit A to Rate Schedule FPC No. 30;
(2) Revised Page 4 to original Exhibit A to Rate Schedule FPC No. 30.

The changes are requested to become effective on August 16, 1973.

CLEC claims that the changes result from a request by Southwest Louisana Electric Membership Corporation to acquire all company-owned substation facilities at certain delivery points. The supplements tendered by CLEC represent changes in the Delivery Voltage at those points.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-16052 Filed 8-2-73;8:45 am]

FEDERAL RESERVE SYSTEM

REDWOOD BANCORP.

Order Approving Acquisition of Montgomery Street Mortgage Corp. and West Coast Security Insurance Agency, Inc.

Redwood Bancorp, San Rafael, California, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire indirectly, through its wholly owned subsidiary, Redwood National Mortgage Company, the assets of Montgomery Street Mortgage Corporation ("MSMC") and to acquire directly the voting shares of West Coast Security Insurance Agency, Inc. ("West Coast"). Both MSMC and West Coast are headquartered in San Francisco, California, where they operate as subsidiaries of TUP., Inc., San Francisco, California. Notice of the application affording opportunity for interested persons to submit comments and views has expired and all received have been considered.

The operation by a bank holding company of a mortgage company and the sale of certain insurance coverage are activities that the Board has previously determined to be closely related to banking (12 CFR 225.4(a) (1) and (9)). A bank holding company may acquire companies engaged in these activities in accordance with the procedures the Board has established pursuant to § 4(c)(8) of the Act.

Applicant is a recently formed bank holding company whose principal subsidiary, Redwood Bank (deposits of $54.9 million),[1] is the 48th largest bank in California and the 5th largest of 10 banks in Marin County, where it holds 7.6 per cent of area deposits. Applicant also controls Redwood National Mortgage Company, formed *de novo* by Applicant, and has received the Board's approval to acquire National Mortgage Company.[2] National Mortgage Company engages in a mortgage banking business in Utah, Arizona, and Idaho.

Redwood Bank originates construction loans and originates and services mortgage loans for its own account and for the account of others. During 1972, Redwood Bank originated a total volume approximating $12 million in mortgage loans within the Greater San Francisco Bay Area.[3] Redwood Bank services for others a mortgage portfolio of approximately $66 million.

MSMC is a mortgage banking firm engaged in the origination and servicing of mortgage loans for institutional investors. It has a mortgage servicing portfolio of approximately $34 million.[4] Although headquartered in San Francisco, MSMC has not originated a mortgage loan in this area for approximately two years. Of the $3.0 million in mortgage loans originated by MSMC in 1972, $2.7 million in originations were derived from its Reno, Nevada office, and $0.3 million came from the Sacramento County area. In the Reno, Nevada market, MSMC ranks as the twentieth largest mortgage lender with a market share of 1.2 per cent. Redwood Bank neither originates nor services mortgage or construction loans in the Reno area; it originated $0.5 million in such loans in Sacramento County in 1972. Based on the facts of record, it appears that neither Applicant nor Company have a significant market share in either mortgage originations or mortgage servicing in any relevant area. Thus, consummation of the proposed acquisition would have no adverse effect on existing competition. Applicant's limited capital resources inhibit its potential as a competitor to MSMC in the Reno mortgage markets, while the resources of MSMC limit its ability to expand in the San Francisco area. The Board therefore concludes that consummation of the proposed acquisition would have no adverse effects on mortgage lending in any of the local markets.

It is anticipated that MSMC's affiliation with Applicant will enable MSMC to compete more effectively with the larger mortgage banking firms in the Reno area. Moreover, the use of MSMC's computer facilities and the expertise of its personnel in computerized maintenance of mortgage accounts should enable each institution to effect economies sufficient to operate their combined mortgage banking activities at a profit. In addition, the computer programs developed by MSMC would allow Applicant to provide more efficient service to its own customers. On balance, the Board concludes that the public benefit factors the Board is required to consider under section 4(c)(8) outweigh any possible adverse effects that might result from the proposed acquisition.

In addition to its mortgage loan and servicing activity, MSMC holds a parcel of unimproved real estate for future development. Real estate investment or development are not activities that the Board has determined to be so closely related to banking as to be a proper incident thereto. The Board has received a commitment from Applicant that it will dispose of this parcel of real estate promptly upon approval of this proposal, but in any event, no later than two years from the date of this Order.

West Coast engages in the sale of life, disability and hazard insurance related to the mortgages originated or serviced by MSMC. The life and disability policies insure the life and health of the mortgagor. In all such cases, total benefits payable are limited to the then outstanding principal balance of the loans. The hazard insurance policies ensure the real estate securing the mortgage loans. The mortgagees are designated beneficiaries of such policies. West Coast also, from time to time, sells such insurance to mortgage borrowers of Redwood Bank. These activities appear to be closely related to banking or managing or controlling banks. However, West Coast also engages in the renewal of insurance policies originally sold by it on mortgages originated by MSMC, although the servicing rights on such mortgages have now been transferred to others. The renewal of such insurance policies is not considered to be directly related to an extension of credit or to the provision of other financial services. However, such renewals are made as a matter of convenience to the mortgagors and, in the case of West Coast, the premium income derived from such sales apparently would not constitute a significant portion of the aggregate insurance premium income of Applicant derived from insurance sold pursuant to § 225.4(a)(9)(ii) of Regulation Y.[5] It therefore appears that the making of such renewals is permissible under § 225.4(a)(9)(ii)(c).

Due to the limited nature of West Coast's insurance activities, it does not appear that its acquisition by Applicant would have an significant effect on either existing or potential competition. Rather, consummation of Applicant's proposed acquisition of West Coast would insure continuity of its services to West Coast and its mortgagors.

Based on the record herein, the application is approved on the condition that MSMC promptly dispose of its real estate holding, and in any event, no later than two years from the date of this Order.

The transaction shall not be consummated later than three months after the effective date of this Order, unless such period is extended for good cause by the Board. This approval is subject further to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[6] effective July 24, 1973.

[SEAL] CHESTER B. FELDBERG, *Secretary of the Board.*

BROKER-DEALER MODEL COMPLIANCE PROGRAM ADVISORY COMMITTEE

Notice of Public Meetings

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92–463, 86 Stat. 770, the Securities and Exchange Commission, announces the following public advisory committee meetings.

The Commission's Advisory Committee on a Model Compliance Program for Broker-Dealers, established on October 25, 1972 (Securities Exchange Act Release No. 9835), will hold meetings on August 15–16, 1973 at the office of the National Association of Securities Dealers, Inc., 1735 K Street, NW., Washington, D.C. The meetings will commence at 9:00 a.m., local time.

This Advisory Committee was formed to assist the Commission in developing a model compliance program to serve as an industry guide for the broker-dealer community. Assisted by this Committee's work the Commission plans to publish a guide to broker-dealer compliance under the securities acts in order to advise broker-dealers of the standards to which they should adhere if investor confidence in the fairness of the market place is to be warranted and sustained. The Commission's recommendations are not intended to result in the expansion of Commission rules governing broker-dealers, but to inform broker-dealers as to the existing requirements and how they may comply with them.

The Committee's scheduled meetings will be for the purpose of reviewing drafts and proposals concerning the Committee's proposed report to the Commission on these compliance guidelines for broker-dealers.

These meetings are open to the public. Any interested person may attend and appear before or file statements with the Advisory Committee—which statements, if in written form, may be filed before or after the meeting or, if oral, at the time and in the manner and extent permitted by the Advisory Committee.

APPENDIX 2

CURRENT TEMPORARY INSTRUCTIONS CHECK LIST

1. The following list sets forth all current Temporary Instructions as of July 1, 1973. Those Temporary Instructions marked with an asterisk are multiple-numbered Temporary Instructions, issued in sufficient quantity so that a copy may be filed under each number.

Temporary Instructions Number	Date Issued or Amended	Termination Date
Appendix 1–5	(5–15–73)	Upon Depletion of SSS Form 110
601–1	(6–29–73)	Upon Completion of the required actions
608–2	(4–6–73)	When included in a Revision to Chapter 608, RPM
613–1	(12–4–72)	Upon Receipt of Revised Chapter 613, RMP
613–2	(12–19–72)	Upon Publication of Revisions to RPM changing References from SSS Form 2 and 110 to SSS Form 7
613–4	(2–27–73)	Upon Publication of Revised Chapter 613, RPM and Revised Procedural Directives for SSS Form 1, 3 and 101
621–3*	(6–15–73)	Until Amended or Rescinded
622–3	(6–29–73)	Upon Revision of Chapters 622 and 619
623–1	(6–15–73)	(8–1–73)
628–7	(12–29–72)	Upon Receipt of New Chapter 628
631–9*	(5–15–73)	Upon Receipt of Revised Chapters 631, 632 & 660, RPM
631–10*	(6–15–73)	Upon Amendment or Recission
631–11	(6–1–73)	(9–1–73)
631–12	(6–29–73)	(9–1–73)
632–15*	(5–15–73)	Upon Receipt of Revised Chapters 631, 632 & 660, RPM
642–1	(4–2–73)	Upon Receipt of Revised Chapter 642, RPM
660–10*	(5–15–73)	Upon Receipt of Revised Chapters 631, 632 & 660, RPM
670–4	(12–6–72)	When Procedural Directives have been Revised to Reflect instructions

2. All Temporary Instructions not appearing in the above list have been terminated or rescinded.

Amendments to Chapter 611—Duty and Responsibility to Register, effective August 1, 1973

SEC. 611.2 *Persons Not Required to be Registered.* Paragraphs 9 and 10 are revised to read as follows:

(9) Members of the reserve components of the Armed Forces, the Coast Guard, and the Public Health Service, while on active duty, provided that such active duty in the Public Health Service that commenced after June 30, 1967, is performed by members of the Reserve of the Public Health Service while assigned to staff any of the various offices and bureaus of the Public Health Service, including the National Institutes of Health, or while assigned to the Coast Guard, the Bureau of Prisons of the Department of Justice, the Environmental Protection Agency, or the National Oceanic and Atmospheric Administration.

(10) Any person who is separated from the Armed Forces after having served on active duty, other than active duty for training, or who has served as a commissioned officer in the National Oceanic and Atmospheric Administration of the Public Health Service for not less than 24 months.

SEC. 611.5 *Voluntary registration.*

Any male person who entered the Armed Forces before being required to be registered in accord with the provisions of paragraph 1 of section 611.1 and who is separated from active duty after having served on active duty, other than active duty for training, may present himself for and submit to registration.

SEC. 611.6 *Registration other than by appearance before a registrar.*

The Director may authorize the registration of persons without their appearing before the officials specified in section 611.1 and chapters 613 and 655.

CHAPTER 642

VIOLATORS

SEC. 642.1 *Violation of the military selective service act (MSSA).*

The Military Selective Service Act imposes the duty on all male citizens as well as certain non-citizen residents, who are between the ages of 18 and 26, to present themselves for registration with the Selective Service System. Requirements imposed under the MSSA upon selective service registrants include the duty to furnish necessary information to local boards, the duty to report for and submit to armed forces examinations, and the duty to report for and submit to induction or alternate service. All persons are prohibited from knowingly making or being a party to the making of false statements bearing upon classification or service under the MSSA, or transferring, delivering, preparing, or possessing false Selective Service Certificates. Further, all persons are prohibited from knowingly hindering or interfering with the administration of the Selective Service System, or conspiring to do so, or counseling or aiding others to violate the MSSA. A registrant or a non-registrant who fails to perform one or more of this duties under the MSSA or hinders or interferes with the administration of the MSSA is referred to as a *violator*. Conviction for any such violation is punishable by imprisonment for not more than five years or a fine of not more than $10,000 or by both such fine and imprisonment.

SEC. 642.2. *Reporting of violations by the local board and state director.*

1. *By the Local Board:*

a. Whenever a local board has reason to believe that a person has violated the Military Selective Service Act, the local board will, within 10 days after learning of the violation, prepare a Report of Violation (SSS Form 301). The report, to be signed by the Local Board Chairman, will be addressed to the appropriate United States Attorney and submitted along with the registrant's file folder to the Selective Service Regional Counsel for prosecutive review and disposition.

b. The original and three copies of SSS Form 301 shall be included in the Registrant File Folder or Cover Sheet (SSS Form 101) and forwarded to the Regional Counsel. An information copy of the SSS Form 301 shall also be sent to the State Director by the local board. The above actions shall be recorded on page two of the file folder or page eight of the Classification Questionnaire (SSS Form 100). When a file folder has not been established, all documentation concerning the alleged violation shall be forwarded with the SSS Form 301. A file folder shall not be prepared for a person who has not registered.

c. Whenever the local board has reason to believe that a registrant has violated the law, no modifications, alterations or corrections shall be made to any document or record in his file. If a document is missing from the folder or is improperly marked or stamped, a notation of this fact will be made and submitted at the time the file folder is forwarded to the Regional Counsel. It is then the responsibility of the Regional Counsel to consult with the United States Attorney and to determine with him whether prosecutive action should be dismissed in light of the deficiency.

d. Whenever a local board, except as stated in paragraphs a, b and c above, has reason to believe that any person or persons have hindered or interfered with the administration of the Military Selective Service Act or violated the rules or regulations pursuant to that Act, or have attempted to do so in any manner, the Chairman of the local board, one of the members, or a compensated employee, in the Chairman's absence, shall immediately advise the State Director of the circumstances by telephone or by letter. The State Director will cause an investigation to be conducted.

2. *By the State Director:*

a. Whenever the State Director has reason to believe that a violation of the Military Selective Service Act has been committed by a registrant, the State Director will immediately conduct an investigaiton of the circumstances involved in the suspected violation. In the case of a registrant classified in Class 1-O, 1-OM or 1-W, the investigation will be conducted in accordance with paragraph 2 of Section 660.11. Upon completion of his investigation, the State Director shall submit the following items to the Regional Counsel for prosecutive review and disposition:

(1) A report of his investigation.

(2) His recommendations as to the appropriate action to be taken,

(3) An SSS Form 301 addressed to the appropriate United States Attorney, and

(4) The registrant's file folder.

b. Whenever the State Director has reason to believe that any person or persons have hindered or interfered with administration of the Military Selective Service Act or violated the rules or regulations pursuant to that Act, or have attempted to do so in any manner, he shall immediately contact the appropriate Regional Counsel for guidance. A report of any investigation which is conducted into the matter shall be forwarded to the Regional Counsel for appropriate action. All actions of this nature must first be coordinated by the Regional Counsel with the General Counsel, National Headquarters, before a formal referral of such violation is made to the United States Attorney.

SEC. 642.3. *Action by the Regional Counsel.*

1. Upon receiving an SSS Form 301 and file folder, if established, the Regional Counsel will review the matter for procedural and substantive error. If the Regional Counsel determines that prosecutive action is warranted, he will:

a. Refer the violation to the appropriate United States Attorney with any comments and recommendations he feels necessary.

b. Notify the registrant by letter (see Attachment 642-2) that his case has been referred to the United States Attorney for prosecution.

c. Place a copy of the referral to the United States Attorney and a copy of the letter of notification to the registrant in the registrant's file, and,

d. Forward the file to the State Director for the State in which the Federal District having jurisdiction over the case is located. This State Director shall retain custody of the file until the final disposition of the case is reached.

e. The State Director in whose State the registrant's local board of record is located will be provided with a copy of the Regional Counsel's referral to the United States Attorney, a copy of the Regional Counsel's notification to the registrant, and the location of the file if the file is sent to another State Director for custody as provided in "d" above. The file of a violator whose prosecution is pending will not be returned to the local board.

2. If the Regional Counsel does not report the violation to the United States Attorney for prosecution, he will return the documentation to the State Director with a letter outlining the action to be taken. The State Director will return the file folder to the local board along with the Regional Counsel's letter. However, should the State Director take exception to the action to be taken which is outlined in the Regional Counsel's letter, and he is unable to reach agreement with the Regional Counsel after discussion of the matter, the State Director may refer the matter to National Headquarters, Attn: General Counsel, for final disposition.

SEC. 642.4 *Local board action subsequent to reporting a violation.*

1. The local board shall take no action with reference to the classification or status of a registrant who has been reported as a violator, or establish a new reporting date for induction or alternate service for such a registrant, without having first obtained the approval of the United States Attorney. The local board will request the State Director to obtain such approval through the Regional Counsel.

2. Whenever a local board receives new information concerning a violator after his case has been referred to the United States Attorney by the Regional Counsel, the local board shall submit the new information to the State Director. The State Director shall immediately notify the office of the Regional Counsel by telephone and shall send one copy of the new information to the Regional Counsel and one copy to the United States Attorney. The original of the new information shall be placed in the registrant's file. The new information may include but is not limited to matters:

a. Which have been requested by the United States Attorney.

b. Which may be of assistance in locating the violator or,

c. Which may assist a United States Attorney in his determination of whether the prosecution is warranted.

SEC. 642.5. *United States Attorney to advise of prosecutive disposition.*

When referring a violation for prosecution, the Regional Counsel shall request the United States Attorney to advise him promptly by letter of the United States Attorney's disposition of the reported case. Should the

Regional Counsel disagree with a United States Attorney's decision not to prosecute, he should advise the General Counsel, National Headquarters, but only after conferring with the United States Attorney in an effort to resolve the disagreement. In either event, the Regional Counsel shall notify the State Director by mail of the prosecutive disposition or status. The State Director shall place the document in the registrant's file. When the State Director having jurisdiction over the registrant's local board is informed by the Regional Counsel that an indictment or information has been filed against a registrant, the State Director shall advise the local board. The State Director having custody of the registrant's file shall retain it until advised of the disposition of the case by the Regional Counsel.

SEC. 642.6. *Criminal actions.*

1. A criminal action is a legal action initiated by the government against an individual for an alleged violation of the law.

2. Files of registrants who have been reported as violators will be duplicated only with the specific authorization of the Regional Counsel.

3. The Regional Counsel will make arrangements with the State Director's office having custody of the registrant's file to duplicate the entire file and transmit it to the requesting United States Attorney. Care should be taken to copy all information contained in the file, except that whenever the registrant's file contains voluminous supporting papers, the United States Attorney, in consultation with the State Director, shall determine which documents are to be duplicated.

4. If the United States Attorney requests a copy of the file for the registrant's attorney, or if an attorney submits a signed request from the registrant that the attorney be furnished a copy of his file, the State Director having custody of the registrant's file will have a copy prepared and furnished to the designated attorney in accordance with Section 608.3(a)(1) and 608.3(e) of the RPM.

5. The general policy of the Selective Service System is to retain custody of the original file and to furnish a duplicate to the United States Attorney. Where time is a factor and the Regional Counsel authorizes the release of an original file to the United States Attorney, the Regional Counsel will be responsible for maintaining a constant follow-up. At the earliest possible date, the original file will be retrieved by the Regional Counsel and forwarded to the proper State Director who will prepare a duplicate if requested, for the United States Attorney.

SEC. 642.7 *Civil actions.*

1. A civil action is a legal action initiated by an individual against the government in an attempt to restrain the government from infringing upon what the individual believes are to be his rights.

a. If a summons in a civil action is served on a local board member or employee, if the issuance of a temporary restraining order is imminent, or if a local board member or employee is requested in any manner to appear in court, the Regional Counsel and the State Director shall immediately be notified by telephone. A copy of the summons served and complaint filed, and the name and selective service number of the registrant involved will be promptly furnished to the Regional Counsel. The Regional Counsel shall be responsible for keeping the State Director advised of the developments in the case.

b. In the event of a civil action, the registrant will continue to be processed in the normal manner until the local board is officially notified either by the Court, or the Regional Counsel through the State Director, that the Court has taken action as indicated in paragraph 2 below.

c. A copy of the complaint shall be filed in the registrant's file folder.

2. *Injunctions or Temporary Restraining Orders Granted*

a. When an injunction or temporary restraining order is actually granted, the United States Attorney or the registrant's attorney will usually deliver a copy of the order to the local board. Upon receiving a copy of any court order the local board must immediately notify the State Director by telephone, and furnish one copy of the order to the State Director and one copy to the appropriate Regional Counsel. The State Director will immediately consult with the Regional Counsel for appropriate advice and/or action.

b. The State Director and the local board will take no action to cancel or postpone an induction order or order for alternate service, but will stop processing the registrant immediately. The appropriate entry on the Registration Questionnaire (SSS Form 100) or Registrant File Folder (SSS Form 101) will be: "Processing restrained by order of the court in Civil No. ——, until (date)". If a delivery list containing the registrant's name has been prepared, a similar entry will be made on the list. Further processing of the case will then be held in abeyance until the expiration date of the court order. The local board may then set a new induction reporting date by issuance of a Notice of Rescheduled Reporting Date (SSS Form 253), or alternate service reporting date by Amendment to Order to Report for Alternate Service (SSS Form 153A), or resume processing of the registrant in the normal manner, after coordinating with the Regional Counsel through the State Director. In no event will a new Order to Report for Induction (SSS Form 252) or Order to Report for Alternate Service (SSS Form 153) be issued, except as directed by a court.

c. If a registrant's scheduled induction date comes during the period when the local board is under a court-ordered restraint, the registrant will not be reported as a violator, but actions will be taken in accordance with paragraph 2b of this section. If, after the expiration date of the court order, the local board sets a new date to report under the original order, and the registrant fails to report on the new date, he should then be reported as a violator in accordance with Section 642.2.

3. *Injunctions or Temporary Restraining Orders Denied.*

When a registrant's request for an injunction or restraining order is denied, he may appeal to a higher court. This action does not require an interruption of the normal local board processing of the registrant, unless a "stay order" is granted by the court. Such a "stay order" has the same effect as granting an injunction, and when advised of such an order, the local board will immediately advise the Regional Counsel and the State Director by telephone in accordance with Section 642.8, stop all processing and make the appropriate entries on the SSS Form 100 or on SSS Form 101, and on the Delivery List (See Section 642.8). The local board should arrange for a copy of either the denial order or the "stay order", if one is granted, to be placed in the registrant's file. One copy shall be forwarded to the State Director, and one copy to the appropriate Regional Counsel.

SEC. 642.8 *Subpenas served on local board or appeal board employees or members.*

A local board member or employee who is served with a subpena should immediately advise the Regional Counsel and the State Director by telephone. The Regional Counsel will be the sole point of contact with the United States Attorney and will advise the local board and the State Director what action is required.

SEC. 642.9 *Failure to register and late registration.*

1. A person subject to the provisions of the Military Selective Service Act is required to register within a period of 60 days beginning 30 days prior to the eighteenth anniversary of the date of his birth. An alien who, upon entering the United States, incurs the obligation to register, must register within six months of his date of entry. Any person who did not register during the prescribed period but who was required to be registered, is in violation of the Act and his subsequent compliance with the law does not absolve the initial violation. If a local board learns of any person who did not register during the prescribed period, and who does not register after an attempt is made by the local board to obtain compliance, the local board shall report him on SSS Form 301.

2. When a late registration occurs, the registrar shall prepare, date and sign a statement on a Report of Information (SSS Form 119), or a letter, setting forth the demeanor, attitude, and any statements of the registrant, or any other matter coming to the attention of the registrar regarding the reason for the late registration. The registrar's statement shall be typed in paragraph 5 of SSS Form 301 if a report of the violation is made.

3. Whenever the local board or the State Director learns that a person has failed to comply with the registration requirements, an effort shall be made to obtain compliance. If compliance is obtained, a finding and determination as to the circumstances of each late registration which takes place later than 60 days after the eighteenth anniversary of the registrant's date of birth or later than seven months from the date on which be entered the United States in the case of an alien who enters after attaining the age of 18, will be made by the local board, in a meeting with a quorm present. The determination will be that:

(1) There was deliberate intent not to register timely; or

(2) There was no deliberate intent not to register timely; or

(3) The registrant was unable to register on time due to circumstances beyond his control: for example, the registrant was hospitalized or institutionalized.

4. Although a registrant may be asked by mail (See Attachment 642-4) or in person why he was late in compliance, under no circumstances shall the registrant be *required* to make a statement, if he objects, concerning reasons for his failure to register in a timely manner.

5. A report of each of these three types of late registrations for the previous month will be transmitted by the local board to reach the State Headquarters by the 15th of the month. The State Headquarters will forward the reports of all its local boards so as to reach National Headquarters, Attention: General Counsel, not later than the last day of the month. See Attachment 642-5 for the format to be used for the monthly report. The report will be prepared in an original and two copies. The local board will retain a copy and send the original and one copy to the State Director. The State Director will retain the copy and send the originals of all local board reports to the General Counsel at one time. The General Counsel will advise the State Director of the actions to be taken in those cases where it is determined that a registrant is to be processed as a violator.

6. The State Director bears the responsibility for advising Local Board Chairmen if the local board is in doubt as to what determination to make in a late registration

Dear ----------

Selective Service records indicate that your registration under the Selective Service law took place after the designated period had elapsed. It therefore appears that you may be in violation of the law.

You are entitled to present any information to your local board which will explain the reason for your late registration, but you are not required to do so. If you wish to, you may write the information below, and return this letter to your Local Board in the enclosed pre-addressed envelope. Any information you furnish will be considered by the local board in determining whether you should be reported as a violator and will become part of your confidential Selective Service file.

The following listed **late registrants are** reported in accordance with **Section 642.9** of the RPM. Alien registrants to whom the seven-month provision applies are indicated by an asterisk preceding **their name.**

Name	SSN	Date of Birth	Date of Registration	Determination of Local Board (Code 1, 2 or 3)**

1. Deliberate intent not to register in a timely fashion.
2. No deliberate intent not to register in a timely fashion.
3. Circumstances beyond control of the registrant.

Chairman of Local Board

TEMPORARY INSTRUCTION NO. 622-3
ISSUED: June 29, 1973
SUBJECT: Medical Specialty Students
(References: Section 1604.1(b), 1622.18 (a), SSR)

1. Effective immediately, any student pursuing a full-time course of study leading to a professional degree as a doctor of medicine, doctor of osteopathy, dentist, optometrist, podiatrist, or veterinarian, or licensure as a registered nurse, is specifically ineligible for Class 1-H by board action.

2. Any medical specialty student who is now in Class 1-H will have his classification reopened and be considered for Class 2-M.

3. Section 619.3 of the **Registrants Processing Manual** provides for the retention of files of students undergoing professional training for qualification as medical specialists, who have liability extended to age 35. If evidence is received that a student whose file is being retained beyond age 26 has terminated such course of study, other than by graduation, his file will be certified for destruction at that time.

This Temporary Instruction will terminate upon the revision of Chapters 622 and 619.

case, and seeks the State Director's advice before arriving at a judgment. In those doubtful cases, the file folders of the late registrants will be forwarded to the State Director as an exception to Section 642.2 for an expression by the State Director to the Local Board Chairman.

SEC. 642.10 *Fictitious registration.*

Whenever the local board has its mailings returned because of an apparently fictitious name or address, or whenever it has any other reason to believe that a registrant is fictitious, it shall, after reasonable efforts to determine the facts, report the responsible person as a violator in accordance with Section 642.2.

SEC. 642.11 *Abandoned, mutilated, altered, forged or counterfeit registration or classification documents.*

Whenever the local board gains possession of an abandoned or mutilated SSS Form 2, 7, or 110 which appears to have been caused by a deliberate act, or has knowledge of wrongful possession, altering, forging, or counterfeiting of such documents, it shall report the incident as a violation in accordance with Section 642.2.

SEC. 642.12 *Notification to a registrant who is no longer alleged to be a violator.*

A registrant who has been advised by the Regional Counsel that his case was referred to the United States Attorney for prosecution in accordance with Section 642.3, and whose case is finally disposed of without his being convicted, shall be notified of the disposition by letter from the local board upon the return of the report for this purpose is Attachment 642.3 of this chapter. Before notifying the registrant, the local board will file that:

(1) That the file contains a copy of the letter from the Regional Counsel to the State Director informing the latter as to the disposition of the case.

If both (1) and (2) above are not contained in the file, the local board shall immediately request them from the State Director and the registrant will not be notified by letter of the disposition of his case until both are in hand. Registrants who were not prosecuted shall be advised of the disposition of their case.

TEMPORARY INSTRUCTION APPENDIX 1–6

ISSUED: July 23, 1973

SUBJECT: Inductions and Medical Determinations (SSS Form 205); Report of Manpower Inventory (SSS Form 116) (JUL 73)

1. *SSS FORM 205:*

The requirement for the preparation and submission of the monthly report, Inductions and Medical Determinations (SSS Form 205), is suspended, until further notice, following submission of the report for the month of June 1973. Local boards will retain the procedural directive and facsimile dated July 1972 in Appendix 1 of the Registrants Processing Manual. Existing stocks of the form will be retained.

2. *SSS FORM 116:*

A supply of the new Report of Manpower Inventory (SSS Form 116) (JUL 73), will reach the field by early August, and is to be used beginning with the July 1973 report which will be submitted promptly upon receipt of the forms. The state consolidated reports are to reach National Headquarters by August 31, 1973.

This Temporary Instruction will remain in effect until amended or rescinded.

BYRON V. PEPITONE,
Director.

JULY 26, 1973.

TARIFF COMMISSION

[AA1921-128]

PAPERMAKING MACHINERY AND PARTS THEREOF FROM SWEDEN

Notice of Investigation and Hearing

Having received advice from the Treasury Department on July 24, 1973, that papermaking machinery and parts thereof from Sweden are being, or are likely to be, sold at less than fair value, the United States Tariff Commission on July 27, 1973, instituted investigation No. AA1921-128 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigation will be held in the Tariff Commission's Hearing Room, Tariff Commission Building, 8th and E Streets, NW, Washington, D.C. 20436, beginning at 10 a.m., e.d.t., on Tuesday, September 18, 1973. All parties will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing should be received by the Secretary of the Tariff Commission, in writing, at its office in Washington, D.C., not later than noon, Thursday, September 13, 1973.

Issued: July 30, 1973.

By order of the Commission.

[SEAL] KENNETH R. MASON,
Secretary.

[FR Doc.73-15979 Filed 8-2-73;8:45 am]

[337-L-62]

CERTAIN HYDRAULIC TAPPETS

Extension of Time for Filing Written Views

On June 19, 1973, the United States Tariff Commission published notice of the receipt of a complaint under section 337 of the Tariff Act of 1930, filed by Johnson Products, Inc., of Muskegon, Michigan, alleging unfair methods of competition and unfair acts in the importation and sale of certain hydraulic tappets (38 FR 16002). Interested parties were given until July 27, 1973, to file written views pertinent to the subject matter of a preliminary inquiry into the allegations of the complaint. The Commission has extended the time for filing written views until the close of business on September 27, 1973.

Issued: July 30, 1973.

By order of the Commission:

[SEAL] KENNETH R. MASON,
Secretary.

[FR Doc.73-15980 Filed 8-2-73;8:45 am]

[TEA-F-54]

STANDARD CELLULOSE AND NOVELTY CO., INC.

Notice of Investigation Regarding Petition for Determination

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962 on behalf of Standard Cellulose and Novelty Co., Inc., Ozone Park, New York, the United States Tariff Commission, on July 27, 1973, instituted an investigation under section 301(c)(1) of the said Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with artificial plastic Christmas trees, garlands and wreaths (of the types provided for in item 772.97 of the Tariff Schedules of the United States) produced by the aforementioned firm, are being imported into the United States in such increased quantities as to cause, or threaten to cause, serious injury to such firm.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed by August 13, 1973.

The petition filed in this case is available for inspection at the Office of the Secretary, United States Tariff Commission, 8th and E Streets, NW, Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: July 30, 1973.

By order of the Commission.

[SEAL] KENNETH R. MASON,
Secretary.

VETERANS ADMINISTRATION

702-BED REPLACEMENT HOSPITAL, BRONX, NEW YORK

Notice of Availability of Draft Environmental Impact Statement

Notice is hereby given that a document entitled "Draft Environmental Statement for a 702-Bed Replacement Hospital, Bronx, New York," dated June 8, 1973, has been prepared as required by the National Environmental Policy Act of 1969. This project will provide for the replacement of an 1150-bed medical facility with a new 702-bed hospital. Three existing buildings will be retained and the rest demolished after construction of the new building. The new hospital will be contained within the existing 29.8 acre site located at 130 West Kingsbridge Road. The draft statement discusses the environmental impact of the project. The document is being placed for public examination in the Veterans Administration office in Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office:

Mr. Arthur W. Farmer, Assistant Chief Medical Director for Administration and Facilities (13), Room 600, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420.

Single copies of the draft statement may be obtained on request to the above office.

Dated: July 30, 1973.

By direction of the Administrator,

[SEAL] FRED B. RHODES,
Deputy Administrator.

DEPARTMENT OF LABOR

Wage and Hour Division

CERTIFICATES AUTHORIZING THE EMPLOYMENT OF FULL-TIME STUDENTS WORKING OUTSIDE OF SCHOOL HOURS AT SPECIAL MINIMUM WAGES IN RETAIL OR SERVICE ESTABLISHMENTS OR IN AGRICULTURE

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended, 29 U.S.C. 201 et seq.), the regulation on employment of full-time students (29 CFR, Part 519), and Administrative Order No. 621 (36 FR 12819), the establishments listed in this notice have been issued special certificates authorizing the employment of full-time students working outside of school hours at hourly rates lower than the minimum wage rates otherwise applicable under section 6 of the Act. While effective and expiration dates are shown for those certificates issued for less than a year, only the expiration dates are shown for certificates issued for a year. The minimum certificate rates are not less than 85 percent of the applicable statutory minimum.

The following certificates were issued to variety-departments stores and provide for an allowance not to exceed the

V 38 149 AUG 3 73 XUM

proportion of the total hours worked by full-time students at rates below $1 an hour to the total number of hours worked by all employees in the establishment during the base period in occupations of the same general classes in which the establishment employed full-time students at wages below $1 an hour in the base year; or provide the same standards authorized in certificates previously issued to the establishment.

Raylass Department Store, 5–30–74: 406 Elm Street, Lumberton, NC; 607 Market Street, Chattanooga, TN.

Royal's, Inc., Immokalee, FL; 5–21–73 to 5–8–74.

Spurgeon's: 218 North Tremont, Kewanee, IL, 6–4–74; 116 West Main Street, Washington, IA, 6–2–74.

Sterling Stores Co., University and Markham Streets, Little Rock, AR; 6–1–74.

Tomlinson Stores, Inc.: 146 East Carolina Avenue, Hartsville, SC, 5–31–74; 107 West Main Street, Kingstree, SC, 6–14–74; 326 North Main Street, Marion, SC, 6–14–74.

T. G. & Y. Stores Co., 5–31–74, except as otherwise indicated: No. 191, Flagstaff, AZ; No. 190, Scottsdale, AZ; No. 581, Chino, CA; No. 658, Simi Valley, CA; No. 500, Yucaipa, CA; No. 736, Kissimmee, FL (6–14–74); No. 713, Pine Castle, FL (6–14–74);

No. 305, Kansas City, KS (6–11–74); No. 96, Topeka, KS (5–27–74); No. 476, Independence, MO; No. 129, Kansas City, MO (6–5–74); No. 477, Sikeston, MO (6–18–74); No. 415, Oklahoma City, OK (5–29–74); No. 417, Oklahoma City, OK (6–14–74); No. 449, Oklahoma City, OK (6–11–74); No. 310, Bellaire, TX (6–14–74)

Wood's 5 & 10c Stores, Inc., Lewis Smith Shopping Center, Whiteville, NC; 5–29–73 to 5–27–74.

The following certificates issued to establishments permitted to rely on the base-year employment experience of others were either the first full-time student certificates issued to the establishment, or provide standards different from those previously authorized. The certificates permit the employment of full-time students at rates of not less than 85 percent of the applicable statutory minimum in the classes of occupations listed, and provide for the indicated monthly limitations on the percentage of full-time student hours of employment at rates below the applicable statutory minimum to total hours of employment of all employees.

G. A. S., Inc., variety-department store; 112 Peoria Street, Washington, IL; salesclerk, stock clerk, cashier clerk; 24 to 43 percent; 5–28–74.

M. E. Moses Co., variety-department stores, for the occupations of salesclerk, checker-cashier, stock clerk, 22 to 30 percent: No. 28, Dallas, TX, 5–22–74; No. 39, Dallas, TX, 5–23–74.

Sterling Jewelry & Distributing Co., variety-department stores, for the occupations of stock clerk, sacker, salesclerk, runner, 7 to 27 percent, 6–11–74: 106 Mercantile Continental Building, Dallas, TX; 802 Milam Street, Houston, TX.

T. G. & Y. Stores Co., variety-department store; No. 1101, Baxley, GA; salesclerk, stock clerk; 19 to 30 percent; 5–13–74.

Each certificate has been issued upon the representations of the employer which, among other things, were that employment of full-time students at special minimum rates is necessary to prevent curtailment of opportunities for employment, and the hiring of full-time students at special minimum rates will not create a substantial probability of reducing the full-time employment opportunities of persons other than those employed under a certificate. The certificate may be annulled or withdrawn, as indicated therein, in the manner provided in Part 528 of Title 29 of the Code of Federal Regulations. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof on or before September 4, 1973.

Signed at Washington, D.C. this 26th day of July 1973.

DONALD T. CRUMBACK,
Authorized Representative of the Administrator.

INTERSTATE COMMERCE COMMISSION

[Notice No. 311]

ASSIGNMENT OF HEARINGS

JULY 31, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 121499 Sub 6, William Hayes Lines, Inc., now assigned September 17, 1973, (1 week), will be held in Room 310, Peachtree 7th Building, 50 7th Street, Atlanta, Georgia.

MC 121600 Sub 1, Averitt Express, Inc., now assigned September 10, 1973, at Nashville, Tenn., is cancelled and the application is dismissed.

MC 115841 Sub 438, Colonial Refrigerated Transportation, Inc., now being assigned continued hearing October 9, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 138213, Redl Lease Co., now assigned September 10, 1973, at St. Louis, Mo., will be held at the Sheraton-Jefferson Hotel, 415 North 12th Street.

FD 27436, National Railroad Passenger Corporation (Amtrak)—Discontinuance of Trains Nos. 30 & 31, 530 & 531—Between New York, New York/Washington, D.C., and Kansas City, Missouri (National Limited), now being assigned hearings September 4, 1973 (3 days), at Indianapolis, Ind., September 7, 1973 (1 day) at Effingham, Ill., September 10, 1973 (1 day), at St. Louis, Mo., September 11, 1973 (1 day), at Jefferson City, Mo., September 12, 1973 (1 day), at Kansas City, Mo., September 14, 1973 (1 day), at Columbus, Ohio, September 17, 1973 (1 day), at Pittsburgh, Pa., September 18, 1973 (1 day), at Huntingdon, Pa., September 19, 1973, (1 day), at Harrisburg, Pa., September 20, 1973 (1 day), at Philadelphia, Pa., September 21, 1973 (1 day), at New York, N.Y., and September 24, 1973 (1 day), at Washington, D.C., in hearing rooms to be later designated.

MC 107515 Sub 820, Refrigerated Transport Co., Inc., now assigned September 12, 1973, at St. Louis, Mo., will be held at the Sheraton-Jefferson Hotel, 415 North 12th Street.

MC 127042 Sub 102, Hagen, Inc., now assigned September 17, 1973, at St. Louis, Mo., will be held at the Sheraton-Jefferson Hotel, 415 North 12th Street.

FD 27437, National Railroad Passenger Corporation (Amtrak)—Discontinuance of Trains Nos. 52 & 53 Between Chicago and St. Petersburg/Miami, Florida (The Floridian), now being assigned September 4, 1973 (3 days), at Chicago, Ill., September 7, 1973 (1 day), at Indianapolis, Ind., September 10, 1973, (1 day), at Louisville, Ky., September 11, 1973 (1 day), at Nashville, Tenn., September 13, 1973 (1 day), at Birmingham, Ala., September 14, 1973 (1 day), at Montgomery, Ala., September 17, 1973 (1 day), at Thomasville, Ga., September 18, 1973, (1 day), at Waycross, Ga., September 19, 1973, (1 day), at Jacksonville, Fla., in hearing rooms to be later designated.

MC 87720 Sub 131, Bass Transportation Co., Inc., now assigned September 19, 1973, at St. Louis, Mo., will be held at the Sheraton-Jefferson Hotel, 415 North 12th Street.

MC 127669 Sub 5, Cherry Hill Transit, now being assigned hearing September 24, 1973 (1 week), at Trenton, N.J., in a hearing room to be later designated.

MC 72442 Sub 39, Akers Motor Lines, Inc., now being assigned hearing September 24, 1973, (1 week), at Harrisburg, Pa., in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD,
Secretary.

FOURTH SECTION APPLICATION FOR RELIEF

JULY 31, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before August 20, 1973.

FSA No. 42722—*Oats and Screenings from and to Points in Southwestern and Southern Territories.* Filed by Southwestern Freight Bureau, Agent, (No. B–424), for interested rail carriers. Rates on oats and screenings, in carloads, as described in the application, from various points in southwestern and western trunk-line territories, to points in southwestern and western trunk-line territories; also Natchez, Miss., and Memphis, Tenn.

Grounds for relief—Motor-truck competition and rate relationship.

Tariffs—Supplement 121 to Southwestern Freight Bureau, Agent, tariff 180–L, I.C.C. No. 4901, and 8 other schedules named in the application. Rates are published to become effective on September 3, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

INVESTIGATION OF RAILROAD FREIGHT RATE STRUCTURE, FREIGHT SERVICE; NET INVESTMENT—RAILROAD RATE BASE AND RATE OF RETURN

Notice of Solicitation of Comments

The Interstate Commerce Commission hereby notifies all interested carriers, shippers, and other persons that its Special Projects Counsel, now under contract to this Commission, has by a Circular Letter of July 27, 1973, invited their views and comments on a list of "Proposed Commodity Groups." The 110 groups were selected by counsel for further study and investigation. Counsel particularly solicited comments by August 15, 1973, with respect to the following aspects of the proposed groups of commodities:

(1) Has any significant commodity group been omitted? If so, advise us of the composition of any additional suggested group and your reasons for its inclusion.

(2) Should any commodity group either be omitted as a separate group or combined with another group?

(3) As to any specific commodity group, does the listing of the STCC code numbers reflect a reasonable grouping of individual articles for the purposes of this study? If not, please recommend specific additions or deletions of code numbers.

Requests for copies of the list and inquiries pertaining to the groups should be addressed to:

Leonard S. Goodman
Special Projects Counsel to the Interstate Commerce Commission
Suite 200
1030—15th Street, N.W.
Washington, D.C. 20005

[Notice No. 327]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before August 23, 1973. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–74576. By order of July 24, 1973 the Motor Carrier Board approved the transfer to Shirar Feed Co., Flora, Ind., of Permits Nos. MC–88182 and MC–88182 (Sub-No. 1) issued May 12, 1943, and November 5, 1964, respectively, to Ora F. Shirar, Flora, Ind., authorizing the transportation, as a contract carrier, of: Fertilizer, from Chicago, Ill., to points in Indiana, and return; animal and poultry feed from Burlington, Wis., to points in Indiana, and return; poultry, eggs, livestock, grain, and agricultural commodities, from Indiana points to Chicago, Ill., and return; animal and poultry feed, from Burlington, Wis., to points in Illinois, Indiana (except White and Carroll Counties), and Ohio; burlap and cotton bags, insecticides, and poultry and livestock remedies, from Burlington, Wis., to points in Illinois, Indian, Ohio and the lower peninsula of Michigan; and commodities used in the manufacture of animal and poultry feed, insecticides, and poultry and livestock remedies, from points in Illinois, Indiana, and Ohio to Burlington, Wis. Mr. Robert W. Loser, attorney at law, 1009 Chamber of Commerce Building, Indianapolis, Indiana 46204.

No. MC–FC–74602. By order of July 26, 1973 the Motor Carrier Board approved the transfer to Roderick G. Dahlhammer, York, Pa., of Certificate of Registration No. MC–121327 (Sub-No. 1) issued March 10, 1965, to Robert J. Krouse, Delta, Pa., evidencing a right to engage in transportation in interstate commerce as described in certificate No. 76066, dated December 18, 1950, issued by the Public Utility Commission of Pennsylvania. Fred E. Kilgore, 139 East Market Street, York, Pa. 17401, attorney for applicants.

No. MC–FC–74607. By order of July 24, 1973 the Motor Carrier Board approved the transfer to Richard M. Baar, D/B/A Dick Baar Trucking, Dickinson, N. Dak. 58601 of Permit No. MC–129332 issued October 16, 1968, to Rachel Fridley, D/B/A Fridley Trucking, Dickinson, N. Dak. 58601, authorizing the transportation of malt beverages, orange juice, distilled water, sweeping compound, glassware, and advertising material, used in restaurants and bars, from Minneapolis-St. Paul and Shakopee, Minn., and Milwaukee, Sheboygan, and LaCrosse, Wis., to Dickinson, N. Dak., for the account of Johnston, Inc., of Dickinson, N. Dak.

[Notice No. 103]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JULY 30, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that

V 38-149
AUG 3 73
XUM

there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67, (49 CFR Part 1131) published in the Federal Register, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D. C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 64932 (Sub-No. 516 TA) (CORRECTION) filed July 5, 1973, published in the FEDERAL REGISTER issue of July 24, 1973, and republished as corrected this issue. Applicant: ROGERS CARTAGE CO. 10735 S. Cicero Avenue Oak Lawn, Ill. 60453 Applicant's representative: Carl L. Steiner 39 South LaSalle Street Chicago, Ill. 60603 Note: The purpose of this partial republication is to show that applicant correct name is ROGERS CARTAGE CO., in lieu of RELIANCE AGE CO., which was published in error in the Federal Register. The rest of the application remains the same.

No. MC 108207 (Sub-No. 370 TA) (CORRECTION) filed June 31, 1973, published in the FEDERAL REGISTER issue of July 26, 1973, and republished as corrected this issue. Applicant: FROZEN FOOD EXPRESS 318 Cadiz St. P.O. Box 5888 Dallas, Tex. 75222 Applicant's representative: J. B. Ham (Same address as above) Note: The purpose of this partial republication is to correct the MC number to No. MC 108207 (Sub-No. 370 TA) in lieu of No. MC 10827 (Sub-No. 370 TA) which was published in the Federal Register in error. The rest of the application remains the same.

No. MC 136343 (Sub-No. 15 TA) (CORRECTION) filed June 7, 1973, published in the FEDERAL REGISTER issue of July 12, 1973, as No. MC 134776 (Sub-No. 22 TA) and republished as corrected this issue. Applicant: MILTON TRANSPORTATION, INC. RD 1, P.O. Box 207 Milton, Pa. 17847 Applicant's representative: George A. Olsen 69 Tonnele Avenue Jersey City, N.J. 07306 Note: The purpose of this republication is to show that applicant now seeks to operate as a *common carrier*, in lieu of a contract carrier, which was published in error. Also applicant is now asigned No. MC 136343 (Sub-No. 15 TA) in lieu of No. MC 134766 (Sub-No. 22 TA) which was published in error. The rest of the application remains the same.

COST OF LIVING COUNCIL

[Cost of Living Council Order No. 33]

DIRECTOR, NATIONAL ENERGY OFFICE

Delegation of Authority

Pursuant to the authority vested in me by Executive Order No. 11695, it is hereby ordered as follows:

1. The authority with respect to petroleum products under section 203(a)(3) of the Economic Stabilization Act of 1970, as added by section 2(b) of the Economic Stabilization Act Amendments of 1973 is delegated to the Director of the National Energy Office established by Executive Order 11712, including, without limitation, the power and duty to make the determinations and take the actions required or permitted by the Act and the power to redelegate any of the authority thereunder.

2. Nothing herein shall be deemed to delegate any authority with respect to the stabilization of prices under section 203(a)(1) of the Act.

3. Cost of Living Council Order No. 27 is hereby rescinded.

4. This Order shall be effective immediately.

Dated: July 30, 1973.

GEORGE P. SHULTZ,
Chairman, Cost of Living Council.

CAPITAL EXPENDITURES

Proposed Limitation on Federal Participation

V 38-149 AUG 3 73 XUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

[42 CFR Parts 51, 81]

CAPITAL EXPENDITURES

Proposed Limitation on Federal Participation

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue a new Part 81 of Title 42, Code of Federal Regulations, entitled "Limitation on Federal Participation for Capital Expenditures", and to amend Part 51, Subpart A, of Title 42, Code of Federal Regulations, entitled "Grants to States for Comprehensive Health Planning".

The purpose of the proposed Part 81 is to implement the provisions of section 1122 of the Social Security Act, as added by section 221(a) of the Social Security Amendments of 1972 (86 Stat. 1386–89; 42 U.S.C. 1320a–1). The purpose of section 1122 is to assure that Federal funds appropriated under titles V, XVIII, and XIX of the Social Security Act are not used to support unnecessary capital expenditures made by or on behalf of health care facilities of health maintenance organizations which are reimbursed under any of such titles. Under section 1122, the Secretary of Health, Education, and Welfare is directed to make an agreement with any State which is able and willing to do so under which a designated planning agency will submit to the Secretary findings and recommendations relating to whether capital expenditures proposed by or on behalf of health care facilities and health maintenance organizations in the State are consistent with the standards, criteria, or plans developed pursuant to the Public Health Service Act or the Mental Retardation Facilities and Community Mental Health Centers Act of 1963. Where the designated planning agency finds that a proposed capital expenditure is not in conformity with such standards, criteria, or plans, or where timely notice of such an expenditure has not been provided to such agency, the Secretary is required, subject to certain exceptions set forth in the statute, to exclude from the Federal payments made under titles, V, XVIII, and XIX to the facility or organization expenses related to such capital expenditure.

The proposed new Part 81 sets forth requirements governing the agreements to be entered into pursuant to section 1122, including those relating to the agency to be named as the designated planning agency, criteria and procedures for review of proposed capital expenditures by the designated agency and other appropriate agencies in the State, and submission of findings and recommendations to the Secretary; and procedures for review of such findings and recommendations by the Secretary. Regulations relating to payment by the Secretary to States for the reasonable cost of performing the review functions (pursuant to section 1122(c)) and to the computation by the Secretary of the amounts to be excluded from reimbursement under titles V, XVIII, and XIX, are in preparation and will be published separately.

The proposed amendment to Subpart A of Part 51 would require that State plans for comprehensive health planning make provision for assisting health care facilities and health maintenance organizations to develop programs for capital expenditures in accordance with criteria to be established by the Secretary after consultation with the States, and sets forth criteria to be considered for such purpose.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed new 42 CFR Part 81 and the proposed amendment to Part 51, Subpart A, to the Comprehensive Health Planning Service, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20852, on or before September 4, 1973. Comments will be available for public inspection at Room 7–43, Parklawn Building, between the hours of 8:30 a.m. and 5 p.m., Monday through Friday.

It is therefore proposed to issue a new Part 81 of Title 42, and to amend Part 51, Subpart A, of Title 42, as set forth below.

Dated: July 18, 1973.

CHARLES C. EDWARDS,
Assistant Secretary for Health.

Approved: July 23, 1973.

FRANK CARLUCCI,
Acting Secretary.

PART 81—LIMITATION ON FEDERAL PARTICIPATION FOR CAPITAL EXPENDITURES

1. Title 42, CFR, is amended by the addition of a new Part 81, to read as follows:

Sec.
81.101 Applicability.
81.102 Definition.
81.103 Expenditures covered.
81.104 Agreement; general.
81.105 Agreement; designated agency.
81.106 Agreement; procedures for agency review.
81.107 Agreement; criteria for agency review.
81.108 Determination by the Secretary.
81.109 Continuing effect of determinations.

AUTHORITY: Sec. 1122, Social Security Act; 42 U.S.C. 1320a–1.

§ 81.101 Applicability.

The provisions of this part are applicable to agreements entered into by the Secretary with the various States pursuant to section 1122 of the Social Security Act (42 U.S.C. Chap. 7), and to determinations made by the Secretary thereunder, for the purpose of assuring that Federal funds appropriated under titles V, XVIII, and XIX of the Social Security Act are not used to support unnecessary capital expenditures made by or on behalf of health care facilities or health maintenance organizations which are reimbursed under any of such titles and that, to the extent possible, reimbursement under such titles shall support planning activities with respect to health services and facilities in the various States.

§ 81.102 Definitions.

(a) "Act" means the Social Security Act, as amended (42 U.S.C. Chap. 7).

(b) "State" means any of the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(c) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved may be delegated.

(d) "Person" means an individual, a trust or estate, a partnership, or a corporation (including associations, joint-stock companies, and insurance companies).

(e) "Health care facility" includes hospitals, psychiatric hospitals, tuberculosis hospitals, skilled nursing facilities, home health agencies, and providers of outpatient physical therapy services (including speech pathology services) as defined in section 1861(e), (f), (g), (j), (o), and (p), respectively, of the Act (except that such term shall not apply with respect to outpatient physical therapy services performed by a physical therapist in his office or in a patient's home); kidney disease treatment centers, including freestanding hemodialysis units; intermediate care facilities as defined in section 1905(c) of the Act; and organized ambulatory health care facilities such as health centers, family planning clinics, and facilities providing surgical treatment to patients not requiring hospitalization (surgicenters), which are not part of a hospital but which are organized and operated to provide medical care to outpatients.

(f) "Health maintenance organization" means a public or private organization, organized under the laws of any State, which

(1) Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services: Usual physician services, hospitalization, laboratory, x-ray, emergency and preventive services, and out-of-area coverage;

(2) Is compensated (except for copayments) for the provision of the basic health care services listed in subparagraph (1) of this paragraph to enrolled participants solely on a predetermined periodic rate basis; and

(3) Provides physicians' services primarily (i) directly through physicians who are either employees or partners of such organization, or (ii) through arrangements with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis).

§ 81.103 Expenditures covered.

Any capital expenditure proposed by or on behalf of any health care facility or health maintenance organization, the obligation for which is incurred by or on behalf of a health care facility or health maintenance organization after December 31, 1972, is subject to this part: *Provided, that,* In the case of a health care facility providing health care services as of December 18, 1970, which on such date is committed to a formal plan of expansion or replacement, this part shall not apply with respect to such expenditures as may be made or such obligations as may be incurred for capital items included in such plan where preliminary expenditures toward the plan of expansion or replacement (including payments for studies, surveys, designs, plans, working drawings, specifications, and site acquisition, essential to the acquisition, improvement, expansion, or replacement of the health care facility or equipment concerned) of $100,000 or more, had been made during the three-year period ended December 17, 1970.

(a)(1) For purposes of this part, a "capital expenditure" is an expenditure, including a force account expenditure (i.e., an expenditure for an internal work force employed by the facility), which, under generally accepted accounting principles, is not properly chargeable as an expense of operation and maintenance and which (i) exceeds $100,000, or (ii) changes the bed capacity of the facility with respect to which such expenditure is made, or (iii) substantially changes the services of the facility with respect to which such expenditure is made.

(2)(i) For purposes of paragraph (a)(1)(i) of this section, the cost of studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the plant and equipment with respect to which such expenditure is made shall be included in determining whether such expenditure exceeds $100,000.

(ii) For purposes of paragraph (a)(1)(i) of this section, where the estimated cost of a proposed project, including cost escalation factors appropriate to the area in which the project is located, is, within 60 days of the date on which the obligation for such expenditure is incurred, certified by a licensed architect or engineer to be less than $100,000, such expenditure shall be deemed not to exceed $100,000 regardless of the actual cost of such project: *Provided, that,* In any such case where the actual cost of the project exceeds $100,000, the health care facility or health maintenance organization on whose behalf such expenditure is made shall provide written notification of such cost to the designated planning agency not more than 30 days after the date on which such expenditure is incurred. Such notification shall include a copy of the certified estimate.

(iii) For purposes of paragraph (a)(1)(ii) of this section, the term "bed capacity" means licensed capacity under applicable State or local law, or, if there is no such law, the number of beds in a given facility as of January 1, 1973, as determined by the designated planning agency.

(iv) For purposes of paragraph (a)(1)(iii) of this section, a capital expenditure which "substantially changes the services" of a facility means a capital expenditure which results in the addition of a clinically related (i.e., diagnostic, curative, or rehabilitative) service not previously provided in the facility or the termination of such a service which had previously been provided in the facility.

(v) Any change in a proposed capital expenditure which itself meets the criteria set forth in this paragraph, shall, for purposes of this part, be deemed a capital expenditure.

(b) Where a person obtains, under lease or comparable arrangement, or through donation, any facility or part thereof, or equipment for a facility, the expenditure for which would have been considered a capital expenditure and subject to exclusion from reimbursement under titles V, XVIII, and XIX of the Act pursuant to this part if the person had acquired it by purchase, such acquisition shall be deemed a capital expenditure by or on behalf of such facility and the Secretary shall, subject to section 1122(d) of the Act:

(1) In the case of a donation which is carried by such person as a capital asset, or in computing such person's rental expense, in determining the Federal payments to be made under such titles V, XVIII, and XIX with respect to services furnished in such facility, deduct the amount which in his judgment is a reasonable equivalent of the amount that would have been excluded if the person had acquired such facility or equipment by purchase. The amount to be excluded pursuant to this subparagraph shall be based upon.

(i) The fair market value, as determined by the Secretary, in the case of real property; and

(ii) The Estimated Useful Lives of Depreciable Assets as set forth in the American Hospital Association Chart of Accounts for Hospitals, or comparable table for the computation of equipment values acceptable to the Secretary, in the case of equipment.

(2) In computing such person's return on equity capital, deduct any amount deposited under the terms of the lease or comparable arrangement.

(c) Obligation: An obligation for a capital expenditure shall be deemed to have been incurred by or on behalf of a health care facility or health maintenance organization

(1) When an enforceable contract is entered into by such facility or organization or by a person proposing such capital expenditure on behalf of such facility or organization for the construction, acquisition, lease or financing of a capital asset; or

(2) Upon the formal internal commitment of funds by such facility or organization for a force account expenditure which constitutes a capital expenditure; or

(3) In the case of donated property, the date on which the gift is completed in accordance with applicable State Law.

§ 81.104 Agreement; general.

The Secretary, after consultation with the Governor (or other chief executive officer) and with appropriate public officials, shall make an Agreement with any State which is able and willing to enter into such an agreement under which a designated planning agency (which shall be an agency described in § 81.105) will submit to the Secretary, together with such supporting materials as the Secretary may require, the following:

(a) With respect to each capital expenditure proposed by or on behalf of a health care facility or health maintenance organization in such State, the findings of such designated planning agency as to whether

(1) The designated planning agency or any other agency described in § 81.105 had been given notice of such proposed capital expenditure (in accordance with such procedure or in such detail as may be required pursuant to § 81.106) at least 60 days prior to obligation for such expenditure; and

(2) Such expenditure is or is not consistent with the standards, criteria, or plans developed pursuant to the Public Health Service Act (or the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963) to meet the need for adequate health care facilities in the area covered by the plan or plans so developed.

(i) In reaching such findings, the designated planning agency shall consult with, and take into consideration the findings and recommendations of, the other agencies described in § 81.105.

(ii) Where the designated planning agency finds that such expenditure is not consistent with such standards, criteria, or plans, it shall submit to the Secretary the findings and recommendations of all such other agencies with which it has consulted.

(b) With respect to each proposed capital expenditure which is found by the designated planning agency to be not consistent with the standards, criteria, or plans described in paragraph (a) of this section, its recommendation as to whether the Secretary should either

(1) Exclude, in determining the Federal payments to be made under titles V, XVIII, and XIX of the Act with respect to services furnished in the health care facility or health maintenance organization for which such capital expenditure is made, any amount which is attributable to a depreciation, interest on borrowed funds, a return on equity capital (in the case of proprietary facilities), or other expenses related to such capital expenditure (in accordance with section 1122(d)(1) of the Act; or

V 38-149
AUG 3 73
XUM

(2) Not exclude such expenses, on the ground that such facility or organization has demonstrated proof of capability to provide comprehensive health care services efficiently, effectively, and economically, and that such an exclusion would discourage the operation or expansion of such facility or organization, or of any facility of such organization.

(c) With respect to each proposed capital expenditure which is found by any other agency described in § 81.105 of this part to be not consistent with the standards, criteria, or plans described in paragraph (a) of this section within the field of responsibilities of such other agency, the findings and recommendations of such other agency.

(d) With respect to each proposed capital expenditure as to which the designated planning agency reaches a finding contrary to that reached by the local area planning agency described in § 81.105(a)(3), a statement of the reasons for such a contrary finding.

§ 81.105 Agreement; designated agency.

(a) The designated planning agency designated in the Agreement shall be one of the following:

(1) The State agency designated or established pursuant to section 314(a) of the Public Health Service Act as the sole agency for administering or supervising the administration of the State's health planning functions under the plan developed pursuant to such section 314(a).

(2) The State agency designated pursuant to section 604(a) of the Public Health Service Act as the sole agency for the administration of the State plan developed pursuant to Title VI of the Public Health Service Act.

(3) The public or nonprofit private agency or organization responsible for the comprehensive regional, metropolitan area, or other local area plan or plans referred to in section 314(b) of the Public Health Service Act covering the area in which the health care facility or health maintenance organization proposing such capital expenditure is or is proposed to be located or, if there is no such agency covering such area, such other public or nonprofit private agency or organization which is found by the State agency referred to in paragraph (a)(1) of this section and by the Secretary to be performing similar functions.

(b) The designated planning agency shall have a governing body or advisory board at least half of whose members represent consumer interests.

§ 81.106 Agreement: procedures for agency review.

(a) The Agreement shall provide for the following notification and review procedures:

(1) The designated planning agency shall establish and maintain procedures under which timely written notice of the intention to make a capital expenditure subject to this part is required to be given (i) to the designated planning agency, in which case such agency shall distribute copies of such notice to those other agencies described in § 81.105 whose respective fields of responsibility cover the proposed expenditure, or (ii) simultaneously to the designated planning agency and to those other agencies described in § 81.105 whose respective fields of responsibility cover the proposed expenditure. Such notice shall set forth the date on which the obligation is expected to be incurred, and must be received by the designated planning agency not less than 60 days prior to such date.

(2) Such notice shall be submitted in such form and manner and shall contain such information as may be required by the designated planning agency to meet the needs of all the agencies whose respective fields of responsibility cover the proposed expenditure. The designated planning agency shall promptly publicize its receipt of such notice through local newspapers and public information channels.

(3) If the notice under this paragraph is found by the designated planning agency to be incomplete, such agency shall notify the person proposing the capital expenditure within 15 days of its receipt of such incomplete notice, advising such person of the additional information required. Where such timely notification of incompleteness is provided, the period within which the agency is required to notify the person proposing such expenditure that such expenditure is not approved, as required by section 1122(d)(1)(B)(i) of the Act and paragraph (a)(4) of this section, shall run from the date of receipt by the agency of a notice containing such additional information.

(4) Except as provided in paragraph (a)(3) of this section, or unless the person proposing the capital expenditure agrees to a longer period, the designated planning agency shall, prior to the date set out in the written notice of intention submitted pursuant to paragraph (a)(1) of this section as the expected date for the obligation of the proposed expenditure (but subject to the provisions of paragraph (a)(3) of this section in no event later than 90 days after the receipt of such notice), provide written notification to the person proposing such capital expenditure (i) that such capital expenditure has been determined by such agency to be in conformity with the standards, criteria and plans described in § 81.104(a)(2), or (ii) that such agency has elected not to review the proposed capital expenditure (which election shall constitute a determination by such agency and plans); or (iii) that such agency after having consulted with, and taken into consideration the findings and recommendations of, the other agencies described in § 81.105 (to the extent that such proposed capital expenditure is within the respective fields of responsibility of such other agencies), has determined that the proposed capital expenditure would not be in conformity with the standards, criteria, or plans described in § 81.104(a)(2). The notification described in paragraph (a)(4)(iii) of this section shall be accompanied by a statement of the designated planning agency's proposed recommendation to the Secretary and the reasons therefor, a summary of the findings and recommendations of the other agencies with which such agency has consulted pursuant to paragraph (a)(4)(iii) of this section and shall provide an opportunity for a fair hearing with respect to the findings and recommendations of the designated planning agency at the request of the person proposing such capital expenditure.

(5) Copies of the findings and recommendations of the designated planning agency shall also be sent to the other agencies consulted, and shall be publicized through local newspapers and public information channels.

(b) Any person proposing a capital expenditure may withdraw his previously filed notice of proposed capital expenditure, without prejudice, by filing simultaneous written notification of such withdrawal with those agencies to which he gave notification pursuant to paragraph (a)(1) of this section, at any time prior to his receipt of notice pursuant to paragraph (a)(2)(i), (ii), or (iii) of this section.

(c) In addition to any other hearing which may be provided by an agency described in § 81.105 in connection with the review of a proposed capital expenditure under this part, the Agreement shall provide that the designated planning agency will grant to a person proposing a capital expenditure an opportunity for a fair hearing with respect to the findings and recommendations of the designated planning agency, and will establish and maintain procedures for such appeal. Such procedures shall include the following:

(1) The request for a hearing must be made in writing, to the designated planning agency, within 30 days after the date on which the person proposing the capital expenditure receives notice of an adverse finding or recommendation of the designated planning agency.

(2) The hearing shall be held as promptly as practicable consistent with the provision of adequate notice to the person requesting the hearing in accordance with the applicable requirements of State law, and shall be conducted by such agency or person, other than the designated planning agency, as the Governor (or other chief executive officer of the State) may designate for that purpose.

(i) The hearing shall be open to the public and shall be publicized through local newspapers and public information channels.

(ii) The person proposing the capital expenditure, the other agencies described in § 81.105, and other interested parties, including representatives of consumers of health services, shall be permitted to give testimony and present arguments at the hearing.

(iii) The record of the proceedings shall be transcribed and copies of the transcription, together with copies of all documents received in evidence, shall be available to the public for inspection and copying: *Provided*, That any person who requests copies of such material may be required to bear the costs thereof.

(3) As soon as practicable, but not more than 45 days after the conclusion of a hearing, the hearing officer shall notify the person who requested the hearing, the designated planning agency, the other agencies described in § 81.105 who participated in the hearing, and other interested parties at the discretion of the hearing officer, of his decision and the reasons therefor. Such decision shall be publicized through local newspapers and public information channels.

(4) Any decision of a hearing officer, arrived at in accordance with this paragraph, shall, to the extent that it reverses or revises the findings or recommendations of the designated planning agency, constitute the findings and recommendations of the designated planning agency: *Provided*, That where judicial review of such decision is obtained, the final decision of the reviewing court, to the extent that it modifies the findings and recommendations of the designated planning agency, shall to such extent constitute the findings and recommendations of the designated planning agency.

§ 81.107 Agreement; criteria for agency review.

The Agreement shall set forth the criteria under which the designated planning agency and the other agencies described in § 81.105 shall evaluate proposals for capital expenditures for purposes of this part to determine their conformance with the applicable standards, criteria and plans referred to in § 81.104(a)(2). Such criteria, to the extent provided for under such standards, criteria, or plans, shall include the following:

(a) Whether the proposed project is needed or projected as necessary to meet the needs in the community in terms of health services required: *Provided*, That projects for highly specialized services (such as open-heart surgery, renal transplantation, or radiation therapy) which will draw from patient population outside the community in which the project is situated will receive appropriate consideration;

(b) Whether the proposed project can be adequately staffed and operated when completed;

(c) Whether the proposed capital expenditure is economically feasible and can be accommodated in the patient charge structure of the health care facility or health maintenance organization without unreasonable increases; and

(d) Whether the project will foster cost containment through improved efficiency and productivity, including promotion of cost-effective factors such as ambulatory care, preventive health care services, home health care, and design and construction economies.

§ 81.108 Determination by the Secretary.

(a) Except as provided in paragraph (b) of this section, if the Secretary determines that (1) the designated planning agency has not been given timely notice of intention to make a capital expenditure in accordance with § 81.106, or (2) that the designated planning agency has, in accordance with the requirements of section 1122 of the Act and this part, submitted to the Secretary its finding that such expenditure is not consistent with the standards, criteria, or plans described in § 81.104(a)(2) then, for such period as he deems necessary to effectuate the purpose of section 1122 of the Act, he shall, in determining the Federal payments to be made under titles V, XVII, and XIX of the Act to such health care facility or health maintenance organization, exclude expenses related to such capital expenditure.

(b) Notwithstanding the provisions of paragraph (a) of this section, if the Secretary, after submitting the matters involved to the National Advisory Health Council on Comprehensive Health Planning Programs (established pursuant to section 316 of the Public Health Service Act, 42 U.S.C. 247a) and after taking into consideration the recommendations of the designated planning agency and the other agencies described in § 81.105 with respect to such expenditure, determines that an exclusion of expenses related to any capital expenditure of any health care facility or health maintenance organization would discourage the operation or expansion of such facility or organization, or of any facility of such organization, which has demonstrated to his satisfaction proof of capability to provide comprehensive health care services efficiently, effectively, and economically, or would otherwise be inconsistent with the effective organization and delivery of health services or the effective administration of titles V, XVIII, or XIX of the Act, he shall include such expenses in Federal payments under such titles.

(c) Upon making a determination under this section the Secretary will promptly notify the person proposing such capital expenditure, the designated planning agency, and the other agencies described in § 81.105 with which the designated planning agency has consulted, of such determination and the basis for such determination.

(d) Any person dissatisfied with a determination by the Secretary under section 1122 of the Act or this part with respect to a particular capital expenditure may, within six months following the date of such determination, request the Secretary to reconsider such determination.

(1) Such request for reconsideration shall be in writing, addressed to the Secretary of Health, Education, and Welfare or to any officer or employee of the Department of Health, Education, and Welfare to whom the Secretary has delegated responsibility to receive such requests, and shall set forth the grounds based upon the record of the proceedings and any issues of law, upon which such reconsideration is requested.

(2) Reconsideration will be based upon the record of the proceedings, which shall consist of the findings, recommendations and supporting materials submitted to the Secretary by the designated planning agency (including the findings and recommendations of other agencies) which relate to the findings and recommendations involved, the record of the hearing provided by the designated planning agency, if any, and of any judicial proceedings, the materials submitted in connection with such request, and such comments as the Secretary may request from the designated planning agency.

(3) Notice of any reconsidered determination under this paragraph shall be sent to the designated planning agency and the person requesting such reconsideration.

(4) A determination by the Secretary is, under section 1122 of the Act, not subject to administrative or judicial review.

§ 81.109 Continuing effect of determinations.

(a) Except in the case of a long-term construction plan of the type described in paragraph (b) of this action, where the designated planning agency has found that a proposed capital expenditure is in conformity with the standards, criteria, and plans described in § 81.104(a)(2), the obligation for such capital expenditure shall be incurred not less than one year following the date of such finding, or such shorter period as may be required by applicable State law: *Provided*, That in the absence of any State law to the contrary, the Secretary may, pursuant to a showing of good cause by the person proposing such expenditure, extend the period during which such obligation must be incurred for up to an additional six months. If no such obligation is incurred within such period, the designated planning agency's approval shall, for purposes of this part, be deemed to be terminated upon the expiration of such period.

(b) In the case of any capital construction plan proposed by or on behalf of a health care facility or health maintenance organization under which a series of obligations for capital expenditures for discrete components of the plan is to be incurred over a period longer than one year, the designated planning agency may review and approve or disapprove, for purposes of this part, those of such capital expenditures which it estimates will be incurred within three years following the date of such approval or disapproval.

(c)(1) In any case in which the Secretary has determined pursuant to a finding by the designated planning agency that a proposed capital expenditure is not in conformity with the standards, criteria, or plans described in § 81.104(a)(2), that expenses related to such capital expenditure shall not be included in determining Federal payments under titles V, XVIII, and XIX of the Act the health care facility or health maintenance organization to whom such payments are made shall be entitled, upon its request to the designated planning agency in such form and manner and supported by such information as such agency may require, to a reconsideration by the designated planning agency of such finding:

V 38-149 AUG 3 73 XUM

(i) Whenever there is a substantial change in existing or proposed health facilities or services, of the type proposed, in the area served by such facility or organization;

(ii) Upon a substantial change in the need for facilities or services, of the type proposed, in the area served by such facility or organization, as reflected in the standards, criteria or plans referred to in § 81.104(a)(2); or

(iii) At any time following the expiration of three years from the date of the finding of the designated planning agency or of its last reconsideration of such finding pursuant to this paragraph, whichever is later.

(2)(i) If, upon reconsideration of its finding pursuant to this paragraph, and after consulting with and taking into consideration the findings and recommendations of the other agencies described in § 81.105, the designated planning agency finds that the facilities or services provided by such capital expenditure are in conformity with the standards, criteria, and plans described in § 81.104(a)(2) it shall promptly so notify the Secretary and the person submitting such request.

(ii) If the designated planning agency, upon such reconsideration, reaffirms its previous finding, the procedure set forth in § 81.106 following an initial determination shall be followed.

(3) Upon notification by a designated planning agency of a revised finding in accordance with paragraph (c)(2) of this section, the Secretary will include, in determining future payments under titles V, XVIII, and XIX of the Act, expenses related to such capital expenditure. Such expenses will be included for periods following the date of such notification only, and amounts previously excluded shall not be taken into account in determining Federal payments under titles V, XVIII, and XIX of the Act.

2. Paragraph (l) of 42 CFR 51.4 is amended to read as follows:

§ 51.4 State program requirements.

* * * * *

(l) *Program for capital expenditures.* (1) The State program must incorporate by reference a written program providing for assisting, through consultation, provision of information, and advice, each health care facility and health maintenance organization in the State to develop a program for capital expenditures for replacement, modernization, and expansion in accordance with criteria which will meet the needs of the State for health care facilities, equipment and services without duplication and otherwise in the most efficient and economical manner. Such criteria will be established by the Secretary after consultation with the State, and will be based on the following considerations:

(i) Whether a proposed project is needed or projected as necessary to meet the needs in the community in terms of health services required: *Provided*, That projects for highly specialized services which will draw from patient population outside the community will receive appropriate consideration;

(ii) Whether a proposed project can be adequately staffed and operated when completed;

(iii) Whether a proposed capital expenditure is economically feasible and can be accommodated in the patient charge structure of the health care facility or health maintenance organization without unreasonable increases; and

(iv) Whether a project will foster cost containment through improved efficiency and productivity, including promotion of cost-effective factors such as ambulatory care, preventive health care services, home health care, and design and construction economies.

(2) The State agency furnishing such assistance shall periodically review such capital expenditure program of each health care facility or health maintenance organization in the State and recommend appropriate modification thereof.

(3) The assistance and review required under this paragraph may be provided either by the State comprehensive health planning agency itself, or, under such State agency's control and supervision, by a local public or private nonprofit agency, or by another State agency qualified and authorized to provide such assistance and designated in the State program as the agency with the primary responsibility therefor.

(4) For purposes of this section, the term "health care facility" includes hospitals, psychiatric hospitals, tuberculosis hospitals, skilled nursing facilities, home health agencies, and providers of outpatient physical therapy services (including speech pathology services) as defined in section 1861(e), (f), (g), (j), (o) and (p), respectively, of the Social Security Act (except that such term shall not apply with respect to outpatient physical therapy services performed by a physical therapist in his office or in a patient's home); kidney disease treatment centers, including freestanding hemodialysis units; intermediate care facilities as defined in section 1905(c) of the Social Security Act; and organized ambulatory health care facilities such as health centers, family planning clinics, and facilities providing surgical treatment to patients not requiring hospitalization (surgicenters), which are not part of a hospital but which are organized and operated to provide medical care to outpatients.

(5) For purposes of this section, the term "health maintenance organization" means a public or private organization, organized under the laws of any State which

(i) Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services; usual physician's services, hospitalization, laboratory, x-ray, emergency and preventive services, and out-of-area coverage;

(ii) Is compensated (except for copayments) for the provision of the basic health care services listed in subsection (i) of this subparagraph to enrolled participants solely on a predetermined periodic rate basis; and

(iii) Provides physicians' services primarily (A) directly through physicians who are either employees or partners of such organization, or (B) through arrangements with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis).

(Sec. 314(a), Public Health Service Act; 42 U.S.C. 246(a)).

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION AND INDEX TO GENERAL WAGE DETERMINATION DECISIONS AS OF JULY 6, 1973

Area Wage Determination Decisions

V 38-149
AUG 3 73
XUM

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

Area Wage Determination Decisions

General wage determination decisions. General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determinations frequently and in large volume causes these procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions to general wage determination decisions. Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

INDEX TO GENERAL WAGE DETERMINATION DECISIONS AND MODIFICATIONS AS OF JULY 6, 1973

There is set forth below an index to general wage determination decisions and modifications as published in the FEDERAL REGISTER pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions and modifications by State and county. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

ABBREVIATIONS

(B)—Building Construction
(D)—Dredging Construction
(F)—Flood Control Construction
(H)—Heavy Construction
(Hw)—Highway Construction
(R)—Residential Construction
Mod.—Modification

Signed at Washington, D.C., this 27th day of July 1973.

WARREN D. LANDIS,
Assistant Administrator,
Wage & Hour Division.

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.
Paperbound, with charts

Volume 38 ■ Number 150

Pages 21141–21235

PART I

(Part II begins on page 21227)

NEW TELEPHONE NUMBERS FOR THE OFFICE OF THE FEDERAL REGISTER

General Information	523–5240
Daily Federal Register	523–5210
Code of Federal Regulations	523–5220
U.S. Statutes	523–5237
Presidential Documents	523–5230

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

PHASE IV—CLC issues Questions and Answers No. 5 21170

WATER POLLUTION CONTROL—EPA issues advance notice of public review procedures for proposed guidelines and standards 21202

NONDISCRIMINATION—Interior Department clarification and revision of hearing procedures for Federally assisted programs; effective 7–5–73 21162

RADIOACTIVE MATERIALS—AEC authorizes export of depleted uranium; effective 8–6–73 21176

LOANS—FDIC prohibits member banks from lending to governmental bank examiners 21210

SUPPLEMENTAL SECURITY INCOME—
VA proposed regulations; comments by 9–5–73 21188
HEW proposes State supplementation, supplemental benefit, and Medicaid eligibility provisions; comments by 9–5–73 21188

NAVIGATION—Coast Guard proposes regulations for operation of vessels in the Puget Sound traffic system area; comments by 10–17–73 21227

NEW ANIMAL DRUGS—
FDA establishes requirements regarding liquid feed supplements; effective 11–5–73 21178
FDA amends labeling requirements for the use of Zeranol; effective 8–6–73 21179

V 38-150 AUG 6 73 XUM

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

COLOR ADDITIVES—FDA announces filing of petitions (3 documents) 21199, 21200

SOYBEANS—Commerce Department amends licensing requirements; effective 8–1–73 21177

PACKERS AND STOCKYARDS—USDA policy on advertising allowances and other merchandising payments and services provided by meat packers; effective 8–6–73 21173

RURAL ELECTRIFICATION—REA proposes issuance of two accounting interpretations for borrowers 21181

NEGOTIATED CONTRACTS—EPA general provisions for use in cost reimbursement contracts with educational and other non-profit institutions; effective 9–1–73 21157

NATIONAL RAILROAD ADJUSTMENT BOARD—National Mediation Board proposes administrative fees; comments by 9–5–73 21186

SMALL BUSINESS AFFILIATES—SBA excludes State development companies from definition; effective 8–6–73 21176

MEETINGS—
DOD: Corps of Engineers, Coastal Engineering Research Board, 8–7 to 8–8–73 21195
U.S. Commission on Civil Rights: Colorado State Advisory Committee, 8–6–73 21202
New Mexico State Advisory Committee, 8–6–73 21202
CLC: Food Industry Advisory Committee, 8–13 to 8–14–73 21221

Contents

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER H—AIR FORCE RESERVE OFFICERS' TRAINING CORPS

PART 870—AIR FORCE RESERVE OFFICERS' TRAINING CORPS

This revision deletes requirements to request authorization for and report deferment quotas; adds "consortium arrangement" and "cross-town agreements" to terms explained (§ 870.2(i) and (k)); revises definition for "full-time student" (§ 870.2(n)); redefines restrictions on establishing AFROTC units at educational institutions (§ 870.10(c)); adds provisions for descriptive titles for officers-in-charge of AFROTC activities at educational institutions as well as for the activities (§ 870.10(d)); adds restrictions on CSP enrollments (§ 870.12 (a)); adds provisions and procedures for granting academic credit, course substitutions, and requirements for drill standards (§ 870.12(c)); revises verbiage on exceptions regarding concurrent enrollment (§ 870.26); adds members of the NOAA to those who may not be AFROTC members and provides that Air Force members may compete for AFROTC scholarships under certain conditions (§ 870.28); adds IM-missile launch officer to category I (§ 870.32(a)); revises induction delay criteria (§ 870.44); deletes requirements for the annual DD Form 44 submission and revises procedures for notifying boards of deferments and transfers (§ 870.50); permits citizenship exceptions for certain aliens, precludes membership for those claiming conscientious objector status but permits special student status, and permits attendance at field training if enlistment age will be reached before entry into the POC (§ 870.82, rules 4, 6, and 8 and notes 5, 7, and 8); delegates waiver authority to AFROTC and makes other revisions (§ 870.84); allows some GMC credit for cadets with less than 180 days of active duty/active duty for training (§ 870.86, line 6 and note 5); and generally updates verbiage, format, and terminology throughout the part.

Part 870, Subchapter H of Chapter VII of Title 32 of the Code of Federal Regulations is revised to read as follows:

Sec.
870.0 Purpose.

Subpart A—Background and Organization

870.2 Definitions.
870.4 AFROTC officer procurement.
870.6 AFROTC mission and objectives.
870.8 AFROTC organization.
870.10 Establishment and continuation of AFROTC units at educational institutions.
870.12 The training program.
870.14 Responsibilities of the Commander, AU.
870.16 Major Command functions.
870.18 Administrative services and supplies.

Subpart B—AFROTC Membership and Retention

870.20 Basic membership requirements.
870.22 Other membership requirements.
870.24 Conditional membership.
870.26 Concurrent enrollment in Aerospace Studies.
870.28 Who may not be AFROTC members.
870.30 Investigative requirements.
870.32 Contract cadets.
870.34 In-phase admission to the POC.
870.36 Completed cadet status.
870.38 Alien students.

Subpart C—Selective Service Deferment of AFROTC Members and Designated Applicants

870.40 Military colleges participating in the AFROTC program.
870.42 Deferment selection criteria.
870.44 Delay of induction.
870.46 Length of deferment.
870.48 Actions required for deferment.
870.50 Notifying Board of deferments and transfers.
870.52 Notifying Board of change of deferment status.
870.54 Transfer procedures.

Subpart D—Special Procedures

870.56 Participation and assignment in the Reserve establishment or National Guard.
870.58 Credit for previous education, training, and experience.
870.60 Enlistment of a reservist of another service.
870.62 Transfer of ROTC cadets.

Subpart E—Disenrollment and Discharge

870.64 Disenrollment of member from the AFROTC program.
870.66 Discharge from the United States Air Force Reserve.
870.68 Notifying ARPC of disenrollments.

Subpart F—Readmission

870.70 Readmission.

Subpart G—Appointment and Assignment of Graduates

870.72 Appointment of graduates.
870.74 Extended active duty for AFROTC graduates.
870.76 Distinguished graduates.
870.78 Release of AFROTC graduates for appointment in another service.
870.80 Air Force appointment of ROTC graduates from another service.

Subpart H—Tables

870.82 Eligibility requirements for admission to membership in AFROTC.
870.84 Individuals who require a waiver and waiver granting authority.
870.86 Credit for previous education, training, and military experience.

AUTHORITY: 10 U.S.C. 8012; 10 U.S.C. Chapter 103; Military Selective Service Act of 1967, section 6 (50 U.S.C. App. 456), except as otherwise noted.

§ 870.0 Purpose.

(a) This part explains the organization, administration, and operation of the Senior Reserve Officers' Training Corps. It applies to major commands. AFROTC (Maxwell Air Force Base, Alabama), ARPC, and AFROTC detachments.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

Subpart A—Background and Organization

§ 870.2 Definitions.

(a) *Academic year (AY).* Consists of two semesters, three quarters, or the equivalent combination of trimesters or other terms.

(b) *Aerospace Studies (AS).* The official designation of the Air Force Reserve Officers' Training Corps (AFROTC) program of instruction.

(c) *AFROTC detachment.* An Air Force organization manned by active duty Air Force personnel assigned to AFROTC, with duty station at a civilian educational institution. The AFROTC detachment is an integral academic subdivision of the educational institution and, with concurrence of the institution, has the academic title "Department of Aerospace Studies." The AFROTC detachment conducts all AFROTC activities at the institution as stipulated in the joint contract between the host institution and the Air Force.

(d) *AFROTC graduate.* A contract cadet who has successfully completed the academic and military requirements of the AFROTC Professional Officer Course (POC), including prescribed field training, and has been awarded at least a bachelor's degree.

(e) *Alien student.* A Foreign National eligible to participate in the AFROTC program under the provisions of this part and 10 U.S.C. 2103(b).

(f) *Cadet.* The term cadet as used in this part is synonymous with member.

(g) *Completed cadet.* A contract cadet who has successfully completed the academic and military requirements of the program of advanced training, including field training, and Flight Instruction Program if applicable, but has not been commissioned.

V 38-150 AUG 6 73 XUM

(h) *Conditional cadet.* A contract cadet who has been advised by the Professor of Aerospace Studies (PAS) either upon initial enrollment or during the program that he has been placed on a probationary status to correct a deficiency (academic or otherwise) within a specified period of time to preclude disenrollment from the program. A conditional cadet is a member of the AFROTC program.

(i) *Consortium arrangement.* An agreement between an AFROTC host institution and a nonhost institution which exists for the mutual benefit of the schools, and which permits cross enrollment of students. AFROTC, as a department of the host institution, shares as a beneficiary of the larger agreement and can participate as any other department of the host institution by enrolling students from the consortium nonhost schools. The consortium agreement may be a written agreement. Students at the nonhost institution may enroll in the AFROTC program under this type of arrangement provided:

(1) The nonhost institution is an accredited baccalaureate degree granting or 2-year nonbaccalaureate degree granting institution.

(2) Nonhost institutions agree to grant appropriate academic credit applicable toward graduation for the successful completion of courses offered by the Department of Aerospace Studies.

(j) *Contract cadet.* An AFROTC cadet who has executed AF Form 1056, "Air Force Reserve Officers' Training Corps Category Agreement," enlisted in the United States Air Force Reserve (USAFR) (Obligated Reserve Section (ORS)) under the provisions of 10 U.S.C. 2104 or 2107, and is a member of the POC and/or the College Scholarship Program (CSP).

(k) *Cross-town agreement.* An agreement among a host institution, an accredited baccalaureate degree granting or 2-year nonbaccalaureate degree granting nonhost institution, AFROTC, and Air University (AU), permitting students from the nonhost institution to enroll in the AFROTC program conducted by the host institution.

(l) *Designated applicant.* An individual who has applied in writing and has been tentatively accepted by the Professor of Aerospace Studies (PAS) as a candidate for entry in the POC.

(m) *Enrollment.* Admission of a student into an Aerospace Studies course for academic credit, which in itself entitles individuals to neither AFROTC membership nor subsistance allowance.

(n) *Full-time student.* An individual enrolled in other than correspondence courses who is taking at least the minimum credit hours specified in the institutional catalog for designation as a full-time student. If the institution does not specify a minimum criterion, a student enrolled in at least the minimum number of credit hours prescribed by the Professor of Aerospace Studies.

(o) *Member.* A student who meets and completes the applicable eligibility requirements of § 870.82 and is admitted to the General Military Course (GMC) or POC. Members must maintain retention standards prescribed by the Commandant, AFROTC.

(p) *Officer type training programs.* Any training received in any U.S. Armed Force, Coast Guard, or Merchant Marine program, completion of which may result in a tender of appointment as a commissioned officer (includes service academy preparatory schools).

(q) *Probation (academic).* Scholastic probation, warning, suspension, or any other terminology utilized by an institution to indicate that a student is academically deficient.

(r) *Professor of Aerospace Studies (PAS).* The senior Air Force commissioned officer assigned to command an AFROTC detachment.

(s) *Pursuing student.* A designated applicant for POC membership who is temporarily ineligible for enlistment. He is not a member of the POC or the CSP.

(t) *Special student.* A nonmember student who is enrolled in AFROTC courses and/or corps training.

§ 870.4 AFROTC officer procurement.

AFROTC is a major active duty officer procurement program of the Air Force. It is conducted jointly with the cooperating educational institutions, as outlined in this part. AFROTC will continue to operate as the officer training program conducted at colleges and universities during a national emergency or war.

§ 870.6 AFROTC mission and objectives.

(a) The AFROTC mission is to commission, through a college campus program, second lieutenants in response to Air Force active duty requirements.

NOTE: AFROTC is also responsible for conducting an Air Force Junior ROTC (AFJROTC) program at selected secondary schools nationwide under Air Force Regulation (AFR) 45-39, "Air Force Junior Reserve Officers' Training Corps."

(b) The AFROTC objectives are to:

(1) Identify, motivate, and select qualified students to complete the Air Force ROTC program.

(2) Provide college-level education that will qualify cadets for commissioning in the U.S. Air Force.

(3) Strengthen each cadet's sense of personal integrity, honor, and individual responsibility; enchance his knowledge of how the U.S. Air Force serves the national interest; increase his understanding of officer professionalism in the U.S. Air Force; and develop his potential as a leader and manager.

§ 870.8 AFROTC organization.

The Department of the Air Force establishes policies and develops plans for the conduct of the AFROTC program. AFROTC is organized as a subordinate unit of Air University (AU) and consists of a central staff and detachments. An AFROTC detachment is established or disestablished only by direction of the Secretary of the Air Force.

§ 870.10 Establishment and continuation of AFROTC units at educational institutions.

(a) *Establishment of AFROTC units.* To receive consideration for establishment of an AFROTC unit, an educational institution must:

(1) Apply in writing to the Commandant, AFROTC, Maxwell Air Force Base, Alabama 36112.

(2) Be fully accredited by the appropriate regional or national authority.

(3) Agree to provide adequate physical facilities.

(4) Certify that it does not discriminate with respect to admission or subsequent treatment of students on the basis of race, creed, or national origin.

(5) Be capable of producing a sufficient number of officers to justify Department of Defense resources invested, considering (among other factors) the number of students enrolled who are prospective officer candiates and the proportion of each entering academic class that normally receives degrees from the institution.

(b) *AF Form 1268.* AF Form 1268, "Application and Agreement for the Establishment of a Senior Air Force Reserve Officers' Training Corps Unit," must be signed after establishment has been approved by the Secretary of the Air Force.

(c) *Establishment restrictions.* AF ROTC units will not be established or maintained at an educational institution unless:

(1) The senior commissioned officer of the AFROTC unit is given the academic rank of professor, including appropriate prerogatives and prerequisites (except tenure) associated with the position of a professor as head of a department or program at the institution. (Other AF ROTC officers will be evaluated by the host institution for appropriate academic rank using procedures comparable to those used for their civilian faculty colleagues.)

(2) The institution fulfills the terms of its agreement with the Secretary of the Air Force.

(3) The institution adopts as part of its curriculum a 4-year course of military instruction or a 2-year course of advanced military instruction, or both, which the Secretary of the Air Force prescribes and conducts. Student enrollment shall be elective or compulsory as provided by state law or the institution.

(d) *Descriptive titles.*—(1) As an alternative to the title of professor for the senior commissioned officer of the AFROTC unit, the most complimentary title is the officer's military title. Other titles, such as Visiting Professor, are acceptable provided the prerogatives and perquisites of professional rank (excluding tenure) accompany the position, and the title is not demeaning or indicative of some lessor status.

(2) As a descriptive term for the ROTC educational activity on campus, the word "Program" is acceptable instead of "Department" provided no extracurricular connotation is involved. The term "Program," in this sense, would be applied to AFROTC in the same manner as other academic programs within the institution.

(e) *Institutional standing committees on ROTC.* The Air Force will cooperate with institutional standing committees on ROTC to develop a program of instruction consistent with the goals of both parties, but cannot accept changes inconsistent with the law or Department of Defense policies.

(f) *Disestablishment of AFROTC units.* The annual officer production or projected production from each AFROTC unit should be adequate to justify the investment.

(1) A unit will be considered substandard when its officer production based on the past two years and the production potential for the current and next projected year is below:

(i) Fifteen officers per year where an institution prescribes a 4-year or combination 4- and 2-year program.

(ii) Ten officers per year where the institution prescribes a 2-year program.

(2) Air University will forward recommendations to HQ USAF by December 15 of each year to:

(i) Place substandard units in probationary status for a 1-year school period or recommend for disestablishment. (AFROTC should work closely with any institution whose AFROTC production falls below the standard for any year to seek measures which will make the AFROTC unit fully productive. These efforts should be substantiated in writing.)

(ii) Release from probation units which meet or exceed the minimum production standard.

(iii) Disestablish units which do not meet production standards by the end of the 1-year probationary period. Units will be phased out with sufficient time to permit enrolled AFROTC students to complete the program or offer the students a practical alternative for obtaining commissions.

§ 870.12 The training program.

The training program includes two phases—the institutional phase and field training phase. Successful completion of academic and military requirements in both phases is a prerequisite for appointment as an officer in the U.S. Air Force.

(a) *The institutional phase.* This phase consists of GMC (AS 100 and AS 200), the POC (AS 300 and AS 400), and Corps Training (AS 100 through AS 400). Corps Training is an integral and mandatory portion of each Aerospace Studies year. The GMC and POC are each normally two academic years in length (four semesters, six quarters, or an equivalent number of trimesters or terms). Completion of the GMC, its equivalent or the 6-week field training session is a statutory prerequisite for, but does not guarantee, entrance into the POC.

(1) The 4-year program consists of the GMC, POC, Corps Training, and a 4-week field training session.

(2) The 2-year program consists of the 6-week field training, the POC, and the last two years of Corps Training.

(3) The College Scholarship Program (CSP) provides educational financial assistance (including tuition, fees, laboratory expenses, books, and a monthly subsistence allowance) for selected undergraduate or graduate cadets. Candidates for entry into, the 2- and 4-year programs, and members of the 4-year program, are eligible to compete for scholarships provided they have the requisite number of academic years remaining. Not more than 20 percent of the persons appointed as CSP cadets may be in the 2-year program. At least 50 percent of the CSP cadets enrolled in public institutions must qualify for in-state tuition rates. Scholarship recipients will be centrally selected by AU/AFROTC, Maxwell Air Force Base, Alabama 36112.

(b) *The field training phase.* The 6- and 4-week field training phases are conducted at Air Force bases as prescribed by current Air Force policy. Two-year program applicants must successfully complete the 6-week field training session prior to admission to the POC. This prerequisite is a statutory requirement, but does not guarantee membership in the 2-year program. Cadets in the 4-year program normally attend the 4-week field training session after successful completion of AS 200.

(c) *Curriculum and course support materials.* (1) *Curriculum.* The Commander, AU, develops and maintains the AFROTC education program according to the mission, objectives, and policies prescribed by the Chief of Staff, United States Air Force.

(2) *Academic credit.* AFROTC courses will be reviewed for credit on the same basis as other courses at the institution. Maximum credit should be granted. If credit is questioned, the institution should recommend changes which would make the courses credit worthy, but denial of degree credit would not in itself, necessarily mean withdrawal of the unit. Regardless of the amount of credit granted, AFROTC grades should appear on student's transcripts.

(3) *Course substitution.* Guest lecturers may provide specific hours of instruction in areas where they are academically qualified, provided the institution approves of the practice. Institutionally taught courses, or courses taught jointly by both civilian and military faculties, may be used when these courses satisfy the objectives of the AFROTC curriculum and exist or can be developed by the institution. These provisions shall not be used as a device to reduce the required minimum military contact hours of the AFROTC curriculum.

(4) *Drill.* Standards of performance in military drill are prescribed by Air University. The PAS determines the specific amount of drill needed to obtain the prescribed standards.

§ 870.14 Responsibilities of the Commander, AU.

(a) During any period of full-scale mobilization, the Commander, AU conducts an accelerated AFROTC program as directed by HQ USAF.

(b) The Commander, AU insures that all applicants enlisted as POC or CSP members, and all AFROTC graduates appointed as commissioned officers, meet Air Force personnel procurement standards.

§ 870.16 Major Command functions.

(a) Provide designated applicants for membership in the AFROTC program with:

(1) Subsistence, quarters, and necessary medical care while they are processing at Air Force installations. (Service charges for subsistence and quarters provided will be kept to a minimum.)

(2) On-base transportation to and from examining centers and medical facilities. (Off-base transportation may be provided to the nearest commercial transportation facility.)

(b) Provide for the administration of medical examinations and the Air Force Officer Qualifying Test (AFOQT) to designated finalists competing in the 4-year College Scholarship Program. (The provisions of paragraph (a) of this section apply.)

(c) Insure that adequate personnel and facilities are available to process AFROTC applicants so that a favorable and professional impression of the base and the military will be conveyed.

(d) Provide base facilities, personnel, and airlift in support of the AFROTC base visit and orientation program.

§ 870.18 Administrative services and supplies.

(a) *Uniforms.* The Commandant, AFROTC, prescribes the uniform, uniform devices, and manner of wear of the uniform by students, designated applicants, and cadets. Uniforms will be worn for drill and at other times prescribed by the PAS.

(b) *Monetary allowances.* Policies governing subsistence allowance and commutation in lieu of uniforms are prescribed by the Commandant, AFROTC, consistent with Air Force directives.

Subpart B—AFROTC Membership and Retention

§ 870.20 Basic membership requirements.

Title 10 U.S.C., chapter 103, requires that, at institutions hosting ROTC detachments, membership in the GMC will be elective or compulsory as provided by state law or the authorities of the institutions concerned. Except where GMC membership is compulsory, as many qualified students may be enrolled in the GMC of each AFROTC detachment as are necessary to meet production quotas established by HQ USAF. Entry into the POC is not subject to institutional jurisdiction, but is limited by production goals set by HQ USAF for the graduating class in which cadets will be appointed. Each cadet or applicant desiring membership in the POC must apply and compete with other cadets and applicants for membership in the POC. HQ USAF establishes AFROTC eligibility requirements. For students meeting these requirements,

V 38-150 AUG 6 73 XUM

the Commandant, AFROTC, prescribes admission and retention standards.

(a) *GMC membership.* An eligible student accepted by the PAS becomes a member on the first day he attends Aerospace Studies classes. He remains a member until he completes the GMC unless he is disenrolled sooner, except GMC members tentatively accepted as designated applicants for the POC who will remain members until they are disenrolled from the GMC or fail to be selected for the POC. The PAS will counsel each GMC cadet that acceptance for GMC training is not a guarantee of later admission into the CSP or POC.

NOTE: An individual accepted for membership, who because of accreditation of a portion of the GMC by virtue of equivalent training is excused from attending classes and corps training, is considered a cadet effective the date his application is accepted by the PAS.

(b) *POC membership.* An eligible student accepted by the PAS becomes a member on the date he is fully qualified under current Air Force and AFROTC directives, enlists or reenlists in the USAFR (ORS) according to Part 888d of this chapter and enrolls in courses of the POC. He remains a member until he is disenrolled from membership or is commissioned.

(c) *Designated applicant.* Once accepted as a designated applicant by the PAS, the individual remains a designated applicant until he is enrolled as a contract cadet, or is advised by the PAS that he has been released from further consideration. Normally designated applicant status will not exceed a 12-month period (Subpart C tells how to notify a Selective Service Board of an individual's designated applicant status). At the time of admission to membership in the POC, a designated applicant must have two academic years remaining at an institution hosting the AFROTC program (§ 870.82 note 2). A designated applicant who has completed the GMC, its equivalent, or the 6-week field training prior to enrollment in pursuing status and is thereafter to be accepted as a contract cadet, will meet this requirement if he had two academic years remaining at the time of enrollment in pursuing status. A designated applicant who is on academic probation or not in good academic standing at the institution normally will not be admitted to membership in the POC. Upon favorable recommendation from the Commandant, AFROTC, AU may grant a waiver (§ 870.84).

(d) *Nonmembers.* Pursuing and special students may be enrolled for academic credit although they are not members of the program. Nonmembers are not entitled to subsistence, a uniform allowance, or a uniform. If otherwise authorized, while in nonmember enrollment status, a special student may purchase a uniform at his own expense and wear it as authorized by the PAS. A pursuing student may be loaned a uniform at the discretion of the PAS and with concurrence of the institution. Section 870.22 (h) applies to wearing of the uniform by special and pursuing students. Equipment will not be purchased for the benefit of enrolled nonmembers. Special and pursuing students must acknowledge in writing understanding of their status in the AFROTC program.

§ 870.22 Other membership requirements.

For selection or retention in the AFROTC program, a student must meet and maintain the following standards as well as the requirements in § 870.82.

(a) *Moral character.* Good moral character is a prerequisite for membership and continuance in the AFROTC program. For purpose of membership in the GMC, admission to the institution is presumptive evidence of good character.

(b) *Military or civil offenses.* AFROTC is exempt from the requirement for the police record check required for enlistment in the United States Air Force Reserve. The Commandant, AFROTC, will establish procedures for verification of other than minor traffic violations which, together with the investigative actions inherent in the National Agency Check (NAC) or Background Investigation (BI), will insure proper review of involvements of each contract cadet. A student who has been convicted by a court-martial or civilian court for any offense will not be accepted for CSP/POC membership without a waiver (§ 870.84).

(c) *Medical qualification.* As provided in AFM 160–1, "Medical Examinations and Medical Standards," except for GMC cadets (§ 870.82).

(d) *Academic requirements.* For CSP and POC membership, a student must meet and maintain minimum requirements for good academic standing in the institution (§ 870.84 contains waiver authority).

(e) *Enrollment.* A member must maintain full-time enrollment in an AFROTC host institution or an institution having an approved agreement with an institution hosting AFROTC. Enrollment with less than the normal number of credit hours can be approved by the Commandant, AFROTC (§ 870.84). Undergraduate students will not be denied the opportunity to enroll in AFROTC solely because of their major course of study.

(f) *Elimination from service academies or other officer training programs.* Students who attended officer commissioning programs must be granted a waiver before entering AFROTC (§ 870.84). Applicants may be enrolled in nonmembership (pursuing or special student) status pending waiver determinations. Pending waiver evaluation, 2-year program designated applicants may attend 6-week field training if recommended for further officer training on their DD Form 785, "Record of Disenrollment from Officer Candidate Type Training."

(g) *Ineligibility for reenlistment.* A former serviceman whose DD Form 214, "Armed Forces of the United States Report of Transfer or Discharge," for his last period of service contains entries which render him ineligible to enlist in the Regular Air Force (Part 888 of this chapter) is not eligible for membership in the POC or CSP.

(h) *Loyalty requirements.* No U.S. citizen may be accepted as a member of AFROTC or wear the AFROTC uniform if he fails to fulfill the following:

(1) *For GMC, CSP, and POC.* Be administered and sign the Oath of Allegiance. The student must be administered and sign the following certificate, which becomes part of his record (he may, because of conscientious scruples, substitute "affirm" for "swear"):

> I do solemnly swear or (affirm) that I will support and defend the Constitution of the United States against all enemies, foreign or domestic; that I will bear true faith and allegiance to the same; and that I take this obligation freely, without any mental reservations or purpose of evasion.

(2) *For CSP and POC.* Complete and submit the DD Form 98, "Armed Forces Security Questionnaire."

(i) The student must file the DD Form 98 in advance of scheduled membership or attendance at 6-week field training, whichever occurs earlier.

(ii) If an applicant for POC or CSP fails or refuses, after instruction, to fill out DD Form 98 in its entirety, the PAS will deny him membership as a contract cadet. Also, if he makes entries on this form which provide reason to believe that his enrollment is not clearly consistent with the interests of national security, or if he qualifies an entry by a remark other than "none" or "none to my knowledge" in the remarks section, he will be denied membership or appointment until a full and complete investigation discloses that his membership or appointment is not prejudicial to the national interest.

(i) *Illegal or improper use of drugs.* Prior to enlistment for entry into the CSP or POC each applicant will execute AF Form 2061, "Drug Abuse Certificate (Appointment/Officer Training Applicants Only)." AF Form 2031, "Drug Abuse Circumstances," will be accomplished if applicant fails to certify to no prior drug abuse on AF Form 2061. The PAS will discuss these forms with the applicant and specifically explain the meaning of the terms used.

(j) *Assignment restrictions.* The PAS will counsel each POC and CSP applicant regarding the possibility that future duty with the Air Force may involve being associated with nuclear weapons systems. Applicants whose convictions will not allow them to accept such assignments or to accept worldwide assignment, including combat duty, will be identified, if possible, and denied membership.

§ 870.24 Conditional membership.

The Commandant, AFROTC, prescribes procedures which will allow the PAS to place a student in conditional membership either upon initial enrollment in the POC or during his tenure as a POC or CSP cadet when full membership is not possible. This conditional status is designed to permit correction of deficiencies (academic or otherwise)

within a specified period of time to preclude disenrollment from the program. Each conditional cadet will acknowledge in writing his understanding of the restrictions and requirements of conditional cadet status. Normally, this status is authorized only when the circumstances dictating conditional status will be removed in one academic term (semester, trimester, quarter, term). An individual who is on academic probation or not in good standing in the institution normally will not be designated as a conditional member for initial enrollment in contract cadet status; however, upon favorable recommendation from AFROTC, AU may grant a waiver in appropriate cases (§ 870.84, line 5).

§ 870.26 Concurrent enrollment in Aerospace Studies.

(a) *General Military Course (GMC).* The PAS may concurrently enroll a cadet in two GMC courses for a period not to exceed one academic year provided he obtains the same number of classroom and corps training hours as other GMC cadets at the same institution.

(b) *Professional Officer Course (POC).*—(1) The PAS may authorize concurrent enrollment provided the cadet's tenure will not be reduced to less than two years, for cadets who:

(i) During portions of the program, are absent from campus because of institutional, State Department, industry, or other approved programs;

(ii) Are enrolled in an AFROTC (officer-taught) POC course and a civilian-taught course approved under an alternate curriculum arrangement.

(2) The Commandant, AFROTC, may authorize concurrent enrollment as specified in § 870.84.

§ 870.28 Who may not be AFROTC members.

(a) Commissioned officers (present or former) of any component of the Army, Navy, Air Force, Marine Corps, Coast Guard, or Merchant Marine.

(b) Officers of the Public Health Service.

(c) Members of the National Oceanic and Atmospheric Administration (NOAA).

(d) Members on active duty in any military service. (Air Force enlisted members with a minimum of one year of active duty are eligible to compete for AFROTC scholarships.)

(e) Conscientious objectors.

§ 870.30 Investigative requirements.

The Commandant, AFROTC, will establish procedures to insure that all contract cadets meet the following investigative requirements:

(a) An NAC will be requested during the first academic term of membership as a contract cadet. NACs will not be requested on cadets who have previous investigations which are current as defined in AFR 205–32, "USAF Personnel Security Program," nor will NACs be requested on cadets who are required to have a BI under the provisions of paragraph (b) of this section.

(b) A BI must be completed and a favorable decision rendered before any designated applicant or CSP designee of the GMC may be enlisted if he has:

(1) Traveled or resided in one or more communist or communist-oriented countries listed in AFR 205–32, attachment 6, for more than 30 consecutive days, not under the auspices of the U.S. Government.

(2) A spouse, parent, brother, sister, or offspring currently residing in any country listed in AFR 205–32, attachment 6.

(3) Made entries or deletions on DD Form 98 or DD Form 398, "Statement of Personal History," indicating that enlistment may not be clearly consistent with the interests of national security. (AFR 205–32, attachment 4.)

NOTE: The PAS may permit 2-year program designated applicants to atend 6-week field training pending completion of a BI.

§ 870.32 Contract cadets.

The Commandant, AFROTC, will establish procedures for classifying contract cadets according to Air Force requirements, qualifications of the individuals, and the cadets' desire.

(a) *Classification of contract cadets.*—(1) *Category I.* Cadets who qualify and volunteer for flying training or missile launch officer duty.

(i) *IP-Pilot Candidate.* A candidate may not be classified IP if he has ever been eliminated from a military pilot training course or the Flight Instruction Program of the Army, Navy, or Air Force.

(ii) *IN-Navigator Candidate.* A candidate may not be classified IN if he has ever been eliminated from a military navigator-type training course.

(iii) *IM-Missile Duty Candidate.* A cadet not in category IP or IN who volunteers to be assigned to missile launch officer duty upon entry on active duty.

(2) *Category II.* Cadets not in Category I who are enrolled in a college program leading to at least a bachelor's degree with an academic major in specified scientific or engineering curriculums.

(3) *Category III.* Cadets not in Category I who are enrolled in a college program leading to at least a bachelor's degree with an academic major in other than those scientific or engineering curriculums specified in Category II.

(b) *AF Form 1056, "Air Force Reserve Officers' Training Corps Category Assignment."* Each contract cadet will be required to sign four copies of an AF Form 1056 which becomes effective upon the member's enlistment in the USAFR (ORS). The PAS will be certain that each cadet fully understands the terms of the category agreement. Disposition of the copies is as follows:

(1) Two copies are retained by the PAS and later forwarded to the Air Force Personnel Center (ARPC), through AFROTC as an attachment to the individual's application for appointment. Upon appointment, one copy is placed in the officer's Master Personnel Record (MPerR) and one in his Unit Personnel Record Group (UPRGp). If the cadet is disenrolled from AFROTC for any reason before commissioning, these copies may be used as supporting documents to the disenrollment investigation, if conducted, or retained for a specified period.

(2) One copy is furnished the member.

(3) The remaining copy is filed in the individual's AFROTC Cadet Record.

(c) *Acceptance of educational delay.* Cadets granted educational delays according to Part 875 of this chapter must, if they have not already done so, sign an AF Form 1056 specifying a date of separation (DOS).

§ 870.34 In-phase admission to the POC.

Admission to the POC is normally phased so that completion of the POC will not occur before completion of the requirements for a bachelor's degree. The Commandant, AFROTC, may prescribe exceptions to this policy (§ 870.82, note 2).

§ 870.36 Completed cadet status.

Completed cadet status is authorized for contract cadets who will complete bachelor's degree requirements within 12 months after completion of the AFROTC program. Students who have completed the AFROTC program and have been awarded a bachelor's degree or who will require completed status in excess of 12 months will not be retained in completed status without appropriate waiver (§ 870.84 gives waiver authority).

§ 870.38 Alien students.

(a) *Who may participate in AFROTC.* Aliens as defined in paragraph (a)(1) through (a)(3) of this section, are authorized to participate in the GMC and POC provided they are enrolled full time at a school hosting an AFROTC program or having cross-town agreement or consortium arrangement.

(1) Immigrants, regardless of their country of origin, who have been lawfully admitted for permanent residence in the United States and have in their possession Immigration Form I–151, "Alien Registration Receipt Card."

(2) Refugees still in a parole, conditional entry, or indefinite voluntary departure status, regardless of their country of orgin, and:

(i) They have in their possession Immigration Form I–94, "Arrival-Departure Record," bearing an Immigration and Naturalization Service stamp reading, "Refugee—Conditional Entry"; or

(ii) They are Cuban nationals who have in their possession Immigration Form I–94 endorsed by the Immigration and Naturalization Service to reflect either that they have been paroled into the United States for an indefinite period or have been granted "voluntary departure" for an indefinite period; or.

(iii) The Immigration and Naturalization Service has confirmed in writing that the alien is a refugee.

NOTE: A refugee is classified as an immigrant once he has been accepted for permanent residence and is issued an Immigration Form I–151.

V 38-150 AUG 6 73 XUM

(3) Nonimmigrant aliens, from countries shown on the list of countries approved by the Department of State whose citizens are eligible, may participate in the Senior ROTC program. An individual in this status has acknowledged that he does not intend to apply for U.S. citizenship. (The Commandant, AFROTC, will be furnished and retain custody of the list of countries approved by the Department of State. This list will be distributed on a "need-to-know" basis only.) The individual must:

(i) Have in his possession Immigration Form I-94.

(ii) Present to the Commandant, AFROTC, certification that his government has no objection to his receiving AFROTC training, or have in his possession Immigration Form I-94 stamped "paroled indefinitely" or "indefinite voluntary departure."

(b) *Enrollment limitations.*—(1) HQ USAF may limit alien enrollments of other than nonimmigrant aliens.

(2) Active recruiting of nonimmigrant alien students for the AFROTC program is prohibited.

(3) Alien students are eligible for enrollment in both the 2- and 4-year programs, and may be extended the advantages of membership thereof, except that they:

(i) May not receive a Selective Service deferment.

(ii) Will not be enlisted in the United States Air Force Reserve.

(iii) Will not be administered the Oath of Allegiance.

(iv) Are ineligible for bonetary assistance under the CSP.

(v) Will not be paid subsistence allowance prescribed by 37 U.S.C. 209(a).

(vi) Are ineligible for U.S. Air Force commissioning through the AFROTC program while still in alien status. (The Commandant, AFROTC, will establish procedures to insure that each alien student understands and has acknowledged that his participation in and completion of AFROTC will not result in his appointment as a Regular or Reserve officer of the United States Air Force.)

(4) Alien students will not be charged against the AFROTC enrollment limitations prescribed by HQ USAF.

(c) *Entitlements.* Alien students participating in AFROTC are entitled to:

(1) Wear the uniform. Institutions may be provided commutation funds at the rates prescribed by Part 874 of this chapter in lieu of issue-in-kind uniforms. The student must return uniform items to the institution when he completes or withdraws from the program.

(2) The same subsistence-in-kind and transportation-in-kind furnished other enrollees as prescribed by 10 U.S.C. 2110 (c).

(3) The same subsistence, transportation, medical attention, uniform clothing, and equipment furnished other enrollees while participating in field training (10 U.S.C. 2109(b)).

(4) Pay at the rate prescribed for cadets at the U.S. Air Force Academy (37 U.S.C. 209(c)), when participating in field training.

(d) *Attendance at field training.*—(1) Immigrants participating in the 4-year program will be permitted to attend 4-week field training only if they are admitted to membership.

(2) Immigrants who apply for entry into the 2-year program will be permitted to attend 6-week field training provided it can be reasonably assumed that they will qualify for membership prior to completion of the POC.

(3) Nonimmigrant aliens may attend either 4- or 6-week field training as normally scheduled.

(e) *Eligibility for membership.* Immigrants who become naturalized citizens of the United States may compete for GMC, POC, or CSP membership in the same manner as any other applicant and may request accreditation of successfully completed course work and corps training while in alien student status, in accordance with § 870.84, line 7. They are not authorized retroactive subsistence pay for any period of participation in the POC before attaining membership.

Subpart C—Selective Service Deferment of AFROTC Members and Designated Applicants

§ 870.40 Military colleges participating in the AFROTC program.

A member of an officer procurement program at a military college is not required to register under the Military Selective Service Act of 1967. In addition, he is relieved from liability for training and service and, therefore, need not execute AF Form 1041, "Deferment Agreement." The curriculum of the military college the student attends must be approved by the Secretary of Defense, Virginia Military Institute, The Citadel, and Norwich University, approved and designated as military colleges by the Secretary of Defense, participate in the AFROTC program. Membership in the AFROTC program at these institutions serves as the basis for ID classification.

§ 870.42 Deferment selection criteria.

The PAS at other than military colleges (§ 870.40) selects individuals for a deferment as follows:

(a) All members who have registered with Selective Service, have not completed their Military Service Obligation, and who are admitted to the:

(1) GMC as nonscholarship cadets will be given a deferment at the time of enrollment in their first Aerospace Studies Course, if they so elect, or any time thereafter at the cadets' request so long as they remain members of the GMC.

(2) POC under 10 U.S.C. 2104 or the CSP under 10 U.S.C. 2107 will be given a deferment or have it continued if one is in force at the time the AFROTC Category Agreement becomes effective.

(b) All other male members who are of draft are and who are:

(1) Scholarship cadets or nonscholarship POC cadets will be given a deferment at the time they register with Selective Service.

(2) Nonscholarship GMC cadets will be given a deferment at the time they register with Selective Service, if they so elect, or any time thereafter at the cadets' requests as long as they remain members of the GMC.

(c) Pursuing students may be deferred.

(d) GMC cadets who are members of a Reserve or National Guard unit need not be deferred, but will be reported according to § 870.56.

§ 870.44 Delay of induction.

(a) Designated applicants and 4-year CSP designees may not be deferred; however, their Selective Service boards may be requested to delay their induction pending enrollment as follows:

(1) *Designated applicants.* A letter may be sent once the individual is selected by the PAS as a designated applicant, but not earlier than the beginning of the spring term prior to the individual's scheduled enrollment in the POC.

(2) *Four-year CSP designees.* The PAS may notify the Selective Service board once it is determined that the individual requires a letter to permit his enrollment.

(b) If the designated applicant or CSP designee withdraws from consideration, the PAS must notify the board accordingly by letter.

(c) If the individual's board fails to honor the letter, the PAS may report the facts to AFROTC, who will in turn contact the Air Force Military Personnel Center if additional action is required.

§ 870.46 Length of deferment.

An individual's deferment normally remains in effect until he successfully completes the AFROTC program and accepts a commission. If he is disenrolled from AFROTC membership, his deferment will immediately be terminated unless he is recommended for involuntary call to extended active duty (EAD) in his enlisted grade.

§ 870.48 Actions required for deferment.

(a) The PAS (or his designated representative) will explain the following to the member:

(1) His military service obligation.

(2) The contractual obligation he assumes by signing the Deferment Agreement. Specifically, he agrees to accept an appointment, if offered, as a commissioned officer in the Air Force, and if:

(i) His services are required at the time of his appointment, he will serve on active duty for a minimum of two years and remain a member of a Regular or Reserve component until the sixth anniversary of his commission. (Note: The 6-year requirement applies notwithstanding the fact that the individual may have fulfilled the military service obligation specified in 10 U.S.C. 651.) Also, the active duty service commitment indicated in his AF Form 1056 takes precedence over the 2-year minimum prescribed by the Military Selective Service Act of 1967.

(ii) His services are not needed on active duty when he is appointed, he will serve on active duty for training for a period of three to six months and remain a member of a Reserve component until the eighth anniversary of his commission.

(3) That if his ID classification is changed by his local Selective Service board, he must immediately:

(i) Notify the PAS.

(ii) Submit a written appeal of his classification to his local Selective Service board.

(b) The member certifies that he:

(1) Agrees to the provisions of the Deferment Agreement by signing the AF Form 1041.

(2) Understands that signing the AF Form 1041 does not relieve him of his obligation of keeping his local Selective Service board informed of his status.

§ 870.50 Notifying Board of deferments and transfers.

(a) After the individual has completed and signed the AF Form 1041, the PAS will notify the local Selective Service Board when the individual:

(1) Enrolls in the GMC.

(2) Enrolls in the POC in pursuing student status.

(3) Is enlisted in the USAFR (ORS).

(4) Is gained through transfer.

(b) If the individual's board fails to honor the DD Form 44, "Record of Military Status of Registrant", the PAS will report the facts to AFROTC who will contact the Air Force Military Personnel Center if additional action is required.

§ 870.52 Notifying Board of change of deferment status.

If there is a change in an individual's deferment status:

(a) The PAS is responsible for notifying the Selective Service System of changes of deferment status of all individuals who are disenrolled from membership for reasons other than commissioning.

(b) ARPC is responsible for advising Selective Service boards as follows:

(1) AFROTC graduates. A revised DD Form 44 will be forwarded to the AFROTC graduate's local Selective Service board immediately after appointment as a Reserve officer, indicating the date the registrant was commissioned.

(2) Former AFROTC contract cadets awaiting orders to involuntary extended active duty in their enlisted grade. Individuals will be retained in a deferred status until ordered to EAD in their enlisted grade. A DD Form 44 will be prepared and forwarded as prescribed by Air Force Manual (AFM) 35-3, "Air Reserve Forces Personnel Administration," chapter 14, section E, for other members of the Air Reserve Forces who are serving in a draft deferred status (obligors who have not served on active duty other than for training for at least one year). If the individual is discharged from the Reserves before his EAD date for medical reasons, a copy of the SF 88, "Report of Medical Examination," serving as the basis for the medical disqualification, will be attached to the DD Form 44.

(3) Members disenrolled from AF ROTC and approved for discharge. A revised DD Form 44 will be forwarded to the individual's local Selective Service board immediately after discharge, indicating the effective date the registrant was discharged. For a nonprior service cadet, the statement, "Individual is eligible for service under appropriate Selective Service directives. He has no prior active military service.", will be included.

§ 870.54 Transfer procedures.

On transfer of a member to another institution and enrollment into the AF ROTC, the gaining PAS will prepare a revised DD Form 44, entering the member's new unit and location and forward it to the local Selective Service board with which the member is registered, requesting that the previously submitted form be rescinded.

Subpart D—Special Procedures

§ 870.56 Participation and assignment in the Reserve establishment or National Guard.

(a) Members of the GMC who are not members of the CSP may participate in any element of the Reserve establishment or National Guard. At the end of each calendar year the PAS furnishes the reservist's unit of assignment a statement that his participation in the AFROTC program has been satisfactory or unsatisfactory.

(b) If a member of the Reserve ceases to participate or is disenrolled from GMC membership, the PAS will notify the GMC cadet's unit of assignment.

§ 870.58 Credit for previous education, training, and experience.

(a) A cadet may be credited with a portion or portions of the GMC or POC as shown in § 870.86.

(b) Credit may not be granted for ROTC training received at any institution that did not have a commissioned officer of the military forces (active or retired) assigned by orders of a military department as a professor of military science, professor of naval science, or professor of aerospace studies.

§ 870.60 Enlistment of a reservist of another service.

For a reservist of another armed service, the PAS will:

(a) Request the individual's Reserve unit of assignment to grant a conditional release as a prerequisite to enlistment in the United States Air Force Reserve (USAFR) and admission to membership in the CSP/POC.

(b) Upon receipt of the conditional release, enlist the individual under Part 888d of this chapter, assign him to ARPC (OSR) (AFROTC), and attach him to the AFROTC detachment concerned.

(c) Forward the cadet's records to ARPC.

(d) Notify the releasing service that the individual is enlisted.

§ 870.62 Transfer of ROTC cadets.

(a) Interservice transfer between Army ROTC and Air Force ROTC is authorized under the Statement of Joint ROTC Policies.

(b) Transfer of AFROTC cadets between detachments is authorized. When a contract cadet transfers to another detachment, the PAS of the losing detachment will publish a Reserve Order confirming the transfer and provide a copy to ARPC.

(c) There is no formal agreement between the Air Force and the Navy regarding transfer of contract cadets; each such case will be submitted to AFROTC for individual evaluation.

Subpart E—Disenrollment and Discharge

§ 870.64 Disenrollment of member from the AFROTC program.

(a) The Commandant, AFROTC, may disenroll a cadet from the GMC (with the concurrence of institutional authorities if required), disenroll a POC cadet from membership, or withdraw a cadet from the CSP for any of the following reasons:

(1) Inability, without discredit, to continue regular enrollment in the institution.

(2) Failure to remain medically qualified for commissioning.

(3) Failure to maintain acceptable retention standards under prescribed competitive criteria.

(4) Individual's request for release for justifiable reasons.

(5) Inaptitude, indifference to training, breach or anticipatory breach of the terms of the category agreement, disciplinary reasons, or reasons involving undersirable traits of character.

(b) The Commandant, AFROTC, may delegate to the PAS the authority to disenroll cadets and/or withdraw them from the CSP.

(c) When the PAS initiates a disenrollment action on a contract cadet for any of the reasons in paragraph (a)(3) through (a)(5) of this section, he appoints a commissioned officer (on active duty) to investigate the case and submit a written report. When the investigation is conducted because the student may be found to be in violation of his category agreement, at least one university official (an administrator or faculty member appointed by the institution) will be permitted to observe the investigation or consult in the review if the university desires.

(EXCEPTIONS: (1) In disenrollment actions taken under paragraph (a)(3) of this section, where failure to maintain academic retention standards is documented and the individual is on academic/scholastic probation for consecutive academic terms, or when the individual is forced to leave school because of academic suspension, the appointment of an investigating officer and a written report are not required; (2) Appointment of an investigating officer and a written report are not required when HQ USAF, AU, or the Commandant, AFROTC, has reviewed a cadet's records and directed disenrollment.)

§ 870.66 Discharge from the United States Air Force Reserve.

When a cadet is disenrolled from the CSP/POC, he will be discharged from the USAFR (OSR) unless he is a member reported for involuntary call to extended active duty under Part 888d of this chapter.

V 38 150 AUG 6 73 XUM

§ 870.68 Notifying ARPC of disenrollments.

A roster of cadets and disenrolled cadets qualified for discharge under Part 888d of this chapter is submitted by the Commandant, AFROTC, to ARPC at least once a week. The Commandant, AFROTC, determines if disenrollment was the result of indifference to training, disciplinary reasons, breach or anticipatory breach of the terms of the category agreement, or declining to accept a commission. The names of such individuals will be reported to ARPC for involuntary order to active duty, as prescribed in Part 888d of this chapter.

Subpart F—Readmission

§ 870.70 Readmission.

The Commandant, AFROTC, prescribes policy and procedures for readmitting individuals for program completion and commissioning in the U.S. Air Force. This readmission is restricted to persons who have been disenrolled for the reasons stated in § 870.64(a)(1) through (4). A cadet disenrolled for any of the reasons in § 870.64(a)(5), is ineligible to reenroll if any Air Force officer procurement program or be appointed in any Air Force component unless waiver is authorized (§ 870.84).

Subpart G—Appointment and Assignment of Graduates

§ 870.72 Appointment of graduates.

Membership in the program in itself does not constitute a right to a commission in any Air Force component. The Commandant, AFROTC, shall appoint as a second lieutenant a contract cadet who has successfully completed the military and academic requirements of the program once he has received a bachelor's degree or an authorized institutional official certifies he has qualified for a degree which will be conferred at a later date, provided the cadet is otherwise qualified and is not to be released to another service under § 870.78.

(a) The date of rank of May and June appointees in any year will be the same as the graduates of the United States Air Force Academy.

(b) The Commandant, AFROTC, may not commission in the Reserve of the Air Force without a waiver from HQ USAF, a former Service Academy cadet (including Coast Guard and Merchant Marine) prior to the commissioning date of his Service Academy exclassmates (§ 870.84).

(c) If a student becomes involved with civil authorities, and criminal charges (except minor traffic violations) are filed or pending against him, he will not be commissioned until final disposition of the case is made. If criminal charges are not expected to be disposed of within 120 days after the cadet's scheduled commissioning date, a complete case file will be forwarded to the Air Force Military Personnel Center for waiver determination.

(d) Each POC cadet must recertify the AF Form 2061 as prescribed in AFR 30–19, "Improper or Illegal Use of Drugs," before appointment.

§ 870.74 Extended active duty for AFROTC graduates.

A contract cadet receiving an Air Force commission will normally enter active duty within one year of his graduation, unless a delay is approved under AFR 45–31, "Delay in Active Duty for AFROTC Graduates". A graduate must serve the period specified in the agreement (AF Form 1056) under which he was originally appointed, even though he may later be reappointed (such as a commissioned officer in the Medical Corps, Nurse Corps, Medical Service Corps, or Biomedical Sciences Corps). AFR 45–48, "Air Force Reserve Officers' Training Corps (AFROTC)," is the authority for ordering AFROTC graduates to initial active duty. AFR 45–26, "Voluntary Entry on Extended Active Duty (EAD) of Commissioned Officers of the Armed Forces," authorizes higher temporary grades in which certain officers may be entitled to enter active duty.

§ 870.76 Distinguished graduates.

The Commandant, AFROTC may designate up to 20 percent of the best qualified AFROTC graduates as Distinguished Graduates (DGs) during each fiscal year provided the quality of the student body is sufficiently high. To insure that only the highest quality students in the entire program are designated as DGs, the percentage of graduates from each school may vary. However, the total number of graduates designated during any fiscal year may not be more than 20 percent of the combined total number of graduates of that year.

§ 870.78 Release of AFROTC graduates for appointment in another service.

An AFROTC graduate who meets eligibility requirements listed in this section may be released from the Air Force to accept an appointment as a commissioned officer in the Army or the Marine Corps. The Navy does not offer direct appointments to ROTC graduates of another service.

(a) *Eligibility.* In addition to meeting normal eligibility requirements for an Air Force commission, a cadet must either have served one year on active duty in the service in which he desires an appointment, or his parent must be an active or retired member of that service (or have died while an active or retired member). Except in unusual cases, the Marine Corps will approve only applications from distinguished cadets or distinguished graduates who have reached their 20th birthday, but not their 25th birthday as of July 1 of the calendar year in which they are to be appointed.

(b) *Application procedures.*—(1) Applications will be submitted to the PAS and include:

(i) Reason for requesting selected service.

(ii) Reasonable proof that applicant meets eligibility requirements.

(iii) College transcripts.

(iv) Full length photograph of the applicant, in uniform without a cap.

(v) Results of physical examination (SFs 88 and 93).

(2) The Commandant, AFROTC, may grant a conditional release to eligible applicants. The release and the applications are forwarded to the Department of the Army, The Adjutant General or to the Commandant of the Marine Corps, as appropriate.

§ 870.80 Air Force appointment of ROTC graduates from another service.

An ROTC graduate of another service may be appointed as a commissioned officer in the Air Force, provided he meets eligibility requirements listed in this section and is granted a conditional release from his parent service. Approved applicants will be ordered to active military service with the Air Force as Reserve of the Air Force officers and will be required to serve at least four years of active service before becoming eligible for separation or release from active duty. Applicants for flying training will be required to serve five years of active service after award of aeronautical rating.

(a) *Eligibility.* An applicant must meet minimum AFROTC eligibility requirements for an Air Force commission as outlined in Part 881 of this chapter and this part. Applicant must either have served one year on active duty in the Air Force or his parent must be an active or retired member of the Air Force (or have died while an active or retired member).

(b) *Application procedures.* A cadet who desires appointment in the Air Force must apply, using regulations of his parent service. However, the following will be required by the Air Force before commissioning and entry on active duty:

(1) Reasonable proof that applicant has served one year on active duty in the Air Force or that his parent is or has been a career active duty member of the Air Force. If applicant has prior active military service in the Air Force, a copy of DD Form 214 is required.

(2) An AF Form 24, "Application for Appointment as Reserves of the Air Force or USAF Without Component," in duplicate.

(3) A SF 88 and 93, in duplicate. Flying training applicants must be administered a flight physical by an Air Force Flight Surgeon or Flight Medical Officer (class I for pilots—class IA for navigators).

(4) The results of the Air Force Officer Qualifying Test (any Air Force recruiter will schedule testing).

(5) A DD Form 398, "Statement of Personal History," in duplicate.

(6) A DD Form 98, in duplicate.

(7) Transcript of college work, as evidence of the applicant's educational level.

(8) Evidence of favorable completion of a BI or NAC, date completed, and location filed.

(9) Men applicants who have not attained their 26th birthday and who have had no prior military status, must submit statement required by Part 881 of this chapter.

(10) An applicant who is not a citizen of the United States by birth must submit statement required by Part 881 of this chapter.

(11) Recommendation of the Professor of Military or Naval Science.

(12) An Active Duty Service Commitment Statement of Understanding, dated and signed by the applicant.

(13) An AF Form 2061 and, if required, AF Form 2031.

Subpart H—Tables

§ 870.82 Eligibility requirements for admission to membership in AFROTC.

Rule	An individual must	If he desires to participate in: GMC (AS 100 AS 200)	FT	POC (Notes 1 & 2) (AS 300 AS 400)	CSP (N Notes 1 & 3)
1	be a full time student	X		X	X
2	be of good moral character and be medically qualified under AFM 160-1, "Medical Exams and Medical Standards"	(note 4)	X	X	X
3	execute the Oath of Allegiance	X	X	X	X
4	be a U.S. citizen	X	X (note 5)	X	X
5	enlist in the USAFR (note 6)			X	X
6	not be a conscientious objector	X (note 7)	X	X (note 7)	X
7	have attained age of 14	X			
8	have attained age of 17 if male and 18 if female		X (note 8)	X (note 9)	X (note 10)
9	sign Deferment Agreement (Military colleges and women excepted)	(note 11)	X	X	X
10	execute Armed Forces Security Questionnaire		X	X	X
11	execute AFROTC Category Agreement, with parental consent if under 21 years of age		X	X	X
12	be enrolled in the 4-year program	X			
13	successfully complete any general survey or screening test prescribed for his category		X (note 12)	X (note 12)	X (note 12)
14	meet the two academic years remaining requirement at time of enrollment			X	
15	be in good academic standing and not be on academic probation		X	X	X
16	successfully complete or receive credit for the GMC or successfully complete 6-week FT			X	
17	execute USAF Drug Abuse Certificate (note 13)		X	X	X

NOTES: 1. A Former member of a service academy (including Coast Guard and Merchant Marine Academies) is ineligible unless a waiver has been granted by AFMPC. He may be enrolled as a pursuing student and be deferred subject to the restriction of § 870.84, line 2.

2. Undergraduate students having less than two academic years remaining before graduation and graduate students may be selected for the POC if they have two academic years remaining on campus. However:

(a) Approval of AFMPC must be obtained before selection of students who will not complete advanced degree requirements within 12 months after commissioning.

(b) Applicants must sign a statement acknowledging that the needs of the Air Force are paramount and no guarantee of assignment in or related to any academic discipline can be given.

(c) Applicants who will be studying law upon commissioning must sign a statement of understanding that completion of legal licensing requirements in no way constitutes a guarantee of assignment to judge advocate duties.

3. Cadets in the 2- and 4-year program are eligible for membership in the CSP. Cadets initially becoming scholarship recipients at the AS 300 level must have completed the GMC, have received GMC credit under § 870.86, or have completed the 6-week field training. Cadets initially becoming scholarship recipients at the AS 200 level must be capable of completing the GMC before entry into the POC. Students enrolled in law school are prohibited from the CSP by the Defense Appropriation Act.

4. For GMC cadets, enrollment in the institution is considered as evidence of good moral character. Medical qualification is determined by authorities of the institution for GMC cadets.

5. See § 870.38(d) for exceptions.

6. If already a member of any Reserve component of any military department, including the USAFR, he must be discharged and reenlist in the USAFR or transfer to the USAFR.

7. An individual who claims to be a conscientious objector will be denied membership, but he may participate as a special student.

8. Individuals may attend field training if they will attain the age of enlistment before entry into the POC.

9. Must be able to complete all requirements for appointment by age 26½ if he is a Category IP or IN and by age 30, if Category IM, II, or III. The Commandant, AFROTC, may waive the maximum age restriction for outstanding and deserving cadets, provided the Category IP or IN cadet is commissioned and entered into flying training by age 27½; he may also waive the maximum age restriction for Category IM, II, or III cadets who were scheduled for commissioning by age 30 but because of unusual circumstances were not appointed. Commissioning must occur before a cadet attains the age of 32.

10. Must be able to complete all Aerospace Studies courses, prescribed field training, and degree requirements and not have reached his 25th birthday by June 30 of the calendar year in which he is eligible for appointment. (This requirement is statutory and cannot be waived.)

11. Provisions for deferments for GMC members are stated in § 870.42.

12. Applicants for the POC or CSP will be administered the AFOQT and their scores will be evaluated as part of the selection process. Categories IP and IN applicants must attain qualifying scores as prescribed by AFR 51–4, "Application Procedures for Undergraduate Pilot Training (UPT) and Undergraduate Navigator Training (UNT)."

13. If applicant fails to certify to no prior drug abuse on AF Form 2061, AF Form 2031 will be accomplished as outlined in AFR 30–19. Eligibility for enlistment is given in AFR 30–19.

V 38-150 AUG 6 73 XUM

§ 870.84 Individuals who require a waiver and waiver granting authority.

	A: If an individual requires a waiver for retention in or admittance to the AFROTC program, and is	B: then a waiver must be obtained prior to commissioning or prior to entry into the program, and waiver authority is		
		AFMPC	AU	AFROTC
1	a POC/CSP cadet or applicant who was a former service academy cadet and who will complete commissioning requirements before his ex-academy classmates	X		
2	any applicant for membership who was previously eliminated from an officer-type training program because of military inaptitude, indifference to training, major honor violations, undesirable traits of character, disciplinary reasons, or who resigned in the face of impending charges. (He will not be enrolled or granted a Selective Service deferment until waiver is approved.)	X (note 1)	X (note 2)	
3	a POC/CSP applicant who has previously attended a service academy (including the Coast Guard and Merchant Marine Academies)	X		
4	a POC/CSP applicant who attended but did not complete a service academy preparatory school or who has been a member of any officer program except a service academy		X	(note 3)
5	a POC/CSP applicant who is on academic probation or not in good academic standing		X (note 4)	X (note 5)
6	A POC applicant who requires more than one academic term in pursuing status to become eligible for membership.			X
7	an individual who, to qualify for membership, requires accreditation of successfully completed Aerospace Studies course work and training while in special or alien student status.			X
8	a POC cadet who will require completed cadet status in excess of 12 months or who will require retention in completed status after award of baccalaureate degree.			X
9	a cadet who had two academic years remaining when admitted to the POC but who, by virtue of superior performance or unusual circumstances, is eligible for earlier graduation and commissioning. (This includes concurrent enrollment required by school disestablishment action.)			X
10	a cadet who requires relief from normal retention standards (academic or disciplinary). (PAS may waive less than full-time student status for nonscholarship GMC cadets, and for POC members for the last academic term provided the cadet is enrolled in at least one course in addition to Aerospace Studies, or during the last academic term a cadet is in completed status.)			X (note 6)
11	a category IB/IX POC cadet or applicant who would exceed age 26½ at time of commissioning (may be waived if individual can be commissioned and entered into flying training by age 27½); a category IM/II/III POC cadet who would exceed age 30 at time of commissioning (may be waived to age 32 if the cadet was scheduled for commissioning but because of unusual circumstances was not appointed)			X
12	A POC/CSP applicant or cadet who has been convicted by a court-martial or a civil court for any offense other than that which is minor		X (note 7)	X (note 7)
13	A POC/CSP applicant or cadet who had had minor civil or military convictions which would not be prejudicial to his performance of duty as an Air Force officer and which do not indicate unacceptable traits of character			X
14	a POC/CSP applicant or cadet who has committed an offense resulting in less than a conviction			X (note 8)
15	in a condition which requires a waiver for reason other than enumerated in lines 1 through 14 above	X		

NOTES: 1. Former service academy cadets only.

2. AU will determine eligibility in all cases not involving former service academy cadets.

3. AFROTC may approve the readmission of certain former AFROTC cadets (§ 870.70).

4. To activate a scholarship a student must be in good academic standing or, if not in good academic standing, have both a cumulative grade point average and preceding term grade point average of at least 2.0 on the scale A is equal to 4.0.

5. AFROTC may prescribe procedures for attendance at the 6-week field training and enrollment in pursuing status.

6. A cadet may not be retained in scholarship status for more than one academic term during which he is not in good academic standing unless he has a cumulative and a term grade point average of at least 2.0 on the scale A is equal to 4.0.

7. AU may approve or disapprove; AFROTC may disapprove only.

8. Involvements which do not result in a conviction (such as deferred prosecution or nonjudicial punishment under the UCMJ) may indicate unacceptable traits of character or be prejudicial to an applicant or member's performance of duty as an Air Force officer. The Commandant, AFROTC, has authority to evaluate the circumstances of such involvements and grant or deny a waiver.

§ 870.86 Credit for previous education, training and military experience.

Line	A: If the applicant has successfully completed	B: then the PAS may credit	C: and additionally, the Commandant, AFROTC, may credit
1	a U.S. Armed Forces, Coast Guard, or Merchant Marine Academy preparatory school, or portions of the first two years at a U.S. Armed Forces, Coast Guard, or Merchant Marine Academy (note 1)	up to, but not exceeding an equivalent portion of the GMC	
2	the basic course or portions of the basic course while a member of Army, Navy, or Air Force ROTC		
3	at least two years of junior level (high school) ROTC, or equivalent training in the Civil Air Patrol	one academic term (semester, trimester, or quarter) of the GMC	
4	three years of junior level (high school) ROTC or equivalent training in the Civil Air Patrol (note 2)	one year of the GMC (note 3)	
5	four years of junior level ROTC (high school) at a military school or academy	the GMC or a portion of it (note 4)	
6	more than 60 days of active duty or active duty for training in any U.S. military department	the GMC or portion of it as prescribed by the Commandant, AFROTC (note 5)	(note 6)
7	portions of the last two years at a U.S. Armed Forces, Coast Guard, or Merchant Marine Academy	portions of the POC on a term-for-term/academic year basis (2d classman=AS 300) not to exceed one year	one additional term of the POC if the ex-academy cadet was disenrolled from the academy after successful completion of the first half of his senior year (note 1)
8	portions of the last two years of advanced training and/or field training of the Army	portions of the POC on a term-for term/academic year basis not to exceed one year and field training	one additional term of the POC if the former ROTC cadet was disenrolled from Senior ROTC after successful completion of at least one academic term of the last year (note 7)

Notes: 1. Refer to § 870.84 to determine required waiver action.

2. CAP cadets who earned the Carl A. Spaatz Award may be credited with 75 percent of the GMC.

3. Students presenting evidence of successful completion of a junior ROTC program are entitled to one year's credit in the GMC upon their request.

4. Rather than waive the entire GMC, consider requiring the cadet to complete at least one quarter or semester to give a basis on which to evaluate him for entrance into the POC.

5. The entire GMC will not be waived for cadets with less than 180 days of active duty or active duty for training.

6. The Commandant, AFROTC, may establish requirements and procedures for accrediting 4-week field training on the basis of previous military training and experience.

7. An additional term or terms may be credited by AU.

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

Title 41—Public Contracts and Property Management

CHAPTER 14—DEPARTMENT OF THE INTERIOR

PART 14-1—GENERAL

PART 14-12—LABOR

Identical Bid Reports; Deviations From Listing of Employment Openings

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301, Part 14-1 and Part 14-12 of Chapter 14 of Title 41 of the Code of Federal Regulations, are hereby amended.

It is the general policy of the Department of the Interior to allow time for interested parties to participate in the rule-making process. However, the amendments herein are minor and entirely administrative in nature. Therefore, the public rulemaking process is waived and these changes will become effective on August 10, 1973.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

JULY 30, 1973.

1. Part 14-1 of the Interior procurement regulations is amended by adding the following to the table of contents:

Subpart 14-1.16—Reports of Identical Bids

Sec.
14-1.1603 Reporting requirements.

2. Part 14-12 of the Interior procurement regulations is amended by adding the following to the table of contents:

Subpart 14-12.11—Listing of Employment Openings

Sec.
14-12.1102 List of employment openings.
14-12.1102-3 Deviations.

(AUTHORITY: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

2. Part 14-1 of the Interior Procurement Regulations is amended by adding the following § 14-1.1603 to Subpart 14-1.16.

Subpart 14-1.16—Reports of Identical Bids

§ 14-1.1603 Reporting requirements.

Reports on identical bids required by § 1-1.1603 of this title shall be submitted by the heads of bureaus and offices directly to the Attorney General in accord with § 1-1.1603-3 of this title. A copy of the transmittal letter and a copy of the abstract of bids shall be furnished to the Assistant Director for Procurement Policy, Office of Survey and Review.

3. Part 14-12 of the Interior Procurement Regulations is amended by adding the following to Subpart 14-12.11.

Subpart 14-12.11—Listing of Employment Openings

§ 14-12.1102 Listing of employment openings.

§ 14-12.1102-3 Deviations.

Any request to deviate from the requirements of Subpart 1-12.11 of this title shall be approved by the Director of Survey and Review before the request is sent to the Department of Labor.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

[FR Doc.73-16099 Filed 8-3-73;8:45 am]

CHAPTER 15—ENVIRONMENTAL PROTECTION AGENCY

PART 15-16—PROCUREMENT FORMS

Subpart 15-16.5—Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect-Engineer Contracts)

On January 10, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 1219-1223) stating that the Environmental Protection Agency proposed an amendment to 41 CFR 15-16.553, to add General Provisions to be used in Cost Reimbursement Contracts with Educational and other Nonprofit Institutions. Interested parties were invited to submit written data, views, or comments within 30 days after publication. Written comments were received, and after due consideration of the views presented, the regulation was revised and adopted as set forth below.

The purpose of this amendment is to illustrate EPA Form 1900-28, General Provisions for Use in Cost Reimbursement Contracts with Educational and Other Nonprofit Institutions.

Effective date. This amendment shall become effective on or before September 1, 1973.

Dated: August 1, 1973.

ROBERT W. FRI,
Acting Administrator.

A new Subpart 15-16.5, Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other than Construction and Architect-Engineer Contracts), consisting of § 15-16.553-4, is added to 40 CFR Part 15-16 to read as follows:

§ 15-16.553-4 General provisions.

GENERAL PROVISIONS

FOR USE IN COST REIMBURSEMENT CONTRACTS WITH EDUCATIONAL AND OTHER NONPROFIT INSTITUTIONS

The following listed clauses (1-39), previously published in the FEDERAL REGISTER, dated September 20, 1972, will be included:

1. Definitions
2. Disputes
3. Changes
4. Printing
5. Stop Work Order (Not applicable to contracts with Educational Institutions)

V 38 150 AUG 6 73 XUM

Sec.
6. Inspection.
7. Subcontracts
8. Competition in Subcontracting
9. Overtime
10. Foreign Travel
11. Services of Consultants
12. Insurance
13. Litigation and Claims
14. Notice to the Government of Delays
15. Limitation on Withholding of Payments
16. Interest (Not applicable to contracts with Educational Institutions)
17. Payment of Interest of Contractor's Claims
18. Audit and Records
19. Examination of Records by Comptroller General
20. Price Reduction for Defective Cost or Pricing Data
21. Subcontractor Cost and Pricing Data
22. Pricing of Adjustments
23. Assignment of Claims
24. Utilization of Small Business Concerns
25. Utilization of Labor Surplus Area Concerns
26. Utilization of Minority Business Enterprises.
27. Equal Opportunity
28. Listing of Employment Openings
29. Walsh-Healey Public Contracts Act
30. Contract Work Hours and Safety Standards Act—Overtime Compensation
31. Convict Labor
32. Buy American Act
33. Officials not to Benefit
34. Covenant Against Contingent Fees
35. Gratuities
36. Authorization and Consent
37. Rights in Data
38. Data Requirements
39. Notice and Assistance Regarding Patent and Copyright Infringement

In addition to the above, the following clauses will be included for use in cost reimbursement contracts with educational and other nonprofit institutions:

40. TERMINATION FOR CONVENIENCE OF THE GOVERNMENT

(a) The performance of work under this contract may be terminated, in whole or from time to time in part, by the Government whenever for any reason the Contracting Officer shall determine that such termination is in the best interest of the Government. Termination of work hereunder shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of work under the contract is terminated and the date upon which such termination becomes effective.

(b) After receipt of the Notice of Termination the Contractor shall cancel his outstanding commitments hereunder covering the procurement of materials, supplies, equipment, and miscellaneous items. In addition, the Contractor shall exercise all reasonable diligence to accomplish the cancellation or diversion of his outstanding commitments covering personal services and extending beyond the date of such termination to the extent that they relate to the performance of any work terminated by the notice. With respect to such canceled commitments the Contractor agrees to (1) settle all outstanding liabilities and all claims arising out of such cancellation of commitments, with the approval or ratification of the Contracting Officer, to the extent he may require, which approval or ratification shall be final for all purposes of this clause, and (2) assign to the Government, in the manner, at the time, and to the extent directed by the Contracting Officer, all of the right, title, and interest of the Contractor under the orders and subcontracts so terminated, in which case the Government shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts.

(c) The Contractor shall submit his termination claim to the Contracting Officer promptly after receipt of a Notice of Termination, but in no event later than one year from the effective date thereof, unless one or more extensions in writing are granted by the Contracting Officer upon written request of the Contractor within such one-year period or authorized extension thereof. Upon failure of the Contractor to submit his termination claim within the time allowed, the Contracting Officer may, subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, determine, on the basis of information available to him, the amount, if any, due to the Contractor by reason of the termination and shall thereupon pay to the Contractor the amount so determined.

(d) Any determination of costs under paragraph (c) shall be governed by the contract cost principles and procedures in Subpart 1–15.3 of the Federal Procurement Regulations (41 CFR 1–15.3) in effect on the date of this contract, except that if the Contractor is not an educational institution any costs claimed, agreed to, or determined pursuant to paragraphs (c) or (e) hereof shall be in accordance with Subpart 1–15.2 of the Federal Procurement Regulations (41 CFR 1–15.2) in effect on the date of this contract.

(e) Subject to the provisions of paragraph (c) above, and subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, the Contractor and the Contracting Officer may agree upon the whole or any part of the amount or amounts to be paid to the Contractor by reason of the termination under this clause, which amount or amounts may include any reasonable cancellation charges thereby incurred by the Contractor and any reasonable loss upon outstanding commitments for personal services which he is unable to cancel; *Provided, however,* That in connection with any outstanding commitments for personal services which the Contractor is unable to cancel, the Contractor shall have exercised reasonable diligence to divert such commitments to his other activities and operations. Any such agreement shall be embodied in an amendment to this contract and the Contractor shall be paid the agreed amount.

(f) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments against costs incurred by the Contractor in connection with the terminated portion of this contract, whenever, in the opinion of the Contracting Officer, the aggregate of such payments is within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand; *Provided,* That if such excess is not so paid upon demand, interest thereon shall be payable by the Contractor to the Government at the rate of 6 percent per annum, beginning 30 days from the date of such demand.

(g) The Contractor agrees to transfer title to the Government and deliver in the manner, at the times, and to the extent, if any, directed by the Contracting Officer, such information and items which, if the contract had been completed, would have been required to be furnished to the Government, including:

(1) Completed or partially completed plans, drawings, and information; and

(2) Materials or equipment produced or in process or acquired in connection with the performance of the work terminated by the notice.

Other than the above, any termination inventory resulting from the termination of the contract may, with the written approval of the Contracting Officer, be sold or acquired by the Contractor under the conditions prescribed by and at a price or prices approved by the Contracting Officer. The proceeds of any such disposition shall be applied in reduction of any payments to be made by the Government to the Contractor under this contract or shall otherwise be credited to the price or cost of work covered by this contract or paid in such other manner as the Contracting Officer may direct. Pending final disposition of property arising from the termination, the Contractor agrees to take such action as may be necessary, or as the Contracting Officer may direct, for the protection and preservation of the property related to this contract which is in the possession of the Contractor and in which the Government has or may acquire an interest.

(h) Any disputes as to questions of fact which may arise hereunder shall be subject to the "Disputes" clause of this contract.

41. GOVERNMENT PROPERTY

(a) *Government-Furnished Property.* The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described as Government-furnished property in the Schedule or specifications, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-furnished property"). The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-furnished property suitable for use will be delivered to the Contractor at the times stated in the Schedule or, if not so stated, in sufficient time to enable the Contractor to meet such delivery or performance dates. In the event that Government-furnished property is not delivered to the Contractor by such time or times, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay, if any, occasioned the Contractor and shall equitably adjust the estimated cost, fixed fee, or delivery or performance dates, or all of them, and any other contractual provisions affected by any such delay, in accordance with the procedures provided for in the clause of this contract entitled "Changes." In the event that Government-furnished property is received by the Contractor in a condition not suitable for the intended use, the Contractor shall, upon receipt thereof notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (i) return such property at the Government's expense or otherwise dispose of the property or (ii) effect repairs or modifications. Upon completion of (i) or (ii) above, the Contracting Officer upon written request of the Contractor shall equitably adjust the contract price, or delivery or performance dates, or all of them, and any other contractual provision effected by the return or disposition, or the repair or modification in accordance with the procedures provided for in the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-furnished property or delivery of such property in a

condition not suitable for its intended use.

(b) *Changes in Government-Furnished Property.* (1) By notice in writing, the Contracting Officer may (i) decrease the property furnished or to be furnished by the Government under this contract, and/or (ii) substitute other Government-owned property for property to be furnished by the Government, or to be acquired by the Contractor for the Government, under this contract. The Contractor shall promptly take such action as the Contracting Officer may direct with respect to the removal and shipping of property covered by such notice.

(2) In the event of any decrease in or substitution of property pursuant to paragraph (1) above, or any withdrawal of authority to use property provided under any other contract or lease, which property the Government had agreed in the Schedule to make available for the performance of this contract, the Contracting Officer, upon the written request of the Contractor (or, if the substitution of property causes a decrease in the cost of performance, on his own initiative), shall equitably adjust such contractual provisions as may be affected by the decrease, substitution or withdrawal, in accordance with the procedures provided for in the "Changes" clause of this contract.

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, for the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under the contract, shall pass to and vest in the Government upon (i) issuance for use of such property in the performance on this contract, or (ii) commencement of processing or use of such property in the performance of this contract, or (iii) reimbursement of the cost thereof by the Government in whole or in part, whichever first occurs. All Government-furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this paragraph, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(The following paragraph shall be substituted for (c) above when the contract is with an educational institution.)

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor with the prior approval of the Contracting Officer shall be vested in the Contractor without further obligation to the Government except as provided below, unless it is determined by the Contracting Officer that such vesting is not in furtherance of the objectives of the Government or unless their is not proper authority to vest title in the Contractor. Such title shall be vested in the Contractor upon acquisition of the property or as soon as feasible thereafter provided that:

(i) The Contractor shall not under any Government contract, or subcontract thereunder, charge for any depreciation, amortization, or use of such property.

(ii) At any time prior to twelve (12) months after completion or termination of the contract, the Contracting Officer reserves the right to require the Contractor to transfer title to property costing $1,000 or more per unit to the Government or to a third party named by the Contracting Officer.

(iii) The Contractor shall, within 30 days after completion of the contract, furnish the Contracting Officer a list of all property where title is vested in the Contractor. If no such property has vested, the report shall so state.

All Government furnished property, together with all property title to which vests in the Government under this clause, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government Property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reasons of affixation to any realty.

(d) *Property Administration.* The Contractor agrees to maintain and administer a property control system in accordance with EPA publication "Guide for Control of Government Property by Contractors," in effect as of the date of this contract, supplied by the Government. While the Contractor is responsible for the Government Property (Government furnished and Contractor acquired), the Government will maintain the official accountability records. For Government furnished property and Contractor acquired property to which the Government takes title.

(e) *Use of Government Property.* The Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(f) *Maintenance of Government Property.* The Contractor shall maintain and administer, in accordance with sound business practice, a program for the maintenance, repair, protection, and preservation of Government property so as to assure its full availability and usefulness for the performance of this contract. The Contractor shall take all reasonable steps to comply with all appropriate directions or instructions which the Contracting Officer may prescribe as reasonably necessary for the protection and disposition of Government property.

(g) *Risk of Loss.* (1) The Contractor shall not be liable for any loss of or damage to the Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) which results from willful misconduct or lack of good faith on the part of any one of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of—

(A) all or substantially all of the Contractor's business; or

(B) all or substantially all of the Contractor's operations at any one plant or separate location, in which this contract is being performed; or

(C) a separate and complete major industrial operation in connection with the performance of this contract;

(ii) which results from a failure on the part of the Contractor, due to the willful misconduct or lack of good faith on the part of any of his directors, officers, or other representatives mentioned in subparagraph (i) above—

(A) to maintain and administer, in accordance with sound industrial practice, the program for utilization, maintenance, repair, protection and preservation of Government property as required by paragraph (f) hereof, or to take all reasonable steps to comply with any appropriate written direction of the Contracting Officer under paragraph (f) hereof; or

(B) to establish, maintain and administer, in accordance with (d) above, a system for control of Government property;

(iii) for which the Contractor is otherwise responsible under the express terms of the clause or clauses designated in the Schedule;

(iv) which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement.

(2) If more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception. The Contractor shall obtain the approval of the Contracting Officer prior to transferring any Goverment property to a subcontractor. If the Contractor transfers Government property to the possession and control of a subcontractor, the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to the property as set forth above. However, the Contractor shall require the subcontractor to assume the risk of, and be responsible for, any loss or destruction of or damage to the property while in the latter's possession or control, except to the extent that the subcontract, with the prior approval of the Contracting Officer, provides for the relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of the prime contract.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provision for a reserve, covering the risk of loss of or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provisions of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best possible order and furnish to the Contracting Officer a statement of—

(i) the lost, destroyed and damaged Government property;

(ii) the time and origin of the loss, destruction or damage;

(iii) all known interests in commingled property of which the Government property is a part; and

(iv) the insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall make repairs and renovations of the damaged Government property or take such other action, as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, he shall use the proceeds to repair, renovate or replace the Government property involved, or shall credit such proceeds against the cost of the

V 38 150
AUG 6 73
XUM

work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The Contractor shall do nothing to prejudice the Government's right to recover against third parties for any such loss, destruction, or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where the subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

(h) *Access.* The Contractor agrees to make available to the Contracting Officer, at all reasonable times, at the office of the Contractor, all its property records under this contract, and the Government shall at all reasonable times have access to the premises where any of the Government property is located.

(i) *Final Accounting and Disposition of Government Property.* Upon the completion of this contract, or at such earlier dates as may be fixed by the Contracting Officer, the Contractor shall submit to the Contracting Officer in a form acceptable to him, inventory schedules covering all items of the Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, and shall deliver or make such other disposal of such Government property as may be directed or authorized by the Contracting Officer. The net proceeds of any such disposal shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct. The foregoing provisions shall apply to scrap from Government property; provided, however, that the Contracting Officer may authorize or direct the Contractor to omit from such inventory schedules any scrap consisting of faulty castings or forgings, or cutting and processing waste, such as chips, cuttings, borings, turnings, short ends, circles, trimmings, clippings, and remnants, and to dispose of such scrap in accordance with the Contractor's normal practice and account therefor as a part of general overhead or other reimbursable cost in accordance with the Contractor's established accounting procedures.

(j) *Restoration of Contractor's Premises and Abandonment.* Unless otherwise provided herein, the Government:

(i) May abandon any Government property in place, and thereupon all obligations of the Government regarding such abandoned property shall cease; and

(ii) has no obligation to the Contractor with regard to restoration or rehabilitation of the Contractor's premises, neither in case of abandonment (paragraph (j)(i) above), disposition on completion of need or of the contract (paragraph (i) above), nor otherwise, except for restoration or rehabilitation costs caused by removal of Government property pursuant to paragraph (b) above.

(k) *Communications.* All communications issued pursuant to this clause shall be in writing.

42. Principal Investigators

Where principal investigators have been identified in this contract, it has been determined that such named investigators are necessary for the successful performance of this contract; and the Contractor agrees to assign such persons to the performance of the work under this contract, and shall not reassign or remove any of them without the consent of the Contracting Officer. Whenever, for any reason, one or more of the aforementioned investigators is unavailable for assignment for work under the contract, the Contractor shall immediately notify the Contracting Officer to that effect and shall, subject to the approval of the Contracting Officer without formal modification to the contract, replace such investigators with investigators of substantially equal ability and qualifications.

43. Allowable Cost and Payment

(a) For the performance of this contract, the Government shall pay to the Contractor the cost thereof (hereinafter referred to as "allowable cost") determined by the Contracting Officer to be allowable in accordance with:

(1) Subpart 1–15.3 of the Federal Procurement Regulations as in effect on the date of this contract except that if the Contractor is not an educational institution the allowable costs shall be determined by Subpart 1–15.2 of FPR; and

(2) The terms of this contract.

(b) Once each month (or more frequent intervals, if approved by the Contracting Officer), the Contractor may submit to an authorized representative of the Contracting Officer, in such form and reasonable detail as such representative may require, an invoice or public voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute allowable cost.

(c) Promptly after receipt of each invoice or voucher and statement of cost, the Government shall, except as otherwise provided in this contract, subject to the provisions of (e) below, make payment thereon as approved by the Contracting Officer.

(d) (The following paragraph is not applicable to contracts with educational institutions).

Payment of the fixed fee, if any, shall be made to the Contractor as specified in the Schedule: Provided, however, that after payment of eight-five percent (85%) of the fixed fee set forth in the Schedule, further payment on account of the fixed fee shall be withheld until a reserve of either fifteen percent (15%) of the total fixed fee, or fifteen thousand dollars ($15,000.00), whichever is less, shall have been set aside.

(e) At any time or times prior to final payment under this contract, the Contracting Officer may have the invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by the Contracting Officer, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayments, or increased for underpayments, on preceding invoices or vouchers.

(f) A "completion invoice" or "completion voucher" shall be submitted upon the physical completion of all performance provisions and when all cost applicable to the contract have been incurred.

The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than one (1) year (or such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion. Upon the completion of the final audit and the receipt of a "final invoice" or "final voucher," the Government shall promptly pay to the Contractor any balance of allowable costs, and any part of the fixed fee, if any, which has been withheld pursuant to (d) above or otherwise not paid to the Contractor.

(g) The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government, to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver:

(1) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(2) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions:

(A) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor:

(B) Claims, together with reasonable expense incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract; provided, that such claims are not known to the Contractor on the date of execution of the release; and provided further, that the Contractor gives notice of such claims in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(C) Claims for reimbursement of costs (other than expenses of the Contractor by reason of his indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

(h) Any cost incurred by the Contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at his expense or without cost to the Government.

44. Limitation of Cost

(a) It is estimated that the total cost to the Government, for the performance of this contract will not exceed the estimated cost set forth in the Schedule, and the Contractor agrees to use his best efforts to perform the work specified in the Schedule and all obligations under this contract within such estimated cost. If, at any time, the Contractor has reason to believe that the cost which he expects to incur in the performance of this contract in the next succeeding sixty (60) days, when added to all costs previously incurred, will exceed seventy-five percent (75%) of the estimated cost set forth in the Schedule, or if, at any time, the Contractor has reason to believe that the total cost to the Government for the performance of his contract will be greater or substantially less than the then estimated cost hereof, the Contractor shall notify the Contracting Officer in writing to that effect, giving the revised estimate of such total cost for the performance of this contract.

(b) Except as required by other provisions of this contract specifically citing and stated to be an exception from this clause, the Government shall not be obligated to reimburse the Contractor for costs incurred in excess of the estimated cost set forth in the Schedule, and the Contractor shall not be obligated to continue performance under the contract (including actions under the Termination Clause) or otherwise to incur costs in excess of the estimated cost set forth in the Schedule, unless and until the Contracting Officer shall have notified the Contractor in writing that such estimated cost has been increased and shall have specified in such notice a revised estimated cost which shall thereupon constitute the estimated cost of performance of this contract. No notice, communication or representation in any other form or from any person other than the Contracting Officer shall affect the estimated cost of this contract. In the absence of the specified notice, the Government shall not be obligated to reimburse the Contractor for any costs in excess of the estimated cost set forth in the Schedule, whether those excess costs were incurred during the course of the contract or as a result of termination. When and to the extent that the estimated cost set forth in the Schedule has been increased, any costs incurred by the Contractor in excess of the estimated cost prior to such increase shall be allowable to the same extent as if such costs had been incurred after the increase unless the Contracting Officer issues a termination or other notice and directs that the increase is solely for the purpose of covering termination or other specified expenses.

(c) Change orders issued pursuant to the Changes clause of this contract shall not be considered an authorization to the Contractor to exceed the estimated cost set forth in the Schedule in the absence of a statement in the change order, or other contract modification, increasing the estimated cost.

(d) In the event this contract is terminated or the estimated cost not increased the Government and the Contractor shall negotiate an equitable distribution of all property produced or purchased under the contract based upon the share of costs incurred by each.

45. Negotiated Overhead Rates

(a) The following provisions shall be applicable to Educational Institutions when post determined rates are used:

(1) Notwithstanding the provisions of the clause of this contract entitled "Allowable Cost and Payment" the allowable indirect costs under this contract shall be obtained by applying negotiated overhead rates to bases agreed upon by the parties, as specified in the Contract Schedule Article entitled "Negotiated Overhead Rates."

(2) The Contractor, as soon as possible but not later than ninety (90) days after the expiration of his fiscal year, or such other period as may be specified in the contract, shall submit to the Cost Review and Policy Branch of the Contracts Management Division, with one copy each to the cognizant audit activity and the cognizant negotiating agency delegated in Attachment "A" of Office of Management and Budget Circular A–88, a proposed final overhead rate or rates for that period based on the Contractor's actual cost experience during that period, together with supporting cost data. Negotiation of final overhead rates by the Contractor and the Government shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(3) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with paragraph (a)(1) of the clause of this contract entitled "Allowable Cost and Payment."

(4) The results of each negotiation shall be set forth in a modification to this contract, which shall specify (1) the agreed final rates; (2) the bases to which the rates apply; and (3) the periods for which the rates apply. The incorporation of the negotiated final overhead rates by contract modification shall not change any monetary ceiling, contract obligation, or specific cost allowance or disallowance provided for in the contract.

(5) Pending establishment of final overhead rates for any period, the Contractor shall be reimbursed either at negotiated provisional rates as provided in the Contract Schedule or at billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that period are established. To prevent substantial over and under payment, and to apply either retroactively or prospectively: (1) provisional rates may, at the request of either party, be revised by mutual agreement; and (2) billing rates may be adjusted at any time by the Contracting Officer. Any such revision of negotiated provisional rates provided in the contract shall be set forth in a modification to this contract.

(6) Any failure by the parties to agree on any final rates under this clause shall be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract.

(7) Nothing in this clause shall preclude the parties from negotiating final overhead rates applicable to this contract for any period, for the purpose of contract close out, provided that (1) the negotiated amount of overhead costs applicable hereto does not exceed $200,000.00 for any one fiscal year; (2) there is agreement between the Government and the Contractor that there will be no adjustment against other Government contracts for over or under recovery under this contract disclosed through a subsequent, regular final overhead rate negotiation or determination; and (3) this contract is appropriately modified to reflect the finality of this negotiation and the fact that other contracts shall not be affected by any over or under recovery resulting therefrom.

(b) The following provisions shall be applicable to Educational Institutions when predetermined rates are used:

(1) Notwithstanding the provisions of the clause of this contract entitled "Allowable Cost and Payment" the allowable indirect costs under this contract shall be obtained by applying predetermined overhead rates for the applicable periods, to the bases agreed upon by the parties, as specified in the Contract Schedule Article entitled "Negotiated Overhead Rates."

(2) The Contractor, as soon as possible but not later than ninety (90) days after the expiration of his fiscal year, or such other periods as may be specified in the contract, shall submit to the Cost Review and Policy Branch of the Contracts Management Division, with one copy each to the cognizant audit activity and the cognizant negotiating agency delegated in Attachment "A" of Office of Management and Budget Circular A–88, a proposed predetermined overhead rate or rates, based on the Contractor's actual cost experience during that period, together with supporting cost data. Negotiation of predetermined overhead rates by the Contractor and the Government shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(3) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with paragraph (a)(1) of the clause of this contract entitled "Allowable Cost and Payment."

(4) The results of each negotiation shall be set forth in a modification to this contract, which shall specify (1) the agreed predetermined overhead rates; (2) the bases to which the rates apply; and (3) the periods for which the rates apply.

(5) Pending establishment of predetermined overhead rates for the initial period of contract performance or for any fiscal year or different period agreed to by the parties, the Contractor shall be reimbursed either at (1) the rates fixed for the previous fiscal year or other period; or (2) billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that fiscal year or other periods are established.

(6) Any failure by the parties to agree on any predetermined overhead rate or rates under this clause shall not be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract. If for any fiscal year or other period of contract performance the parties fail to agree to a predetermined overhead rate or rates, it is agreed that the allowable indirect costs under this contract shall be obtained by applying negotiated final overhead rates in accordance with the terms of the "Negotiated Overhead Rates—Postdetermined" clause set forth in paragraph (a) of this "Negotiated Overhead Rate Clause."

(c) The following provisions shall be applicable to Educational Institutions when fixed rates subject to carry forward adjustments are used:

(1) Notwithstanding the provisions of the clause of this contract entitled, "Allowable Cost and Payment," the allowable indirect costs under this contract shall be obtained by applying negotiated fixed overhead rates for the applicable periods to bases agreed upon by the parties, as specified in the Contract Schedule Article entitled "Negotiated Overhead Rates." A negotiated fixed rate(s) is based on an estimate of the costs which will be incurred during the period for which the rate(s) applies. When the application of the negotiated fixed rate(s) against the actual base(s) during a given fiscal period produces an amount greater or less than the indirect costs determined for such period, such greater or lesser amounts will be carried forward to a subsequent period.

(2) The Contractor, as soon as possible but not later than ninety (90) days after the expiration of his fiscal year, or such other periods as may be specified in the contract, shall submit to the Cost Review and Policy Branch of the Contracts Management Division, with one copy each to the cognizant audit activity and the cognizant negotiating agency delegated in Attachment "A" of Office of Management and Budget Circular A–88, a proposed fixed overhead rate or rates based on the Contractor's actual cost experience during the fiscal year, including adjustments, if any, for amounts carried forward, together with supporting cost data. When the application of the negotiated fixed rate(s) against the actual base(s) for a given fiscal period produces an amount greater or less than the actual indirect costs determined for that period, such greater or lesser amounts will be carried forward and reflected in the negotiated fixed rate(s) of a subsequent period. Negotiation of the fixed overhead rate(s) by the Contractor and the Government shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(3) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with paragraph (a)(1) of the clause of this contract entitled "Allowable Cost and Payment."

V 38-150 AUG 6 73 XUM

(4) The results of each negotiation shall be set forth in a modification to this contract, which shall specify (1) the agreed fixed overhead rates; (2) the bases to which the rates apply; and (3) the periods for which the rates apply.

(5) Pending establishment of fixed overhead rates for the initial period of contract performance or for any fiscal year or different period agreed to by the parties, the Contractor shall be reimbursed either at (1) the rates fixed for the previous fiscal year or other period; or (2) billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that fiscal year or other periods are established.

(6) Any failure by the parties to agree on any fixed overhead rate or rates or to the amount of any carry forward adjustment under this clause shall not be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract. If for any fiscal year or other period of contract performance the parties fail to agree to a fixed overhead rate or rates, it is agreed that the allowable indirect costs under this contract shall be obtained by applying negotiated final overhead rates in accordance with the terms of the "Negotiated Overhead Rates—Postdetermined" clause set forth in paragraph (a) of this "Negotiated Overhead Rate Clause."

(d) The following provisions shall be applicable to nonprofit institutions when post determined rates are used:

(1) Notwithstanding the provisions of the clause of this contract entitled "Allowable Cost and Payment" the allowable indirect costs under this contract shall be obtained by applying negotiated overhead rates to bases agreed upon by the parties, as specified in the Contract Schedule Article entitled "Negotiated Overhead Rates."

(2) The Contractor, as soon as possible but not later than ninety (90) days after the expiration of his fiscal year, or such other period as may be specified in the contract, shall submit to the Cost Review and Policy Branch of the Contracts Management Division, with a copy to the cognizant audit activity, a proposed final overhead rate or rates for that period based on the Contractor's actual cost experience during that period, together with supporting cost data. Negotation of final overhead rates by the Contractor and the Cost Review and Policy Branch shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(3) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with paragraph (a) (1) of the clause of this contract entitled "Allowable Cost and Payment."

(4) The results of each negotiation shall be set forth in a modification to this contract, which shall specify (1) the agreed final rates; (2) the bases to which the rates apply; and (3) the periods for which the rates apply. The incorporation of the negotiated final overhead rates by contract modification shall not change any monetary ceiling, contract obligation, or specific cost allowance or disallowance provided for in the contract.

(5) Pending establishment of final overhead rates for any period, the Contractor shall be reimbursed either at negotiated provisional rates as provided in the Contract Schedule or at billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that period are established. To prevent substantial over and under payment, and to apply either retroactively or prospectively: (1) provisional rates may, at the request of either party, be revised by mutual agreement; and (2) billing rates may be adjusted at any time by the Contracting Officer. Any such revision of negotiated provisional rates provided in the contract shall be set forth in a modification to this contract.

(6) Any failure by the parties to agree on any final rates under this clause shall be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract.

(7) Nothing in this clause shall preclude the parties from negotiating final overhead rates applicable to this contract for any period, for the purpose of contract closeout, provided that (1) the negotiated amount of overhead costs applicable hereto does not exceed $200,000.00 for any one fiscal year; (2) there is agreement between the Government and the Contractor that there will be no adjustment against other Government contracts for over or under recovery under this contract disclosed through a subsequent, regular final overhead rate negotiation or determination; and (3) this contract is appropriately modified to reflect the finality of this negotiation and the fact that other contracts shall not be affected by any over or under recovery resulting therefrom.

37. RIGHTS IN DATA

Paragraph (f) of clause no. 37 is deleted in its entirety and the following is substituted therefor:

(f) Publications. (1) The contractor shall submit to the Contracting Officer or his designee at least 30 (thirty) days prior to publication, a copy of each publication and other dissemination of information (other than publicity) that contains information resulting directly or indirectly from a contract supported activity.

(2) Any publication or other dissemination of information shall acknowledge Federal contract assistance by including the following:

This project has been funded at least in part with Federal funds from the Environmental Protection Agency under contract number ---------. The content of this publication does not necessarily reflect the views or policies of the U.S. Environmental Protection Agency; nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

(40 U.S.C. 486(c), sec. 205(c), 63 Stat. 377, as amended)

[FR Doc.73-16134 Filed 8-3-73;8:45 am]

Title 43—Public Lands: Interior

SUBTITLE A—OFFICE OF THE SECRETARY OF THE INTERIOR

PART 4—DEPARTMENT HEARINGS AND APPEALS PROCEDURES

PART 17a—RULES FOR PROCEEDINGS UNDER TITLE VI, CIVIL RIGHTS ACT OF 1964

Transfer of Regulations

On July 21, 1972, there was published in the FEDERAL REGISTER (37 FR 14609–14614), pursuant to section 602 of the Civil Rights Act of 1964 (42 U.S.C. 2000d–1) and Part 17 of this title, a notice and text of a proposal (1) to revise the regulations appearing in Part 17a of Title 43 of the Code of Federal Regulations for purposes of effecting clarifications and adapting the regulations to proposed amendments to Part 17 of this title, published December 9, 1971 (36 FR 23491–23494), pursuant to recommendations of an interagency committee for uniform Title VI regulations to effectuate the provisions of Title VI of the Civil Rights Act of 1964, and (2) to redesignate the revised regulations and incorporate them into the Department Hearings and Appeals Procedures contained in 43 CFR Part 4, as Subpart I thereof. The notice stated that Part 17a would thus be vacated.

Interested persons were given 30 days within which to participate in the rule making through the submission of written comments, suggestions or objections. No comments, suggestions or objections were received.

The amendments to Part 17 of this title, as proposed in the FEDERAL REGISTER publication of December 9, 1971, referred to above, to be consistent with the uniform amendments being adopted by Federal agencies, have now been published in the FEDERAL REGISTER as final rule making (38 FR 17975–17978, July 5, 1973). Certain additional amendments to conform to the uniform agency amendments, as well as other minor technical corrections, were included in this final rule making publication.

In view of the foregoing, the proposed revised regulations are adopted, without change other than correction of the obsolete term hearing examiner to administrative law judge (38 FR 10939–10940, May 3, 1973). The revised regulations are set forth below, and Part 17a of this title is vacated.

Effective date. These regulations shall be effective as of July 5, 1973, the effective date of the adoption by this Department of the uniform agency amendments referred to above.

Dated: July 30, 1973.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

1. Subpart I of 43 CFR Part 4 is added to read as set forth below.

Subpart I—Special Procedural Rules Applicable to Practice and Procedure for Hearings, Decisions, and Administrative Review Under Part 17 of this Title—Nondiscrimination in Federally-Assisted Programs of the Department of the Interior—Effectuation of Title VI of the Civil Rights Act of 1964

[CROSS REFERENCE: See Subpart A for the organization, authority and jurisdiction of the Office of Hearings and Appeals, including its Hearings Division. To the extent they are not inconsistent with these special rules, the general rules applicable to all types of proceedings before the Hearings Division and the several Appeals Boards of the Office of Hearings and Appeals, contained in Subpart B of this part, are applicable also to proceedings under these regulations.]

Subpart I—Special Procedural Rules Applicable To Practice and Procedure for Hearings, Decisions, and Administrative Review Under Part 17 of This Title—Nondiscrimination in Federally-Assisted Programs of the Department of the Interior—Effectuation of Title IV of the Civil Rights Act of 1964

GENERAL

§ 4.800 Scope and construction of rules.

(a) The rules of procedure in this Subpart I supplement Part 17 of this title and are applicable to the practice and procedure for hearings, decisions, and administrative review conducted by the Department of the Interior, pursuant to title VI of the Civil Rights Act of 1964 (section 602, 42 U.S.C. 2000d–1) and Part 17 of this title, concerning nondiscrimination in Federally-assisted programs in connection with which Federal financial assistance is extended under laws administered in whole or in part by the Department of the Interior.

(b) These regulations shall be liberally construed to secure the just, prompt, and inexpensive determination of all proceedings consistent with adequate consideration of the issues involved and full protection of the rights of all interested parties including the Government.

§ 4.801 Suspension of rules.

Upon notice to all parties, the responsible Department official or the administrative law judge, with respect to matters pending before him, may modify or waive any rule in this part upon his determination that no party will be unduly prejudiced and the ends of justice will thereby be served.

§ 4.802 Definitions.

(a) The definitions set forth in § 17.12 of this title apply also to this subpart.

(b) "Director" means the Director, Office for Equal Opportunity, Department of the Interior.

(c) "Administrative law judge" means an administrative law judge designated by the Office of Hearings and Appeals, Office of the Secretary, in accordance with 5 U.S.C. secs. 3105 and 3344.

(d) "Notice" means a notice of hearing in a proceeding instituted under Part 17 of this title and these regulations.

(e) "Party" means a recipient or applicant; the Director; and any person or organization participating in a proceeding pursuant to § 4.808.

4.803 Computation of time.

Except as otherwise provided by law, in computing any period of time under these rules or in an order issued hereunder, the time begins with the day following the act or event, and includes the last day of the period, unless it is a Saturday, Sunday, or Federal legal holiday, or other nonbusiness day, in which event it includes the next following day which is not a Saturday, Sunday, Federal legal holiday, or other nonbusiness day. When the period of time prescribed or allowed is 7 days or less, intermediate Saturdays, Sundays, Federal legal holidays and other nonbusiness days shall be excluded in the computation.

§ 4.804 Extensions of time.

A request for extension of time should be made to the designated administrative law judge or other appropriate Departmental official with respect to matters pending before him. Such request shall be served on all parties and set forth the reasons for the request. Extensions may be granted upon a showing of good cause by the applicant. Answers to such requests are permitted if made promptly.

§ 4.805 Reduction of time to file documents.

For good cause, the responsible Departmental official or the administrative law judge, with respect to matters pending before him, may reduce any time limit prescribed by the rules in this part, except as provided by law or in Part 17 of this title.

DESIGNATION AND RESPONSIBILITIES OF ADMINISTRATIVE LAW JUDGE

§ 4.806 Designation.

Hearings shall be held before an administrative law judge designated by the Office of Hearings and Appeals.

§ 4.807 Authority and responsibilities.

The administrative law judge shall have all powers necessary to preside over the parties and the proceedings, conduct the hearing, and make decisions in accordance with 5 U.S.C. secs. 554–557. His powers shall include, but not be limited to, the power to:

(a) Hold conferences to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding.

(b) Require parties to state their position with respect to the various issues in the proceedings.

(c) Establish rules for media coverage of the proceedings.

(d) Rule on motions and other procedural items in matters before him.

(e) Regulate the course of the hearing, the conduct of counsel, parties, witnesses, and other participants.

(f) Administer oaths, call witnesses on his own motion, examine witnesses, and direct witnesses to testify.

(g) Receive, rule on, exclude, or limit evidence.

(h) Fix time limits for submission of written documents in matters before him.

(i) Take any action authorized by these regulations, by 5 U.S.C. sec. 556, or by other pertinent law.

APPEARANCE AND PRACTICE

§ 4.808 Participation by a party.

Subject to the provisions contained in Part 1 of this subtitle, a party may appear in person, by representative, or by counsel, and participate fully in any proceeding held pursuant to Part 17 of this title and these regulations. A State agency or any instrumentality thereof, a political subdivision of the State or instrumentality thereof, or a corporation may appear by any of its officers or employees duly authorized to appear on its behalf.

§ 4.809 Determination of parties.

(a) The affected applicant or recipient to whom a notice of hearing or a notice of an opportunity for hearing has been mailed in accordance with Part 17 of this title and § 4.815, and the Director, are the initial parties to the proceeding.

(b) Other persons or organizations shall have the right to participate as parties if the final decision could directly and adversely affect them or the class they represent, and if they may contribute materially to the disposition of the proceedings.

(c) An person or organization wishing to participate as a party under this section shall submit a petition to the administrative law judge within 15 days after the notice has been served. The petition should be filed with the administrative law judge and served on the affected applicant or recipient, on the Di-

V 38-150
AUG 6 73
XUM

rector, and on any other person or organization who has been made a party at the time of filing. Such petition shall concisely state: (1) Petitioner's interest in the proceeding, (2) how his participation as a party will contribute materially to the disposition of the proceeding, (3) who will appear for petitioner, (4) the issues on which petitioner wishes to participate, and (5) whether petitioner intends to present witnesses.

(d) The administrative law judge shall promptly ascertain whether there are objections to the petition. He shall then determine whether petitioners have the requisite interest to be a party in the proceedings, as defined in paragraphs (a) and (b) of this section, and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interests, the administrative law judge may request all such petitioners to designate a single representative, or he may recognize one or more of such petitioners to represent all such petitioners. The administrative law judge shall give each such petitioner written notice of the decision on his petition. If the petition is denied, he shall briefly state the grounds for denial and shall then treat the petition as a request for participation as amicus curiae. The administrative law judge shall give written notice to each party of each petition granted.

(e) Persons or organizations whose petition for party participation is denied may appeal the decision to the Director, Office of Hearings and Appeals, within 7 days of receipt of denial. The Director, Office of Hearings and Appeals, will make the final decision for the Department to grant or deny the petition.

§ 4.810 Complainants not parties.

A person submitting a complaint pursuant to § 17.6 of this title is not a party to the proceedings governed by Part 17 of this title and these regulations, but may petition, after proceedings are initiated, to become an amicus curiae. In any event a complainant shall be advised of the time and place of the hearing.

§ 4.811 Determination and participation of amici.

(a) Any interested person or organization wishing to participate as amicus curiae in the proceeding shall file a petition before the commencement of the hearing. Such petition shall concisely state the petitioner's interest in the hearing and who will represent petitioner.

(b) The administrative law judge will grant the petition if he finds that the petitioner has an interest in the proceedings and may contribute materially to the disposition of the proceedings. The administrative law judge shall give the petitioner written notice of the decision on his petition.

(c) An amicus curiae is not a party and may not introduce evidence at a hearing but may only participate as provided in paragraph (d) of this section.

(d) An amicus curiae may submit a written statement of position to the administrative law judge at any time prior to the beginning of a hearing, and shall serve a copy on each party. He may also file a brief or written statement on each occasion a decision is to be made or a prior decision is subject to review. His brief or written statement shall be filed and served on each party within the time limits applicable to the party whose position he deems himself to support; or if he does not deem himself to support the position of any party, within the longest time limit applicable to any party at that particular stage of the proceedings.

(e) When all parties have completed their initial examination of a witness, any amicus curiae may request the administrative law judge to propound specific questions to the witness. The administrative law judge, in his discretion, may grant any such request if he believes the proposed additional testimony may assist materially in elucidating factual matters at issue between the parties and will not expand the issues.

FORM AND FILING OF DOCUMENTS

§ 4.812 Form.

Documents filed pursuant to a proceeding herein shall show the docket description and title of the proceeding, the party or amicus submitting the document, the dates signed, and the title, if any, and address of the signatory. The original will be signed in ink by the party representing the party or amicus. Copies need not be signed, but the name of the person signing the original shall be reproduced.

§ 4.813 Filing and service.

(a) All documents submitted in a proceeding shall be served on all parties. The original and two copies of each document shall be submitted for filing. Filings shall be made with the administrative law judge or other appropriate Departmental official before whom the proceeding is pending. With respect to exhibits and transcripts of testimony, only originals need be filed.

(b) Service upon a party or amicus shall be made by delivering one copy of each document requiring service in person or by certified mail, return receipt requested, properly addressed with postage prepaid, to the party or amicus or his attorney, or designated representative. Filing will be made in person or by certified mail, return receipt requested, to the administrative law judge or other appropriate Departmental official before whom the proceeding is pending.

(c) The date of filing or of service shall be the day when the matter is deposited in the U.S. mail or is delivered in person.

§ 4.814 Certificate of service.

The original of every document filed and required to be served upon parties shall be endorsed with a certificate of service signed by the party or amicus curiae making service or by his attorney or representative, stating that such service has been made, the date of service, and the manner of service.

PROCEDURES

§ 4.815 How proceedings are commenced.

Proceedings are commenced by the Director by mailing to an applicant or recipient a notice of alleged noncompliance with the Act and the regulations thereunder. The notice shall include either a notice of hearing fixing a date therefor or a notice of an opportunity for a hearing as provided in § 17.8 of this title. The notice shall advise the applicant or recipient of the action proposed to be taken, the specific provisions of Part 17 of this title under which the proposed action is to be taken, and the matters of fact or law asserted as the basis of the action.

§ 4.816 Notice of hearing and response thereto.

A notice of hearing shall fix a date not less than 30 days from the date of service of the notice of a hearing on matters alleged in the notice. If the applicant recipient does not desire a hearing, he should so state in writing, in which case the applicant or recipient shall have the right to further participate in the proceeding. Failure to appear at the time set for a hearing, without good cause, shall be deemed a waiver of the right to a hearing under section 602 of the Act and the regulations thereunder and consent to the making of a decision on such information as is available which may be presented for the record.

§ 4.817 Notice of opportunity to request a hearing and response thereto.

A notice of opportunity to request a hearing shall set a date not less than 20 days from service of said notice within which the applicant or recipient may file a request for a hearing, or may waive a hearing and submit written information and argument for the record, in which case, the applicant or recipient shall have the right to further participate in the proceeding. When the applicant or recipient elects to file a request for a hearing, a time shall be set for the hearing at a date not less than 20 days from the date applicant or recipient is notified of the date set for the hearing. Failure of the applicant or recipient to request a hearing or to appear at the date set shall be deemed a waiver of the right to a hearing, under section 602 of the Act and the regulations thereunder and consent to the making of a decision on such information as is available which may be presented for the record.

§ 4.818 Answer.

In any case covered by § 4.816 or § 4.817, the applicant or recipient shall file an answer. Said answer shall admit or deny each allegation of the notice, unless the applicant or recipient is without knowledge, in which case the answer shall so state, and the statement will be considered a denial. Failure to file an answer shall be deemed an admission of all allegations of fact in the notice. Allegations of fact in tht notice not denied or controverted by answer shall be deemed admitted. Matters alleged in the answer as affirmative defenses shall be separately stated and numbered. The answer under § 4.816 shall be filed within 20 days from the date of service of the notice of hearing. The answer under § 4.817 shall be filed within 20 days of service of the notice of opportunity to request a hearing.

§ 4.819 Amendment of notice or answer.

The Director may amend the notice of hearing or opportunity for hearing once as a matter of course before an answer is filed, and each respondent may amend his answer once as a matter of course not later than 10 days before the date fixed for hearing but in no event later than 20 days from the date of service of his original answer. Other amendments of the notice or of the answer to the notice shall be made only by leave of the administrative law judge. An amended notice shall be answered within 10 days of its service, or within the time for filing an answer to the original notice, whichever period is longer.

§ 4.820 Consolidated or joint hearings.

As provided in § 17.8(e) of this title, the Secretary may provide for proceedings in the Department to be joined or consolidated for hearing with proceedings in other Federal departments or agencies, by agreement with such other departments or agencies. All parties to any proceedings consolidated subsequently to service of the notice of hearing or opportunity for hearing shall be promptly served with notice of such consolidation.

§ 4.821 Motions.

Motions and petitions shall state the relief sought, the basis for relief and the authority relied upon. If made before or after the hearing itself, these matters shall be in writing. If made at the hearing, they may be stated orally; but the administrative law judge may require that they be reduced to writing and filed and served on all parties. Within 8 days after a written motion or petition is served, any party may file a response to a motion or petition. An immediate oral response may be made to an oral motion. Oral argument on motions will be at the discretion of the administrative law judge.

§ 4.822 Disposition of motions.

The administrative law judge may not grant a written motion or petition prior to expiration of the time for filing responses thereto, but may overrule or deny such motion or petition without awaiting response: *Provided, however,* That prehearing conferences, hearings, and decisions need not be delayed pending disposition of motions or petitions. Oral motions and petitions may be ruled on immediately.

§ 4.823 Interlocutory appeals.

Except as provided in § 4.809(e), a ruling of the administrative law judge may not be appealed to the Director, Office of Hearings and Appeals, prior to consideration of the entire proceeding by the administrative law judge unless permission is first obtained from the Director, Office of Hearings and Appeals, and the administrative law judge has certified the interlocutory ruling on the record or abused his discretion in refusing a request to so certify. Permission will not be granted except upon a showing that the ruling complained of involves a controlling question of law and that an immediate appeal therefrom may materially advance the final decision. An interlocutory appeal shall not operate to suspend the hearing unless otherwise ordered by the Director, Office of Hearings and Appeals. If an appeal is allowed, any party may file a brief within such period as the Director, Office of Hearings and Appeals, directs. Upon affirmance, reversal, or modification of the administrative law judge's interlocutory ruling or order, by the Director, Office of Hearings and Appeals, the case will be remanded promptly to the administrative law judge for further proceedings.

§ 4.824 Exhibits.

Proposed exhibits shall be exchanged at the prehearing conference, or otherwise prior to the hearing, if the administrative law judge so directs. Proposed exhibits not so exchanged in accordance with the administrative law judge's order may be denied admission as evidence. The authenticity of all exhibits submitted prior to the hearing, under direction of the administrative law judge, will be deemed admitted unless written objection thereto is filed and served on all parties, or unless good cause is shown for failure to file such written objection.

§ 4.825 Admissions as to facts and documents.

Not later than 15 days prior to the date of the hearing any party may serve upon an opposing party a written request for the admission of the genuineness and authenticity of any relevant documents described in, and exhibited with, the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters as to which an admission is requested shall be deemed admitted, unless within a period of 10 days, the party to whom the request is directed serves upon the requesting party a statement either (a) denying specifically the matters as to which an admission is requested, or (b) setting forth in detail the reasons why he cannot truthfully either admit or deny such matters.

§ 4.826 Discovery.

(a) *Methods.* Parties may obtain discovery as provided in these rules by depositions, written interrogatories, production of documents, or other items; or by permission to enter property, for inspection and other purposes.

(b) *Scope.* Parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the hearing.

(c) *Protective orders.* Upon motion by a party or by the person from whom discovery is sought, and for good cause shown, the administrative law judge may make any order which justice requires to limit or condition discovery in order to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense.

(d) *Sequence and timing.* Methods of discovery may be used in any sequence. The fact that a party is conducting discovery shall not operate to delay any other party's discovery.

(e) *Time limit.* Discovery by all parties will be completed within such time as the administrative law judge directs, from the date the notice of hearing is served on the applicant or recipient.

§ 4.827 Depositions.

(a) A party may take the testimony of any person, including a party, by deposition upon oral examination. This may be done by stipulation or by notice, as set forth in paragraph (b) of this section. On motion of any party or other person upon whom the notice is served, the administrative law judge may for cause shown enlarge or shorten the time for the deposition, change the place of the deposition, limit the scope of the deposition or quash the notice. Depositions of persons other than parties or their representatives shall be upon consent of the deponent.

(b)(1) The party will give reasonable notice in writing to every other party of the time and place for taking depositions, the name and address of each person to be examined, if known, or a general description sufficient to identify him or the particular class or group to which he belongs.

(2) The notice to a deponent may be accompanied by a request for the production of documents and tangible things at the taking of the deposition.

(3) A party may name as the deponent a corporation, partnership, association, or governmental agency and may designate a particular person within the organization whose testimony is desired and the matters on which examination is requested. If no particular person is named, the organization shall designate one or more agents to testify on its behalf, and may set forth the matters on which each will testify. The persons so designated shall testify as to matters known or reasonably available to the organization.

(c) Examination and cross-examination of witnesses may proceed as permitted at the hearing. The witness shall be placed under oath by a disinterested person qualified to administer oaths by the laws of the United States or of the place where the examination is held, and the testimony taken by such person shall be recorded verbatim.

(d) During the taking of a deposition a party or deponent may request suspension of the deposition on grounds of bad faith in the conduct of the examination, annoyance, embarrassment, oppression of a deponent or party or improper questions propounded. The deposition will then be adjourned. However, the objecting party or deponent must immediately move the administrative law judge for a ruling on his objections to the deposi-

V 38-150 AUG 6 73 XUM

tion conduct or proceedings. The administrative law judge may then limit the scope or manner of the taking of the deposition.

(e) The officer shall certify the deposition and promptly file it with the administrative law judge. Documents or true copies of documents and other items produced for inspection during the examination of the witness shall, upon the request of a party, be marked for identification and annexed to the deposition.

(f) The party taking the deposition shall give prompt notice of its filing to all other parties.

§ 4.828 Use of depositions at hearing.

(a) Any part or all of a deposition so far as admissible under § 4.835 applied as though the witness were then present and testifying, may be used against any party who was present or represented at the taking of the deposition or who had reasonable notice thereof as follows:

(1) Any deposition may be used for contradiction or impeachment of the deponent as a witness.

(2) The deposition of a party, or of an agent designated to testify on behalf of a party, may be used by an adverse party for any purpose.

(3) The deposition of any witness may be used for any purpose if the party offering the deposition has been unable to procure the attendance of the witness because he is dead; or if the witness is at a greater distance than 100 miles from the place of hearing, or is out of the United States, unless it appears that the absence of the witness was procured by the party offering the deposition; or if the witness is unable to attend or testify because of age, illness, infirmity, or imprisonment; or, upon application and notice, that such exceptional circumstances exist as to make it desirable, in the interest of justice and with due regard to the importance of presenting the testimony of witnesses orally in open hearing, to allow the deposition to be used.

(b) If only part of a deposition is offered in evidence, the remainder becomes subject to introduction by any party.

(c) Objection may be made at the hearing to receiving in evidence any deposition or part thereof for any reason which would require the exclusion of the evidence if the witness were then present and testifying.

§ 4.829 Interrogatories to parties.

(a) Any party may serve upon any other party written interrogatories after the notice of hearing has been filed. If the party served is a corporation, partnership, association, or governmental agency, an agent shall furnish such information as is available to the party.

(b) Each interrogatory shall be answered separately and fully in writing under oath, unless it is objected to, in which event the objection shall be stated in lieu of an answer. The answers are to be signed by the person making them, and the objections signed by the attorney or other representative making them. Answers and objections shall be made within 30 days after the service of the interrogatories. The party submitting the interrogatories may move for an order under § 4.831 with respect to any objection to or other failure to answer an interrogatory.

(c) Interrogatories shall relate to any matter not privileged which is relevant to the subject matter of the hearing.

§ 4.830 Production of documents and things and entry upon land for inspection and other purposes.

(a) After the notice of hearing has been filed, any party may serve on any other party a request to produce and/or permit the party, or someone acting on his behalf, to inspect and copy any designated documents, phonorecords, and other data compilations from which information can be obtained and which are in the possession, custody, or control of the party upon whom the request is served. If necessary, translation of data compilations shall be done by the party furnishing the information.

(b) After the notice of hearing has been filed, any party may serve on any other party a request to permit entry upon designated property in the possession or control of the party upon whom the request is served for the purpose of inspection, measuring, surveying or photographing, testing, or sampling the property or any designated object.

(c) Each request shall set forth with reasonable particularity the items to be inspected and shall specify a reasonable time, place, and manner of making the inspection and performing the related acts.

(d) The party upon whom the request is served shall respond within 15 days after the service of the request. The response shall state, with respect to each item, that inspection and related activities will be permitted as requested, unless there are objections in which case the reasons for each objection shall be stated. The party submitting the request may move for an order under § 4.831 with respect to any objection to or other failure to respond.

§ 4.831 Sanctions.

(a) A party, upon reasonable notice to other parties and all persons affected thereby, may move for an order as follows:

(1) If a deponent fails to answer a question propounded or submitted under § 4.827(c), or a corporation or other entity fails to make a designation under § 4.827(b)(3), or a party fails to answer an interrogatory submitted under § 4.829, or if a party, under § 4.830 fails to respond that inspection will be permitted or fails to permit inspection, the discovering party may move for an order compelling an answer, a designation, or inspection.

(2) An evasive or incomplete answer is to be treated as a failure to answer.

(b) If a party or an agent designated to testify fails to obey an order to permit discovery, the administrative law judge may make such orders as are just, including:

(1) That the matters regarding which the order was made or any other designated facts shall be established in accordance with the claim of the party obtaining the order;

(2) Refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting him from introducing designated matters in evidence.

(c) If a party or an agent designated to testify falls after proper service (1) to appear for his deposition, (2) to serve answers or objections to interrogatories submitted under § 4.829 or (3) to serve a written response to a request for inspection, submitted under § 4.830, the administrative law judge on motion may make such orders as are just, including those authorized under subparagraphs (1) and (2) of paragraph (b) of this section.

§ 4.832 Ex parte communications.

(a) Written or oral communications involving any substantive or procedural issue in a matter subject to these proceedings, directed to the administrative law judge, the Director, or the Director, Office of Hearings and Appeals, shall be deemed ex parte communications and are not to be considered part of any record or the basis for any official decision, unless the communication is made by motion pursuant to these rules.

(b) The administrative law judge shall not consult any person, or party, on any fact in issue or on the merits of the matter before him unless upon notice and opportunity for all parties to participate.

(c) No employee or agent of the Federal Government engaged in the investigation and prosecution of a proceeding governed by these rules shall participate or advise in the rendering of any recommended or final decision, except as witness or counsel in the proceeding.

PREHEARING

§ 4.833 Prehearing conferences.

(a) Within 15 days after the answer has been filed, the administrative law judge will establish a prehearing conference date for all parties including persons or organizations whose petition requesting party status has not been ruled upon. Written notice of the prehearing conference shall be sent by the administrative law judge.

(b) At the prehearing conference the following matters, among others, shall be considered: (1) Simplification and delineation of the issues to be heard; (2) stipulations; (3) limitation of number of witnesses; and exchange of witness lists; (4) procedure applicable to the proceeding; (5) offers of settlement; and (6) scheduling of the dates for exchange of exhibits. Additional prehearing conferences may be scheduled at the discretion of the administrative law judge, upon his own motion or the motion of a party.

HEARING

§ 4.834 Purpose.

(a) The hearing is directed primarily to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. A hearing will be held only in cases where issues of fact must be resolved in order to determine whether the applicant or recipient has failed to comply with one or more applicable requirements of title VI of the Civil Rights Act of 1964 (sec. 602, 42 U.S.C. 2000d–1) and Part 17 of this title. However, this shall not prevent the parties from entering into a stipulation of the facts.

(b) If all facts are stipulated, the proceedings shall go to conclusion in accordance with Part 17 of this title and the rules in this subpart.

(c) In any case where it appears from the answer of the applicant or recipient to the notice of hearing or notice of opportunity to request a hearing, from his failure timely to answer, or from his admissions or stipulations in the record that there are no matters of material fact in dispute, the administrative law judge may enter an order so finding, vacating the hearing date if one has been set, and fixing the time for the submission of evidence by the Government for the record. Thereafter, the proceedings shall go to conclusion in accordance with Part 17 of this title and the rules in this subpart. An appeal from such order may be allowed in accordance with the rules for interlocutory appeal in § 4.823.

§ 4.835 Evidence.

Formal rules of evidence will not apply to the proceeding. Irrelevant, immaterial, unreliable, and unduly repetitious evidence will be excluded from the record of a hearing. Hearsay evidence shall not be inadmissible as such.

§ 4.836 Official notice.

Whenever a party offers a public document, or part thereof, in evidence, and such document, or part thereof, has been shown by the offeror to be reasonably available to the public, such document need not be produced or marked for identification, but may be offered for official notice as a public document item by specifying the document or relevant part thereof. Official notice may also be taken of other matters, at the discretion of the administrative law judge.

§ 4.837 Testimony.

Testimony shall be given under oath by witnesses at the hearing. A witness shall be available for cross-examination, and, at the discretion of the administrative law judge, may be cross-examined without regard to the scope of direct examination as to any matter which is material to the proceeding.

§ 4.838 Objections.

Objections to evidence shall be timely, and the party making them shall briefly state the ground relied upon.

§ 4.839 Exceptions.

Exceptions to rulings of the administrative law judge are unnecessary. It is sufficient that a party, at the time the ruling of the administrative law judge is sought, makes known the action which he desires the administrative law judge to take, or his objection to an action taken, and his ground therefor.

§ 4.840 Offer of proof.

An offer of proof made in connection with an objection taken to any ruling of the administrative law judge excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony. If the excluded evidence consists of evidence in written form or consists of reference to documents, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof.

§ 4.841 Official transcript.

An official reporter will be designated for all hearings. The official transcripts of testimony and argument taken, together with any exhibits, briefs, or memoranda of law filed therewith, shall be filed with the administrative law judge. Transcripts may be obtained by the parties and the public from the official reporter at rates not to exceed the applicable rates fixed by the contract with the reporter. Upon notice to all parties, the administrative law judge may authorize such corrections to the transcript as are necessary to accurately reflect the testimony.

POSTHEARING PROCEDURES

§ 4.842 Proposed findings of fact and conclusions of law.

Within 30 days after the close of the hearing each party may file, or the administrative law judge may request, proposed findings of fact and conclusions of law together with supporting briefs. Such proposals and briefs shall be served on all parties and amici. Reply briefs may be submitted within 15 days after receipt of the initial proposals and briefs. Reply briefs should be filed and served on all parties and amici.

§ 4.843 Record for decision.

The administrative law judge will make his decision upon the basis of the record before him. The transcript of testimony, exhibits, and all papers, documents, and requests filed in the proceedings, shall constitute the record for decision and may be inspected and copied.

§ 4.844 Notification of right to file exceptions.

The provisions of § 17.9 of this title govern the making of decisions by administrative law judges, the Director, Office of Hearings and Appeals, and the Secretary. An administrative law judge shall, in any initial decision made by him, specifically inform the applicant or recipient of his right under § 17.9 of this title to file exceptions with the Director, Office of Hearings and Appeals. In instances in which the record is certified to the Director, Office of Hearings and Appeals, or he reviews the decision of an administrative law judge, he shall give the applicant or recipient a notice of certification or notice of review which specifically informs the applicant or recipient that, within a stated period, which shall not be less than 30 days after service of the notice, he may file briefs or other written statements of his contentions.

§ 4.845 Final review by Secretary.

Paragraph (f) of § 17.9 of this title requires that any final decision of an administrative law judge or of the Director, Office of Hearings and Appeals, which provides for the suspension or termination of, or the refusal to grant or continue Federal financial assistance, or the imposition of any other sanction available under Part 17 of this title or the Act, shall be transmitted to the Secretary. The applicant or recipient shall have 20 days following service upon him of such notice to submit to the Secretary exceptions to the decision and supporting briefs or memoranda suggesting remission or mitigation of the sanctions proposed. The Director shall have 10 days after the filing of the exceptions and briefs in which to reply.

2. Part 17a of Title 43 of the Code of Federal Regulations is vacated and reserved.

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5372]

[Oregon 8920]

OREGON

Withdrawal for Natural Area

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described land, which is under the jurisdiction of the Secretary of the Interior, is hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws, and reserved for scientific, educational, and research purposes:

WILLAMETTE MERIDIAN

LITTLE SINK NATURAL AREA

T. 8 S., R. 6 W.,
sec. 33, W½NW¼.

The area described aggregates 80 acres in Polk County.

2. The withdrawal made by this order does not alter the applicability of the public land laws governing the use of the land under lease, license, easement or permit, or governing the disposal of its mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

[Idaho 07510]

IDAHO

Withdrawal for National Forest Recreation Area

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

BOISE NATIONAL FOREST

BOISE MERIDIAN

Sage Hen Reservoir Recreation Area

T. 11 N., R. 2 E.,
sec. 2, lots 1 thru 4;
sec. 3, lot 1.
T. 12 N., R. 2 E.,
sec. 34, SE¼NE¼, E½SE¼;
sec. 35, N½N½, E½E½SE¼NE¼, W½NE¼SW¼NE¼, NW¼SW¼NE¼, N½SE¼NW¼, N½SW¼NW¼, W½SE¼SW¼NW¼, SW¼SW¼NW¼, E½NE¼SE¼, E½W½NE¼SE¼, W½E½NW¼SW¼, W½NW¼SW¼, SE¼SE¼, E½SW¼SE¼, E½W½SW¼SE¼, W½SW¼SW¼SE¼, E½SE¼SE¼SW¼, SW¼SE¼SE¼SW¼, S½SW¼SE¼SW¼, SE¼SE¼SW¼SW¼, W½E½SW¼SW¼, W½SW¼SW¼;
sec. 36, NW¼NW¼, SW¼NW¼, NW¼SW¼.

The areas described aggregate 728.59 acres in Gem and Valley Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

sec. 15, N½N½;
sec. 24, E½;
sec. 25;
sec. 26, SE¼;
sec. 35, N½N½.

The areas described aggregate approximately 29,215.66 acres of land in Dona Ana, Grant, Luna and Sierra Counties, of which 1,600 acres are privately owned.

The topography consists of broad nearly level to gently sloping semi-desert plains from which rise relatively narrow, but steep and rugged mountain ridges, isolated peaks and ranges of hills. The elevation ranges between 3,500 to 5,500 feet. Soils are shallow to moderately deep sandy loams. Vegetation is of the southwestern desert shrub type, of which the most common are creosote bush, mesquite, cacti, black grama, tobosa and dropseed grasses.

2. At 10 a.m. on September 4, 1973, the public lands described in paragraph 1 of this order shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on September 4, 1973, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands shall be open to location for nonmetalliferous minerals at 10 a.m. on September 4, 1973. They have been and continue to be open to applications and offers under the mineral leasing laws and to locations under the United States mining laws for metalliferous minerals.

Inquiries concerning the lands should be addressed to the Chief, Division of Technical Services, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

JACK O. HORTON,
Assistant Secretary of the Interior.

JULY 30, 1973.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19735; FCC 73-803]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Lyon, Kans.

In the matter of Amendment of § 73.202(b), Table of assignments, FM broadcast stations. (Lyons, Kansas)

1. On May 9, 1973, the Commission issued a notice of proposed rule making (FCC 73-489, 38 F.R. 13386) in the above-entitled matter, proposing the substitution of Channel 291 for Channel 288A at Lyons, Kansas. The proceeding was instituted on the basis of a petition filed by Rice County Broadcasting Co., Inc., licensee of Station KLOQ(FM), Lyons, Kansas. Station KLOQ is presently operating on Channel 288A which is the sole assignment in Lyons. Interested parties were invited to comment on the proposal on or before June 22, 1973, and could reply to such comments on or before July 3, 1973. There were no oppositions to the proposal. Supporting comments were filed by petitioner.

2. Lyons, population 4,355, is the seat of Rice County, population 12,320.[1] There are no standard broadcast stations in Rice County.

3. Petitioner points out that it desires to switch from a Class A to a Class C assignment so that it may increase the power and antenna height of its station (KLOQ) to enlarge its present service area. It maintains that the increased coverage is necessary for competitive position in the market, and if the switch is made, it immediately intends to increase power to 25 Kw and tower height to 500 feet. It contends that based on the FCC method of prediction of service, this increase in facilities would bring a first FM service to 193 people and a second to 23,374. Preclusion areas occur in the co-channel and five of the six pertinent adjacent channels as a result of the assignment of Channel 291 to Lyons. However, most of the communities located within these areas either have or can be assigned FM broadcast channels. In supporting comments, petitioner states that through a number of carefully planned steps over a period of years as the audience responds to this new medium, he intends to build Station KLOQ to 100 Kw circular polarization with a tall tower.

4. The Commission would ordinarily assign a Class A channel to a community the size of Lyons, but under the above circumstances the proposal to substitute Channel 291 for Channel 288A at Lyons, has public interest value and is worthy of adoption, in our view, because it is a reasonable means to provide a first and second FM service to 193 and 23,374 persons, respectively. Since Channel 291 can be assigned to Lyons and used at the present site without any other changes in the Table and in full conformity with all spacing requirements, we believe it should be granted.

5. The authority for the action taken herein is contained in Sections 4(i), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended.

6. Accordingly, *It is ordered*, That effective September 7, 1973, the Table of FM Assignments (§ 73.202(b) of the rules) is amended with respect to the city listed below as follows:

City	Channel No.
Lyons, Kansas	291

7. *It is further ordered*, That effective September 7, 1973, and pursuant to section 316(a) of the Communications Act of 1934, as amended, the outstanding license held by Rice County Broadcasting Co., Inc., for Station KLOQ(FM), Lyons, Kansas, is modified to specify operation on Channel 291 in lieu of Channel 288A subject to the following conditions.

(a) The licensee shall inform the Commission in writing by no later than September 27, 1973, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by September 7, 1973, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station KLOQ(FM) on Channel 291 at Lyons, Kansas.

(c) The licensee may continue to operate on Channel 288A under its outstanding authorization until it is ready to operate on the new frequency. Ten days prior to commencing operation on Channel 291, the licensee shall submit the same measurement data normally required in an application for an FM broadcast station license.

(d) The licensee shall not commence operation on Channel 291 until the Commission specifically authorizes it to do so.

8. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.)

By the Commission.

Adopted: July 26, 1973.

Released: July 31, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[2]
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-16138 Filed 8-3-73;8:45 am]

PART 87—AVIATION SERVICES

General Operator Requirements; Miscellaneous Amendment

In the matter of editorial amendment of Part 87 of the Federal Communications Commission's rules and regulations.

1. The Commission, by Memorandum Opinion and Order adopted December 8, 1971, granted a petition for reconsideration filed by the Aerospace and Flight Test Radio Coordinating Council to exempt certain aircraft stations from the requirement that operators hold a third class license or higher. Section 87.133 was thereby amended to limit the third class operator requirement to stations utilizing frequencies below 30 MHz not exclusively allocated to the aeronautical mobile service, or stations utilizing frequencies above 30 MHz not allocated exclusively to aeronautical mobile services and which are assigned for international use. This limitation was imposed to comply with Article 23 of the Radio Regulations of the International Telecommunication Union (ITU). Since Article 23 of the ITU Radio Regulations apply only to aircraft stations, it was the Commission's intention to require a third class or higher operator permit to aircraft stations operating in the frequency bands specified above. Section 87.133 is therefore editorially amended to eliminate any possible misinterpretation of the third class operator or higher requirement as applying to other classes of stations other than aircraft stations.

2. This amendment is editorial in nature, and hence the prior notice, and effective date provisions of 5 U.S.C. 553 are not applicable. Authority for the promulgation of this amendment is contained in Section 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commissions rules.

3. Accordingly, *It is ordered*, effective August 10, 1973. That Part 87 of the rules and regulations is amended as set forth below.

Adapted: July 30, 1973.

Released: July 31, 1973.

FEDERAL COMMUNICATIONS COMMISSION.
[SEAL] JOHN M. TOREBT,
Executive Director.

Section 87.133 is amended as follows:

§ 87.133 General operator requirements.

Except as provided for in §§ 87.134, 87.139 or as limited on the face of the

[1] Population figures cited are from the 1970 U.S. Census.

[2] Commissioner H. Rex Lee absent.

operator license or permit, all stations in the Aviation Services shall be operated by persons holding any class of commercial radio operator license or permit issued by the Commission: *Provided*, That, only a person holding a third class or higher operator permit shall operate aircraft stations (a) utilizing frequencies below 30 MHz not exclusively allocated to the aeronautical mobile service, or (b) utilizing frequencies above 30 MHz not allocated exclusively to aeronautical mobile services and which are assigned for international use. The licensed operator of a land or aeronautical public service station using telephony may permit other persons to transmit or to communicate under his direct supervision and responsibility over the facilities of the station in accordance with the terms of the station license.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1132; Amdt. 1]

PART 1033—CAR SERVICE

Distribution of Freight Cars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 31st day of July 1973.

Upon further consideration of Service Order No. 1132 (38 FR 9668), and good cause appearing therefor:

It is ordered, That:

Section 1033.1132 Service Order No. 1132 (Distribution of freight cars) be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 15, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., July 31, 1973.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2))

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

CHAPTER I—COST OF LIVING COUNCIL

PART 130—COST OF LIVING COUNCIL FREEZE REGULATIONS

Low Wage Employees

Correction

In FR Doc. 73-15883 appearing at page 20461 in the issue for Wednesday, August 1, 1973, make the following changes: In the sixth line of the first paragraph, "section 207(d)" should read "section 203(d)"; and in the second line of § 130.36(b), "section 207(d)" should read "section 203(d)".

PART 150—COST OF LIVING COUNCIL PHASE IV REGULATIONS

Phase IV Questions and Answers No. 5

These "Questions and Answers", which are issued by the Cost of Living Council, are designed to provide immediate guidance in understanding and applying the new regulations governing Stage A of Phase IV for food. To achieve the broadest publication, these are hereby added to Appendix B of Part 150. Since they provide guidance of general applicability and are subject to clarification, revision or revocation, they do not constitute legal rulings with respect to specific fact situations.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 FR 1473; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489)

Issued in Washington, D.C., on August 1, 1973.

JAMES W. MCLANE,
Deputy Director, Cost of Living Council.

Appendix B of Part 150 is amended by adding the following:

PHASE IV
QUESTIONS & ANSWERS

NO. 5

1. Q. A food processor has a freeze price of $1.50 and a freeze costs of $1.00 for a food product. During the freeze market conditions drove the food processor's price down and he sold his product to Firm A for $1.40. The food processor's current cost is $1.15 because of a 15¢ rise in raw agricultural costs. Due to a change in market conditions, the processor can now sell its same product for $1.60. May the food processor sell at this increased price? How much of an "allowable cost increase" may its processor certify on his invoice to Firm A?

A. The food processor has an "allowable cost increase" of $.15, i.e., $1.15 (current cost) minus $1.00 (freeze cost) = $.15. The processor could legally charge $1.65 for his product (his freeze price plus his allowable cost increase) and certify his full $.15 "allowable cost increase." However, because the market limits his price to $1.60, the processor can only certify $.10 of the allowable cost increase. The difference between the actual price charged during the freeze ($1.40) and the freeze price ($1.50) is not an allowable cost increase and may not be certified to Firm A as such. If the processor's current cost continues at $1.15, the processor may later raise his price to $1.65 to reflect the remaining allowable cost increase which has not yet been used to justify a price increase.

2. Q. A firm buys oats and barley from a farmer. He mixes them together, bags the mixture and sells it as mixed feed grain for animals. Is this a "food" product subject to the Stage A regulations?

A. Yes. Since the mixed oats and barley are for animal ingestion, the product falls within the definition of "food" under Phase IV, Stage A regulations, and because the product is processed, i.e., mixed, it is not exempt as a raw agricultural product under § 140.31.

3. Q. How may a restaurant distribute certified cost increases on food items it purchases in its menu prices?

A. In general the restaurant should pass-through the "allowable cost increases" on a basis proportional to the amount of the food item in the individual menu item. However, if such a proportional process is not feasible in light of customary business practices for cost allocation and repricing, the restaurant may increase prices in its customary fashion so long as the total price increase does not exceed the total allowable cost increase. Further, the menu item to which an "allowable cost increase" is added must contain some portion of the food item that had a certified cost increase. For example, certified "allowable cost increases" on a head of lettuce may be distributed to a ham sandwich containing lettuce according to customary business practices, but may not be reflected in the price of a cup of coffee.

4. Q. What is the procedure for certifying constantly rising raw agricultural costs (i.e., $8.10 per week) under the Stage A food regulations?

A. "Allowable cost increases" may be calculated at the end of a firm's customary repricing period. These increases must be indicated on the invoice on a cumulative basis. Example:

Customary repricing period is each week:	
Freeze Price of Processor	$0.70
Freeze Price of Retailer	1.00
Week No. 1: Allowable Cost Increase=$.10	
Processor's Price	$0.80
Retailer's Price	1.10
Week No. 2: Additional Allowable Cost Increase=$.10	
Processor's Price	$0.90
Retailer's Price	1.20
Week No. 3: Additional Allowable Cost Increase=$.10	
Processor's Price	$1.00
Retailer's Price	1.30
INVOICES (Processor to Retailer)	
Week No. 1:	
Price	$0.80
Allowable Cost Increase	.10
Week No. 2:	
Price	$0.90
Allowable Cost Increase	.20
Week No. 3:	
Price	$1.00
Allowable Cost Increase	.30
In the case of a cost decrease:	
Week No. 4: Cost Decrease—$.17	
Processor's Price	$0.83
Retailer's Price	1.13
INVOICE (processor to Retailer)	
Price	$0.83
Allowable Cost Increase	.13

5. Q. A flour miller has a "freeze cost" for flour of $7.00/cwt. (cost of wheat during June 1-3). His freeze price is $6.00/cwt. of flour. How may this processor adjust his price on flour pursuant to the new Stage A food regulations?

A. Since the freeze cost for flour exceeds the freeze price, the miller may now charge a price in excess of the freeze price pursuant to the new § 140.93(d) on a dollar-for-dollar basis to the extent that he incurred increases in raw agricultural product costs between January 10, 1973, and the freeze base period with respect to the flour which are not otherwise reflected in the freeze price. For example, if the miller can document that he incurred a 50 cents/cwt. of flour increase in raw agricultural product cost between January 10, 1973, and the freeze base period not otherwise reflected in his freeze price, he may begin charging $6.50/cwt. of flour after 4:00 p.m., e.s.t., July 18, 1973. However, in no case may the adjusted price be permitted to exceed the freeze cost through application of 6 CFR 140.93(d).

In addition to raising prices above the freeze price as indicated above, the miller may also raise prices pursuant to 6 CFR 140.93(b) to reflect "allowable cost increases" since June 8. In the above example, the freeze cost for the flour (i.e., the cost of the wheat) was $7.00/cwt. If his current cost of wheat is $7.61/cwt. of flour, the miller's "allowable cost increase" is 61 cents/cwt. of flour. The maximum price the miller may now charge for flour is $7.11/cwt. of flour, calculated by adding to the freeze price of $6.00/cwt. (1) the 50 cent price increase allowed under 6 CFR 140.93(d) and (2) the 61 cent price increase attributable to allowable cost increases incurred since the freeze base period.

6. Q. A firm which processes raw agricultural products customarily conducts hedging operations in terms of the processed products it makes. For example, a soybean crusher hedges bean cost against soybean meal and oil futures. May the net losses or gains from those hedging operations be reflected as raw agricultural product costs?

A. Yes. Question No. 5 of Q&A Sheet No. 2 fully applies to this situation. Gains or losses incurred by a food firm in its customary practice of hedging raw agricultural costs against processed product price are considered to be raw agricultural product costs in Phase IV, Stage A. Comprehensive records must be kept to show evidence of an actual cash position and the records must be made available upon request to economic stabilization personnel of the Internal Revenue Service.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 442, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period July 27-August 2, 1973. The quantity that may be shipped is increased due to improved market conditions for California-Arizona Valencia oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) and upon the basis of the recommendation and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Valencia Orange Regulation 442 (38 FR 19958). The marketing picture now indicates that there is a greater demand for Valencia oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Valencia oranges to fill the current demand thereby making a greater quantity of Valencia oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to given preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Valencia oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b)(1)(ii) of § 908.742 (Valencia Orange Regulation 442 (38 FR 19958) are hereby amended to read as follows:

§ 908.742 Valencia Orange Regulation 442.

* * * * *

(b)(1) * * *

(ii) District 2: 500,000 cartons.

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 1, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 73-16186 Filed 8-3-73;8:45 am]

[Pear Reg. 12]

PART 927—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

Regulation by Grades and Sizes

This regulation prescribes the grade and size requirements for the Beurre D'Anjou, Beurre Bosc, Winter Nelis, and Doyenne du Comice varieties of winter pears shipped from Oregon, Washington, and California, during the period August 6, 1973, through June 30, 1974.

On July 27, 1973, notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 20092) regarding a proposed regulation to be made effective pursuant to the marketing agreement, as amended, and Order No. 927, as amended (7 CFR Part 927), which regulate the handling of Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau varieties of pears grown in Oregon, Washington, and California. The proposed regulation was recommended by the Control Committee established pursuant to said marketing

V 38-150 AUG 6 73 XUM

agreement and order. This section program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The notice allowed interested persons to submit, through July 30, 1973, written data, views, or arguments pertaining to the proposed regulation. None were submitted.

This section reflects the Department's appraisal of the winter pear crop and the current and prospective market conditions. Seasonal shipments of fresh winter pears are expected to begin on or about August 6, 1973. The grade and size requirements hereinafter provided are designed to prevent the handling, on and after August 6, 1973, of any Beurre D'Anjou, Beurre Bosc, Doyenne du Comice, or Winter Nelis varieties of winter pears of lower grades and smaller sizes than hereinafter specified so as to provide consumers with good quality fruit, consistent with the overall quality of the crop, while improving returns to the producers pursuant to the declared policy of the act.

In addition to the basic grade and size requirements specified for Beurre D'Anjou, Beurre Bosc, and Doyenne du Comice pears, the regulation permits the handling of such pears bearing limited damage from skin punctures, however, this reduction in market desirability would be offset by the requirement that any pears thus affected be of a specified higher grade and larger size. Likewise, Beurre D'Anjou pears, grown in the Wenatchee District, which fail to meet U.S. No. 2 grade requirements only because of specified types of damage are required to be considerably larger than the basic minimum size with at least half of each pear showing no such damage. The provisions that any handler may ship size 180 Beurre D'Anjou pears of at least U.S. No. 1 grade in an amount not exceeding 2 percent of his total seasonal Beurre D'Anjou shipments that are U.S. No. 1 grade, or better, would permit the marketing of pears of a desirable quality which offsets the smaller size.

The requirement that the core temperature of Beurre D'Anjou pears grown in the Oregon and Washington Districts and shipped prior to October 15, 1973, must have been lowered to the specified temperature (35° F.) is designed to assure proper ripening of such pears.

After consideration of all relevant matter presented, including the proposal set forth in the aforesaid notice, the recommendation and information submitted by the Control Committee, and other available information, it is hereby found and determined that the regulation hereinafter set forth is in accordance with the provisions of said marketing agreement and order and will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of the varieties hereinafter specified are expected to begin on or about the effective date hereof and this section should be applicable to all such shipments in order to effectuate the declared policy of the act; (2) notice of proposed rule making concerning this regulation, with an effective date as hereinafter specified, was published in the FEDERAL REGISTER (38 FR 20092), and no objection to this section or such effective date was received; and (3) compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time thereof.

§ 927.312 Pear Regulation 12.

Order. (a) During the period August 6, 1973, through June 30, 1974, no handler shall ship any of the following varieties of pears which do not meet the requirements hereinafter specified:

(1) Beurre D'Anjou pears shall be of a size not smaller than 165 size and shall grade at least U.S. No. 2 except that any handler may ship a quantity of Beurre D'Anjou pears that are not smaller than 180 size and not less than U.S. No. 1 grade which quantity shall not exceed 2 percent of the total U.S. No. 1 or better grades of such variety shipped by the handler, during the aforesaid period: *Provided,* That pears of such variety which bear unhealed skin punctures not exceeding $\frac{1}{8}$ of an inch in diameter may be shipped if they otherwise grade at least U.S. No. 1 and are of a size not smaller than 135 size: *Provided further,* That pears of such variety grown in the Wenatchee District which fail to meet the requirements of U.S. No. 2 grade only because of serious, but not very serious, damage caused by frost injury, healed hail marks, russeting, or limbrubs, may be shipped if they are of a size not smaller than 135 size and they are not so seriously misshapen as to preclude the cutting of at least one good half;

(2) Beurre D'Anjou pears shipped from the Medford, Hood River-White Salmon-Underwood, Wenatchee, and Yakima Districts prior to October 15, 1973, shall have an appropriate certification by the Federal-State Inspection Service, issued prior to shipment, showing that the core temperature of such pears has been lowered to 35° Fahrenheit or less;

(3) Beurre Bosc pears shall grade at least U.S. No. 1 and shall be of a size not smaller than 195 size: *Provided,* That pears of such variety which grade at least U.S. No. 2 may be shipped if they are of a size not smaller than 180 size: *Provided further,* That pears of such variety which bear unhealed skin punctures not exceeding $\frac{1}{8}$ of an inch in diameter may be shipped if they otherwise grade at least U.S. No. 1 and are of a size not smaller than 135 size;

(4) Doyenne du Comice pears shall be of a size not smaller than 165 size and shall grade at least U.S. No. 2: *Provided,* That pears of such variety which bear unhealed skin punctures not exceeding $\frac{1}{8}$ of an inch in diameter may be shipped if they otherwise grade at least U.S. No. 1 and are of a size not smaller than 135 size; and

(5) Winter Nelis pears shall be of a size not smaller than 195 size and shall grade at least U.S. No. 2.

(b) During the aforesaid period, each handler may ship on any one conveyance up to, but not to exceed, 200 standard western pear boxes of any variety of pears, or an equivalent quantity of pears in other containers computed by weight to the nearest 5 pounds, without regard to the inspection requirements of § 927.60 (a), under the following conditions:

(1) Each handler desiring to make shipment of pears pursuant to this paragraph (b) (1) shall first apply to the committee, on forms furnished by the committee, for permission to make such shipments. At the time of any such shipment the handler shall report to the committee, on forms supplied by the committee, the car or truck number and the destination of the shipment.

(2) On the basis of such individual reports the committee shall require spot check inspectors of such shipments.

(c) When used herein, "U.S. No. 1" and "U.S. No. 2" shall have the same meaning as when used in the United States Standards for Winter Pears such as Anjou, Bosc, Winter Nelis, Comice, and Other Similar Varieties (7 CFR 51.1300–51.1323); "135 size," "165 size," "130 size," and "195 size" shall mean that the pears are of a size which, as indicated by the size number, will pack, in accordance with the sizing and packing specifications of a standard pack as specified in said United States Standards, 135, 165, 180, or 195 pears, respectively, in a standard western pear box (inside dimensions 18 inches long by 11½ inches wide by 8½ inches deep); "very serious damage" shall mean any injury or defect which very seriously affects the appearance or the edible or shipping quality of the pears; and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 2, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

Nonimmigrant Documentary Waivers

Correction

In FR Doc. 73–14442 appearing on page 18868 in the issue of Monday, July 16, 1973, in § 212.1 (e) (1), in the 25th and 26th lines the word "Vietnam" should read "Viet-Nam".

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS: EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

[Docket No. 73–522]

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Release of Areas Quarantined

This amendment excludes portions of Hamilton and Tipton Counties in Indiana from the areas quarantine because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded areas, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantine areas contained in said Part 76 apply to the excluded areas. No areas in Indiana remain under quarantine.

Pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

In § 76.2, paragraph (e) (1) relating to the State of Indiana is deleted.

(Sec. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 37 F.R. 28464, 28477.)

Effective date. The foregoing amendment shall become effective July 31, 1973.

The amendment relieves restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 31st day of July, 1973.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73–16129 Filed 8–3–73;8:45 am]

CHAPTER II—PACKERS AND STOCKYARDS ADMINISTRATION, DEPARTMENT OF AGRICULTURE

PART 203—STATEMENT OF GENERAL POLICY UNDER THE PACKERS AND STOCKYARDS ACT

Advertising Allowances and Other Merchandising Payments and Services

On April 12, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 9238) regarding the proposed issuance of a statement of general policy with respect to advertising payments and services provided by meat packers. Interested persons were given an opportunity to submit written data, views, and arguments concerning the proposed statement by no later than July 1, 1973.

One comment received agreed with the general requirement that a packer take reasonable precautions to see that services for which he is paying are actually performed and that he is not overpaying for them. It opposed the suggestion (found in the footnote to Example 1, paragraph 6) that "allowances that have little or no relationship to cost or approximate cost of the service provided by the retailer may be considered to be in violation of section 202 of the Act." The comment submits that an allowance or payment based upon the value of such service is not an unfair trade practice.

In determining the need for this statement of policy with respect to advertising allowances, consideration was given to the use of cost or value of services provided. Investigations of such matters disclosed discriminatory practices when actual cost was not used. Therefore, the Packers and Stockyards Administration must consider that an allowance that has little or no relationship to cost or approximate cost of the service provided by the retailer may be in violation of section 202 of the Act.

After consideration of all views, comments, and arguments received and all other relevant information, the following statement with respect to advertising allowances and other merchandising payments and services made by meat packers subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), has been formulated and adopted by the Packers and Stockyards Administration for the guidance of packers and other persons and is issued as § 203.14 of Part 203, Chapter II, Title 9, Code of Federal Regulations, to read as follows:

§ 203.14 Statement with respect to advertising allowances and other merchandising payments and services.

(a) The Packers and Stockyards Administration has received complaints during the past several years concerning payments made to customers or retailers by packers subject to the Packers and Stockyards Act, purportedly for advertising allowances and other promotional services. Investigations were conducted of these complaints, some of which disclosed apparent violations of the provisions of the Packers and Stockyards Act. It was found in some cases that there was no relationship between the payment made and the cost of furnishing the services. The investigations further disclosed that the terms of the contract were not always complied with in that the payments received by customers were not used for the purposes specified.

(b) (1) In view of the importance of this problem in the industry, it was determined that a policy statement should be issued to provide guidelines for the industry in order to assist firms in complying with the provisions of the Packers and Stockyards Act. This statement applies to any meat packer subject to the Packers and Stockyards Act, when such packer either directly or through an intermediary pays for or furnishes services to a customer who competes with any other customer in the resale of the packer's products of like grade and quality.

(2) The following statement of general policy has been developed after extensive consultations with members of the trade and represents the views of the Packers and Stockyards Administration with respect to the use of advertising allowances and other promotional services in connection with the sale of the packer's products.

THE GUIDELINES

1. *Who is a customer?* (a) A "customer" is a person who buys for resale directly from the packer, or through the packer's agent or broker; and in addition, a customer is any buyer of the packer's product for resale who purchases from or through a wholesaler or other intermediate reseller.

(NOTE: In determining whether a packer has fulfilled his obligations toward his customers, the Packers and Stockyards Administration will recognize that there may be some exceptions to this general definition of "customer." For example, the purchaser of distress merchandise would not be considered a "customer" simply on the basis of such purchase. Similarly, a retailer who purchases solely from other retailers, or one who makes only sporadic purchases, or one who does not regularly sell the packer's product or who is a type of retail outlet not usually selling such products will not be considered a "customer" of the packer unless the packer has been put on notice that such retailer is selling his product.)

(b) "Competing customers" are all businesses that compete in the resale of the packer's products of like grade and quality at the same functional level of distribution, regardless of whether they purchase direct from the packer or through some intermediary.

Example: A packer sells directly to some independent retailers, sells to the headquarters of chains and of retailer-owned cooperatives, and also sells to wholesalers. The direct-buying independent retailers, the headquarters of chains and of retailer-owned cooperatives, and the wholesalers' independent retailer customers are customers of the packer. Individual retail outlets which are part of the chains or members of the retailer-owned cooperatives are not customers of the packer.

2. *Definition of services.* "Services" are any kind of advertising or promotion of a packer's product, including but not limited to, cooperative advertising, handbills, window and floor displays, demonstrators and demonstrations.

3. *Need for a plan.* If a packer makes payments or furnishes services, he should do so under a plan that meets several requirements. If there are many competing customers to be considered, or if the plan is at all complex, the packer would be well advised

V 38-150 AUG 6 73 XUM

to put his plan in writing. Briefly, the requirements are:

(a) The payments or services under the plan should be available on proportionally equal terms to all competing customers.

(b) The packer should take action designed to inform all of his competing customers of the existence of and essential features of the promotion plan in ample time for them to take full advantage of it.

(c) If the basic plan is not functionally available to (i.e., suitable for and usable by) some customers competing in the resale of the packer's products of like grade and quality with those being furnished payments or services, alternatives that are functionally available should be offered to such customers.

(d) In informing customers of the details of a plan, the packer should provide them sufficient information to give a clear understanding of the exact terms of the offer, including all alternatives and the conditions upon which payment will be made or services furnished.

(e) The packer should take reasonable precautions to see that the services are actually performed and that he is not overpaying for them.

4. *Proportionally equal terms.* The payments or services under the plan should be made available to all competing customers on proportionally equal terms. This means that payments or services should be proportionalized on some basis that is fair to all customers who compete in the resale of the packer's products. No single way to proportionalize is prescribed, and any method that treats competing customers on proportionally equal terms may be used. Generally, this can best be done by basing the payments made or the services furnished on the dollar volume or on the quantity of goods purchased during a specified period. Other methods which are fair to all competing customers are also acceptable.

Example 1: A packer may properly offer to pay a specified part (say 50 percent) of the cost of local advertising up to an amount equal to a set percentage (such as 5 percent) of the dollar volume of purchases during a specified time.

Example 2: A packer may properly place in reserve for each customer a specified amount of money for each unit purchased and use it to reimburse those customers for the actual cost of their advertising of the packer's product.

Example 3: A packer should not select one or a few customers to receive special allowances (e.g., 5 percent of purchases) to promote his product while making allowances available on some lesser basis (e.g., 2 percent of purchases) to customers who compete with them.

Example 4: A packer's plan should not provide an allowance on a basis that has rates graduated with the amount of goods purchased, as for instance, 1 percent of the first $1,000 purchases per month, 2 percent on second $1,000 per month, and 3 percent on all over that.

Example 5: A packer should not identify or feature one or a few customers in his own advertising without making the same service available on proportionally equal terms to customers competing with the customer or customers.

Example 6: A packer should not offer to pay a straight line rate for advertising if such payment results in a discrimination between competing customers; e.g., the offer of $1 per line for advertising in a newspaper that charges competing customers different amounts for the same advertising space.

(The straight line rate for advertising is an acceptable method for allocation of advertising funds, if the packer offers an alternative to retailers that pays more than the lowest newspaper rate which enables small retailers to obtain the same percentage of the cost of advertising as large retailers. Example: A packer's straight line rate of payment of $1 per line is based on 50 percent of the newspaper's lowest contract rate of $2 per line. The packer should offer to pay 50 percent of the newspaper advertising cost of the smaller retailers who established by invoice or otherwise that they paid more than the lowest contract rate of $2 per line for advertising.)

Example 7: A packer should not refuse to participate in the cost of ads that feature prices other than the packer's suggested prices. (See Item 6.)

5. *Packer's duty to inform.* The packer should take reasonable action, in good faith, to inform all his competing customers of the availability of his promotional program. Such notification should include all the relevant details of the offer in time to enable customers to make an informed judgment whether to participate. In the alternative, such notification should include a summary of the essential features and a specific source to contact for further details on a specific promotion. Where such one-step notification is impracticable, the packer may, in lieu thereof, maintain a continuing program of first notifying all competing customers of the types of promotions offered by the packer and a specific source for the customer to contact in order to receive full and timely notice of all relevant details of the packer's promotions. Such notice should also inform all competing customers that the packer offers advertising allowances and/or other promotional assistance that are usable in a practical business sense by all retailers regardless of size. When a customer indicates his desire to be put on the notification list, the packer should keep that customer advised of all promotions available in his area as long as the customer so desires. The packer may make the required notification by any means he chooses; but in order to show later that he gave notice to a certain customer, he is in a better position to do so if it was given in writing or a record was prepared at the time of notification showing date, person notified, and contents of notification.

If more direct methods of notification are impracticable, a packer may employ one or more of the following methods, the sufficiency of which will depend upon the complexity of his own distribution system. Different packers may find that different notification methods are most effective for them.

(a) The packer may enter into contracts with his wholesalers, distributors or other third parties which conform to the requirements of Item 10, infra.

(b) The packer may place appropriate announcements on product containers or inside thereof with conspicuous notice of such enclosure on the outside.

(c) The packer may publish notice of the availability and essential features of a promotional plan in a publication of general distribution in the trade.

Example 1: A packer has a plan for the retail promotion of his products in Philadelphia. Some of his retailing customers purchase directly, and he offers the plan to them. Some other Philadelphia retailers purchase his products through wholesalers. The packer may use the wholesalers to reach the retailing customers who buy through them, either by having the wholesalers notify those retailers in accordance with Item 10 or by using the wholesalers' customer lists for direct notification by the packer.

Example 2: A packer has a plan for the retail promotion of his products in Kansas City. Some of his retailing customers purchase directly and he offers the plan to them. Others purchase his products through wholesalers. The packer may satisfy his notification obligations to them by undertaking, in good faith, one or more of the following measures:

(a) Placing on a shipping container or a product package in time to enable them to participate in the program a conspicuous notice of the availability and essential features of his proposals, identifying a specific source for further particulars and details. In lieu of identifying a source for further particulars, brochures describing the details of the offer may be included in the shipping containers. If it is impracticable to include the essential features of the proposal on or in the shipping container, the packer may substitute in the notice, as stated above, a summary of the types of promotions offered (e.g., allowances for advertising in newspapers, handbills, or envelope stuffers; allowances for radio or television advertising; short term display allowances, etc.) and a statement that such promotions are usable in a practical business sense by all retailers regardless of size.

(b) Including the materials within the product container, if a promotional plan simply consists of providing retailers with display materials.

(c) Advising customers from accurate and reasonably complete mailing lists.

(d) Placing an announcement of the availability and essential features of promotional programs, and identifying a specific source for further particulars and details, at reasonable intervals in publications which have general and widespread distribution in the trade and which are recognized in the trade as means by which packers announce the availability of such programs.

Example 3: A packer has a wholesaler-oriented plan directed to wholesalers distributing his products to retailing customers. He should notify all the competing wholesalers distributing his products of the availability of this plan, but the packer is not required to notify retailing customers.

Example 4: A packer who sells on a direct basis to some retailers in an area, and to other retailers in the area through wholesalers, has a plan for the promotion of his products at the retail level. If the packer directly notifies not only all competing direct purchasing retailers but also all competing retailers purchasing through the wholesalers as to the availability, terms and conditions of the plan, the packer is not required to notify his wholesalers.

Example 5: A packer regularly engages in promotional programs and the competing customers include large direct purchasing retailers and smaller customers who purchase through wholesalers. The packer may encourage, but not coerce, the retailer purchasing through a wholesaler to designate a wholesaler as his agent for receiving notice of, collecting, and using promotional allowances for him. If a wholesaler or other intermediary by written agreement with a retailer is actually authorized to collect promotional payments from suppliers, the packer may assume that notice of and payment under a promotional plan to such wholesaler or intermediary constitutes notice and payment to the retailer.

(A packer should not rely on a written agreement authorizing an intermediary to receive notice of and/or payment under a promotional plan for a retailer if the packer knows, or should know, that the retailer was coerced into signing the agreement. In addition, a packer should assume that an intermediary is not authorized to receive notice of and/or payment under a promotional plan for a retailer unless there is a written authorization signed by such retailer.)

6. *Availability to all competing customers.* The plan should be such that all types of competing customers may participate. It should not be tailored to favor or discriminate against a particular customer or class of customers but should, in its terms, be usable in a practical business sense by all competing customers. This may require offering all such customers more than one way to participate in the plan or offering alternative terms and conditions to customers for whom the basic plan is not usable and suitable. The packer should not, either expressly or by the way the plan operates, eliminate some competing customers, although he may offer alternative plans designed for different customer classes. If he offers alternative plans, all of the plans offered should provide the same proportionate equality and the packer should inform competing customers of the various alternative plans.

With respect to promotional plans offered to retailers, the packer should insure that his plans or alternatives do not bar any competing retailer customers from participation whether they purchase directly from him or through a wholesaler or other intermediary.

When a packer, in good faith, offers a basic plan, including alternatives, which is reasonably fair and nondiscriminatory and refrains from taking any steps which would prevent any customer, or class of customers, from participating in his program, he shall be deemed to have satisfied his obligation to make his plan functionally available to all customers, and the failure of any customer or customers to participate in the program shall not be deemed to place the packer in violation of the provisions of the Packers and Stockyards Act.

Example 1: A packer offers a plan of short term store displays[1] of varying sizes, including some which are suitable for each of his competing customers and at the same time are small enough so that each customer may make use of the promotion in a practical business sense. The plan also calls for uniform, reasonable certification of performance by the retailer. Because they are reluctant to process a reasonable amount of paperwork, some small retailers do not participate. This fact is not deemed to place a packer in violation of Item 6 and he is under no obligation to provide additional alternatives.

Example 2: A packer offers a plan for cooperative advertising on radio, television, or in newspapers of general circulation.[2] Because the purchases of some of his customers are too small, this offer is not "functionally available" to them. The packer should offer them alternative(s) on proportionally equal terms that are usable by them and suitable for their business.

7. *Need to understand terms.* In informing customers of the details of a plan, the packer should provide them sufficient information to give a clear understanding of the exact terms of the offer, including all alternatives, and the conditions upon which payment will be made or services furnished.

8. *Checking customer's use of payments.* The packer should take reasonable precautions to see that services he is paying for are furnished and also that he is not overpaying for them. Moreover, the customer should expend the allowance solely for the purpose for which it was given. If the packer knows or should know that what he pays or furnishes is not being properly used by some customers, the improper payments or services should be discontinued.

A packer who, in good faith, takes reasonable and prudent measures to verify the performance of his competing customers will be deemed to have satisfied his obligations under the Act. Also, a packer who, in good faith, concludes a promotional agreement with wholesalers or other intermediaries and who otherwise conforms to the standards of Item 10 shall be deemed to have satisfied this obligation. If a packer has taken such steps, the fact that a particular customer has retained an allowance in excess of the cost, or approximate cost if the actual cost is not known, of services performed by him shall not alone be deemed to place a packer in violation of the Act.

(When customers may have different but closely related costs in furnishing services that are difficult to determine, such as the cost for distributing coupons from a bulletin board or using a window banner, the packer may furnish to each customer the same payment if it has a reasonable relationship to the cost of providing the service or is not grossly in excess thereof.)

9. *Competing customers.* The packer is required to provide in his plan only for those customers who compete with each other in the resale of the packer's products of like grade and quality. Therefore a packer should make available to all competing wholesalers any plan providing promotional payments or services to wholesalers, and similarly should make available to all competing retailers any plan providing promotional payments or services to retailers. With these requirements met, a packer can limit the area of his promotion. However, this section is not intended to deal with the question of a packer's liability for use of an area promotion where the effect may be to injure the packer's competition.

10. *Wholesaler or third party performance of packer's obligations.* (a) A packer may, in good faith, enter into written agreements with intermediaries, such as wholesalers, distributors or other third parties, including promoters of tripartite promotional plans, which provide that such intermediaries will perform all or part of the packer's obligations under this part. However, the interposition of intermediaries between the packer and his customers does not relieve the packer of his ultimate responsibility of compliance with the provisions of the Packers and Stockyards Act. The packer, in order to demonstrate his good faith effort to discharge his obligations under this part, should include in any such agreement provisions that the intermediary will:

(1) Give notice to the packer's customers in conformity with the standards set forth in items 5 and 7; supra.

(2) Check customer performance in conformity with the standards set forth in Item 8; supra.

(3) Implement the plan in a manner which will insure its functional availability to the packer's customers in conformity with the standards set forth in item 6, supra. (This must be done whether the plan is one devised by the packer himself or by the intermediary for use by the packer's customers.); and

(4) Provide certification in writing and at reasonable intervals that the packer's customers have been and are being treated in conformity with the agreement.

(b) A packer who negotiates such agreements with his wholesalers, distributors or third party promoters will be considered by the Administration to have justified his "good faith" obligations under this section only if he accompanies such agreements with the following supplementary measures: At regular intervals the packer takes affirmative steps to verify that his customers are receiving the proportionally equal treatment to which they are entitled by making spot checks designed to reach a representative cross section of his customers. Whenever such spot checks indicate that the agreements are not being implemented in such a way that his customers are receiving such proportionally equal treatment, the packer takes immediate steps to expand or to supplement such agreements in a manner reasonably designed to eliminate the repetition or continuation of any such discriminations in the future.

(c) Intermediaries, subject to the Packers and Stockyards Act, administering promotional assistance programs on behalf of a

[1] Allowances that have little or no relationship to cost or approximate cost of the service provided by the retailer may be considered to be in violation of section 202 of the Act, such as an allowance of $1 per case of goods purchased if the retailer furnishes a display or provides specific shelf space, or a promotional allowance of 10 percent of purchases during a specific period of time if the retailer places an ad of at least 3 column inches in a newspaper. In addition, a customer, subject to the Act, that induces such allowances may be proceded against under section 202 of the Act. Also, the purchase of display or shelf space, whether directly or by means of so-called allowances, may be considered an "unfair practice" in violation of section 202 of the Act.

[2] In order to avoid the tailoring of promotional programs that discriminate against particular customers or class of customers, the packer in offering to pay allowances for newspaper advertising should offer to pay the same percentage of the cost of newspaper advertising for all competing customers in a newspaper of the customer's choice, or at least in those newspapers that meet the requirements for second class mail privileges. Examples of promotional plans that may discriminate against small retailers are: (1) a plan that offers to pay 75 percent of the cost of advertising in daily newspapers, which are the regular advertising media of the packer's large or chain store customers, and only 50 percent of the cost of advertising in other newspapers that may be used by small retail customers; and (2) a plan that pays allowances for advertising in daily newspapers, which are the regular advertising media of the packer's large or chain store customers, but does not pay allowances for advertising in semi-weekly, weekly, or other newspapers that may be desirable to small retail customers, who are offered, as an alternative to advertising in daily newspapers, services such as envelope stuffers, handbills, window banners, etc. (See item 4.)

V 38-150 AUG 6 73 XUM

packer may be in violation of the provisions of the Packers and Stockyards Act if they have agreed to perform the packer's obligations under the Act with respect to a program which they have represented to be usable and suitable for all the packer's competing customers if it should later develop that the program was not offered to all or, if offered, was not usable or suitable, or was otherwise administered in a discriminatory manner.

11. *Customer's liability.* A customer, subject to the Packers and Stockyards Act, who knows, or should know, that he is receiving payments or services which are not available on proportionally equal terms to his competitors engaged in the resale of the same packer's products may be in violation of the provisions of the Act. Also, customers (subject to the Packers and Stockyards Act) that make unauthorized deductions from purchase invoices for alleged advertising or other promotional allowances may be proceeded against under the provisions of the Act.

Example 1: A customer subject to the Act should not induce or receive an allowance in excess of that offered in the packer's advertising plan by billing the packer at "vendor rates" or for any other amount in excess of that authorized in the packer's promotion program.

12. *Meeting competition.* A packer charged with discrimination under the provisions of the Packers and Stockyards Act may defend his actions by showing that the payments were made or the services were furnished in good faith to meet equally high payments made by a competing packer to the particular customer, or to meet equivalent services furnished by a competing packer to the particular customer. This defense, however, is subject to important limitations. For instance, it is insufficient to defend solely on the basis that competition in a particular market is very keen, requiring that special allowances be given to some customers if a packer is "to be competitive."

13. *Cost justification.* It is no defense to a charge of unlawful discrimination in the payment of an allowance or the furnishing of a service for a packer to show that such payment or service could be justified through savings in the cost of manufacture, sale, or delivery.

The foregoing are guidelines which set forth the general views of the Packers and Stockyards Administration regarding advertising allowances and other merchandising payments and services. In a particular situation in which the Administrator believes that the Act has been violated in connection with such activities, a complaint may be issued instituting a formal administrative proceeding under the Act. In such a proceeding, the Administrative Law Judge or the Judicial Officer of the Department will determine, after opportunity for full hearing, whether the packer has in fact violated the Packers and Stockyards Act and should be ordered to cease and desist from continuing such violation.

The foregoing statement of general policy shall become effective on Aug. 6, 1973.

(Sec. 202(a), 42 Stat. 161, as amended, 7 U.S.C. 192; sec. 402, 42 Stat. 168, as amended, 7 U.S.C. 222; sec. 407(a), 42 Stat. 169, as amended, 7 U.S.C. 228(a); sec. 6(g), 38 Stat. 721, 15 U.S.C. 46(g).)

Done at Washington, D.C., this 1st day of August 1973.

MARVIN L. MCLAIN,
Administrator, Packers and Stockyards Administration.

[FR Doc.73-16171 Filed 8-3-73;8:45 am]

Title 10—Atomic Energy

CHAPTER I—ATOMIC ENERGY COMMISSION

PART 40—LICENSING OF SOURCE MATERIAL

General License To Export Depleted Uranium

By letters dated May 9, 1972, May 4, 1973, and May 10, 1973, the General Electric Co., of San Jose, CA, filed with the Atomic Energy Commission a petition for rule making (PRM 40–17) to amend § 40.23(e)(1) of the Commission's regulation 10 CFR part 40 to authorize the export under general license of uranium which is used as shielding and constitutes part of packaging for the transportation of radioactive materials.

Uranium fabricated as shielding and contained in radiographic exposure or teletherapy devices, in quantities not to exceed 500 pounds per device, may be exported under the present provisions of the general license AEC–GRO–SME, issued in § 40.23(e)(1), from the United States to any foreign country or destination except Southern Rhodesia, Cuba, or countries or destinations listed in § 40.90, schedule A of 10 CFR Part 40.

The Commission has given careful consideration to the petition and has amended § 40.23(e)(1) to authorize the export of depleted uranium, when fabricated as shielding and contained in X-ray units, thermoelectric generators, and packaging for the transportation of radioactive materials, in quantities not to exceed 1000 kilograms per shipment, from the United States to any foreign country or destination, except Southern Rhodesia, Cuba, or countries or destinations listed in § 40.90, schedule A of 10 CFR Part 40. In amending § 40.23(e)(1), the Commission has included X-ray units and radioactive thermoelectric generators as well as packaging for the transportation of radioactive materials.

The term "packaging" means one or more receptacles and wrappers and their contents excluding fissile material and other radioactive material, but including radiation shielding and other supplementary equipment.

As amended, the general license in § 40.23(e)(1) applies only to depleted uranium when fabricated as shielding and contained in radiographic exposure or teletherapy devices, X-ray units, radioactive thermoelectric generators, or packaging for the transportation of radioactive materials. Any person who desires to export natural uranium contained in such products should apply for a specific license pursuant to § 40.33 of 10 CFR Part 40.

A general license is effective without the filing of an application with the Commission or the issuance of a licensing document to a particular person. Thus, it will not be necessary for the Commission to issue a specific license for the export of X-ray units, radioactive thermoelectric generators, or packaging, including shipping containers, falling within the scope of the general license issued in § 40.23(e)(1). The Commission has determined that such exports will not be inimical to the interests of the United States.

Because the amendments involve the foreign affairs functions of the United States, notice of proposed rule making and public procedure thereon are not required by section 553 of title 5 of the United States Code, and the amendments may be made effective without the customary 30-day notice.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendment of Title 10, Chapter I, Code of Federal Regulations, Part 40, is published as a document subject to codification to be effective on Aug. 6, 1973.

In 10 CFR Part 40, § 40.23(e)(1) is amended to read as follows:

§ 40.23 General licenses to export.

* * * * *

(e)(1) A general license, designated AEC–GRO–SME, is hereby issued authorizing the export of depleted uranium, when fabricated as shielding and contained in radiographic exposure or teletherapy devices, X-ray units, radioactive thermoelectric generators, or packaging for the transportation of radioactive materials, in quantities not to exceed 1000 kilograms per shipment, from the United States to any foreign country or destination, except Southern Rhodesia, Cuba, or countries or destinations listed in § 40.90.

* * * * *

(Sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply sec. 64, 68 Stat. 933; 42 U.S.C. 2094)

Dated at Germantown, Maryland this 31st day of July 1973.

For the Atomic Energy Commission.

GORDON M. GRANT,
Acting Secretary of the Commission.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 12, Amdt. 5]

PART 121—SMALL BUSINESS SIZE STANDARDS

Definition of Affiliates as Affecting State Development Companies

On May 25, 1973, there was published in the FEDERAL REGISTER (38 FR 13751) a notice that the Small Business Administration proposed to amend the definition of affiliates as affecting State development companies authorized to receive loans under sections 501 and 502 of the Small Business Investment Act of 1958, as amended.

Interested parties were given 25 days to submit written statements of facts, opinions, and arguments concerning the proposal.

On the basis of all information available, it has been determined to adopt the proposal, with language clarifying that the exception of State development companies applies only to State development companies qualifying under the Small Business Investment Act of 1958 and the regulations issued pursuant thereto.

Accordingly, Part 121 of Chapter I of Title 13 of the Code of Federal Regulations is hereby amended by revising § 121.3–2(a) to read as follows:

§ 121.3–2 Definition of terms used in this part.

(a) Affiliates: Concerns, other than investment companies licensed or State Development companies qualifying under the Small Business Investment Act of 1958 and the regulations issued pursuant thereto, or investment companies registered under the Investment Company Act of 1940, are affiliates of each other when either directly or indirectly (1) one concern controls or has the power to control the other, or (2) a third party or parties controls or has the power to control both. In determining whether concerns are independently owned and operated and whether or not affiliation exists, consideration shall be given to all appropriate factors, including common ownership, common management, and contractual relationships: *Provided, however,* that restraints imposed on a franchisee by its franchise agreement shall not be considered in determining whether the franchisor controls or has the power to control and, therefore, is affiliated with the franchisee, if the franchisee has the right to profit from his effort, comensurate with ownership, and bears the risk of loss or failure. Where a concern is a subcontractor pursuant to section 8(a)(2) of the Small Business Act and, in connection therewith, is the subject of a divestiture agreement approved by SBA for the benefit of socially or economically disadvantaged individuals, the receipts, employment, and other factors of the concern attributable to the section 8(a)(2) subcontract shall not be included in determining the size of either concern during the term of such divestiture agreement. Other contracts and business of such subcontractor may also be excluded in determining the size if, in the judgment of SBA, substantial beneficiaries of such other contracts and business will be the socially or economically disadvantaged individuals in question.

* * * * *

Effective Date. This amendment shall become effective August 6, 1973.

Dated: July 25, 1973.

(Catalog of Federal Domestic Assistance Program No. 59.013, State and Local Development Company Loans.)

THOMAS S. KLEPPE,
Administrator.

Title 15—Commerce and Foreign Trade

CHAPTER III—DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, DEPARTMENT OF COMMERCE

[13th Gen. Rev. Export Regs., Amdt. 69]

PART 377—SHORT SUPPLY CONTROLS

Exports of Soybeans

Section 377.3 of 15 CFR Part 377 is amended to read as set forth below.

Effective date: August 1, 1973.

RAUER H. MEYER,
Director, Office of Export Control.

The FEDERAL REGISTER issuance of July 3, 1973, announced the licensing system adopted by the Department of Commerce for exports of soybeans prior to September 1, 1973.

The purpose of this announcement is to announce the licensing policy for soybeans to be exported in September 1973. Validated licenses will be granted for 100 percent of the unfilled balance in the case of applications to export soybeans in respect of unfilled or partially filled orders calling for export of soybeans during the month of September 1973, which were accepted by an exporter on or before June 13, 1973. Such licenses, however, will be granted only if such orders were previously reported by such exporter as being scheduled for export shipment in September 1973, pursuant to the reporting requirements of § 376.3 of the Export Control regulations.

Under the policy previously announced on July 3, 1973, validated licenses for 50 percent of the unfilled balance were granted against orders accepted on or before June 13, 1973, which called for export prior to September 1, 1973. In no case could the unlicensed portion of such an order be eligible for licensing under the new policy hereby announced.

Accordingly, paragraph (b) of § 377.3 is amended by revising subparagraphs (1), (2), (3), and (4) to read as follows:

§ 377.3 Agricultural commodities.

* * * * *

(b) *Licensing System for Exports of Soybeans, Soybean Oil-cake and Meal, Cottonseed, and Cottonseed Oil-cake and Meal*—(1) *Licensing for exports of soybeans prior to September 1, 1973, soybean oil-cake and meal, cottonseed, and cottonseed oil-cake and meal*—(i) *Submission of application with supporting documentation.* All exporters who previously reported anticipated exports of soybeans (Schedule B No. 221.4000) for export prior to September 1, 1973, cottonseed (Schedule B No. 221.6000) for export prior to August 1, 1973, or soybean oil-cake and meal (Schedule B No. 081.3030) or cottonseed oil-cake and meal (Schedule B No. 081.3020) for export prior to October 1, 1973, and who wish to be considered for the issuance of a validated license for any export of such commodities, must file with the Office of Export Control (Attention: 546), U.S. Department of Commerce, Washington, D.C. 20230, an application with the following supporting documentation: (*a*) Photocopy or certified copy of the contract of sale for export to a foreign buyer, accepted by the applicant on or before June 13; (*b*) a sworn affidavit by the applicant as to the amount previously exported against such contract, if any; (*c*) a sworn affidavit by the applicant that the applicant is the exporter and that the contract to sell to the foreign firm is not offset in whole or in part by a similar contract to purchase the same grain from a foreign firm, whether that contract was entered into by the applicant or the applicant's supplier (If the contract to sell is offset by such a similar contract by a foreign firm, it will not be licensed. If it is offset in part, only that portion not offset will be available for license.); and (*d*) with the first application for export of soybeans or for export of soybean oil-cake and meal under this paragraph, the applicant will submit Form DIB–636P, Contract Detail Supporting Anticipated 1972–1973 Crop Year Exports as Reported June 13, 1973.[1] The application shall be submitted on Forms FC–419 and FC–420.[1] The above-mentioned documentation will serve in lieu of the Form FC–842, Single Transaction Statement by Consignee and Purchaser, that would otherwise be required pursuant to § 375.2 of this chapter.

(ii) *Issuance of licenses.* The Office of Export Control will verify the authenticity of each application and supporting documentation and will issue a validated export license against each verified contract submitted under the terms of subdivision (i) of this subparagraph, for the following percentages of the unfilled balance of each contract:

Soybeans	50%
Cottonseed	100%
Soybean oil-cake and meal	40%
Cottonseed oil-cake and meal	100%

(2) *Licensing for exports of soybeans in September 1973*—(i) *Submission of application with supporting documentation.* All exporters who previously reported anticipated exports of soybeans (Schedule B No. 221.4000) for export in September 1973, and who wish to be considered for the issuance of a validated license for any export of such commodity, must file with the Office of Export Control (Attention: 546), U.S. Department of Commerce, Washington, D.C. 20230, an application with the following supporting documentation: (*a*) Photocopy or certified copy of the contract of sale for export to a foreign buyer, accepted by the applicant on or before June 13; (*b*) a sworn affidavit by the applicant as to the amount previously ex-

[1] Forms FC–419, FC–420, and DIB–636P are available from the Office of Export Control (Attention: 547), U.S. Department of Commerce, Washington, D.C. 20230, or the nearest Department of Commerce District Office.

V 38-150 AUG 6 73 XUM

ported against such contract, if any; (c) a sworn affidavit by the applicant that the applicant is the exporter and that the contract to sell to the foreign firm is not offset in whole or in part by a similar contract to purchase the same grain from a foreign firm, whether that contract was entered into by the applicant or the applicant's supplier (If the contract to sell is offset by such a similar contract by a foreign firm, it will not be licensed. If it is offset in part, only that portion not offset will be available for license); and (d) with the first application for export of soybeans under paragraphs (b) (1) or (2) of this section, the applicant will submit Form DIB–636P, Contract Detail Supporting Anticipated 1972–1973 Crop Year Exports as Reported June 13, 1973.[1] The application shall be submitted on Forms FC–419 and FC–420.[1] The above-mentioned documentation will serve in lieu of the Form FC–842, Single Transaction Statement by Consignee and Purchaser, that would otherwise be required pursuant to § 2375.2 of this chapter.

(ii) *Issuance of licenses.* The Office of Export Control will verify the authenticity of each application and supporting documentation and will issue a validated export license for 100 percent of the unfilled balance against each verified contract submitted under the terms of paragraph (b)(2)(i) of this section. In no case will the unlicensed portion of any export order for soybeans accepted on or before June 13, 1973, be eligible for licensing under this subdivision if—(*a*) such unlicensed portion was on or before July 31, 1973, reported pursuant to § 376.3 of this chapter as scheduled for shipment prior to September 1, 1973; or (*b*) in violation of such section, such unlicensed portion was on or before July 31, 1973, unreported.

(3) *Special terms.* Each license issued under this paragraph will only be valid for shipment against the particular contract applicable. All licenses issued for export of soybeans shall expire on September 15, 1973; except however, that those issued for export of soybeans in September 1973, pursuant to paragraph (b)(2) of this section shall expire on October 15, 1973; all those issued for export of cottonseed shall expire on August 15, 1973; and all those issued for export of soybean oil-cake and meal and cottonseed oil-cake and meal shall expire on October 15, 1973. Any cancellation of a contract automatically revokes the license that was issued against it. Accordingly, exporters shall not export under a license before obtaining from the foreign buyer written confirmation that he will accept delivery under the contract of the quantity licensed for export. Any export without such confirmation would be in violation of the regulations. In the event of the cancellation of a contract, the applicant is required to file a report of such cancellation with the Office of Export Control no later than five days from the date of cancellation. If a license has been issued against such contract, the license shall be returned to the Office of Export Control with the notice of cancellation.

(4) *Reduction of shipping tolerance allowance.* Section 386.7(b)(1) of this chapter states, in part, that a shipping tolerance of 10 percent is allowed on the unshipped balance specified on a validated license for shipments of any commodities licensed in units of bushels or short tons. For licenses issued under the procedures set forth above, this shipping tolerance allowance is reduced to 5 percent for cottonseed and soybeans, and to 2½ percent for cottonseed oil-cake and meal and soybean oil-cake and meal.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS

PART 135—NEW ANIMAL DRUGS

Liquid Feed Supplements

In the FEDERAL REGISTER of December 19, 1972 (37 FR 27634) the Commissioner of Food and Drugs proposed a new § 135.112 *Liquid feed supplements; new animal drug requirements.* This proposed new section would require, (1) that all drugs labeled for use in liquid feed supplements be the subject of approved new animal drug applications pursuant to section 512(b) of the Federal Food, Drug, and Cosmetic Act, (2) that all liquid animal feed supplements bearing or containing a new animal drug be the subject of an approved application pursuant to section 512(m) of the act, and (3) that certain drug products bear in their labeling a statement that the product is not for use in liquid feed supplements, unless the product is the subject of an approved new animal drug application providing for such use.

This action was based on data which demonstrate the instability of certain animal drugs when incorporated into liquid feed supplements and the consequent need for safety and efficacy data for this dosage form under conditions of use.

Four responses were received to the proposal, one from an industry trade association and three from animal drug and medicated feed manufacturers.

Three of the four responses concurred with the Commissioner that the stability of drugs in liquid feed formulations may differ from their stability in dry feeds or in drinking water. It was pointed out, and the Commissioner agrees, that not all formulations of the named drugs are unstable under every condition and the final order is revised to reflect this fact.

Three of the respondents took exception to the requirement that a new animal drug application is required for each premix intended for use in the manufacture of liquid feed supplements. It was suggested that the order merely require the submission of stability data to supplement the information currently on file regarding the use of these drugs in dry feeds. This suggestion is rejected. A liquid animal feed supplement differs considerably from a dry feed or dry feed supplement. Data show that, unlike dry feeds, small variations in some of the components of liquid feed supplement formulations have a marked effect on the stability of added drugs which would be expected to have a corresponding effect on the safety and efficacy of such drugs. For this reason the Commissioner concludes that each premix intended for use in manufacturing medicated liquid feed supplements must be the subject of an approved application pursuant to section 512(b) of the act.

Two respondents expressed the view that certain medicated liquid feed supplements should be exempt from the requirements of an application pursuant to section 512(m) of the act where the dry counterparts of such supplements are currently not subject to this requirement. The Commissioner concludes that the manufacture of liquid feed supplements is inherently more difficult to control and that available data demonstrate the need for such products to be subject to all the requirements of section 512(m) of the act to ensure their safety and effectiveness.

Each of the respondents took issue with the proposed requirement that certain drug products bear in their labeling a statement that the product is not for use in liquid feed supplements. It was asserted that such a statement would constitute negative labeling and as such would be contrary to the intent of the act which directs all labeling towards the safe and effective administration of a drug for its intended use; 21 CFR 1.106(a)(1) was cited in support of this contention. The Commissioner disagrees. The use of so called "negative" labeling is not new. Section 1.106(a)(1) does not limit the Commissioner's authority in requiring labeling which is necessary to assure the safe and effective use of a drug, nor is it intended that all products not intended for use in liquid feeds be so labeled. The labeling statement required by this order will apply only to certain drugs labeled for use in dry feeds and/or drinking water.

One firm stated that the labeling requirement of the proposed regulation discriminates in favor of those drugs which were not named and for which the additional labeling is not required. The Commissioner concludes that the three drugs named in the proposal for which restrictive labeling applies constitute the major portion of the medicated liquid feed supplement market and thus represent the greatest potential for misuse. In addition, data are available which clearly demonstrate that these drugs are unstable when added to certain liquid feed supplements. Should data of a similar nature become available on other products, those products will also be made subject to this labeling requirement.

The view was expressed that the 60 day period provided for revising the labeling of products was inadequate, and that the labeling requirement should not apply to products which have already entered channels of distribution. The Commissioner agrees and the regulation has been revised to require that each article which is the subject of this new section shall bear labeling in compliance

with this section when introduced into interstate commerce after Nov. 5, 1973. Label revisions may be made by overprinting or placing stickers on labels of products prior to their introduction into interstate commerce, provided that use of such over-printing or stickers does not obliterate other mandatory labeling.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–351, 21 U.S.C. 360b) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135 is amended in Subpart B by adding thereto the following new section:

§ 135.112 Liquid feed supplements; new animal drug requirements.

(a) Information available to the Commissioner of Food and Drugs shows that certain drugs are unstable when added to some liquid feed supplements. The demonstrated instability of these drugs gives rise to the question of the stability of other drugs when added to liquid feed supplements, except where specific approval has been granted for such use. Therefore, the labeling of a drug to provide for its use in a liquid feed supplement causes the drug to be a new animal drug for such use for which an approved new animal drug application is required pursuant to section 512(b) of the Federal Food, Drug, and Cosmetic Act.

(b) The addition of a drug to a liquid feed supplement causes such supplement to become an animal feed bearing or containing a new animal drug for which an approved application is required pursuant to section 512(m) of the act.

(c) Each drug product intended for oral administration to animals which contains any of the drugs listed in paragraph (d) of this section and which bears labeling for its use in animal feed and/or drinking water shall also include in such labeling the following statement: "FOR USE IN _____ ONLY. NOT FOR USE IN LIQUID FEED SUPPLEMENTS," the blank being filled in with the words "DRY FEEDS", "DRINKING WATER", "DRY FEEDS AND DRINKING WATER" as applicable, unless such drug product is the subject of an approved new animal drug application providing for its use in liquid feed supplements.

(d) The labeling provisions of paragraph (c) of this section apply to all forms of bacitracin, oxytetracycline, and chlortetracycline.

(e) For any drug which is the subject of an approved new animal drug application, the labeling provisions of paragraph (c) of this section may be implemented without prior approval as provided for in § 135.13a (d) and (e).

Effective date. This order shall become effective Nov. 5, 1973.

(Sec. 512, 82 Stat. 343–351; 21 U.S.C. 360b)

Dated: July 30, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Zeranol

The Commissioner of Food and Drugs has evaluated supplemental new animal drug applications (38–233V) filed by Commercial Solvents Corp., 1331 South First St., Terre Haute, IN 47808, proposing revised specifications and labeling for the safe and effective use of zeranol as set forth below in order to: (1) Delete the claim for improved feed conversion for suckling beef calves; (2) add the word "weight" in reference to rate of gain for feedlot lambs, beef cattle, and suckling beef calves; (3) make an editorial change regarding the preslaughter withdrawal period for feedlot lambs, beef cattle, and suckling beef calves; and (4) revise the melting point specifications for the drug. The supplemental applications are approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135b is amended by revising paragraph (b)(1) and the table in § 135b.12 (f) as follows:

§ 135b.12 Zeranol.

* * * * *

(b) *Specifications.* (1) Melting point range 181°–185° C.

* * * * *

(f) *Conditions of use.* It is used as follows:

	Amount	Limitations	Indications for use
1. * * *	* * *	For feedlot lambs; for subcutaneous ear implantations; do not implant animals within 40 days of slaughter.	For increased rate of weight gain and improved feed conversion.
2. * * *	* * *	For beef cattle (including weaned beef calves, growing beef cattle, feedlot steers, and feedlot heifers); for subcutaneous ear implantation; do not implant animals within 65 days of slaughter.	Do.
3. Zeranol	Three 12 milligram implants per dose.	For suckling beef calves; for subcutaneous ear implantation; do not implant animals within 65 days of slaughter.	For increased rate of weight gain.

Effective date. This shall be effective on August 6, 1973.

(Sec. 412(1), 82 Stat. 347; 21 U.S.C. 360(1))

Dated: July 30, 1973.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-184]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
. . .	. . .	. . .	. . .	. . .	. . .	. . .
[illegible]	San Luis Obispo	San Luis Obispo, City of	---	[illegible]	[illegible]	Aug. 3, 1973, Emergency
[illegible]	Colfax	Manchester, City of	---	[illegible]	[illegible]	Do.
[illegible]	[illegible]	Tullahoma, City of	---	[illegible]	[illegible]	Do.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (secs. 408-410, Public Law 91-152, Dec. 24, 1969), 42 U.S.C. 4001-4127; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969)

Issued: July 27, 1973.

GEORGE K. BERNSTEIN,
Federal Insurance Administrator.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

[7 CFR Part 1701]

ACCOUNTING INTERPRETATIONS FOR RURAL ELECTRIC BORROWERS

Issuance of Two Accounting Interpretations

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 USC 901 et seq.), REA proposes to issue two new supplements to REA Bulletin 181-3, Accounting Interpretations for Rural Electric Borrowers.

Persons interested in the provisions of the two new supplements may submit written data, views, or comments to the Director, Accounting and Auditing Division, Room 4307, South Building, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, on or before Sept. 5, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Accounting and Auditing Division, during regular business hours.

ACCOUNTING INTERPRETATION NO. 113

ACCOUNTING FOR TERMINAL FACILITIES

I. *General.* Borrowers are sometimes required to construct terminal facilities in the transmission line of another utility to receive power from their power supplier. The document executed between the borrower and the utility is normally referred to as the "License Agreement." The licensee agreement may stipulate that certain items of the terminal facilities are to be transferred to and become the property of the utility upon completion of the construction.

II. *Questions and Answers.* 1. *Question.* How are the construction costs accounted for?

Answer. All construction costs are charged to a work order. Upon completion of the construction and accumulation of all costs, the costs of the facilities which become the property of the utility with whom the license agreement is executed are transferred to Account 186, Miscellaneous Deferred Debits. The costs for the plant which the borrower retains title to is transferred to the appropriate plant account.

2. *Question.* What is the disposition of the amount transferred to Account 186, Miscellaneous Deferred Debits?

Answer. The amount is amortized to Account 557, Other Expenses, over the estimated "Service Life" of the plant. If the related contract or contracts for this power supply are terminated, the unamortized balance is transferred to Account 557.

ACCOUNTING INTERPRETATION NO. 617

ACCOUNTING FOR CONTRIBUTIONS MADE TO THE BREEDER REACTOR CORPORATION (BRC)

I. *General.* The Utility Contribution Agreement, executed by the borrower with the Breeder Reactor Corporation, obligates the borrower to contribute an amount equal to .025 mills per kWh for total kWh sold to consumers for the 1970 calendar year. The amount is to be paid to BRC in ten equal installments. Each installment is to be paid on or before December 31 of the years 1972 through 1981, subject to the conditions described in paragraph No. 5 of the agreement. Any past due installments shall bear interest at the rate of six percent per annum from the date payment of such installments become due.

II. *Questions and Answers.* 1. *Question.* Should the entire amount stipulated in the agreement be recorded in the general ledger upon execution of the agreement?

Answer. Yes. The amount should be recorded by debiting Account 188, Research and Development Expenditures, and crediting Account 224.14, Other Long-Term Debt—Miscellaneous. The amount recorded in Account 188 should be amortized over the ten-year period to Account 930, Miscellaneous General Expenses. The annual payment to BRC is charged to Account 224.14, Other Long-Term Debt—Miscellaneous.

2. *Question.* What account is charged for the interest on late payments?

Answer. Account 431, Other Interest Expense.

Dated: July 31, 1973.

DAVID A. HAMIL,
Administrator.

[FR Doc.73-16168 Filed 8-3-73;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 73-GL-32]

CONTROL ZONE

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation regulations so as to alter the control zone at Battle Creek, Michigan.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before September 5, 1973 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The Battle Creek Combined Station/Tower hours of operation are planned to be reduced from 24 hour operations to 16 hour operations in the fall of 1973. The Battle Creek control zone is designated as continuous. Weather reporting, which is required for the control zone, is provided by the CS/T and therefore will only be available during the CS/T hours of operation.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation regulations as hereinafter set forth:

In § 71.171 (37 FR 2056), the following control zone is amended to read:

BATTLE CREEK, MICH.

Within a 5 mile radius of Kellogg Field (latitude 42°18'31"N., longitude 85°14'57" W.) within 2 miles each side of the Battle Creek VORTAC 050°, 117° and 215° radials extending from the 5 mile radius zone to 8 miles NE, SE and SW of the VORTAC; and within 2 miles each side of the Kellogg Field ILS localizer SW course extending from the 5 mile radius zone to 5 miles SW of the approach end of runway 4. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Illinois on July 13, 1973.

H. W. POGGEMEYER,
Acting Director,
Great Lakes Region.

[FR Doc.73-16097 Filed 8-3-73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 73-CE-18]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the

V 38-150 AUG 6 73 XUM

Federal Aviation regulations so as to alter the transition area at Cape Girardeau, Missouri.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received on or before September 5, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief.

Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

Since designation of controlled airspace at Cape Girardeau, Missouri, an ILS has been installed on Runway 10 at the Cape Girardeau Municipal Airport. Accordingly, it is necessary to alter the Cape Girardeau transition area to adequately protect aircraft utilizing the new ILS approach procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation regulations as hereinafter set forth:

In § 71.181 (38 FR 435) the following transition area is amended to read:

CAPE GIRARDEAU, MISSOURI

That airspace extending upward from 700 feet above the surface within a 10 mile radius of Cape Girardeau Municipal Airport (latitude 37°13'30"N, longitude 89°34'10"W) within 4½ miles east and 9½ miles west of the Cape Girardeau VOR 194 radial, extending from the 10 mile radius area to 18½ miles south of the VOR; and within 4½ miles north and 9½ miles south of the Cape Girardeau VOR 279° radial, extending from the 10 mile radius area to 18½ miles west of the VOR, excluding the portion which overlies the Sikeston, Missouri transition area; and that airspace extending from 1,200 feet above the surface within 4.5 miles north and 9.5 miles south of the Cape Girardeau ILS localizer west course, extending from the LOM to 18.5 miles west of the LOM.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Kansas City, Missouri on July 17, 1973.

JOHN R. WALLS,
Acting Director, Central Region.

[FR Doc.73-16098 Filed 8-3-73;8:45 am]

Office of Pipeline Safety

[49 CFR Parts 192 and 195]

[Notice 73-1A; Docket No. OPS-23]

BENDING LIMITATIONS

Extension of Comment Period

On May 31, 1973, the Department of Transportation issued an advance notice of proposed rule making, Notice 73-1, Docket OPS-23 (38 FR 14969, June 7, 1973) proposing an amendment to Part 192 and Part 195 which would provide more realistic pipe bending limitations and to make the standards in this regard for gas and liquid pipelines consistent insofar as practicable.

The date for return of comments was set as August 6, 1973. Since the Pipeline Contractors Association, American Petroleum Institute (API) and the Independent Natural Gas Association of America (INGAA) on behalf of their respective memberships have asked for an extension of time to adequately prepare and submit comments, and since these organizations represent a large segment of operators and contractors who would be affected by a rule change in this area, the date for submission of comments on Notice 73-1 is extended to August 30, 1973.

This notice is issued under the authority of section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1672), sections 831-835 of Title 18, United States Code, section 6(e)(4) of the Department of Transportation Act (49 U.S.C. 1655(e)(4)), § 1.58(d) of the regulations of the Office of the Secretary of Transportation (49 CFR 1.58(d)), and the redelegation of authority to the Director, Office of Pipeline Safety, set forth in Appendix A to Part 1 of the regulations of the Office of the Secretary of Transportation (49 CFR Part 1).

Issued in Washington, D.C., on August 1, 1973.

JOSEPH C. CALDWELL,
Director,
Office of Pipeline Safety.

[FR Doc.73-16135 Filed 8-3-73;8:45 am]

FEDERAL POWER COMMISSION

[18 CFR Part 2]

[Docket No. R-405]

RELIABILITY OF ELECTRIC AND GAS SERVICE

Order Updating Nationwide Investigation

AUGUST 1, 1973.

In our notice of investigation and proposed rulemaking with respect to developing emergency plans which was issued in this docket on November 4, 1970, we sought with regard to the natural gas industry to elicit information so as to enable us to assess the adequacy and reliability of the gas supply and deliverability to meet consumer demand for the oncoming winter season and four winters following. Evidence of anticipated curtailment of necessary service has impelled the Commission to take continuing affirmative steps in the public interest to obtain reliable factual information regarding the sources of available gas and the facilities existing and planned to deliver such gas to meet consumer demands and to determine the terms and conditions of a rule or rules necessary to avoid or minimize the consequences of any emergencies that may develop. On September 12, 1972, the Commission issued an order updating its investigation. Amendments of the Commission's regulations proposed in this docket are still under Commission consideration.

Pursuant to this action and in the implementation thereof the Commission directed all of the large gas producers whose individual jurisdictional sales of natural gas totalled in excess of 10 million Mcf annually to respond thereto on forms designed to elicit the information necessary for Commission consideration. The responses were designed to cover separately the time frames set forth in the notice and in the updated order.

The responses received pursuant to said orders have been particularly useful to the Commission in enabling it to assess problems which have arisen as a result of shortages in the gas supply and to take steps designed to meet them.

To enable the Commission to have a better understanding of the problems prevailing in the industry, data almost identical in form to that previously supplied should be submitted for evaluation and appropriate action. For the purpose of this continued investigation the current data should relate also to two time periods, one as of December 31, 1972, and the other as of June 30, 1973. After receipt and analysis of such information, the sources thereof may be subject to audit by the Commission's staff.

Because of steps required to be taken by the Commission pursuant to Congressional subpoena duces tecum issued June 21, 1973, our treatment of information submitted pursuant to this order cannot be accorded the confidentiality heretofore authorized and honored by the Commission. The Commission's orders issued November 4, 1970, and September 12, 1972, providing for the nationwide investigations of reserves of natural gas directed that the reserves data submitted pursuant thereto would be held in a confidential status in accordance with the provisions of section 8(b) of the Natural Gas Act, 15 U.S.C. 717g(b), and the Freedom of Information Act, 5 U.S.C. 552(b)(4) and (9).

The Chairman of the Senate Judiciary Committee's Subcommittee on Antitrust and Monopoly requested disclosure to the Subcommittee and the Federal Trade Commission of such data, and our efforts to comply with such requests as fully as possible without violating the conditions of confidentiality under which the reserves data had been obtained were unavailing. Instead, the Chairman of the Subcommittee acting on behalf of the Subcommittee, issued a subpoena duces tecum directing the Commission's Chairman to appear before the Subcommittee on June 26, 1973, and to produce all data in the Commission's possession, custody or control or of any member or employee thereof referring or relating to the Commission's order dated September 12, 1972, including all workpapers and composites resulting from the material received in connection with that order.

In order to avoid placing the Commission's Chairman in jeopardy of contempt of Congress by refusing to disclose the data protected by our order of September 12, 1972, by order issued June 22, 1972, the Chairman was authorized to deliver, under protest, the data described in the subpoena. The Subcommittee has not decided whether to maintain the confidential status of the subpoenaed data, whether to publicly disclose such data, or whether to disclose such data to the Federal Trade Commission. Inasmuch as the protection heretofore provided for proprietary data can no longer be assured, we are unable to represent to the respondents that the data submitted will not be made public.

We have heretofore recognized that data such as that sought by this order is confidential and propriety in nature, the public disclosure of which could result in irreparable injury to the owner and to the public. We will not, therefore, require filing of the data herein sought until any producer who opposes the filing of data without an assurance of confidentiality has been afforded an opportunity for hearing on this issue.

It is ordered, That:

1. The investigation initiated by further notice issued on November 4, 1970, in Docket No. R-405 be further updated, and the natural gas companies listed in Appendix A are requested to file responses to the questionnaires set forth in Appendix B; that such responses may be submitted in hand to Mr. Leon H. Friedlander at Room 7312L, 825 North Capitol Street, NE., Washington, D.C. 20426, in a sealed envelope plainly marked "Responses to Order issued August 1, 1973, Docket No. R-405" on or before August 22, 1973. Any questions regarding said forms should be directed to Mr. Friedlander, who may be reached by telephone at 202-386-5735.

2. For the purposes of this investigation any responses submitted in compliance herewith shall be made available for inspection or copying by the public; individual company information received as a result of this continued investigation will not be maintained in confidential status. The Commission cannot, in the light of Congressional demands as above set forth, assure confidential status for the data to be submitted pursuant to this order. See "Order of Modification to Authorize Compliance With Congressional Subpoena Duces Tecum" issued June 22, 1973, in this docket. It should be noted that all responses will be made at the Federal Power Commission Offices in Washington, D.C.

3. After receipt and analysis of the information requested pursuant to paragraph 1. hereof, the data upon which the responses were predicated shall be made available for audit by the Commission's staff in the offices of the producers.

4. If voluntary response to the data request herein made is not sufficient for Commission assessment of gas supply and deliverability, appropriate proceedings may be instituted, after notice, to consider whether the reporting and disclosure of uncommitted reserve data by producers should be compelled.

5. The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

APPENDIX B-1

Q. A. Will you please state your name, the name of your company and your position with the company?

Q. B. Are you authorized by your company to furnish the information requested in the following interrogaories?

Q. C. If not, will you please state the name or names of the official or officials of your company who have such information?

Q. D. Do you understand that the designated Commission employee will combine the information obtained from you with information obtained from others and file a composite report in the public files in Docket No. R-405?

CERTIFICATION

I certify that the information hereon is correct to the best of my knowledge.

APPENDIX B-2

Q. E. Will you please state the net working interest volumes, including associated royalty interest volumes, of proved recoverable reserves of non-associated natural gas in MMcf, at 14.73 psia and 60 degrees Fahrenheit, that your company had available for sale as of December 31, 1972, for the areas hereinafter designated? (For the purpose of questions E-J, the term "proved reserves" is used as defined by the Committee on Natural Gas Reserves of the American Gas Association and such definition is set forth on Appendix B-8 of this letter. The volumes held "available for sale" in questions E-J are those which are not covered by gas purchase contracts and are not reserved for direct industrial contracts, not company use-warranty gas or not company use-fuel and feedstock.)

FOOTNOTES:

1 *Proved Reserves* are, using the definition of the Committee on Natural Gas Reserves of the American Gas Association, as follows:

"The current estimated quantity of natural gas which analysis of geologic and engineering data demonstrate with reasonable certainty to be recoverable in the future from known oil and gas reservoirs under existing economic and operating conditions. Reservoirs are considered proved that have demonstrated the ability to produce by either actual production or conclusive formation test.

"The area of a reservoir considered proved is that portion delineated by drilling and defined by gas-oil, gas-water, or oil-water contracts or limited by structural deformation or lenticularity of the reservoir. In the absence of fluid contacts, the lowest known structural occurrence of hydrocarbons controls the proved limits of the reservoir. The proved area of a reservoir may also include the adjoining portions not delineated by drilling but which can be evaluated as economically productive on the basis of geological and engineering data available at the time the estimate is made. Therefore, the reserves reported by the Committee include total proved reserves which may be in either the drilled or the undrilled portions of the field or reservoir."

NATIONAL MEDIATION BOARD

[29 CFR Parts 1201, 1203, 1207]

ADMINISTRATIVE FEES

Notice of Proposed Rulemaking

Pursuant to the authority contained in 44 Stat. 577, as amended, (45 U.S.C. 151–163), notice is hereby given that the National Mediation Board proposes to amend Part 1201 of its rules (13 F.R. 8740) by the addition of new §§ 1201.7–1201.9; to amend Part 1203 of its rules (13 FR 8740) by the addition of new § 1203.4; and, to revise Part 1207 of its rules (36 FR 12451) to conform new definitional language and administrative fee requirements to all boards of adjustment established pursuant to section 3 of the Railway Labor Act. These proposed amendments and revisions are set forth herein.

These proposals provide for the assessment of administrative fees for the appointment of neutrals under section 3 of the Railway Labor Act and describe the definitional language and requirements for payment and collection of said administrative fees prior to the appointment of neutrals by the National Mediation Board.

Interested persons are invited to submit written comments, suggestions or objections regarding the proposed amendments and revisions to the National Mediation Board, Washington, DC 20572, on or before September 5, 1973.

It is the intent of the National Mediation Board to publish these rules on or about October 1, 1973, after evaluation of comments, suggestions or objections, and to make the rules effective thirty (30) days thereafter.

ROWLAND K. QUINN, Jr.,
Executive Secretary.

PART 1201—DEFINITIONS

§ 1201.7 Special board.

The term "special board" shall mean any board of adjustment created or established under section 3, Second of the Railway Labor Act.

§ 1201.8 Grievance cases.

The term "grievance case" means any dispute between an employee or group of employees and a carrier or carriers growing out of grievances or out of the interpretation or application of agreements concerning rates of pay, rules or working conditions. This term shall also include unresolved matters with respect to the establishment and jurisdiction of special boards.

§ 1201.9 Party.

The term "party" when used in connection with grievance cases submitted to the National Railroad Adjustment Board means either the petitioner or the respondent. When used in connection with grievance cases involving a Special Board, the term "party" means the carrier and the representative of the employees involved.

PART 1203—APPLICATIONS FOR SERVICE

§ 1203.4 Appointment of neutrals.

(a) *Request for appointment.* Requests for the services of the National Mediation Board under section 3, First of the Railway Labor Act to appoint a referee to any division of the National Railroad Adjustment Board may be made through the Staff Director-Grievances. A request under Section 3, Second to appoint a neutral member(s) to a special board may be made on NMB Form 5 (revised). Such referees and neutral member(s) shall hereinafter be referred to as "neutrals". Requests for the appointment of neutrals shall be filed with the Staff Director-Grievances of the National Mediation Board.

(b) *Format of request.* (1) Requests for the appointment of neutrals and all correspondence connected therewith should be submitted in duplicate. The request must define and list the specific grievance case(s) to be heard and name the carrier and labor organization involved.

(2) If a request is made pursuant to Section 3, Second, a copy of the agreement, if any, establishing or proposing the establishment of the special board should be included in addition to the other information required.

(c) *Administrative fee.* (1) An administrative fee of $25.00 from each party for each grievance case to be heard shall be due and payable at the time a request for the appointment of a neutral is made. (Request for a neutral to dispose of a procedural issue will be considered one case.)

(2) Upon receipt of a request for the appointment of a neutral, where appropriate fees have not been paid, the Staff Director-Grievances shall notify all parties by registered mail return receipt, that they have thirty (30) calendar days from the receipt of notification to pay the required administrative fee.

(d) *Failure to pay administrative fee.* (1) If neither party pays the administrative fee, no neutral will be appointed.

(2) If only one party has paid the administrative fee, after notification considered in paragraph (c) of this section, a neutral will be appointed and directed that the hearings will proceed ex parte and a decision will be rendered on the relevant evidence in the ex parte submission.

(e) *Certification of grievance cases.* The Staff Director-Grievances must certify the number of grievance cases and the collection of appropriate administrative fees before the National Mediation Board will appoint a neutral. Only those grievance cases so certified shall be heard by the neutral appointed.

(f) *Addition and withdrawal of grievance cases.* (1) After the appointment of a neutral, grievance cases may be added only if appropirate administrative fees have been paid and the request has been approved by the National Mediation Board.

(2) Cases may be withdrawn, however, no refunds will be made by the Government.

(g) *Designation of special boards.* Effective November 1, 1973, all new boards of adjustment established pursuant to Section 3, Second of the Railway Labor Act will be designated special boards (S.B.) and will be numbered serially commencing with No. 1, in the order of their docketing by the National Mediation Board (e.g., S.B.–1). Cross-referencing to prior existing Public Law Boards and Special Boards of Adjustment will be made where appropriate.

(h) *Filing of agreement.* The original agreement creating the special board shall be filed with the Staff Director-Grievances National Mediation Board at the time it is executed by the parties.

(i) *Filing of awards.* Two copies of all awards made by a special board together with the record of proceedings upon which the awards are based, shall be forwarded by the neutral who is a member of the special board to the Staff Director-Grievances, National Mediation Board, for filing, safekeeping and handling under the provisions of section 3, First (q) of the Railway Labor Act.

(j) *Effective date for administrative fee.* The $25.00 administrative fee will become effective for grievance cases assigned to neutrals after November 1, 1973. Grievance cases assigned to neutrals before November 1, 1973, and not resolved by October 31, 1974, will be subject to the administrative fee as if the cases were assigned to the neutral after November 1, 1973. No hearings will be held subsequent to October 31, 1974, on cases assigned to a neutral before November 1, 1973, until appropriate administrative fees have been paid to the National Mediation Board and certification to that effect is forwarded by the National Mediation Board to all concerned.

PART 1207—SPECIAL BOARDS ESTABLISHED PURSUANT TO PUBLIC LAW 89–456

Sec.
1207.1 Establishment of such special boards.
1207.2 Requests for Mediation Board action.
1207.3 Compensation of neutrals.
1207.4 Designation as Special Boards, filing of agreements, and disposition of records.

AUTHORITY: Railway Labor Act, as amended (45 U.S.C. 151–163).

§ 1207.1 Establishment of special boards of adjustment.

Public Law 89–456 (80 Stat. 208) governs procedures to be followed by carriers and representatives of employees in the establishment and functioning of certain special boards of adjustment, hereinafter referred to as "special boards". Public Law 89–456 requires action by the National Mediation Board in the following circumstances:

(a) *Designation of party member of such special Board.* Public Law 89–456 provides that within thirty (30) days from the date a written request is made by an employee representative upon a carrier, or by a carrier upon an employee representative, for the establishment of a special board, an agreement establishing such a board shall be made. If, however, one party fails to designate a member of the board, the party making the request may ask the National Mediation Board to designate a member on behalf of the other party. Upon receipt of such request, the National Mediation Board will notify the party which failed to designate a partisan member for the establishment of a special board of the receipt of the request. The National Mediation Board will then designate a representative on behalf of the party upon whom the request was made. This representative will be an individual associated in interest with the party he is to represent. The designee, together with the member appointed by the party requesting the establishment of the special board, shall constitute the board.

(b) *Appointment of a procedural neutral to determine matters concerning the establishment and/or jurisdiction of such special board.* (1) When the members of a special board constituted in accordance with paragraph (a) of this section, for the purpose of resolving questions concerning the establishment of the board and/or its jurisdiction, are unable to resolve these matters, then and in that event, either party may ten (10) days thereafter request the National Mediation Board to appoint a neutral to determine these procedural issues.

(2) Upon receipt of this request, the National Mediation Board will notify the other party to the special board. Upon receipt from the Staff Director-Grievances of the necessary certification as described in § 1203.4(e) of this chapter, the National Mediation Board will designate a neutral to sit with the special board and resolve the procedural issue(s) in dispute. When the neutral has determined the procedural issue(s) in dispute, he shall cease to be a member of the special board.

(c) *Appointment of neutral to sit with such special boards and dispose of grievance cases.* When the members of a special board constituted by agreement of the parties, or by the appointment of a party member by the National Mediation Board as described in paragraph (a) of this section, are unable within ten (10) days after their failure to agree upon an award to agree upon the selection of a neutral, either member of the special board may request the National Mediation Board to appoint such neutral. Upon receipt from the Staff Director-Grievances of the necessary certification described in § 1203.4(e) of this chapter, the National Mediation Board will promptly make such appointment.

(d) *Docketing of special board agreements.* The National Mediation Board will docket agreements establishing special boards, when such agreements meet the requirements of coverage as specified in Section 3 of the Railway Labor Act. Docketing procedures for special boards are described in § 1203.4(g). No neutral will be appointed under paragraph (c) of this section until the agreement establishing the special board has been docketed by the National Mediation Board.

§ 1207.2 Requests for National Mediation Board action.

(a) Requests for the National Mediation Board to appoint neutrals or party representatives should be made on NMB Form 5. A request for the appointment of a neutral made under paragraphs (b) or (c) of § 1207.1 shall:

(1) Show the authority for the request;

(2) Define and list the proposed grievance cases to be heard; and

(3) Otherwise comply with § 1203.4 of this chapter.

(b) Those authorized to sign request on behalf of parties:

(1) The "representative of any craft or class of employees of a carrier", making request for National Mediation Board action, shall be either the General Chairman, Grand Lodge Officer (or corresponding officer of equivalent rank), or the Chief Executive of the representative involved. A request signed by a General Chairman or Grand Lodge Officer (or corresponding officer of equivalent rank) shall bear the approval of the Chief Executive of the employee representative.

(2) The "carrier representative" making such a request for the National Mediation Board's action shall be the highest carrier officer designated to handle matters arising under the Railway Labor Act.

V 38-150
AUG 6 73
XUM

§ 1207.3 Compensation of neutrals.

(a) *Neutrals appointed by the National Mediation Board.* (1) All neutrals appointed by the National Mediation Board under the provisions of § 1207.1 (b) and (c) will be compensated by the National Mediation Board in accordance with legislative authority. Certificates of appointment will be issued by the National Mediation Board in each instance.

(2) In no event will the Board issue a certificate of appointment and compensate a neutral unless the requirements of § 1203.4 of this chapter have been met.

(b) *Neutrals selected by the parties.* (1) In cases where the party members of a special board mutually agree upon a neutral to be a member of the board, the party members will jointly so notify the National Mediation Board Staff Director-Grievances. Upon receipt from the Staff Director-Grievances of the necessary certification as described in § 1203.4 (e) the National Mediation Board will issue a certificate of appointment to the neutral and arrange to compensate him as under paragraph (a) of this section.

(2) The same procedure will apply in cases where carrier and employee representatives are unable to agree upon the establishment and jurisdiction of a special board, and mutually agree upon a procedural neutral to sit with them as a member and determine such issues.

§ 1207.4 Designation as special boards, filing of agreements, and disposition of records.

(a) *Designation as special boards.* All special boards of adjustment created under Public Law 89–456 will be designated special boards and will be docketed in accordance with § 1203.4 (g) of this chapter.

(b) *Filing of agreements and disposition of records.* Filing of agreements and disposition of records for special boards created under Public Law 89–456 will be in accordance with § 1203.4 (h) and (i) of this chapter.

VETERANS ADMINISTRATION

[38 CFR Part 3]

DEPENDENCY AND INDEMNITY COMPENSATION

Supplemental Security Income

The Administrator of Veterans' Affairs proposes regulatory changes relating to computation of income in determining entitlement to benefits under programs administered by the Veterans Administration.

Public Law 92–603 (86 Stat. 1329), the Social Security Amendments of 1972, provides a new Federal program of Supplemental security income effective January 1, 1974. This program replaces as of that date, State-administered programs of aid to aged, blind and disabled under titles I, X, XIV and XVI of the Social Security Act except in Puerto Rico, Virgin Islands and Guam. Benefits under these State-administered programs were considered as charitable donations and as such excluded from computation of income. The proposed changes extend the exclusions to the new supplemental security income benefit. To effect this change it is proposed to amend Part 3, Title 38, Code of Federal Regulations, as set forth below.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (232H), Veterans Administration, Central Office, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before September 5, 1973 will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address of the above room number.

The proposed changes would be effective January 1, 1974.

1. In § 3.261(a), subparagraph (17) is amended to read as follows:

§ 3.261 Character of income; exclusions and estates.

* * * * *

	Dependency (parents)	Dependency and indemnity compensation (parents)	Pension; protected (veterans, widows and children)	Pension; Public Law 86–211 (veterans, widows and children)	See
(a) *Income:*					§ 3.262(f).
(17) Social security benefits:					
Old age and survivors, and disability insurance.	Included	Included	Included	Included	
Charitable programs	Excluded	Excluded	do	Excluded	
Lump sum death payments	Included	do	do	do	
Supplemental security income	Excluded	Excluded	do	do	

2. In § 3.262, paragraph (f) is amended to read as follows:

§ 3.262 Evaluation of income.

* * * * *

(f) *Social security benefits.* Old age and survivor's insurance and disability insurance under title II of the Social Security Act will be considered income as a retirement benefit under the rules contained in paragraph (e) of this section. Benefits received under noncontributory programs, such as old age assistance, aid to dependent children, and supplemental security income are subject to the rules contained in paragraph (d) of this section applicable to charitable donations. The lumpsum death payment under title II of the Social Security Act will be considered as income except in claims for dependency and indemnity compensation and for pension under Public Law 86–211 (72 Stat. 432).

* * * * *

Approved: July 31, 1973.

By direction of the Administrator.

[SEAL] FRED B. RHODES,
Deputy Administrator.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

[20 CFR Part 416]

SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

National Program Policies

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553) that amendments to the regulations set forth in tentative form are proposed by the Acting Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. The proposed amendments add a new Part 416, comprising the policies and procedures for payment of supplemental income to aged, blind, or disabled individuals under title XVI of the Social Security Act, as amended by section 301 of the Social Security Amendments of 1972 (P.L. 92–603), enacted October 30, 1972. These amendments to title XVI of the Social Security Act are effective January 1, 1974.

The proposed new Part 416 is designed to embrace all substantive rules and other provisions having general applicability and legal effect, that are necessary to the implementation of the statute, or relevant to an understanding of the policies affecting payments under it. In this regard, it will comprehend the full range of rules required to be published, or serving to give direction and guidance to the public; and contemplates the grouping of related provisions into appropriate subparts of Part 416 designated by letters of the alphabet. Initial publication of Part 416 is limited in content, however, to Subparts T and U pertaining to provisions for State Supplementation and State Medicaid agreements respectively.

Proposed Subpart T would establish the conditions under which the Secretary of Health, Education, and Welfare would enter into an agreement with a State to make optional supplementary payments to persons eligible (or eligible but for income) for benefits under title XVI of the Act. Proposed regulations implementing the mandatory State supplementation provisions contained in P.L. 93–66 will be published at a later date.

Proposed Subpart U (Medicaid Eligibility Determinations) sets forth the conditions under which the Secretary of Health, Education, and Welfare will enter into an agreement with a State to determine eligibility for medical assistance in the case of aged, blind, or disabled individuals under such State's plan approval under title XIX of the Social Security Act.

Prior to the final adoption of the proposed amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare Building, Fourth and Independence Avenue SW., Washington, D.C. 20201, on or before September 5, 1973.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Public Affairs, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue SW., Washington, D.C. 20201.

The proposed amendment is to be issued under the authority contained in sections 1102, 1601, 1616, 1631, and 1634, 49 Stat. 647, as amended, 86 Stat. 1465, 1474, 1475, 1478; 42 U.S.C. 1302, 1381 et seq.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

Dated: July 20, 1973.

ARTHUR E. HESS,
Acting Commissioner of Social Security.

Approved: August 2, 1973.

FRANK CARLUCCI,
Acting Secretary of Health, Education, and Welfare.

Chapter III of Title 20 of the Code of Federal Regulations is amended by adding a new Part 416 to read as follows:

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED (1974.....)

Subparts A—S [reserved]

Subpart T—State Supplementation Provisions; Agreements; Payments

Sec.
416.2001 State supplementation agreements; general.
416.2003 Essentials of the State supplementation agreements.
416.2005 State funds advanced for supplementary payments.
416.2010 Limitation of fiscal liability of States.
416.2012 Non-Federal share of expenditures; defined.
416.2014 Adjusted payment level.
416.2051 State supplementary payments; general.
416.2052 Federal administration of State supplementary payments.
416.2054 Establishing eligibility.
416.2058 Limitations on eligibility.
416.2060 Amount of State supplementary payments.
416.2064 Overpayments and underpayments.
416.2065 Waiver of State supplementary payments.

Subpart U—Medicaid Eligibility Determinations

416.2101 Authority to perform State Medicaid functions.
416.2104 Renewal, termination, or modification of agreement.
416.2107 Effect of agreement on existing Federal-State responsibilities.
416.2111 Conditions for agreement to determine eligibility for medical assistance.
416.2112 Limitations as to individuals covered by agreement to determine eligibility for medical assistance.
416.2116 Terms of agreement; functions performed by the Secretary.
416.2118 State requests for studies and evaluations.
416.2119 Functions performed by the State.

AUTHORITY: secs. 1102, 1601, 1616, 1631, 1634, 49 Stat. 647, as amended, 86 Stat. 1465, 1474, 1475, 1478; 42 U.S.C. 1302, 1381, et seq.

Subparts A—S [reserved]

Subpart T—State Supplementation Provisions; Agreements; Payments

§ 416.2001 State supplementation agreements; general.

Any State (or political subdivision) may, at its option, provide a payment in supplementation of the Federal supplemental security income benefit to aged, blind, or disabled individuals and/or couples. The State may, subject to the provisions of § 416.2003 enter into an agreement with the Secretary of Health, Education, and Welfare (hereinafter referred to as the Secretary) under which the Secretary will administer the State supplementary payments on behalf of a State (or political subdivision). Under such an agreement between the Secretary and a State, specific Federal and State responsibilities for administration and fiscal responsibilities of the State supplement will be stipulated. The regulations in effect for the supplemental security income program shall be applicable in the Federal administration of a State supplementary payment program by the Secretary except as provided in this subpart. Those rules regarding eligibility and payment will be sufficiently uniform to allow the Secretary to administer both the basic Federal benefit and the State supplementary payment efficiently and effectively.

§ 416.2003 Essentials of the State supplementation agreements.

(a) *Payments.* Any agreement between the Secretary and a State made pursuant to § 416.2001 must provide that the State supplementary payments are made to all individuals and/or couples who are:

(1) Receiving (or at the option of the State would, but for the amount of their income, be eligible to receive) supplemental security income benefits under title XVI of the Social Security Act, and

(2) Within the variations and categories (as defined in § 416.2052(c)) for which the State (or political subdivision) wishes to provide a supplementary payment, and

(3) Residing, subject to the provisions of paragraph (f) of this section, in such State (or political subdivision thereof).

(b) *Payment level.* The level of State supplementary payments may vary for each category the State elects to include in its Federally administered supplement. These categorical variations of payment levels must be specified in the agreement between the Secretary and the State.

(1) *Geographical variations.* A State may elect to include two different geographical variations. A third may be elected if adequate justification, e.g., substantial differences in living costs, can be demonstrated. All such variations must be readily identifiable by county or ZIP code or other readily identifiable factor (§ 416.2060).

(2) *Living arrangements.* In addition, a State may elect no more than five variations in recognition of the different needs which result from various living arrangements. Types of living arrangements for which variations shall be allowed include:

(i) Living alone,

(ii) Living with an incligible spouse,

(iii) Personal care facility,

(iv) Domiciliary or congregate care facility.

(c) *Relationship to actual cost differences.* Under the agreement, variations in State supplementary payment levels will be permitted for each living arrangement the State elects. These differences must be based on rational distinctions between both the types of living arrangements and the costs of those arrangements.

(d) *Earned and unearned income.* No less than the amounts of earned or unearned income which were excluded in determining eligibility for or amount of a title XVI supplemental security income benefit must be excludable by a State in the Federal-State agreement for purposes of determining eligibility for or amount of the State supplementary payment.

(e) *Additional income exclusions.* Any State (or political subdivisions thereof) may, at its option, specify in the agreement amounts of earned or unearned income in addition to the amounts it is required to exclude under paragraph (d) of this section in determining an individual's eligibility for State supplementary payments.

(f) *Residency requirement.* A State or political subdivision may impose, as a condition of eligibility, a residency requirement which excludes from eligibility for State supplementary payment any individual who has resided in such State (or political subdivision thereof) for less than a minimum period prescribed by the State. Any such residency requirement will be specified in the agreement.

(g) *Lien and relative responsibility.* A State which elects Federal administration of its supplementary payments may place a lien upon property of an individual as a consequence of the receipt of such payments or may require that a relative of the individual contribute to

V 38-150 AUG 6 73 XUM

a reasonable extent to the support of the individual, providing it is stated in the agreement that:

(1) The Secretary has determined that the specific State laws and their enforcement are consistent with the supplemental security income program purpose of providing unencumbered cash payments to recipients; and

(2) The Federal Government is not involved in the administration of such laws and will not vary the State supplementary payment amount it makes to comply with such laws; and

(3) Neither the basic Federal benefit nor any part of the State supplementary payment financed by Federal funds will be subject to the liens or encumbrances of such laws.

(h) *Audit and verification.* The agreement between a State and the Secretary will specify the dollar amount(s) of the adjusted payment level(s), as defined in § 416.2014. The non-Federal share of expenditures for calendar year 1972 as defined in § 416.2012 will also be stated in the agreement. These amounts, if not known at the time the agreement is entered into, may be provisionally agreed upon and subsequently verified by Department of Health, Education, and Welfare audits.

(i) *Administrative costs.* The agreement between the State and the Secretary shall specify that all administrative costs incurred by the Secretary will be paid by the Federal Government.

(j) *Agreement period.* The agreement period for a State which, prior to January 1, 1974, elects Federal administration of its supplement will extend from January 1, 1974, through June 30, 1974. The agreement will be automatically renewed for a period of 1 year unless either the State or the Secretary gives written notice not to renew, at least 120 days before the beginning of the new period. For a State to elect Federal administration after January 1, 1974, it must notify the Secretary of its intent to enter into an agreement, at least 120 days before the first day of the month for which it wishes Federal administration to begin, and complete such agreement at least 30 days before such day. Such a State's initial agreement period will run until the following June 30 at which time its agreement will be automatically renewed for 1 year unless it has given written notice not to renew at least 120 days before the end of that period.

(k) *Modification or termination.* The agreement may be modified or terminated by either party. A 120-day prior notice must be given by the initiating party for such modifications or terminations. Modifications must be agreed to by both parties.

§ 416.2005 State funds advanced for supplementary payments.

(a) *Advance payment and adjustment.* Any State which has entered into an agreement with the Secretary which provides for Federal administration of such State's supplementation program shall pay to the Secretary an amount equal to the Secretary's estimate of State supplementary payments for any month which shall be made by the Secretary on behalf of such State. In order for the Secretary to make State supplementary payments as provided by the agreement, the necessary amount of State funds must be on deposit with the Secretary prior to the month for which the supplementary payments are to be made on behalf of such State. The amount of State funds paid to the Secretary for State supplementary payments will be adjusted as necessary to maintain the balance with State supplementary payments paid out by the Secretary on behalf of the State.

(b) *Accounting of State funds.* (1) The Secretary shall provide an accounting of State funds received and paid as State supplementary payments within 3 calendar months following:

(i) The close of each fiscal year to which the agreement applies; or

(ii) The termination of such agreement if the agreement is terminated other than at the close of the fiscal year.

(2) Adjustment will be made because of State funds due and payable or amounts of State funds recovered for calendar months for which the agreement was in effect. No interest shall be charged or payable by the Secretary or the State with respect to the adjustment and accounting of State supplementary funds.

(c) *State audit.* Any State entering into an agreement with the Secretary which provides for Federal administration of the State's supplementary payments may audit the payments made by the Secretary on behalf of such State. State audit of supplementary payments made by the Secretary, in accordance with the agreement, is limited to no more than one such audit in each fiscal year provided in the agreement, and shall be made at State expense. Resolution of audit findings shall be made in accordance with the provisions of the State's agreement with the Secretary. In addition, the State and the Secretary may further agree to provide for interim quality assurance procedures compatible with efficient administration where justified by circumstances.

§ 416.2010 Limitation of fiscal liability of States.

(a) *Fiscal limits.* The amount payable to the Secretary by a State for the amount of the supplementary payments made on its behalf for any fiscal year pursuant to the State's agreement with the Secretary as described in § 416.2001 shall not exceed the total amount of the State's calendar year 1972 non-Federal share of expenditures as aid or assistance under the State plan(s) approved under titles I, X, XIV, or XVI of the Social Security Act (hereinafter referred to as the Act), as set forth in § 416.2012.

(b) *Less than full fiscal year period.* Should the agreement cover less than a full fiscal year, the limitation on the amount of the State's fiscal liability protection is the same as described in paragraph (a) of this section. The only exception is the fiscal liability protection for States for January through June of 1974 which will be determined by dividing the calendar year 1972 non-Federal share of expenditures as described in § 416.2012 by one-half.

(c) *State fiscal projection.* Except as provided in paragraph (e) of this section, the provisions of paragraphs (a) and (b) of this section shall apply only to that portion of the State supplementary payments made by the Secretary on behalf of a State under an agreement for any month which do not exceed, in the case of any individual, the difference between:

(1) The adjusted payment level as defined in § 416.2014 under the appropriate approved State plan(s) as in effect for January 1972, and

(2) The benefits paid for such month under title XVI plus any income not excluded under the provisions of section 1612 of the Act.

(d) *Unprotected payments.* Except as provided in paragraph (e) of this section, the portion of the State supplementary payment which is, in the case of any individual, in excess of this difference between the State's January 1972 adjusted payment level and the Federal benefit (plus income counted under Federal eligibility rules) will be made entirely at State expense.

(e) *Credits and debits.* For purposes of determining the extent of protected payments where State supplementary payments are paid at varying levels, to the extent that payments above the adjusted payment level do not exceed the difference by which variations in payment levels (variant payment levels) are established below the adjusted payment level, payments count toward the amount of a State's fiscal liability protection. This provision is explained as follows:

(1) The variant payment levels must be both above and below the adjusted payment level. The variant payment level is the sum of the Federal benefit plus income counted under Federal eligibility rules plus the State supplementary payment.

(2) In each case where the variant payment level is below the adjusted payment level, a credit will be given to the extent of the difference between the adjusted payment level and the variant payment level. While countable income affects the amount of the State's supplementary payment, it has no effect on the amount of credit given. Cumulative credit will be given for the number of cases in each variation below the adjusted payment level. The credit given to each case within such a variation is always the same because it is not adjusted to reflect payments that are reduced due to income.

(3) In each case where the variant payment level is above the adjusted payment level and a State supplementary payment is made which equals either the full or partial difference between the variant payment level and the adjusted payment level, a debit will be given to the extent of such difference. A cumulative debit amount will be given for such cases in each variation that exceeds the adjusted payment level.

(4) Neither a credit nor a debit is applicable to those cases where a State's variant payment level is equal to the adjusted payment level.

(5) For those States which apply additional income exclusions as explained in § 416.2003(e), the computation of credits and debits will be made as if supplementary payments had been made without regard to such additional income exclusions.

(6) For purposes of paragraph (e)(4) of this section, credits may be applied to debits at any time within a fiscal year. The amount that would count toward a State's fiscal liability protection once the non-Federal share of 1972 expenditures has been met will be determined by the extent to which total credits within each category of supplementation equal total debits within each category of supplementation in a fiscal year. The amount by which total debits exceed total credits will be borne entirely at State expense.

(f) *Payment variations.* States which supplement and whose adjusted payment level exceeds $130 in the case of eligible individuals and $195 in the case of eligible couples ($140 and $210 respectively effective July 1, 1974) will be afforded the limitation on fiscal liability protection when the amounts of such State supplemental payments vary by aged, blind, or disabled individuals or couples and by geographic locales or living arrangements as described in § 416.2003, provided that such payments are made to each individual or eligible couple within a particular category subject to the residency requirement that a State may opt to impose. The limitation on fiscal liability provision will not apply to any State supplementary payments which are made to individuals or couples within any category for which the January 1972 adjusted payment level was less than, or equal to, the supplemental security income benefit level.

(g) *Fiscal limit not applicable.* The provisions of paragraph (a) of this section shall not apply to the amount of any State supplementary payment which results from the application of additional income exclusions specified by the State in its agreement with the Secretary (see § 416.2003(e)). In addition, the provisions of paragraph (a) of this section shall not apply with respect to supplementary payments to any individual or couple who is both:

(1) Not required to be included in the agreement administered by the Secretary (see § 416.2003(a)(1)), and

(2) Would have been ineligible (for reasons other than income) for payments under the appropriate approved State plan as in effect for January 1972.

§ 416.2012 Non-Federal share of expenditures; defined.

The term "non-Federal" share of expenditures as aid or assistance for quarters in the calendar year 1972 under the plans of a State approved under titles I, X, XIV, or XVI of the Act means the difference between:

(a) The total matchable expenditures as aid or assistance for such plans (excluding expenditures authorized under section 1119 of the Act as in effect prior to October 30, 1972, for repairing the home of an individual who was receiving aid or assistance under one of the appropriate approved State plans); and

(b) The total of the amounts determined under sections 3, 1003, 1118, 1403, and 1603 of the Act and under section 9 of the Act of April 19, 1950, for such State with respect to such expenditures in such quarters.

§ 416.2014 Adjusted payment level.

(a) *Adjusted payment level; defined.* "Adjusted payment level" means the amount of the money payment under the appropriate State plan(s) approved under titles I, X, XIV, or XVI of the Social Security Act to individuals within a category who had no other income (excluding eligible recipients who received no payments) for the month of January 1972; plus (at State option) an amount no greater than the sum of a payment level modification (as described in paragraph (d) of this section) and (at State option) the bonus value of food stamps in the State for January 1972 (as described in paragraph (e) of this section).

(1) *Amount of money payment.* The amount of the money payment will be determined by computing the average of the cash payments made for basic needs and special needs, (but excluding cases involving only personal needs payments to recipients residing in medical facilities, and payments that included an amount for the needs of an "essential person") to individuals who were not living in the household of another, whose support and maintenance was not contributed to by another, and who had no other income. In addition, States may include domiciliary care payments to individuals with no other income (within each category).

(2) *No other income.* Cases in which income which was totally disregarded by a State in determining the amount of the money payment will be considered cases in which there was "no other income." For these purposes, in-kind or imputed income will be treated the same as cash income.

(b) *Adjusted payment levels for couples.* With respect to couples, the adjusted payment level will be determined by multiplying the sum of the average money payment to individuals in the appropriate category (as defined in § 416.2052(c)) and the payment level modification for that category by the ratio of the payment standard for a couple to the payment standard for an individual in that category, and then adding the bonus value of food stamps to the result. In no case, however, can the ratio of the payment standards be smaller than 1.5 or greater than 2.0; actual ratios less than 1.5 shall be raised to 1.5; actual ratios in excess of 2.0 shall be lowered to 2.0.

(c) *Payment standard.* "Payment standard" (PS) means the amount specified as the "payment standard" in the approved State plan as in effect for January 1972 under titles I, X, XIV, or XVI of the Act.

(d) *Payment level modification.* "Payment level modification (PLM) with respect to any State plan means the amount by which a State which paid less than 100 percent of its standard of need could have increased its January 1972 money payments for basic needs to persons with no other income by reducing the need standard and raising the maximum amount payable so that the increased payments equal 100 percent of the new standard without increasing the non-Federal share of expenditures under titles I, X, XIV, and XVI of the Act for calendar year 1972.

(1) *Maximum amount payable.* The "maximum amount payable" (M) means the amount specified as the largest amount payable for basic needs in the approved State plan as in effect for January 1972 under title I, X, XIV, or XVI of the Act.

(2) *Computing the payment level modification.* The payment level modification shall be determined by computing a Reduced Payment Standard (RS) and subtracting the maximum amount payable (PLM = RS − M).

(i) The Reduced Payment Standard shall be computed (within a category) by use of the following formula:

$$RS = \frac{TP + TCI}{TR}$$

(TP = Total Payments for January 1972 for basic needs,
TCI = Total Countable Incomes of recipients for January 1972, and
TR = Total Number of Recipients for January 1972.)

(ii) For a State entitled to a payment level modification and for which State total countable incomes of recipients for January 1972 cannot be determined, TCI may be estimated using the following formula:

$$TCI = TN - TP\ (PS).$$
$$M$$

TN = PS × TR = Total Needs for January 1972.)

(e) *Bonus value of food stamps.* (1) The term "bonus value of food stamps in a State for January 1972" means (with respect to any individual) the difference between:

(i) The face value of the coupon allotment which would have been provided to such individual under the Food Stamp Act of 1964 (7 U.S.C. 2011 ff.) for January 1972, and

(ii) The charge which such individual would have paid for such coupon allotment.

(2) *Income schedules.* The total face value of such coupon allotment and the cost thereof for January 1972 shall be determined in accordance with the schedules prescribed by the Secretary of Agriculture. Such schedules for 48 States and the District of Columbia are those published in the FEDERAL REGISTER on January 26, 1972 (37 FR 1180). Such schedules for Alaska and Hawaii are those published in the FEDERAL REGISTER on March 3, 1972 (37 FR 4456-58). The schedule as applicable to a household of one shall be used with respect to an individual, and the schedule as applicable

V 38-150 AUG 6 73 XUM

to a household of two shall be used with respect to a couple.

(3) *Determining bonus value.* In determining the charge such individual (or couple) would have paid for such coupon allotment, the individual's (or couple's) monthly net income will be considered to equal the State's January 1972 adjusted payment level as set forth in § 416.2014, including the results of any payment level modification as described in § 416.2014(d), but excluding the bonus value of food stamps.

§ 416.2051 State supplementary payments; general.

(a) *Payments excluded from income.* Any payments made by a State (or one of its political subdivisions) to a recipient of supplemental security income benefits (or to an individual who would be eligible for such benefits except for income), will be excluded from income when determining the amount of those benefits, if the payments are made:

(1) In supplementation of the Federal supplemental security income benefits; i.e., as a complement to the Federal benefit amount, thereby increasing the amount of income available to the recipient to meet his needs; and

(2) Regularly, on a periodic recurring, or routine basis of at least once a quarter; or made to a specific group or class of individuals in similar circumstances or situations (such as burnouts, utility turnoffs, evictions); and

(3) In cash, which may be actual currency or any negotiable instrument, convertible into cash upon demand; and

(4) In an amount based on the need or income of an individual or couple.

(b) *Administration.* If the State elects to provide assistance and the payments meet the criteria of paragraph (a) of this section, it has the option of administering the payment itself, or entering into an agreement with the Secretary to administer the payment in its behalf. If the State chooses to administer the payment itself, it may establish its own criteria for determining eligibility requirements as well as the amounts.

(c) *Federal administration.* If the State elects Federal administration, it will have to agree to those eligibility rules and payment amounts pursuant to the agreement entered into between the State and the Secretary and which the Secretary finds necessary to achieve efficient and effective administration of both the supplemental security income benefit and the State supplementary payment. However, the State will be able to establish certain variations in its payment amounts, within limits prescribed by the Secretary.

§ 416.2052 Federal administration of State supplementary payments.

(a) *Secretary paying supplementary payments.* As specified in § 416.2001, a State may choose to have the Secretary administer its supplementary payments. If it so chooses, it will enter into an agreement whereby the Secretary will pay a supplementary payment on the State's behalf to all individuals or couples eligible to receive (or at the State's option those who would but for their income be eligible to receive) a Federal benefit within those categories (aged, blind, or disabled) for which the State elects to make a supplementary payment, subject to those limitations on eligibility found in § 416.2058.

(b) *Recipients.* For purposes of the State supplementary payment:

(1) The terms "eligible individual" and "eligible couple" (i.e., eligible individual and eligible spouse) are the same as for the supplemental security income benefit as described in section 1614 of the Act.

(2) The terms "aged, blind, and disabled" are the same as for the supplemental security income benefit as described in section 1614 of the Act.

(c) *Nine categories possible.* A State may elect Federal administration of its supplementary payments for up to nine categories, depending on the assistance titles in effect in that State in January 1972 (i.e., titles I, X, XIV, or XVI). It can have no more than two categories (one for individuals and one for couples) for each title in effect for January 1972:

(1) Since a State with a title XVI had just the one title in effect, it can supplement only to two categories, the individual (aged, blind, or disabled), the couple (both of whom are aged, blind, or disabled).

(2) Other States could supplement up to nine categories, depending on the plans they had in effect. Six of these categories would be for:

(i) Aged Individual,
(ii) Aged Couple,
(iii) Blind Individual,
(iv) Blind Couple,
(v) Disabled Individual,
(vi) Disabled Couple

(3) In addition to those enumerated in paragraph (c)(2) of this section, there are three additional couple categories for which a State may elect to provide a Federally administered supplement. These categories are created when one individual in the couple is:

(1) Aged and the other blind, or
(2) Aged and the other disabled, or
(3) Blind and the other disabled.

(d) *Residency.* No Federally administered payments can be made to individuals or couples who do not meet the State (or political subdivision's) minimum residency requirements as specified in the Federal-State agreement (§ 416.2003). These residency requirements pertain only to the supplemental payment; they do not affect the eligibility for and receipt of the Federal supplemental security benefit amount for which the individual or couple is eligible.

§ 416.2054 Establishing eligibility.

(a) *Applications.* The supplemental security income application form will serve as the application form for any Federally administered State supplementary payment (except as specified under § 416.2065). In order to apply for such a State supplementary payment, an applicant must first file for a supplemental security income benefit. Recipients of assistance under a State plan for December 1973 who are transferred to the Federal payment system during the conversion period do not have to file an application. The conversion will be based on established State records; however, a supplemental application or statement will be required where it is necessary to gather additional information that is not on the State records or where there is a significant difference between the State records and those of the Social Security Administration.

(b) *Evidentiary requirements.* The evidentiary requirements and developmental procedures of the supplemental security income program will be utilized (in the same manner and to the same extent) for the purposes of a Federally administered State supplementary payments program.

(c) *Determination.* As under the Federal supplemental security income program, eligibility for and the amount of the State supplementary payment will be determined on a calendar quarter basis, except for the quarter of application. If an application is filed in the second or third month of a calendar quarter, eligibility and payment amount will be determined and payment will be made for the remaining month or months of that calendar quarter. An applicant cannot be eligible for a Federally administered State supplementary payment for any month prior to the month in which his application is filed for the Federal supplemental security income benefit.

(d) *Categories; aged, blind, disabled.* An applicant will be deemed to have filed for the State supplementary payment amount provided for the category under which his application for a Federal supplemental security income benefit is filed. As in the Federal supplemental security income program, an individual who establishes eligibility as a blind or disabled individual, and continually remains on the rolls, will continue to be considered blind or disabled after he attains age 65. An individual who is over age 65 at the time of his initial application will be eligible only for the State supplementary payment provided for the aged category.

(e) *Changes of category.* In States where the supplementary payment provided for the aged category is higher than the State supplement for the blind or disabled category, the States shall permit blind or disabled recipients to reapply for the State supplementary payment on the basis of age.

§ 416.2058 Limitations on eligibility.

Notwithstanding any other provision of this subpart, the eligibility of an individual (or couple) for State supplementary payments administered by the Federal Government in accordance with this subpart shall be limited as follows:

(a) *Inmate of public institution.* No person shall be eligible for a State supplementary payment with respect to any month if, throughout such month, he is an inmate of a public institution.

(b) *Supported by title XIX funds.* No person who is, throughout any month, in a medical facility receiving payments with respect to such person under a State plan approved under title XIX at a level exceeding 50 percent of the cost of such person's care, or in a medical facility which is not certified under the State's title XIX program, shall be eligible for a State supplementary payment for that month.

(c) *Ineligible persons.* No person who is ineligible for a Federal benefit under sections 1611(e)(1), (2), (3), and (f) of the Act (failure to file; refuses treatment for drug addiction or alcoholism; outside the United States) or section 1615 of the Act (refuses vocational rehabilitation) or other reasons (other than the amount of income) shall be eligible for a State supplementary payment under the provisions of this subpart.

§ 416.2060 Amount of State supplementary payments.

(a) *Maximum amount.* There is no restriction on the amount of a State supplementary payment that the Federal Government will administer on behalf of a State. The amount of such State supplementary payment will be specified in the State's agreement with the Secretary. (See § 416.2003.)

(b) *Minimum amount.* The Federal Government will not administer State supplementary payments in amounts less than $1 per month, i.e., $3 per quarter. Hence, supplementary payment amounts of less than $1 will be raised to a dollar.

(c) *Variations in payment amounts.* The amounts of State supplementary payments made to eligible individuals and couples may vary subject to the provisions of § 416.2003(b)–(e).

(d) *Effect of countable income on payment amounts.* "Countable income" of an eligible individual or eligible couple is determined in the same manner as such income is determined under the title XVI supplemental security income program. Countable income will affect the amount of the State supplementary payments as follows:

(1) Countable income will first be deducted from the Federal benefit amount payable to an eligible individual or eligible couple.

(2) If countable income is equal to or less than the amount of the Federal benefit rate, the full amount of the State supplementary payment as specified in the Federal agreement will be made.

(3) If countable income exceeds the amount of the Federal benefit rate, the State supplementary payment will be reduced by the amount of such excess.

(4) No State supplementary payment will be made where countable income is equal to or exceeds the sum of the Federal benefit rate and the State supplementary payment rate.

(e) *Effect of additional income exclusions on payment amounts.* A State has the option of excluding types and amounts of earned or unearned income in addition to the amounts it is required to exclude under § 416.2003(d) in determining a person's eligibility for State supplementary payments. Such additional income exclusions affect the amount of the State supplementary payments as follows:

(1) Countable income (as determined under the Federal eligibility rules) will first be deducted from the Federal benefit amount payable to an eligible individual or eligible couple.

(2) Such countable income is then reduced by the amount of the additional income exclusion specified by the State.

(3) If the remaining countable income is equal to or less than the amount of the Federal benefit, the full amount of the State supplementary payment will be made.

(4) If the remaining countable income exceeds the amount of the Federal benefit, the State supplementary payment will be reduced by the amount of such excess. (See § 416.2010(g) for the effect of additional income exclusions on a State's fiscal liability protection.)

(f) *Payment procedures.* A Federally administered State supplementary payment will be made on a monthly basis and will be included in the same check as a Federal benefit that is payable. A State supplementary payment shall be for the same month as the Federal benefit.

§ 416.2064 Overpayments and underpayments.

(a) *Overpayments.* Upon determination that an overpayment has been made, adjustments will be made against future State supplementary payments for which the person is entitled. Recoupment procedures in effect for recovery of supplemental security income benefit overpayments shall also apply to the recovery of State supplementary overpaid amounts. If the overpaid person's entitlement to the State supplementary payments is terminated prior to recoupment of the overpaid State supplementary payment amount the person's record will be annotated (specifying the amount of the overpayment) to permit recoupment if the person becomes reentitled to State supplementary payments. If the overpaid person dies prior to recoupment of the overpaid amount the State will be notified so that recoupment may be made from the person's estate.

(b) *Underpayments.* Upon determination that an underpayment of State supplementary payments is due and payable, the underpaid amount shall be paid to the underpaid claimant directly, or his representative, as may be specified in the agreement. If the underpaid person dies before receiving the underpaid amount of State supplementary payment the underpaid amount shall be paid to the claimant's eligible spouse. If the deceased claimant has no eligible spouse, no payment of the underpaid amount shall be made.

§ 416.2065 Waiver of State supplementary payments.

(a) *Waiver request in writing.* Any individual who is eligible to receive State supplementary payments or who would be eligible to receive such State supplementary payments may waive his right to receive such payments if the person makes a written request for waiver of State supplementary payments.

(b) *Revocation of waiver.* Any individual who has waived State supplementary payments may revoke such waiver at any time by making a written request to any social security office. The revocation will be effective the month in which it is filed. The date such request is received in a social security office or the postmarked date, if the written request was mailed, will be the filing date, whichever is earlier.

Subpart U—Medicaid Eligibility Determinations

§ 416.2101 Authority to perform State Medicaid functions.

(a) *Section 1634 of the Act.* Pursuant to section 1634 of the Act, the Secretary may, should a State so desire, enter into an agreement with that State to determine the eligibility for medical assistance on behalf of such State in the case of aged, blind, and disabled individuals under such State's medical assistance plan approved for Federal financial participation under title XIX of the Act.

(b) *Data exchange.* Pursuant to authority under the Intergovernmental Cooperation Act (42 U.S.C. 4222), the Secretary will enter into an agreement with a State, if the State so desires, to provide information obtained through the administration of the title XVI program and other additional assistance or support related to the administration of the State's medical assistance programs where administratively feasible and subject to such limitations as may be necessary for the efficient and effective administration of the title XVI program.

§ 416.2104 Renewal, termination, or modification of agreement.

(a) *Terms of agreement.* An agreement between the Secretary and a State described in § 416.2101 remains in effect for the term specified in the agreement and shall be automatically renewed for a period of 1 year except that the Secretary or the State may terminate the agreement by written notice at least 120 days in advance of the proposed termination date.

(b) *Modification or termination of agreement.* The Secretary or the State may modify or terminate the agreement at any time by mutual consent.

§ 416.2107 Effect of agreement on existing Federal-State responsibilities.

The terms and conditions for approval of a State's medical assistance plan under title XIX of the Act and the State's responsibility under such plan remain unchanged except to the extent otherwise specifically provided for in the agreement. Thus, a State will continue to be responsible for any aspects of medical assistance eligibility determinations and other functions not specifically undertaken to be performed by the Secretary pursuant to the agreement. Functions permitted or required by title XIX

V 38-150 AUG 6 73 XUM

of the Act that shall remain as State responsibilities include, but are not limited to:

(a) Issuance of emergency authorizations for medical service pending processing of applications;

(b) Outstationing of medical assistance eligibility workers at providers of medical services to receive Medicaid applications;

(c) Establishment, administration, and operation of the cost-sharing systems (including spend-down computations) for medical assistance recipients;

(d) Issuance, control, and termination of medical assistance identification cards and other notices to individuals within the purview of the agreement;

(e) Determination of retroactive eligibility for medical assistance.

§ 116.2111 Conditions for agreement to determine eligibility for medical assistance.

As a condition for having the Secretary agree to determine or redetermine eligibility for medical assistance under a State's approved plan, the plan must specify that:

(a) Such eligibility is to be determined using the criteria established under title XVI of the Act to determine eligibility for benefits as a disabled, blind, or aged individual; and

(b) Such Medicaid eligibility is provided to all individuals of a particular category (i.e., aged, blind, or disabled) eligible for benefits under title XVI of the Act.

§ 116.2112 Limitations as to individuals covered by agreement to determine eligibility for medical assistance.

Determinations of Medicaid eligibility pursuant to an agreement are limited to individuals who have been determined to be eligible individuals under title XVI of the Act or who are receiving a State supplementary payment which is federally administered, or both (see § 416.2003 and § 416.2052 in connection with federally administered State supplementary payments).

§ 116.2116 Terms of agreement; functions performed by the Secretary.

Under the agreement the Secretary may perform the following:

(a) *Determinations and redeterminations.* (1) Make determinations of eligibility for medical assistance pursuant to the agreement on behalf of a State so requesting;

(2) Make redeterminations of eligibility for medical assistance as frequently and to the same extent that redeterminations of eligibility for benefits are made under the title XVI program or as frequently and to the same extent as may be mutually agreed upon.

(b) *Notification to States.* Notify the State in a manner mutually agreed upon concerning:

(1) Individuals determined or redetermined to be eligible to receive a benefit under title XVI or a federally administered State supplementary payment, or both;

(2) Changes in status of individuals covered under the agreement;

(3) Individuals determined or redetermined to be ineligible to receive a benefit under title XVI or a federally administered State supplementary payment, or both.

(c) *Quality reviews and program integrity reviews.* Apply the same procedures established for the performance of quality assurance reviews and program integrity reviews for the title XVI program to determinations made under the agreement and to notify the State of findings that affect the status of individuals covered under the agreement.

(d) *Other items of mutual concern.* Other matters of mutual concern relevant to the purpose of the agreement or related functions may, in the Secretary's discretion, be incorporated into its terms.

§ 116.2118 State requests for studies, evaluations, and other information or assistance.

(a) *Studies and evaluations.* The Secretary may, in a separate agreement, agree to conduct such studies and evaluations as the State may request, provided that:

(1) The costs of such studies and evaluations shall be borne by the State, and

(2) The Secretary determines that any such study or evaluation requested by the State is consistent with effective and efficient administration of the title XVI program and does not interfere with the administration of that program.

(b) *Information sharing.* The Secretary may provide the State with information obtained upon an application for title XVI benefits which may be relevant to medical assistance eligibility determinations in a manner mutually agreed upon.

(c) *Coordination with title XVI program.* The Secretary may provide such other assistance with respect to coordination between the State medical assistance programs and the title XVI program, such as the gathering of additional information required by a State to make eligibility determinations for medical assistance, the referral of applicants under the title XVI program to the appropriate State agency, and the placement of State medical assistance workers in offices of the Social Security Administration, as may be administratively feasible and subject to such limitations as may be necessary for the efficient and effective administration of the title XVI program.

§ 116.2119 Functions performed by the State.

(a) *Agreements for Federal determination of eligibility for medical assistance.* The State shall make a timely payment to the Secretary as specified in the agreement of an amount equal to one-half of the administrative costs incurred in carrying out the agreement. In determining such administrative costs only the costs that are necessitated by the agreement and that are additional to the Secretary's costs incurred in administering the title XVI program shall be included.

(b) *Agreements for data exchange.* The State shall make a timely payment to the Secretary, as specified in the agreement of the identifiable costs incurred in carrying out the agreement. Only those costs, necessitated by the agreement that are additional to the Secretary's costs incurred in administering the title XVI program shall be included.

(c) *Notification to Secretary of events affecting eligibility.* The State shall notify the Secretary of all necessary information received concerning the occurrence of events affecting the eligibility status of individuals within the purview of the agreement.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

COASTAL ENGINEERING RESEARCH BOARD

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given of a meeting of the consultants to the Coastal Engineering Research Board on August 7-8, 1973.

This meeting will be held at the Casa Sirena Motor Hotel, Channel Islands Harbor, Oxnard, California, from 0900 hours to 1600 hours on 7 August 1973 and at the Point Mugu Naval Air Station from 0830 to 1145 on 8 August.

The August 7 session will be devoted to technical discussions of prototype experimental groin research, radioisotopic sand tracer studies, inner continental shelf studies, and wave measurements.

The 8 August session will be a field inspection of a prototype experimental groin on the grounds of the Point Mugu Naval Air Station.

The sessions will be open to the public subject to the following limitations:

1. Seating capacity of the meeting room limits public attendance to not more than 20 people. Advance notice of intent to attend is requested in order to assure adequate and appropriate arrangements.

2. Written statements may be submitted prior to, or up to 30 days following the meeting, but oral participation by the public is precluded because of the time schedule.

3. Each person planning to attend the field inspection trip at Mount Mugu must: furnish his own transportation, leave his vehicle outside the Point Mugu Naval Air Station, enter by Gate 5 at Arnold Road, and comply with Point Mugu Naval Air Station restrictions.

Inquiries may be addressed to Colonel James L. Trayers, Commander and Director, U.S. Army Coastal Engineering Research Center, Kingman Building, Fort Belvoir, Virginia 22060; telephone 202-325-7000.

For the Adjutant General.

JULY 27, 1973.

R. B. BELNAP,
Special Advisor to TAG.

ALPINE LAKES AREA

Recommended Land Use Plan; Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for a Recommended Land Use Plan for the Alpine Lakes Area in the State of Washington.

The environmental statement concerns a proposed plan for the management of lands including wilderness in the Alpine Lakes Area on portions of the Snoqualmie and Wenatchee National Forests in the State of Washington. USDA-FS-DES (Adm.) 73-91.

This draft environmental statement was filed with CEQ July 30, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave., S.W.
Washington, D.C. 20250

USDA, Forest Service
Pacific Northwest Region
319 S.W. Pine Street
Portland, Oregon 97204
Snoqualmie National Forest
1601 Second Avenue Building
Seattle, Washington 98101
Wenatchee National Forest
3 S. Wenatchee Avenue
Wenatchee, Washington 98801

A limited number of single copies are available upon request to Regional Forester, T. A. Schlapfer, Pacific Northwest Region, 319 SW. Pine Street, Portland, Oregon 97204.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to T. A. Schlapfer, Pacific Northwest Region, 319 SW. Pine Street, Portland, Oregon 97204. Comments must be received by November 20, 1973 in order to be considered in the preparation of the final environmental statement.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

Maritime Administration

[Docket No. S-373]

MOORE-McCORMACK BULK TRANSPORT, INC.

Application for Operating-Differential Subsidy

Notice is hereby given that Moore-McCormack Bulk Transport, Inc., a wholly owned subsidiary of Moore and McCormack Co., Inc., has filed an application for operating-differential subsidy on three (3) proposed new tankers of approximately 38,300 deadweight tons each to be operated in worldwide tanker trades in the foreign commerce of the United States.

Any party having an interest in such application and who would contest a finding of the Board that the service now provided by vessels of United States registry for the worldwide carriage of liquid and dry bulk cargoes moving in the foreign commerce of the United States or in any particular trade in the foreign commerce of the United States is inadequate, must, on or before August 16, 1973, notify the Secretary in writing of his interest and of his position and file a petition for leave to intervene in accordance with the Board's Rules of Practice and Procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Merchant Marine Act, 1936, as amended, and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing.

In the event that a section 605(c) hearing is ordered to be held, the purpose of such hearing will be to receive evidence relevant to whether the service already provided by vessels of U.S. registry for the worldwide movement of liquid and dry bulk cargoes in the foreign oceanborne commerce of the United States is inadequate and whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

Dated: August 1, 1973.

By order of the Maritime Subsidy Board.

JAMES S. DAWSON, JR.,
Secretary.

[Docket No. S-374]

OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO BETWEEN THE U.S. AND U.S.S.R.

Notice of Multiple Applications

Notice is hereby given that applications have been filed under the Merchant Marine Act of 1936, as amended, for extension of operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire on December 31, 1973 (unless extended only for subsidized voyages in progress on that date). Inasmuch as the applicants listed in Appendix A and/or related persons or firms, employ ships in the domestic intercoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for each such applicant if its application for operating-differential subsidy is granted.

Said applicants have requested written permission involving the domestic, intercoastal or coastwise services likewise described in Appendix A.

Said applicants have previously been granted written permission with respect to such services in fiscal year 1973.

Interested parties may inspect these applications in the Office of The Secretary, Maritime Administration, Department of Commerce Building, 14th and E Streets, NW., Washington, D.C. 20230.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in any application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on August 10, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief. Further, each petition shall identify the applicant or applicants against which the intervention is lodged.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled commencing at 10 a.m., August 13, 1973 and continuing on succeeding business days if required, in Room 4896, Department of Commerce Building, 14th and E Streets, NW., Washington, D.C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations. Evidence concerning each application will be heard in the order in which applicants are listed in Appendix A.

Dated: August 1, 1973.

By Order of the Maritime Administration.

JAMES S. DAWSON, JR.,
Secretary.

APPENDIX A

I. Name of Applicant: Academy Tankers, Inc. (Academy)

Description of Domestic Service and Vessels: The applicant, Academy, owns and operates the vessels listed hereafter, which vessels have operated in the domestic, intercoastal and/or coastwise service, and Academy's parent, Petrolane, Inc. also owns the Arthur Levy Boat Service which comprises a number of corporations owning or leasing vessels operating in domestic commerce serving offshore oil drilling rigs. Academy has requested written permission to continue its domestic operations as well as those of its various sister corporations:

THOMAS A
THOMAS M
THOMAS Q

Written permission is now required by the applicant, Academy, notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessels carried domestic commerce of the United States on that voyage.

II. Name of Applicants:

Willamette Transport, Inc. (Willamette)
Wabash Transport, Inc. (Wabash)
Connecticut Transport, Inc. (Connecticut)
Albany River Transport, Inc. (Albany River)
Empire Transport, Inc. (Empire)
Meadowbrook Transport, Inc. (Meadowbrook)
Ogden Merrimac Transport, Inc. (Ogden Merrimac)
Platte Transport, Inc. (Platte)
Rio Grande Transport, Inc. (Rio Grande)
Mohawk Shipping Co., Inc. (Mohawk)
Ogden Sacramento Trans., Inc. (Ogden Sacramento)
Ogden Sea Transport, Inc. (Ogden Sea)
James River Transport, Inc. (James River)

Description of Domestic Service and Vessels: Willamette, Wabash, Connecticut, Albany River, Empire, Meadowbrook, Ogden Merrimac, Platte, Rio Grande, Mohawk, Ogden Sacramento, Ogden Sea and James River, all affiliates of one another and of the other owning companies listed hereafter, have each requested written permission to continue employment in the domestic intercoastal and/or coastwise service for the below listed vessels owned by each or their affiliates.

Ship	*Owning Company*
ALBANY	Albany River
CONNECTICUT	Connecticut
JAMES	James River
MISSOURI	Meadowbrook
MOHAWK	Mohawk
OGDEN WABASH	Wabash
OGDEN WILLAMETTE	Willamette
OGDEN YUKON	Ogden Sea
YELLOWSTONE	Rio Grande

Written permission is now required by the applicants notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

III. Name of Applicant: Sea Tankers, Inc. (Sea Tankers)

Description of Domestic Service and Vessels: The applicant, Sea Tankers, is a subsidiary of Overseas Shipholding Group, Inc. (Shipholding), whose subsidiaries have engaged in domestic coastwise, intercoastal and non-contiguous petroleum trades with tanker vessels, and the applicant has requested written permission for it and its related companies to continue such operations. The following tanker vessels are owned by the applicant and related companies, all subsidiaries of Shipholding:

Ship	*Owner*
OVERSEAS ALASKA	Intercontinental Bulktank Corporation
OVERSEAS ALICE	Intercontinental Bulktank Corporation
OVERSEAS ALEUTIAN	Ocean Transportation Company, Inc.
OVERSEAS ULLA	Ocean Transportation Company, Inc.
OVERSEAS ARTIC	Overseas Bulktank Corporation
OVERSEAS VALDEZ	Overseas Bulktank Corporation
OVERSEAS JOYCE	Overseas Oil Carriers, Inc.

V 38-150 AUG 6 73 XUM

OVERSEAS ANCHORAGE	Globe Seaways, Inc.
OVERSEAS VIVIAN	Ocean Tankships Corporation
OVERSEAS ROSE (ALPHA RESERVE).	Sea Tankers
BETA RESERVE	Sea Tankers
OVERSEAS EVELYN (GAMMA RESERVE).	Sea Tankers

Written permission is now required by the applicant, Sea Tankers, notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

[FR Doc.73-16165 Filed 8-3-73;8:45 am]

[Docket No. S-376]

OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO BETWEEN THE U.S. AND U.S.S.R.

Notice of Multiple Applications

Notice is hereby given that the corporations listed in Appendix A have filed applications for extension of operating-differential subsidy contracts to carry bulk cargoes to expire, unless extended, on December 31, 1973 except for subsidized voyages in progress on that date. The bulk cargo carrying vessels proposed to be subsidized and a description of each of such vessels are also presented in Appendix A.

Said applications may be inspected in the Office of the Secretary, Maritime Subsidy Board, Maritime Administration, U.S. Department of Commerce, Washington, D.C., during regular working hours.

These vessels are to engage in the carriage of export bulk, raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the United States to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Liquid and dry bulk cargoes may be carried from U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk, raw and processed agricultural commodities to the U.S.S.R.

Full details concerning the U.S.-U.S.S.R. export bulk, raw and processed agricultural commodities subsidy program, including terms, conditions, and restrictions upon both the subsidized operators and vessels, appear in the regulation published in the FEDERAL REGISTER on October 21, 1972 (37 FR 22747).

For purposes of section 605(c), Merchant Marine Act, 1936, as amended (Act), it should be assumed that each vessel named will engage in the trades described on a full-time basis through December 31, 1973 (with extension to termination of approved subsidized voyages in progress on that date). Each voyage must be approved for subsidy before commencement of the voyage. The Maritime Subsidy Board (Board) will act on each request for a subsidized voyage as an administrative matter under the terms of the individual operating-differential subsidy contract for which there is no requirement for further notices under section 605(c) of the Act.

The Board has previously found during fiscal year 1973, that section 605(c) was no bar to the grant of operating-differential subsidy to each of the applicants listed in Appendix A.

Any person having an interest in the granting of one or any of such applications and who would contest a finding of the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes as previously specified is inadequate, must, on or before August 10, 1973, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing. Further, each such statement shall identify the applicant or applicants against which the intervention is lodged.

In the event requests for hearing and petitions regarding the relevant section 605(c) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled commencing at 10 a.m., August 13, 1973, and continuing on succeeding business days if required, in Room 4896, Department of Commerce Building, 14th and E Streets, N.W., Washington, D.C. 20235. The purpose of the hearing will be to receive evidence relevant to (1) whether the application(s) hereinabove described is one with respect to vessels to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon. Evidence concerning each application will be heard in the order in which applicants are listed in Appendix A.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

Dated: August 2, 1973.

By order of the Maritime Subsidy Board.

JAMES S. DAWSON, JR.,
Secretary.

OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO BETWEEN U.S. AND U.S.S.R. AND OTHER FOREIGN TRADE

Notice of Multiple Applications

Notice is hereby given that applications have been filed under the Merchant Marine Act of 1936, as amended, for extension of operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire unless extended, on December 31, 1973 (except for subsidized voyages in progress on that date). Inasmuch as the Applicants listed in Appendix A and/or related persons or firms, employ ships in the domestic, intercoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for each such applicant if its application for extension of operating-differential subsidy is granted.

Said Applicants have requested permission involving the domestic, intercoastal or coastwise services described in Appendix A.

Said Applicants have previously been granted written permission with respect to such services in fiscal year 1973.

Interested parties may inspect these applications in the Office of The Secretary, Maritime Administration, Department of Commerce Building, Fourteenth & E Streets, NW., Washington, D. C. 20230.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in any application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on August 10, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

In no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for 10 A.M., August 13, 1973 in Room 4896 Department of Commerce Building, Fourteenth & E Streets, NW., Washington, D. C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

Dated: August 2, 1973.

By order of the Maritime Administration.

JAMES S. DAWSON, JR.
Secretary.

APPENDIX A

I. *Name of applicant.* Chas. Kurz & Co., Inc. (Kurz)

Description of domestic service and vessels. On January 6, 1972, a related company of Kurz, Margate Shipping Co. (Margate), was granted written permission for Margate's affiliates to own and operate a total of 31 U.S. flag vessels to transport liquid bulk cargoes within or between the following coastal areas with free interchange of the vessels among these various domestic trades. The following list shows the maximum number of vessels to be employed in each Domestic Trade at any one time:

U.S. Gulf/Atlantic Coastwise	17 vessels
U.S. Gulf/Atlantic, Puerto Rico	2 vessels
U.S. Atlantic/Gulf Intercoastal (including Alaska and Hawaii)	5 vessels
Pacific Coast-Alaska and Hawaii	10 vessels

The following U.S. flag tankers are owned, managed or operated by affiliates of Kurz:

Chancellorville	Catawba Ford
Perryville	Keytanker
Shenandoah	Keystoner
Fort Fetterman	Keytrader
Julesburg	Ticonderoga
Naeco	Valley Forge
Bennington	Golden Gate
Cherry Valley	Edgar M. Queeny
Gaines Mill	P. C. Spencer
Mill Spring	J. E. Dyer
Northfield	Sinclair Texas
Tullahoma	David E. Day
Meadowbrook	Mobile Gas
Sandy Lake	Mobile Power
Monmouth	Mobile Fuel
Spirit of Liberty	

Written permission is now required by the applicant (Kurz) notwithstanding the previous grant to a related company (Margate) or the fact that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

II. *Name of applicants.* Sea Transport Corporation (Sea Trans.), and Eagle Terminal Tankers, Inc. (Eagle).

Description of domestic service and vessels. The applicants, Sea Trans. and Eagle, affiliates of one another and of the owning company listed hereafter, have each requested written permission for the continuance of domestic, intercoastal and coastwise service for the following vessels owned by each of the affiliates:

Ship	*Owner*
Eagle Charter	Eagle
Eagle Leader	Eagle
Eagle Courier	Eagle
Eagle Transporter	Eagle
Eagle Traveler	Sea Trans.
Eagle Voyager	Sea Trans.
Nashbulk	Nashbulk, Inc.

Written permission is now required by the applicants (Sea Trans. and Eagle) notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

III. *Name of Applicant.* Penn Tanker Company (Penntanker).

Description of domestic service and vessels. The applicant, Penntanker, has engaged in the domestic intercoastal and coastwise service with the tankers Penn Challenger and Penn Champion and may operate in the future in various domestic trades commercially, under charter to the Military Sealift Command or others, and has requested written permission for Penntankers and its affiliates to engage in the domestic trades as well as the right to move a vessel from one domestic trade to another, and/or from a foreign trade(s) to a domestic trade(s).

Written permission is now required by the applicant, Penntanker, notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

IV. *Name of applicant.* American Rice Steamship Co. (Rice).

Description of domestic service and vessels. Freighters, Inc., parent company of the Applicant, owns and operates the SS American Wheat, which vessel has from time to time tramped in the United States coastwise trade, particularly in the carriage of bulk sugar from the State of Hawaii to the United States Gulf. Written permission is required by Rice for its parent company to continue domestic coastwise service for that vessel.

V. Name of Applicant: *Atlantic Richfield Company.*

Description of domestic service and vessels. Applicant owns, operates and charters vessels engaged in domestic, intercoastal and and coastwise services and has requested written permission for it and related companies to continue operations in the domestic service. The following wholly owned subsidiaries own vessels, chartered to Applicant, which engage in domestic, intercoastal and coastwise services; namely, Philadelphia Tankers, Inc. and Tankers Leasing Corporation.

U.S. flag vessels owned, chartered to and operated by Applicant are listed below:

Arco Prudhoe Bay	Atlantic Navigator
Arco Sag River	Atlantic Prestige
Atlantic Endeavor	Atlantic Trader
Atlantic Enterprise	David E. Day
Atlantic Communicator	Sinclair Texas
Atlantic Heritage	Chancellorsville
	Texan

Written permission is now required by the Applicant, Atlantic Richfield Company, notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessels carried domestic commerce of the United States on that voyage.

[Docket No. Sub-B-50]

PAN-ALASKA FISHERIES, INC.

Change of Hearing Date and Location

Whereas, on July 12, 1973, there was published at 38 FR 18571 a supplementary notice of hearing in the above-entitled matter to be held in Washington, D.C., on August 13, 1973;

Whereas such notice of hearing provided that any person desiring to intervene must file a petition of intervention with the Director, National Marine Fisheries Service, as proscribed in 50 CFR Part 257 at least 10 days prior to the date set for hearing;

Whereas several persons have filed petitions for leave to intervene and/or have expressed in writing their interests in this matter (such persons hereinafter referred to as putative intervenors);

Whereas these putative intervenors have expressed the desire to have a hearing in this matter at a location other than in Washington, D.C.; and

Whereas the undersigned Administrative Law Judge assigned to hear and adjudicate the application herein has taken the foregoing matters under advisement and has concluded that the establishment of a different hearing date and hearing location would facilitate a determination of this matter and be in the interest of the public:

It is accordingly hereby ordered, That the hearing in this matter originally scheduled for August 13, 1973, in Washington, D.C., be, and it hereby is, rescheduled to be held commencing August 21, 1973, in Seattle, Washington, and continue until completion. The exact time and location of the hearing will be given to all parties by written notification at least 10 days in advance of said hearing.

ERNEST G. BARNES,
Administrative Law Judge.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing Management

[Docket No. D-73-244]

DEPUTY ASSISTANT SECRETARY FOR HOUSING MANAGEMENT ET AL.

Designation as Acting Assistant Secretary for Housing Management

SECTION A. *Designation.* The officials appointed to, or designated to serve as Acting during a vacancy in, the following positions are hereby designated to serve as Acting Assistant Secretary for Housing Management during the absence of the Assistant Secretary for Housing Management with all the powers, functions, and duties delegated or assigned to the Assistant Secretary for Housing Management: *Provided,* That no official is authorized to serve as Acting Assistant Secretary for Housing Management unless all other officials whose appointed, or designated Acting, position titles precede his in this designation are unable to act by reason of absence:

1. Deputy Assistant Secretary for Housing Management.
2. Executive Assistant to the Assistant Secretary for Housing Management.
3. Director, Office of Housing Programs.
4. Director, Office of Property Disposition.
5. Director, Office of Administrative and Program Services.

SEC. B. *Authorization.* Each head of an organizational unit of Housing Management is authorized to designate an employee under his jurisdiction to serve as Acting during the absence of the head of the unit.

SEC. C. *Supersedure.* This designation supersedes the designation of Acting Assistant Secretary for Housing Management published at 37 FR 7536, April 15, 1972.

(Secretary's delegation of authority to designate Acting officials, 36 FR 5004, March 17, 1971)

Effective date. This designation to serve as Acting Assistant Secretary for Housing Management is effective as of April 12, 1973.

H. R. CRAWFORD,
Assistant Secretary for Housing Management.

ATOMIC ENERGY COMMISSION

[Docket No. 50-335]

FLORIDA POWER AND LIGHT CO.

Notice of Evidentiary Hearing

On January 9, 1973, the Atomic Energy Commission published in the FEDERAL REGISTER (38 FR 1139) a notice of hearing pursuant to 10 CFR Part 50, Appendix D, section B, to consider environmental issues relating to Construction Permit No. CPPR-74 issued on July 1, 1970, to Florida Power and Light Company authorizing the construction of St. Lucie Nuclear Power Plant, Unit 1 (formerly Hutchinson Island Nuclear Power Plant).

The matter having come before this Atomic Safety and Licensing Board at a prehearing conference held on June 5, 1973, and counsel for the parties having been present and participating in said conference, it was agreed that the evidentiary hearing in this proceeding would commence in Ft. Pierce, Florida on August 28, 1973.

The notice of hearing directed that the Licensing Board will, without conducting a de novo evaluation of the application, determine whether the environmental review conducted by the Commission's Regulatory Staff pursuant to Appendix D of 10 CFR Part 50 has been adequate. The Board will also in accordance with section A.11 of Appendix D to 10 CFR Part 50—(a) determine whether the requirements of section 102 (2)(c) and (D) of the National Environmental Policy Act of 1969, and Appendix D to 10 CFR Part 50 of the Commission's Regulations have been complied with in this proceeding; (b) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view toward determining the appropriate action to be taken; and (c) determine, after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, whether the construction permit should be continued, modified, terminated, or appropriately conditioned to protect environmental values.

It is hereby ordered, That the initial session of the evidentiary hearing in this proceeding shall convene at 1 p.m. local time on August 28, 1973, at the County Commissioners' Hearing Room No. 203, County Courthouse, 2nd Street, Ft. Pierce, Florida 33450.

The public is invited to attend the hearing. Any person who has requested the opportunity to make a limited appearance will be afforded an opportunity to state his views or to file a written statement on the first day of the hearing or at such other times as the Licensing Board may for good cause designate.

The following agenda will in general be followed:

1. Disposition of preliminary matters raised by the Atomic Safety and Licensing Board;
2. Opening statements of the parties;
3. Statements by persons permitted to make limited appearances;
4. Disposition of preliminary motions of the parties and related matters;
5. Introduction of testimony; and
6. Questioning of witnesses by parties and by members of the Licensing Board.
7. Closing matters.

It is so ordered.

Issued at Washington, D.C., this 1st day of August 1973.

The Atomic Safety and Licensing Board.

ROBERT M. LAZO,
Chairman.

[FR Doc.73-16094 Filed 8-3-73;8:45 am]

[Docket No. 50-346]

TOLEDO EDISON CO. AND THE CLEVELAND ELECTRIC ILLUMINATING CO.

Notice for Evidentiary Session

In the Matter of Toledo Edison Co. and The Cleveland Electric Illuminating Co. (Davis-Besse Nuclear Power Station).

By agreement of the parties, approved by the Board, the Evidentiary Session in this proceeding will continue commencing on August 6, 1973, at 11 a.m., local time in Room 2069 of the Anthony Celebrezzi Building, at 1230 E. 9th Street, Cleveland, Ohio 44199.

It is so ordered.

Issued at Washington, D.C., this 31st day of July, 1973.

The Atomic Safety and Licensing Board.

JOHN B. FARMAKIDES,
Chairman.

[FR Doc.73-16093 Filed 8-3-73;8:45 am]

[Docket Nos. 50-424, 50-425, 50-426, 50-427]

GEORGIA POWER CO.

Availability of AEC Draft Environmental Statement

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulations in Appendix D to 10 CFR Part 50, notice is hereby given that a Draft Environmental Statement prepared by the Commission's Directorate of Licensing related to the proposed Vogtle Nuclear Plant, Units 1, 2, 3 & 4, to be constructed by Georgia Power Company in Burke County, Georgia is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. and in the Burke County Library, Fourth Street, Waynesboro, Georgia 30830. The Draft Statement is also being made available at the Georgia State Clearinghouse, 270 Washington Street, SE. Atlanta, Georgia 30334. Copies of the Commission's Draft Environmental Statement may be obtained by request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

The Applicant's Environmental Report, as supplemented, submitted by Georgia Power Company is also available for public inspection at the above-designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on April 27, 1973 FR 10495.

Pursuant to 10 CFR Part 50, Appendix D, interested persons may, on or before September 17, 1973 submit comments on the Applicant's Environmental Report, as supplemented, and the Draft Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Applicant's Environmental Report and the Draft Environmental Statement (local agencies may obtain these documents upon request). When comments thereon by Federal, State, and local officials are received by the Commission, such comments will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. and the Burke County Library, Fourth Street, Waynesboro, Georgia 30830. Comments on the Draft Environmental Statement from interested members of the public should be addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 30th day of July 1973.

For the Atomic Energy Commission.

GORDON K. DICKER,
Chief, Environmental Projects Branch 2 Directorate of Licensing.

[FR Doc.73-15922 Filed 8-3-73;8:45 am]

[Dockets Nos. 50-270, 50-287]

DUKE POWER CO.

Order Extending Completion Dates

Duke Power Company is the holder of Provisional Construction Permits Nos. CPPR-34 and CPPR-35 issued by the Commission on November 6, 1967, for the construction of the Oconee Nuclear Station, Units 2 and 3, two 2568 megawatt (thermal) pressurized water nuclear reactors presently under construction at the Company's site in Oconee County, South Carolina, approximately eight miles northeast of Seneca, South Carolina.

On July 3, 1973, the Company requested an extension of the completion dates because construction of Units 2 and 3 have been delayed due to (i) diversion of construction forces from Units 2 and 3 to Unit 1 to solve problems occasioned by the lateness of Unit 1, (ii) delay in delivery of major reactor coolant components, and (iii) modifications required to the reactor vessel internals for Unit 2. The Director of Regulation having determined that this action involves no significant hazards consideration, and good cause having been shown, the bases for which are set forth in a memorandum dated July 30, 1973, from R. C. DeYoung to A. Giambusso:

It is hereby ordered, That the latest completion date for CPPR-34 (Unit 2) is extended from September 1, 1973 to October 1, 1973, and the lastest completion date for CPPR-35 (Unit 3) is extended from August 1, 1973 to June 30, 1974.

Date of Issuance: July 30, 1973.

For the Atomic Energy Commission.

A. GIAMBUSSO,
Deputy Director for Reactor Projects, Directorate of Licensing.

CIVIL AERONAUTICS BOARD

[Docket No. 24694]

MIAMI-LOS ANGELES COMPETITIVE NONSTOP CASE

Notice of Oral Argument

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that oral argument in the above-entitled matter is assigned to be held before the Board on September 26, 1973, at 10 a.m. (local time) in Room 1027, Universal Building, 1825 Con-

V 38-150 AUG 6 73 XUM

necticut Avenue, NW., Washington, D.C.

Dated at Washington, D.C., July 31 1973.

[SEAL] RALPH L. WISER,
Chief Administrative Law Judge.

[FR Doc.73-16143 Filed 8-3-73;8:45 am]

COMMISSION ON CIVIL RIGHTS

COLORADO STATE ADVISORY COMMITTEE

Notice of Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 707) notice is hereby given that the Colorado State Advisory Committee to the U.S. Commission on Civil Rights will meet in a closed session at 9:00 A.M., Monday, August 6, 1973, in Room 216, Ross Building, 1726 Champa Street, Denver, Colorado 80202.

The agenda will consist of discussions leading to recommendations on proposed revisions to the first draft of the Colorado Prison preliminary report.

I have determined that this meeting would fall within exemption (5) of 5 U.S.C. 522(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 1, 1973.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc 73-16284 Filed 8-3-73;8:45 am]

NEW MEXICO STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the New Mexico State Advisory Committee to this Commission will convene at 6:00 p.m. on August 6, 1973, at the Four Seasons, 2500 Carlisle Boulevard, North East, Albuquerque, New Mexico 87110.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Southwestern Regional Office of the Commission, Room 209, New Moore Building, 106 Broadway, San Antonio, Texas 78205.

The purpose of this meeting shall be to review plans for the Navajo Indian Hearing to be held in Window Rock, Arizona in September 1973, in which the New Mexico Committee will participate.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., August 1, 1973.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

EFFLUENT LIMITATIONS GUIDELINES AND STANDARDS OF PERFORMANCE FOR NEW SOURCES

Advance Notice of Public Review Procedures

Advance notice is hereby given concerning notices of proposed rule making to be published by the Environmental Protection Agency ("EPA") with respect to effluent limitations guidelines, standards of performance, and pretreatment standards for new sources pursuant to sections 304(b) 306 and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1314, 1316 and 1317(c); 86 Stat. 816 et seq.; Pub. L. 92-500) ("the Act"). The purpose of this notice is to facilitate public comment upon the regulations to be promulgated under sections 304(b), 306 and 307(c), both before and after the publication of the notices of proposed rule making. In addition, this notice will explain EPA's overall plans for development of effluent limitations guidelines and standards of performance for new sources and the approach which is being taken by the Agency in discharging the duties placed upon the Administrator under sections 304(b), 306 and 307(c) of the Act.

EPA believes that the exposure of the technical basis and reasoning underlying regulations to be established pursuant to sections 304(b), 306 and 307(c) is essential to the promulgation of sound effluent limitations guidelines and standards of performance for new sources. At the same time, because of the deadlines for action imposed upon the Administrator under the Act, both EPA and the public will be pressed to analyze and resolve highly complex and important issues in a relatively short time. In order both to develop sound regulations and meet the time schedules set by the Act, EPA intends to identify as many issues and elicit points of criticism at the earliest possible time. To resolve such issues often will require further staff work and management decision-making within EPA and may necessitate substantial redrafting of regulations and support documents. Therefore, extensive external review cannot be postponed until internal EPA review of initial recommendations for effluent limitations guidelines and standards of performance has been completed, but must proceed concurrently with EPA's own internal review and decision-making if the Act's deadlines are to be met.

EPA has already begun this process by seeking comments upon draft technical reports from persons and organizations known to be interested in particular source categories. These reports (which are discussed further below) contain tentative recommended effluent limitations guidelines and standards of performance. This notice seeks to supplement this already initiated external review and facilitate further review and public comment in late August and early September, when notices of proposed rule making will be published in the FEDERAL REGISTER. The notice is divided into three parts. First, the basic legal authority for regulations concerning effluent limitations guidelines and standards of performance for new sources will be set forth. Second, EPA's general methodology will be described. Third, the means by which EPA has to date, and will in the future, seek the widest possible public scrutiny of the technical and legal basis for the regulations to be established will be explained.

1. *Legal authorities* — (a) *Existing point sources.* Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available (the 1977 requirement) and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives (the 1963 requirement).

(b) *New sources.* Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. The Administrator published in the FEDERAL REGISTER of January 16, 1973, (38 FR 1624) a list of source categories for which standards of performance for new sources will initially be established. Section 306(a)(2) defines "new source" as "any source, the construction of which is commenced after the publication of proposed regulations prescribing a standard of performance under this section which will be applicable to such source * * *."

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for a category of new sources at the same time that standards of performance for that category are promulgated pursuant to section 306. EPA presently plans to include in proposed and promulgated regulations establishing standards of performance for new sources, provisions which will require application of pretreatment standards which are consistent with EPA's proposed pretreatment standards for existing sources. The basis for the latter standards is set forth in the FEDERAL REGISTER of July 19, 1973 (38 FR 19236) under 40 CFR Part 128. The provisions and rationale of Part 128 are equally applicable to sources which would constitute "new sources", under section 306 if they were to discharge pollutants directly to navigable waters, except for § 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires application of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards to be promulgated under section 307(c) apply to new sources, the regulations establishing standards of performance for new sources will amend § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

2. *EPA's methodology*—(a) *Overall approach.* The technical studies discussed below and the development of regulations for effluent limitations guidelines and standards of performance are undertaken in the following manner. The point source category is first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis includes a determination of whether differences in raw material used, product produced, manufacturing process employed, age and size of plants, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment are then identified. This includes an analysis of (1) the source, flow and volume of water used in the process employed and the sources of waste and waste waters in the plant; and (2) the constituents of waste waters. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance are then identified.

Next, the control and treatment technologies existing within each segment are identified. This includes an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which exists or is capable of being designed for each segment. It also includes an identification of the effluent level resulting from the application of each of the treatment and control technologies, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants. The problems, limitations and reliability of each treatment and control technology are also identified. In addition, any non-water quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation is examined. Finally, the energy requirements of each control and treatment technology are determined, as well as the cost of the application of such technologies.

This information is then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available", "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors are considered including the total cost of the application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes and non-water quality environmental impact (including energy requirements).

The data on which the above analysis was performed included EPA permit applications, EPA sampling and inspections, industry submissions and consultant reports, including the reports discussed below.

(b) *Technical studies.* Studies of some thirty point source categories for which regulations will initially be promulgated were instituted by EPA as soon as possible after passage of the Federal Water Pollution Control Act Amendments of 1972 (October 18, 1972). These studies constitute in-depth analyses of the technological feasibility and economic costs of reducing or eliminating discharges of pollutants. The studies, along with other information obtained by EPA in the course of internal and external review of the resulting reports or otherwise available to EPA, will serve as a foundation for the regulations to be issued under sections 304(b) and 306 of the Act.

To have attempted to amass within the Agency in a very short period of time the large number of technical personnel with experience in the many diverse point source categories to be covered would have been impractical. Therefore, the overall data base and initial analysis has been obtained through contracts with qualified technical consultants. These consultants were instructed to perform in-depth studies of each point source category, under the supervision and with the assistance of EPA, in accordance with the methodology described above The resulting draft reports include initial tentative recommendations with respect to the effluent limitations guidelines and standards of performance for the particular point source category concerned. The draft reports and recommendations are then subjected to extensive internal and external review. The contractors are assisting in the initial collection and collation of the data base. The responsibility for establishing effluent limitations guidelines and standards of performance for new sources, of course, remains with EPA.

For each of the point source categories covered by the technical studies, EPA is also conducting supplementary studies of the economic impact which could result from application of alternative control and treatment technologies. These studies add to the economic analyses already undertaken as part of the technical studies, which center upon the investment and operating costs associated with various alternative control and treatment technologies, by estimating the broader economic effects which might result from the required application of various technologies. The economic impact studies will investigate effects of alternative approaches in terms of product price increases, effects upon employment and the continued viability of affected plants, effects upon foreign trade and other competitive effects. These reports may be obtained in the same manner as the EPA draft reports, as discussed in section 3(c) below.

Contractors' technical studies of the following point source categories have been completed:

1. Pulp, Paper and Paperboard Mills
2. Builders Paper and Board Mills
3. Meat Product and Rendering Processing
4. Dairy Product Processing
5. Grain Mills
6. Canned and Preserved Fruits and Vegetables Processing
7. Canned and Preserved Seafood Processing
8. Beet Sugar Processing
9. Cane Sugar Processing
10. Textile Mills
11. Cement Manufacturing
12. Feedlots
13. Electroplating
14. Organic Chemicals Manufacturing
15. Inorganic Chemicals Manufacturing
16. Plastics and Synthetic Materials Manufacturing
17. Soap and Detergent Manufacturing
18. Fertilizer Manufacturing
19. Petroleum Refining
20. Iron and Steel Manufacturing
21. Nonferrous Metals Manufacturing
22. Phosphate Manufacturing
23. Steam Electric Powerplants
24. Ferroalloy Manufacturing
25. Leather Tanning and Finishing
26. Glass Manufacturing
27. Insulation Fiberglass Manufacturing
28. Timber Products Processing
29. Beet Sugar Processing Industry
30. Insulation Fiberglass Industry

3. *Public participation in the development of regulations*—(a) *Review of the draft contractors' reports.* The completed contractors' reports are presently undergoing intensive analysis within

V 38-150 AUG 6 73 XUM

EPA and are also receiving extensive external review and comment. This process of internal and external review is being carried on simultaneously in order to make the most of the time available under the Act. Once the contractors' draft reports are received by EPA, they are immediately distributed to a list of external reviewers for critical analysis. The persons or institutions listed below have been sent the draft reports. They have been asked to comment within 30 days so there will be time for their comments to be taken into account by EPA when preparing proposed rule making documents.

(b) *Public availability of draft technical reports.* The draft reports are voluminous and rapid reproduction in large quantities is difficult to accomplish. In order to maximize the usefulness of early external review of the reports, the reports must be transmitted to interested persons immediately upon receipt by EPA. Printing of substantial quantities of the reports would consume two to three weeks and, under applicable federal regulations, no more than approximately 160 copies of the reports may be provided through outside printing contracts. The 160 copies of the report supplied by the contractors have already been largely exhausted in transmissions to the organizations listed above, and for internal review purposes within EPA. However, a copy of every report is available in each of EPA's regional offices, which are listed in the Appendix to this notice, and a complete set of the reports is also available in EPA's Washington offices (Office of Public Affairs, Environmental Protection Agency, Room W-227, Waterside Mall, Washington, D.C. 20460). The Washington Office will also maintain a complete set of comments received from the public upon draft reports and upon the notices of proposed rule making which will subsequently be published. The draft reports, revised EPA reports which are described below, and all public comments, will be available for inspection and copying during regular business hours. Under EPA's information regulations (40 CFR, Part 2), a fee may be required for making copies.

In addition to review of the EPA copies of the reports, interested persons may in many instances obtain a copy of a draft report by contacting an organization listed above with which they have an affiliation or by seeking to review a copy in the possession of the appropriate State agency.

(c) *Public availability of EPA draft reports.* Upon conclusion of internal and external review of the initial draft reports and their tentative recommendations, an EPA draft report will be prepared in support of proposed regulations to be issued in the FEDERAL REGISTER. The EPA draft report will be published simultaneously with the notice of proposed rule making. The EPA draft report may be different from the contractors' reports, particularly as to the assessment of practicability or availability of technology, and the conclusions reached with respect to effluent limitations guidelines and standards of performance for new sources.

However, EPA does not anticipate that the EPA report will be markedly different in terms of the fundamental data base for the regulations. In most cases, major issues or objections to the approach taken or the conclusions reached in the EPA draft report will have already been raised by the contractors' draft report. Criticisms of the adequacy of the data base and the analytical methods employed should therefore be expressed now rather than after the notice of proposed rule making.

Nevertheless, EPA does not regard the contractors' draft report as an official EPA document and additional comments will, of course, be solicited once the EPA draft report and the associated proposed regulations are published (A final EPA report will also be prepared and published in support of the final regulations promulgated under sections 301, 304(b), 306 and 307(c)). The EPA draft report will be sent to the list of reviewers set forth earlier in this notice. In addition, EPA is establishing a mailing list of other persons wishing to obtain a copy of the EPA draft report. Any person wishing to be included on the list should so request as soon as possible, but no later than August 20, 1973. The request should be addressed to the "EPA Information Center, Attention: Mr. Philip B. Wisman, Environmental Protection Agency, Room W-327, Waterside Mall, Washington, D.C. 20460", and should indicate which specific reports the person or organization is interested in receiving. EPA will transmit a copy of the EPA draft report to those on the mailing list, as soon as the report is available. Copies of the EPA draft reports will otherwise be transmitted, upon request to EPA, at the address just quoted, as soon as possible. The economic studies referred to in section 2(b) above will be made available upon request in the same manner as the EPA draft reports.

EPA desires to make copies of all reports available to interested parties wishing to comment as soon as possible. EPA therefore requests the cooperation of the

V 38-150
AUG 6 73
XUM

public who are interested in, but not directly affected by, the proposed regulations in awaiting the final EPA report to be published after the final regulation is printed in the FEDERAL REGISTER, rather than requesting copies of the EPA draft reports.

(d) *Solicitation of public comments.* By seeking comments upon the initial draft reports which have already been prepared, and the initial recommended guidelines and standards which those reports contain, much of the analysis and comment which would ordinarily occur after notices of proposed rule making are published is taking place now. In this way the resolution of many issues can be accomplished even before notices of proposed rule making are published. These issues will be identified and their resolution explained in the notices of proposed rule making. Issues which remain unresolved will be highlighted in the notices. In addition, EPA hopes to enable all interested parties to be sufficiently familiar with the complex technical details underlying the proposed effluent limitations and standards so that they can respond to notices of proposed rule making in a relatively short time. In order to meet the deadlines imposed by the Act, the present plan is that the notices of proposed rule making will request formal, public comments within 21 days of publication of the notices in the FEDERAL REGISTER. Those persons who have indicated their desire to be included on the mailing list described above will receive copies of EPA's draft report supporting the proposed regulations in the FEDERAL REGISTER. As noted, these reports will reflect EPA's judgment as to the proper regulations; however, they will be based in large part upon the initial draft reports (which will have been available in most cases since early July 1973) and any comments received thereon.

EPA will consider all comments received up to the time indicated in the notices of proposed rule making. In addition, to the extent time allows, early comments upon the initial draft reports will be considered when developing proposed rule making regulations.

(e) *Conclusion.* In summary, EPA is, by this notice, seeking to encourage as wide ranging and thorough public review prior to proposal and promulgation of effluent limitations guidelines and standards of performance as is possible within the time allowed. The following specific steps may be taken by interested persons:

1. Submit comments upon initial draft reports and economic studies. To facilitate rapid transmission of comments to the persons concerned within EPA, and also have a copy which is immediately available for public review, EPA requests that comments be submitted in triplicate. All comments received before or after publication of the notice of proposed rule making, as well as all technical and economic reports, will be available for inspection and copying at the Office of Public Affairs, Room 227, West Tower, Waterside Mall, during regular business hours (8:00 a.m.–4:30 p.m.).

2. Request inclusion on a mailing list for the EPA draft reports and economic studies which will be published about the same time as notices of proposed rule making in the FEDERAL REGISTER. Requests to be included on the mailing list should be received by August 20, 1973 and should indicate which specific reports are requested.

3. Comment upon the notices of proposed rule making and the associated draft EPA technical and economic reports. All comments received within 21 days after publication of the notices in the FEDERAL REGISTER will be considered.

4. All public comments, requests to be included on the mailing list for reports and other requests for reports may be addressed to "EPA Information Center, Attention: Mr. Philip B. Wisman, Environmental Protection Agency, Room W-327, Waterside Mall, Washington, D.C. 20460."

In conclusion, it should be emphasized that EPA seeks comments upon its overall approach and legal interpretation of its responsibilities under sections 304(b), 306 and 307(c) of the Act, as well as upon the technical aspects of the initial draft reports, and the EPA reports to be issued. However, it should be also emphasized that the early expression of comments is essential if EPA is to be able to make whatever adjustments and responses which may be necessary in time to satisfy its responsibilities under the Act. In the event comments are in the nature of criticisms as to the adequacy of data which is available or which may be relied upon by the Agency, comments should identify any additional data which may be available and should indicate how such data is pertinent to the development of regulations under sections 301, 304(b), 306 and 307(c) of the Act. In the event comments address the approach taken to establishing an effluent limitation guideline or standard of performance, EPA solicits suggestions as to what alternative approach should be taken, or result reached, and why and how this fits with the detailed requirements of sections 304(b), 306 and 307(c) of the Act.

Dated: July 31, 1973.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

FEDERAL COMMUNICATIONS COMMISSION

[Report 659]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

JULY 30, 1973.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) Within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60 day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

APPENDIX

APPLICATION ACCEPTED FOR FILING:

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

20070–C2–P–74 Dakota Radio Paging, Inc. (KQK777) C.P. to add additional facilities to operate on 152.06 MHz at a new location described as Loc. #2: Water Tower 2 miles SSW of Sioux Falls, (Lincoln) S. Dakota.

20071–C2–P–74 Miami Valley Radiotelephone (KLF577) C.P. for additional facilities to operate on 35.22 MHz located at 2400 Lehman Road, Cincinnati, Ohio, described as Loc. #2.

20072–C2–P–74 Raleigh Radio Paging Service, Inc. (KIY409) C.P. to replace transmitter operating on 35.22 MHz at 5 West Hargett Street, Wake, North Carolina.

20073–C2–P–74 Radio Telephone Service, Inc. (New) C.P. for a new 2-way station to operate on 152.21 MHz located at 2210 Boardwalk, Atlantic City, New Jersey.

20074–C2–P–74 Coosa Valley Telephone Company (New) C.P. for a new 2-way station to operate on 152.510 MHz located at: 0.8 mile NW of intersection of U.S. Hwy 78 & U.S. Hwy 231 in Pell City, Alabama.

20075–C2–P–(7)–74 South Central Bell Telephone Company (KIB532) C.P. to replace transmitter operating on 152.81 MHz; additional facilities to operate on 152.51, 152.66, & 152.72 MHz; change antenna system and relocate all base facilities to Sharps Ridge, Memorial Park, Knoxville, Tennessee; also establish test facilities to operate on 157.77, 157.89, 157.92, 157.95, 157.98, 158.07 to be located at 312 North Broadway, Knoxville, Tennessee.

20076–C2–P–(4)–74 Airsignal International, Inc. (New) C.P. for a new 2-way station to operate on 454.075 454.150 454.200 and 454.325 located at: SE corner of I-40 & North Avalon, West Memphis, Arkansas.

20077–C2–(4)–74 Kwik Kall Communications Co. (New) C.P. for a new 2-way station to operate on 454.075 454.200 454.275 and 454.350 located at: 5321 First Place, N.E., Washington, D.C.

20078–C2–P–74 Elyria Telephone Company (KQK581) C.P. to replace transmitter to operate on 152.66 MHz located at 124–126 Middle Avenue, Elyria, Ohio.

20079–C2–P–74 Radiocall, Inc. (New) C.P. for a new 1-way signaling station to operate on 152.24 MHz, Base, to be located at Loc. #1: 1.3 miles S.W. of Maui County Farm, Kula, Hawaii and 454.025 MHz, Control, to be located at Loc. #2: 1977 Kaohu Street, Wailuku, Hawaii.

251-C1-ML-74 Same. (KQM38). Mod. of C.P. to change from vertical to horizonal polarization on frequencies 11325 and 11565 toward Station KQM37, at Shalersville, Ohio.

252-C1-P-74 General Telephone Company of the Northwest, Inc. (New) 11.5 Miles SW of Wenatchee, Washington. Lat. 47 16 31 N. -Long. 120 25 38 W. C.P. for a new station on frequencies: 6034.2V toward Wymer, Washington on azimuth 48° 57'; 11445.0H 11665.0H toward Wenatchee, Washington on azimuth 18° 51'; 6078.6H toward Chelan Butte, Washington on azimuth 66° 46'.

253-C1-P-74 Same. (New). 100 S. Chelan Avenue, Wenatchee, Washington. Lat. 47 25 20 N. -Long. 120 18 43 W. C.P. for a new station on frequencies: 10915.0H 11135.0H toward Mission Peak, Washington on azimuth 18° 51'.

254-C1-P-74 Same. (KTF80). 2.9 Miles SW of Chelan, Washington. C.P. for additional facilities on frequencies: 6330.7H toward Mission Peak, Washington on azimuth 66° 46'; 2110.8H toward Mansfield, Washington on azimuth 29° 63'; and 2126.8H toward Harmony Heights, Washington on azimuth 36° 72'.

255-C1-P-74 Same. (New). Main Street adjacent to City Park, Mansfield, Wash. Lat. 47 48 45 N. -Long. 119 38 16 W. C.P. for a new station on frequency: 2160.8H toward Chelan Butte, Washington on azimuth 29° 63'.

256-C1-P-74 Same. (New). 15 First, SW, Brewster, Washington. Lat. 48 05 52 N. -Long. 119 46 46 W. C.P. for a new station on frequency: 2176.8H toward Harmony Heights Passive, Washington on azimuth 3° 86'.

257-C1-P-74 The Mountain States Telephone and Telegraph Company. 120 4th Street, N.W., Albuquerque, New Mexico. Lat. 35 05 06 N.—Long. 106 39 03 W. C.P. to change antenna system. (KLC49).

258-C1-P-74 Same. (KLD48). 12 Miles NW of Jemez. Lat. 35 41 43 N.—Long. 106 51 29 W. C.P. to add frequencies: 10955V and 10715H MHz toward new points of communication at San Ysidro, New Mexico, on azimuth 16° 6'.

260-C1-P-74 Wyoming Microwave Corporation. (KPS63). C.P. to add frequencies 6234.3V, 6323.3V, 6382.6V and 6412.2H MHz (via power split) toward Lovell, Wyoming on azimuth 57 degrees 36 minutes. Station location Cedar Mountain, Wyoming, (Lat. 44 29 46 N.—Long. 109 09 16 W.). (Informative: Applicant proposes to provide the television signals KSL, KUED, KCPX, and KUTV of Salt Lake City, Utah to Lovell Cable TV Company in Lovell, Wyoming).

261-C1-R-74 Indiana Bell Telephone Company. (KYS50). In any temporary fixed location within the territory of the grantee. Application for Renewal of Radio Station for Term: September 12, 1973 to September 12, 1974.

Major Amendments

3778-C1-P-72 United Video, Inc. (New) Change azimuth from 90 degrees 07 minutes to 88 degrees 00 minutes toward Bloomingdale, Ga.

3779-C1-P-72 Same Change location to west side of Ga. Hwy. 17, 0.9 mile north of U.S. Hwy 80 intersection. Lat. 32 degrees 09 minutes 30 seconds N. and Long. 81 degrees 20 minutes 59 seconds W. Change azimuth from 131 degrees 41 minutes to 131 degrees 52 minutes toward WJCL; from 114 degrees 28 minutes to 115 degrees 50 minutes toward WSAV; and from 110 degrees 36 minutes to 112 degrees 22 minutes toward WTOC.

3780-C1-P-72 Same Change azimuth from 171 degrees 22 minutes to 168 degrees 43 minutes toward Jesup, Ga.

3781-C1-P-72 Same Change azimuth from 24 degrees 12 minutes to 23 degrees 41 minutes toward Jesup.

3785-C1-P-72 Same Change location to south side of U.S. Hwy. 341, 3.8 miles NW of Jesup, Ga. Lat. 31 degrees 38 minutes 16 seconds N. and Long. 81 degrees 57 minutes 23 seconds W. Change azimuth from 351 degrees 24 minutes to 348 degrees 45 minutes toward Tison; and from 204 degrees 13 minutes to 203 degrees 46 minutes toward Owen.

5199-C1-P-66 United Video, Inc. (New) 2.5 Miles East of Gridley, Illinois (Lat. 40 45 12 N.—Long. 88 49' 57 W.): Application amended (a) to relocate station to foregoing coordinates and (b) to change frequencies to 10775V MHz and 11015V MHz toward Bloomington, Illinois, on azimuth 204 degrees 18 minutes.

6402-C1-P-70 Southern Pacific Communications Company (New) Amended to change coordinates of station to Lat. 38 23 10 N.—Long. 90 09 02 W. (All other particulars same as reported in Public Notice dated March 15, 1971).

CORRECTIONS

8399-C1-TC-73 Olympic Telephone Company. (WHB45). Change File No. 8530-C1-TC-73 to 8399-C1-TC-73. (All other particulars same as reported in Public Notice No. 651, dated June 4, 1973).

The following File Number will be changed from 1973 to 1974.

[FR Doc.73-16040 Filed 8-3-73;8:45 am]

[Docket No. 19684; FCC 73-811]

ITT WORLD COMMUNICATIONS INC.

Telex and Message Telegraph Services to Guam; Memorandum Opinion and Order Amending and Adding Issues

In the matter of ITT World Communications Inc. Petition under section 201(a) of the Communications Act of 1934 for connection with RCA Global Communications, Inc. (38 FR 14436) to enable ITT World Communications Inc. to provide telex and message telegraph services to Guam.

1. The Commission is considering, on its own motion, pursuant to sections 201 (a) and 3(i) of the Communications Act of 1934, an amendment to the issues set for hearing in this matter in the Commission's Memorandum Opinion and Order of February 20, 1973 (FCC 73-144).

BACKGROUND

2. This proceeding was instituted by Memorandum Opinion and Order of February 20, 1973 (FCC 73-144) on petition of ITT World Communications Inc. (ITTWC), requesting that the Commission, pursuant to section 201(a) of the Communications Act of 1934, direct RCAGC to cooperate with ITTWC in establishing an electrical interconnection between RCAGC's telegraph message and telex systems on Guam and ITTWC's telegraph message and telex systems, establishing through routes and charges applicable thereto and the division of such charges, and establishing and providing facilities and regulations for operating such through routes.[1]

3. Subsequently RCAGC filed on March 19, 1973, a motion to clarify and enlarge the hearing issues to specifically include whether ITTWC had any right under the International Formula prescribed by the Commission pursuant to Section 222 of the Communications Act of 1934[2] to unrouted Guam-bound message telegraph traffic originating in the Western Union Telegraph Company (WU) domestic network, whether there should be an amendment to the Formula, and the financial effect on RCAGC in the event of any redistribution of traffic under the Formula. RCAGC represented that it received no quota under the Formula for Guam-bound traffic since it did not operate facilities to that point until 1952. It is to be noted, however, that all unrouted Guam-bound message telegraph traffic has been distributed to RCAGC because it alone has been authorized to serve Guam.[3] If a present right to unrouted traffic were successfully established by ITTWC and interconnection were ordered at a point outside of the United States Mainland, RCAGC expects that ITTWC would receive the total unrouted message telegraph traffic presently handled by RCAGC.[4]

4. In our Order of May 29, 1973, we denied the RCAGC motion for enlargement,[5] finding that ITTWC's petition for interconnection and subsequent associated pleadings (including those of WUI) were directed solely at gaining direct access to Guam for exclusive telex subscribers and control over telegraph messages specifically routed via ITTWC (or WUI) facilities and contained nothing to indicate that there was any intent to claim rights to unrouted traffic under the Formula, or to request an amendment to the Formula. Accordingly, we concluded that there was "no reason to include in the instant proceeding any issue addressing the necessity or desirability of effecting a change in the current distribution of Guam-bound message telegraph traffic pursuant to the International Formula as an incident to interconnection." We provided, however, that if ITTWC (and/or WUI) informed the Commission within 15 days of the release of the order it intended to seek a redistribution of unrouted traffic under the Formula were interconnection ordered, we would take appropriate steps to consider such issue in conjunction with Docket No. 19660, In the Matter of International Record Carriers' Scope of Operations in the Continental United States, Including Possible Revisions of the Formula Prescribed under Section 222 of the Communications Act.

5. On June 13, 1973, ITTWC timely filed notice of its intention to seek a redistribution of Guam-bound unrouted message traffic in the event the requested interconnection is ordered. At the conclusion of its filing ITTWC added the following:

> Being unaware of any basis for such action, we assume that the normal administration of the Formula will not be stayed respecting the initial determination and recognition of any carrier's Guam quota rights.

6. Responding to such language, RCAGC filed on June 28, 1973, a motion for clarification requesting that in the event interconnection is ordered herein, the Commission "make it explicit that the present existing distribution of unrouted message telegrams will not be affected by any action except after completion of the necessary proceedings in Docket 19660." RCAGC asserts that if ITTWC were free to effect the distribution of unrouted traffic through other means (e.g., by virtue of the independent operation of the terms of the Formula), the Commission's Order of May 29, 1973 does not adequately protect the rights of RCAGC in the interconnection proceeding.

7. ITTWC filed an opposition to the RCAGC motion on July 11, 1973. It argues that the question raised by RCAGC is purely academic in the absence of the establishment of a Guam telegraph interconnection on a normal correspondancy basis, an assertion by ITTWC of quota rights prior to disposition of Docket 19660, and the recognition of such rights by the "Formula's administrative apparatus." It also asserts that RCAGC's effort to stay the "normal administration of the Formula" while ITTWC's Guam quota rights are studied (presumably within Docket 19660) is inconsistent with RCAGC's position in Docket No. 19660 that the existing Formula is not unjust, unreasonable or inequitable. Finally, it argues that adoption of the RCAGC view would constitute an unprecedented and discriminatory suspension of ITTWC's rights under the Formula pending final disposition of Docket 19660.

DISCUSSION

8. Upon review of ITTWC's June 13, 1973 filing and its recent pleading in opposition to RCAGC's motion for clarification, it appears that, contrary to the impression derived from earlier pleadings in this matter, ITTWC intends to apply under the existing International Formula for a share of unrouted Guam-bound message telegraph traffic if an interconnection with RCAGC is ordered in this proceeding (in addition to its clearly stated desire to handle telex and routed message telegraph traffic via such interconnection). ITTWC appears to believe it is entitled to such traffic under the Formula as presently written and that it need not wait for the conclusion of Docket No. 19660 to accomplish a redistribution of Guam traffic, as we originally contemplated.

9. When the question as to ITTWC's precise position with respect to unrouted traffic was raised initially by RCAGC in its March 12, 1973 motion for clarification and enlargement of the issues, ITTWC in its opposition referred to the remoteness of Formula considerations to this proceeding and the frivolity of Formula revision outside the pending Docket No. 19660. It left open the question of whether it would seek, as a consequence of an affirmative decision in this proceeding, a redistribution of traffic under the International Formula as it presently exists. In its June 13 filing, however, ITTWC's concluding remark suggested that a change in the current distribution of unrouted Guam-bound message traffic may be sought as an incident to interconnection, pursuant to the "normal administration of the Formula," pending conclusion of the broader policy concerns in Docket No. 19660.

10. When the question as to ITTWC's intentions with respect to unrouted traffic was raised a second time in RCAGC's June 29, 1973 motion for clarification, ITTWC again argued the irrelevancy of the redistribution issue in this proceeding. It also expanded on its concern that the normal administration of the Formula and the recognition of quota rights by the Formula's administrative apparatus not be stayed pending Docket No. 19660, thus intimating further, but without detail, that a change in the current distribution of Guam traffic would be sought as an incident to interconnection other than in the context of Docket No. 19660.

11. We disagree with the position taken by ITTWC that a change in the current distribution of unrouted Guam-bound message traffic as an incident to interconnection would have no relevant impact on RCAGC (on the theory that the hearing herein relates only to the Guam half of the interconnected circuit and not the Mainland half). It is clear that should ITTWC be entitled as a matter of law to such unrouted traffic under the present Formula, the effect on RCAGC, which has heretofore handled 100% of unrouted Guam message traffic, would be relevant to a resolution of the financial issues set for hearing in the Commission's Order of February 20, 1973.

12. Accordingly, we find it appropriate to add to this proceeding the issue of whether ITTWC, in the event interconnection is ordered, would be entitled to quota rights under the existing International Formula. If ITTWC is entitled to such rights, we would then consider projected financial and other effects of the consequent redistribution of traffic on RCAGC. The quota rights question appears to be one of law; therefore, it should be addressed in the form of written briefs submitted to the Commission for its determination. The hearing need not be deferred pending the resolution of this issue since it is likely that testimony offered in response to the issues originally set for hearing in the Com-

---

[1] The hearing order encompassed the following issues:

"(1) Whether it is necessary or desirable in the public interest to require RCAGC to interconnect its telegraph message and telex facilities with facilities of ITTWC for the provision of service to and from Guam.

(a) The effects, financial and other, on ITTWC and RCAGC telex and message services, and the public, were no interconnection to be established; and

(b) the manner in which ITTWC customers are able to send or receive messages to and from Guam in the absence of interconnection.

(2) The points at which interconnection, if any, should be established, and the financial and other effects on the ITTWC and RCAGC telex and message services and the public.

(a) The through routes and charges to be established; and

(b) the facilities and regulations appropriate to the operation of such routes.

(c) The charges and the classifications, regulations and practices affecting such charges; and

(d) the appropriate division of such charges."

[2] Merger of Western Union Telegraph Company and Postal Telegraph Company, Separate Report of the Commission on the Formula, 10 FCC 2d 184 (1943). The Formula, which has been amended subsequent to its inception in 1943, governs the distribution among international telegraph carriers of message traffic filed with the Western Union Telegraph Company. It sets out a quota system for the distribution to the international carriers of unrouted outbound messages which, added to messages specifically routed via such carrier, gives each such amount of gross international tolls to a geographical subarea as is proportionate to its share of total industry tolls to such areas in a base period.

[3] The only companies operating on Guam during the base period were Commercial Pacific Cable Company, now defunct, and Globe Wireless, now absorbed into ITTWC. Globe Wireless was acquired in 1960 by AC&R, a subsidiary of International Telephone and Telegraph Corporation. According to RCAGC, it could theoretically be argued that ITTWC has succeeded to the quota of Globe Wireless, even though in the 32 years since the base period it has never applied for it.

[4] ITTWC opposed RCAGC's motion for enlargement, arguing that formula considerations would have no effect on the amount of revenue derived by RCAGC from its operations on Guam and thus were remote from the central issues in the subject proceeding, and consideration of a revision of the Formula would be frivolous in light of the pending Commission Inquiry, *In the Matter of International Record Carriers' Scope of Operations in the Continental United States, Including Possible Revisions of the Formula Prescribed under Section 222 of the Communications Act* (Docket No. 19660).

[5] At the same time the Commission granted a motion of Western Union International, Inc., amending the issues in the instant proceeding to include WUI wherever mention is made of ITTWC.

V 38-150
AUG 6 73
XUM

mission's February 20, 1973 Order will produce sufficient traffic and revenue data to enable consideration of the effect of any possible redistribution of traffic should the Commission find in favor of ITTWC. If necessary, however, appropriate steps may be taken to incorporate additional oral testimony into the hearing record.

CONCLUSION

13. In light of ITTWC's recent intimations that it may seek a redistribution of unrouted Guam-bound message traffic as an incident to interconnection prior to the conclusion of Docket No. 19660 and the clear relevancy of such a possibility to the instant proceeding, we are compelled to amend the issues identified for Commission inquiry in this proceeding in the February 20, 1973 Order.[6]

14. Accordingly, *it is ordered*, That:

(A) The second issue of the Commission's inquiry in Docket No. 19684, initiated by Memorandum Opinion and Order released February 20, 1973 (amended by Memorandum Opinion and Order released May 29, 1973, to include WUI wherever mention is made of ITTWC) shall be amended to read as follows:

(2) The points at which interconnection, if any, should be established and the financial and other effects, including the redistribution of unrouted Guam-bound message telegraph traffic pursuant to the International Formula, on the ITTWC, WUI and RCAGC telex and message services and the public * * *

(B) A third issue shall be added to the inquiry in Docket No. 19684, as follows:

(3) The rights of RCAGC, ITTWC and WUI to unrouted Guam-bound message telegraph traffic under the existing International Formula.

(C) The third issue referenced in (B) above shall be addressed by the parties in the form of written briefs submitted to the Commission within 15 days of the release of this Order. Such briefs shall be personally served by each party on the other parties herein, and a certificate to such effect shall be filed with the Commission. Replies may be filed by any party within 5 days thereafter. A determination may be made by the Commission independently of the scheduled hearing in this matter. The hearing shall continue as scheduled, and the Administrative Law Judge shall defer the closing of the record until further order of the Commission.

By the Commission.

Adopted: July 27, 1973.

Released: July 31, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[7]
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-16139 Filed 8-3-73;8:45 am]

[6] In light of this conclusion, there is no apparent need to consider on its merits and dispose of RCAGC's pending Motion for Clarification filed June 28, 1973.

[7] Commissioner Johnson concurring in the result; Commissioner H. Rex Lee absent.

FEDERAL DEPOSIT INSURANCE CORPORATION

LOANS TO CORPORATION EXAMINERS BY NATIONAL BANKS, DISTRICT BANKS AND STATE MEMBER BANKS OF FEDERAL RESERVE SYSTEM

Policy Statement

Any officer, director or employee of a bank the deposits of which are insured by this Corporation is prohibited from making a loan to any governmental examiner "who examines or has authority to examine" such bank (18 U.S.C. 212). A governmental bank examiner, in turn, is prohibited from "accept[ing] a loan from any bank, corporation, association or organization examined by him or from any person connected therewith" (18 U.S.C. 213). Section 10(b) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1820(b)), provides in pertinent part:

> The Board of Directors shall appoint examiners who shall have power, on behalf of the Corporation, to examine any insured State nonmember bank (except a District bank), any State nonmember bank making application to become an insured bank, and any closed insured bank, whenever in the judgment of the Board of Directors an examination of the bank is necessary. In addition to the examinations provided for in the preceding sentence, such examiners shall have like power to make a special examination of any State member bank and any national bank or District bank, whenever in the judgment of the Board of Directors such special examination is necessary to determine the condition of any such bank for insurance purposes. In making examinations of insured banks, examiners appointed by the Corporation shall have power on behalf of the Corporation to make such examinations of the affairs of all affiliates of such banks as shall be necessary to disclose fully the relations between such banks and their affiliates and the effect of such relations upon such banks. Each examiner shall have power to make a thorough examination of all of the affairs of the bank and its affiliates, and shall make a full and detailed report of the condition of the bank of the Corporation.

The Corporation has rarely exercised its power under section 10(b) to make a special examination of a national bank, a State bank operating under the laws of the District of Columbia ("District Bank"), or a State bank which is a member of the Federal Reserve System ("State member bank"), which are regularly examined by examiners appointed by the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, respectively. Nevertheless, the second sentence of section 10(b) might be interpreted as conferring on all FDIC examiners general authority to examine any national bank, District bank or State member bank, thereby precluding a loan to an FDIC examiner from any such bank.

In the Corporation's opinion, attribution of such general authority to FDIC examiners would be an overly broad construction of section 10(b). Literally read, that provision empowers Corporation examiners to make a special examination of a national bank, District bank or State member bank only "whenever in the judgment of the [Corporation's] Board of Directors such special examination is necessary to determine the condition of [the] bank for insurance purposes." The Corporation interprets this provision as requiring a specific judgmental determination by the Board of Directors as a precondition for a special examination of a national bank, District bank or State member bank by Corporation examiners. It would thus seem wholly anomalous, as well as contrary to the clear meaning of section 10(b), to conclude that a Corporation examiner could, without express prior authorization by the Board of Directors, conduct a special examination of a national bank, District bank or State member bank which is not affiliated with an insured State nonmember bank which he does examine. Although express authorization presently exists with respect to examinations of State nonmember insured banks, which are regularly examined by the Corporation, no such authorization has been generally granted with respect to national banks, District banks or State member banks—nor does the Corporation foresee any circumstances under which such a general authorization would be granted in the future with respect to such banks.

On the contrary, any special examination of a national bank, District bank or State member bank hereafter conducted by Corporation examiners will be undertaken only pursuant to specific authorization by the Board of Directors. In order to avoid any possibility that a Corporation examiner might be assigned to examine a national bank, District bank or State member bank from which he has a loan outstanding, Corporation examiners will be required to report to the Corporation the name of any such bank from which they have credit outstanding. Furthermore, the specific authorization for special examination of a national bank, District bank or State member bank will be predicated upon actual notice to the particular bank at the time the special examination begins to the effect that the bank shall thereafter make no loans to the examiners specifically designated in the notice to conduct the special examination. Absent such specific notice, any such bank may assume that Corporation examiners do not have authority from the Corporation's Board of Directors to examine the bank.

In addition, as noted above, a Corporation examiner is prohibited from accepting a loan from, among others, "any person connected [with]" any bank actually examined by him (18 U.S.C. 213). Since this prohibition could be construed to apply to a Corporation examiner's acceptance of a loan from a national bank, District bank or State member bank which is affiliated with an insured State nonmember bank examined by him, no loan to a Corporation examiner should be made by a national bank, District bank or State member bank which is affiliated in a holding company system or otherwise with an insured State nonmember bank and no such loan should be accepted by a Corporation examiner. In the event a national bank, District bank or State member bank making a loan to a Corporation examiner becomes affiliated with an insured State nonmember bank subsequent to the making of the loan, the loan should be promptly removed and other suitable arrangements made. Prior to removal of the loan, the examiner in question will not be permitted to examine an insured State nonmember bank affiliated under a holding company system or otherwise with a national bank, District bank or State member bank which has made a loan to him.[1]

Dated at Washington, D.C., this 31st day of July, 1973.

By order of the Board of Directors.

FEDERAL DEPOSIT INSURANCE CORPORATION,
[SEAL] ALAN R. MILLER,
Executive Secretary.

[FR Doc.73-16096 Filed 8-3-73;8:45 am]

[1] The above procedures, of course, are merely designed to permit borrowing by an FDIC examiner from a national bank, District bank or State member bank in a bona fide transaction under circumstances where there is no likelihood of contravention of the congressional purpose underlying the criminal statutes discussed herein (18 U.S.C. 212 and 213). Those statutes are designed "to proscribe certain financial transactions which could lead to a bank examiner carrying out his duties with less than total, unbiased objectivity." United States v. Bristol, 473 F. 2d 439, 442 (5th Cir. 1973). As in the Bristol case, it may be expected that courts will have little difficulty in penetrating a subterfuge which attempts to camouflage criminal conduct that does violate the clear intent of those statutes.

FEDERAL POWER COMMISSION

[Docket No. CI74-45]

ANADARKO PRODUCTION CO.

Notice of Application

JULY 30, 1973.

Take notice that on July 23, 1973, Anadarko Production Company (Applicant), P.O. Box 9317, Fort Worth, Texas 76107, filed in Docket No. CI74-45 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Company from the No. 1 Light "D" Well, Stevens County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 1,000 Mcf of natural gas per day for one year from the first day of the month following the date of initial delivery at 45.0 cents per Mcf, subject to Btu adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16116 Filed 8-3-73;8:45 am]

[Docket No. E-8324]

BLACKSTONE VALLEY ELECTRIC CO.

Amendment to Agreement

JULY 30, 1973.

Take notice that Blackstone Valley Electric Company (Blackstone), on July 13, 1973, tendered for filing a supplement to its Rate Schedule FPC No. 6. Blackstone states that the supplement constitutes an amendment to an agreement of November 18, 1974 between Blackstone and Pascoag Fire District. (Pascoag)

According to Blackstone, the amendment was necessary to remove a restrictive clause of the agreement. The clause provided that Pascoag needed to secure Blackstone's approval before selling energy to any manufacturing concern in Harrisville Fire District whose requirements exceed 10 KW. Blackstone claims that the amendment has no effect upon service or charges; therefore, no estimate can be made regarding sales, services, or revenues.

Blackstone requests waiver of the notice requirements of the Commission's rules and regulations so that the amendment would become effective as of June 18, 1973. Blackstone claims that neither party would be adversely affected by such a waiver.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 9, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16118 Filed 8-3-73;8:45 am]

[Docket No. E-8317]

MONTAUP ELECTRIC CO.

Notice of Agreement

JULY 27, 1973.

Take notice that on July 16, 1973, Montaup Electric Company (Montaup) tendered for filing a letter agreement between Montaup and New Bedford Gas and Edison Light Company (New Bedford). The agreement provides for the use of Montaup's Bell Rock Road Switching Station by New Bedford.

According to Montaup, New Bedford is installing a substation adajacent to the Bell Rock Road Station and will obtain its 115 KV supply by connecting to the Bell Rock Road facilities. Montaup estimates the total cost of construction at $380,700 of which New Bedfords share will be $176,310. Montaup states the station will be completed by August 15, 1973 and therefore requests that be the effective date of this application.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 9, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8322]

MONTAUP ELECTRIC CO.

Amendment to Agreement

JULY 30, 1973.

Take notice that on July 16, 1973, Montaup Electric Company (Montaup) ten-

V 38-150 AUG 6 73 XUM

dered for filing a supplement to its FPC Rate Schedule No. 1. According to Montaup, the rate schedule above represents a contract among Montaup, Fall River Electric Light Company, Brockton Edison Company, and Blackstone Valley Electric Company, the latter three companies being the owners of Montaup.

Montaup states that the sole purpose for the amendment is to reflect the fact that the other three parties to the contract are retiring from service all of their generating capacity. Montaup asserts that there are no rate changes involved in the amendment and requests an effective date of August 16, 1973.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before **August 9,** 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP71-308, as Amended]

PENNZOIL PIPELINE CO.

Notice of Filing

JULY 27, 1973.

Take notice that on July 17, 1973, Pennzoil Pipeline Company (Pennzoil) tendered for filing a statement showing emergency purchases of natural gas by United Gas Pipe Line Company from Pennzoil during the period July 1, 1972 to June 30, 1973, and First Revised Sheet No. 11 to its FPC Gas Tariff canceling Rate Schedule X-3. Pennzoil states that service under the aforementioned rate schedule was discontinued at 7 a.m., June 30, 1973.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16115 Filed 8-3-73;8:45 am]

[Docket No. E-8321]

SOUTHERN CALIFORNIA EDISON CO.

Initial Rate Schedule

JULY 27, 1973.

Take notice that on July 16, 1973, Southern California Edison Company (SCEC) tendered for filing as an initial rate schedule a letter of agreement with Portland General Electric Company (Portland) dated May 30, 1973. SCEC states that the agreement provides that if Portland's available resources are or are expected to be insufficient to meet its short term system demands and spinning reserve requirements, SCEC will supply firm capacity and associated energy in the amounts requested, if available, delivered at the Oregon-California border over the facilities of the Pacific Intertie. The company further states that no new facilities are to be installed nor existing facilities modified in order to supply the service to be furnished under the proposed rate schedule. SCEC submits that no estimate of future sales and revenue can be made because such sales will be dependent upon availability of hydroelectric power in the Pacific Northwest. An effective date thirty days after filing date is requested.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16112 Filed 8-3-73;8:45 am]

TRANSCONTINENTAL GAS PIPELINE CORP.

Proposed Rates and Charges

JULY 30, 1973.

Take notice that on July 16, 1973, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing Second Revised Sheet No. 346, First Revised Sheet No. 347, and First Revised Sheet No. 348, (constituting part of Rate Schedule X-46) to its FPC Gas Tariff, Original Volume No. 2.

Transco states that these sheets are part of an exchange agreement between United Gas Pipe Line Company (United) and Transco. The proposed rates are necessary, Transco asserts, to effectuate amendments to that exchange agreement that were approved by Commission order of July 5, 1973, in Docket No. CP67-286.

Transco also requests waiver of the notice requirements of the Commission's rules and regulations. Since the exchange agreement has been in effect since its approval on July 5, 1973, that is the requested effective date of the proposed rates.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D. C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 9, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-187]

UNITED GAS PIPE LINE CO.

Revision to Tariff

JULY 27, 1973.

Take notice that on July 13, 1973, United Gas Pipe Line Company (United) tendered for filing as a part of its FPC Gas Tariff, Original Volume No. 2, the following:

Revised Sheets

Fourth Revised Sheet No. 176
Fourth Revised Sheet No. 179
Fourth Revised Sheet No. 180
Original Sheet No. 180-A

Superseded Sheets

Third Revised Sheet No. 176
Third Revised Sheet No. 179
Third Revised Sheet No. 180

United states that the purpose of this filing is to reflect an exchange agreement with Mid Louisiana Gas Company. An effective date of August 16, 1973, is proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D. C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16113 Filed 8-3-73;8:45 am]

[Docket No. CI74-49]

CITIES SERVICE OIL CO.

Notice of Application

JULY 30, 1973.

Take notice that on July 23, 1973, Cities Service Oil Company (Applicant), P.O. Box 300, Tulsa, Oklahoma 74102, filed in Docket No. CI74-49 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to El Paso Natural Gas Company from the State No. 1 Well, South Carlsbad Field, Eddy County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on July 22, 1973, within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale until May 1, 1975, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell all the gas it can produce, estimated to be approximately 3,000 Mcf per day, at 52.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment. Deliveries are estimated to be approximately 90,000 Mcf per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 16, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16126 Filed 8-3-73;8:45 am]

[Docket No. E-8323]

FLORIDA POWER AND LIGHT CO.

Notice of Agreement and Proposed Changes in Rates and Charges

JULY 27, 1973.

Take notice that on July 16, 1973, Florida Power and Light Company (Florida) tendered for filing a letter agreement dated April 16, 1973, between Florida and the city of Homestead providing for electrical service under the currently effective Rate Schedule WH. Also tendered was an application to substitute Florida FPC Electric Tariff Original Volume No. 1 and the accompanying Rate Schedule SR for the currently effective Rate Schedule WH under the tendered agreement. An effective date of September 1, 1973 is requested for implementing the new rate schedule, while a September 16, 1973 effective date is requested for the entire agreement.

Florida states that the proposed agreement will supersede the contract between Florida and the city of Homestead and currently on file with the Commission as Florida Rate Schedule FPC No. 9. The new agreement, according to Florida, contains authorization for it to seek to unilaterally change the applicable rates as it does in this application. Florida notes that the requested rates would be subject to refund in accordance with Commission order of March 29, 1973 in Docket No. E-8008.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 14, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16125 Filed 8-3-73;8:45 am]

MID LOUISIANA GAS CO.

Notice of Exchange Agreement Amendment

JULY 30, 1973.

Take notice that on July 16, 1973, Mid Louisiana Gas Company (Mid Louisiana) tendered for filing the following tariff sheets as a part of First Revised Volume No. 2 of its FPC Gas Tariff:

	Superseding
Second Revised Sheet No. 27	First Revised Sheet No. 27
Second Revised Sheets No. 30 through 34	First Revised Sheets No. 30 through 34
Original Sheet No. 34a	

Mid Louisiana states that the proposed tariff sheets are for the purpose of incorporating into Rate Schedule X-3 an amendment of the exchange agreement between Mid Louisiana and United Gas Pipe Line Company (United) dated November 27, 1972. The Company submits that by Order issued July 2, 1973, in Docket No. CP73-187, the Commission granted a Certificate of Public Convenience and Necessity authorizing the amendment to the exchange agreement. The Company further states that no change in rate level to its customers is proposed by these tariff sheets. An effective date of August 16, 1973, is proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16124 Filed 8-3-73;8:45 am]

[Docket No. CI74-44]

MOBIL OIL CORP.

Notice of Application

JULY 30, 1973.

Take notice that on July 23, 1973, Mobil Oil Corporation (Applicant), Three Greenway Plaza East, Suite 800, Houston, Texas 77046, filed in Docket No. CI74-44 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Northern Natural Gas Company from the Vacuum (Morrow) Field, Lea County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced sale of gas within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for two years from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's Gen-

V 38-150 AUG 6 73 XUM

eral Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell approximately 2,500 Mcf of gas per day at 50.0 cents per Mcf at 14 65 psia, subject to upward and downward Btu adjustment. Deliveries are estimated to be 75,000 Mcf per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 16, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein. If the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16127 Filed 8-3-73; 8:45 am]

[Docket No. CP61-79]

TEXAS GAS TRANSMISSION CORP.

Notice to Revision to Tariff

JULY 30, 1973.

Take notice that on July 16, 1973, Texas Gas Transmission Corporation (Texas Gas) tendered for filing Fifth Revised Sheet No. 317 and Original Sheet No. 317-A to its FPC Gas Tariff, Original Volume No. 2. Texas Gas states that this filing is made to reflect authorization for the operation of a certain existing delivery point for use in the exchange of natural gas with United Gas Pipe Line Company, pursuant to Commission order issued July 5, 1973, in Docket No. CP61-79. Waiver of § 154.22 of the Commission's regulations is requested to permit an effective date of July 5, 1973.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16121 Filed 8-3-73;8:45 am]

[Docket No. E-8316]

UNION ELECTRIC CO.

Notice of Service Agreement

JULY 30, 1973.

Take notice that Union Electric Company (Union) on July 16, 1973, tendered for filing a service agreement between Union and the city of Hannibal, Missouri (Hannibal). The agreement would provide estimated revenues from jurisdictional sales of $1,137,224 for the 12 month period ending May 31, 1974.

Union states that the new agreement, which provides for Union to provide the total energy requirements of Hannibal, supersedes Union FPC Rate Schedule No. 71. Union claims that the new agreement is necessary because the recent flooding of the Mississippi River caused extensive damage to Hannibal's power plant, forcing it to seek alternative sources of power.

The rate to be assessed, according to Union, is the same as is presently on file with the Commission in Union's FPC Electric Rate Schedule W-2. The only deviation would occur if Hannibal decides to install peaking capacity, such deviation to result in a reduction of Hannibal's monthly bills.

Because of the inoperative conditions of Hannibal's plant, service under the agreement began on June 1, 1973. Accordingly Union seeks waiver of the notice requirement of the Commission's rules and regulations so that June 1, 1973 might be the effective date of the agreement.

Any person desiring to be heard or to protest should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Commission's rules of practice and procedure. All such petitions or protests should be filed on or before August 9, 1973. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

UNITED GAS PIPE LINE CO.

Notice of Revision to Tariff

JULY 30, 1973.

Take notice that on July 13, 1973, United Gas Pipe Line Company (United) tendered for filing as a part of its FPC Gas Tariff, Original Volume No. 3, the following:

Revised Sheets	*Superseded Sheets*
Fourth Revised Sheet No. 68.	Third Revised Sheet No. 68.
Fifth Revised Sheet No. 70.	Fourth Revised Sheet No. 70.

United states that this filing is made to reflect authorization for an additional delivery point in the amended exchange agreement between United and Texas Gas Transmission Corporation, pursuant to Commission orders issued July 5, 1973, in Docket Nos. CP61-79, Amended and CP67-286, Amended. Waiver of § 154.22 to the Commission's regulations is requested to permit an effective date of July 5, 1973.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16123 Filed 8-3-73;8:45 am]

FEDERAL RESERVE SYSTEM

ALABAMA BANCORPORATION

Order Approving Acquisition of Bank

Alabama Bancorporation, Birmingham, Alabama, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent (less directors' qualifying shares) of the voting shares of the successor by merger to The American National Bank of Huntsville, Huntsville, Alabama ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act.

Applicant controls five banks with total deposits of $972.6 million, representing 14.3 per cent of the total deposits of commercial banks in Alabama.[1] Acquisition of Bank (deposits of $22.7 million) would not significantly increase the concentration of banking resources in Alabama.

Bank is the smallest of six banks serving Madison County (the relevant market) where it holds a market share of approximately 7.5 percent. Applicant presently has no banking subsidiaries in this market, and its closest subsidiary draws only a small percentage of any type of account from Madison County. Consequently, approval of this application would not eliminate any substantial existing competition between Bank and Applicant's banking subsidiaries. The relevant banking market appears attractive for de novo entry; however, Applicant's acquisition of Bank is comparable to, and would have the same economic effect as, a de novo entry by Applicant.[2] Consequently, approval of this application would not have a substantially adverse effect on future competition between Applicant and Bank.

Applicant's nonbanking subsidiary, Engel Mortgage Company ("Engel"), has an office in Huntsville. Engel's mortage loans are primarily on one-to-four family houses. However, in both 1971 and 1972 Bank made no permanent mortgage loans on one-to-four family homes so that acquisition of Bank by Applicant would not eliminate any actual competition in this product line. Though consumation of the transaction would possibly eliminate some future competition between Bank and Engel, there are many alternative sources of mortage credit in the market. Consequently, approval of the application would not have substantially adverse effects on competition in mortgage banking. On the basis of the facts of record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial condition and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are satisfactory, particularly in light of Applicant's commitment to increase the capital of Bank. This factor provides added weight to the banking factors involved in the Board's consideration of the application. Considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta, pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 27, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-16152 Filed 8-3-73;8:45 am]

[1] All banking data are as of December 31, 1972, except where otherwise noted, and represent bank holding company formations and acquisitions approved by the Board through May 31, 1973.

[2] See Mr. Justice Marshall's suggestion that "the practical difference between entry by acquisition and entry de novo may be marginal in the case of a dominant entrant" in his concurring opinion in United States v. Falstaff Brewing Corp., 41 LW 4352, fn 14. (1973)

FIRST ALABAMA BANCSHARES, INC.

Acquisition of Bank

First Alabama Bancshares, Inc., Birmingham, Alabama, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to The Selma National Bank, Selma, Alabama. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 23, 1973.

Board of Governors of the Federal Reserve System, July 27, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

BARNETT BANKS OF FLORIDA, INC.

Order Approving Acquisition of Banks

Barnett Banks of Florida, Inc., Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 per cent or more of the voting shares of Delray Beach National Bank, Delray Beach, Florida ("Delray Beach Bank"), and 51 per cent or more of the voting shares of Fidelity Bank of West Delray Beach, Delray Beach, Florida ("Fidelity Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 41 banks with total deposits of $1.3 billion, representing approximately 7 per cent of the total de-

[3] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan, Bucher, and Holland. Absent and not voting: Chairman Burns and Governor Daane.

V 38-150 AUG 6 73 XUM

posits of commercial banks in the State, and is the second largest banking organization in Florida. (All banking data are as of December 31, 1972, and reflect holdin company acquisitions approved through June 30, 1973, including four new acquisitions since January 1, 1973.) The acquisitions of Delray Beach Bank (deposits of $45 million) and Fidelity Bank (deposits of $1.0 million as of March 28, 1973) would increase Applicant's share of the total State deposits by .21 per cent, and it would remain the second largest banking organization in Florida.

Both Fidelity Bank and Delray Beach Bank are located in the West Palm Beach banking market (the relevant market) where they, combined, control 3.9 per cent of market deposits. Applicant presently operates two banks in the West Palm Beach area; these banks are, respectively, the 17th and 24th largest of the 27 area banks. Applicant's present share of deposits in the West Palm Beach area is but 3.3 per cent. Thus, consummation of the proposal will not place Applicant in a dominant position in the area nor have any adverse effect on competing area banks.

Applicant's present banking subsidiaries in the West Palm Beach area are 15 miles north of Delray Beach and attract a negligible amount of deposits and loans from the service area of either Delray Beach Bank or Fidelity Bank. Thus there would be no significant elimination of competition between Applicant's subsidiaries and the banks to be acquired. Nor would consummation of the proposal eliminate present or future competition between Fidelity Bank and Delray Beach Bank since both banks are under common management and control. On this basis, the Board finds that competitive considerations are consistent with approval of the application.

Applicant has recently injected capital into certain of its subsidiary banks and has completed a public stock offering to increase its own equity capital. In addition, Applicant has committed itself to improve the capital position at Delray Beach Bank through an injection of equity capital and a conversion of capital debt to equity capital. In light of these actions, the Board finds the financial condition and managerial resources of Applicant, its subsidiaries and the banks to be acquired as satisfactory; and prospects for each are favorable.

There is no evidence that the 27 banks in the market are failing to meet the banking needs of the community, and Applicant does not intend any immediate change in services offered by the proposed subsidiaries. These new subsidiaries, however, will be able to draw on the expertise and resources of the holding company in areas of investments and lending, and this should improve their competitive position. Accordingly, considerations relating to convenience and needs of the communities to be served are consistent with approval. It is the Board's judgment that consummation of the proposed acquisitions would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transactions shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[1] effective July 26, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc 73-16159 Filed 8-3-73;8:45 am]

COMMERCE BANCSHARES, INC.

Order Approving Acquisition of Bank

Commerce Bancshares, Inc., Kansas City, Missouri, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of Commerce Bank of Independence, National Association, Independence, Missouri ("Bank"), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the third largest banking organization in Missouri and largest of 110 such organizations in the Kansas City banking market (approximated by the old Kansas City SMSA, less that portion of Cass County south of Harrisonville), controls 25 banks with aggregate deposits of $1,024 million, which represent 8.15 per cent of total deposits in commercial banks in Missouri and 15.79 per cent of all such deposits in the Kansas City banking market.[1] Consummation of the proposed acquisition would not immediately increase Applicant's shares of commercial bank deposits either in Missouri or in the Kansas City market. Applicant's nearest present subsidiary, Commerce Bank of Blue Hills, is located thirteen miles away, outside of Bank's proposed service area. Within that service area, Bank will face competition from twelve other banks, including one subsidiary of the seventh largest banking organization in the Kansas City market. Accordingly, the Board concludes that consummation of the proposed acquisition would not adversely affect competition in any relevant area.

During the course of its consideration of this application, the Board has received adverse comments from an Independence, Missouri bank, which contends that affiliation of Applicant with Bank would offend Missouri's statute prohibiting branch banking. The facts of record indicate that Bank will be a separate corporation, with its own capital stock and a loan limit based on such capital stock; that Bank will be managed by its own officers; that Bank's board of directors will be generally independent from that of Applicant's lead bank (Commerce Bank of Kansas City); that no employees of Applicant's lead bank will perform services for customers of Bank or perform management or supervisory functions with respect to Bank; and that Applicant will acquire Bank by purchase with cash from Applicant's own cash assets. The Board has repeatedly stated that a State's restrictive branch banking laws are not automatically applicable to bank holding company operations, and the Board, in this case, has found, based upon the above and other facts of record, that Bank will not be operated in such manner that it and any banking subsidiary of Applicant could be characterized as being engaged in unitary operations. The Board concludes, therefore, that Bank will not constitute a branch office of any banking subsidiary of Applicant.

The financial and managerial resources of Applicant, its present subsidiary banks, and Bank are satisfactory and prospects are considered favorable. Considerations relating to the convenience and needs of the community are consistent with approval. It is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after that date, and (c) Commerce Bank of Independence, National Association, shall be opened for business not later than six months after the effective date of this order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[2] effective July 26, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

FIRST FLORIDA BANCORPORATION

Order Approving Acquisition of Southside Bank of St. Petersburg

First Florida Bancorporation, Tampa, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares of The Southside Bank of St. Petersburg, St. Petersburg, Florida ("Southside Bank"). The name of Applicant was changed to United First Florida Banks, Inc., Tampa, Florida, upon consummation on June 29, 1973, of the merger approved by the Board on February 16, 1973, under section 3(a)(5) of the Bank Holding Company Act between First Florida Bancorporation and United Bancshares of Florida, Inc., Miami, Florida.[1]

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 35 banks with aggregate deposits of $1.2 billion, representing 6.2 percent of total deposits of commercial banks in Florida and is the fourth largest banking organization in the State. (All banking data are as of December 31, 1972, and reflect acquisitions and formations approved by the Board through June 15, 1973.) The acquisition of Southside Bank ($4 million deposits) would increase Applicant's share of Florida deposits by less than one-tenth of one percentage point, and it would remain the fourth largest State banking organization.

Southside Bank is located in St. Petersburg in the South Pinellas County banking market. In terms of deposits, it ranks as the twenty-second largest of 28 market banks and holds approximately 0.22 per cent of total deposits for that area. Twelve bank holding companies are represented in the market and hold deposits ranging from 18 per cent to 3 per cent of total market deposits.

Applicant is presently represented in the South Pinellas County banking market by two subsidiary banks that hold $33 million and $5 million, respectively, in area deposits, representing approximately 3 per cent of total market deposits. However, Southside Bank receives less than 4 per cent of IPC demand and savings deposits and less than 5 per cent of its commercial and installment loans from the service areas of these subsidiaries. Applicant's nearest subsidiary bank is located approximately nine miles from Southside Bank. No meaningful competition exists between these, or any of Applicant's present subsidiary banking offices and Southside Bank, and it appears unlikely that significant future competition would develop between them in view of the presence of intervening banks and State laws restricting branching. Competitive considerations are consistent with approval of the application.

The financial and managerial resources and prospects of Applicant, its subsidiaries, and Southside Bank are satisfactory in light of Applicant's commitment to increase capital in its subsidiary banks and banking factors are consistent with approval of the application. Although there is no evidence in the record to indicate that the banking needs of the area are currently not being satisfied by existing financial institutions, Applicant proposes to make trust and international services available to Southside Bank's customers on a referral basis. Considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the transaction is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[2] effective July 26, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-16161 Filed 8-3-73;8:45 am]

FIRST INTERNATIONAL BANCSHARES, INC.

Acquisition of Bank

First International Bancshares, Inc., Dallas, Texas, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to The Dallas County State Bank, Carrollton, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 23, 1973.

FIRST & MERCHANTS CORP.

Proposed Acquisition of Equitable Leasing Corporation

First & Merchants Corporation, Richmond, Virginia, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Equitable Leasing Corporation, Asheville, North Carolina. Notices of the application were published between May 29 and June 1, 1973, inclusive, in newspapers of general circulation in the following locations: Birmingham, Alabama; Denver, Colorado; Clearwater, Florida; Atlanta, Georgia; Asheville, Charlotte, Greensboro, and Winston-Salem, North Carolina; Columbia and Greenville, South Carolina; and Dallas, Texas.

Applicant states that the proposed subsidiary would engage in the following activities: leasing of personal property and equipment on a full-payout basis, or acting as agent, broker, or advisor in leasing of such property. Such actvities have been specified by the Board in § 225.4(a) of regulation Y as generally permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices.

Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the per-

V 38 150 AUG 6 73 XUM

son requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 19, 1973.

Board of Governors of the Federal Reserve System, August 25, 1973.

[SEAL] CHESTER B. FELDBERG, *Secretary of the Board.*

[FR Doc.73-16157 Filed 8-3-73;8:45 am]

FIRST & MERCHANTS CORP.

Order Approving Acquisition of Bank

First & Merchants Corporation, Richmond, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of First & Merchants National Bank of Tidewater, Chesapeake, Virginia ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set for in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls three banks with aggregate deposits of $1.0 billion, and is the third largest banking organization in the State of Virginia. Bank is a proposed new bank (projected deposits of approximately $70 million) that will acquire substantially all of the assets and liabilities of the fourteen Tidewater area branches of First & Merchants National Bank, Richmond, Virginia. (All banking data are as of December 31, 1972.)

The proposal constitutes a corporate reorganization and represents no expansion of corporate interests.[1] Consummation of the proposed transaction, therefore, would not eliminate either existing or potential competition.

The financial and managerial resources and future prospects of Applicant are satisfactory. Bank, which at the outset will depend on those members of management of Applicant who are familiar with the Tidewater area, appears to have satisfactory management. The financial resources of Bank appear adequate. The initial capitalization of Bank is $1 million, but upon acquisition of the fourteen branches, capital will be increased to $6.5 million. The future prospects of Bank also are good. There is evidence that the market is somewhat underbanked at present and so factors relating to the convenience and needs of the community lend some weight in favor of approval of the application.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after that date, and (c) First & Merchants National Bank of Tidewater, Chesapeake, Virginia, shall be opened for business not later than six months after the effective date of this order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Board of Governors,[2] effective July 27, 1973.

[SEAL] CHESTER B. FELDBERG, *Secretary of the Board.*

[FR Doc.73-16151 Filed 8-3-73;8:45 am]

FIRST & MERCHANTS CORP.

Order Approving Acquisition of Bank

First & Merchants Corporation, Richmond, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares of the successor by merger to Mountain Trust Bank, Roanoke, Virginia ("Bank"). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of the shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired. The Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)), and finds that:

Applicant controls three subsidiary banks with aggregate deposits of $1.0 billion, is the third largest banking organization in Virginia, and holds 9.4 per cent of all commercial bank deposits in the State. (All banking data are as of December 31, 1972.) Bank is the third largest of seven banks operating in the Roanoke market, operates nine offices, and holds deposits of approximately $80 million, or approximately 14 per cent of the commercial bank deposits in the Roanoke SMSA, the relevant market.

The Roanoke SMSA is expanding and is expected to show favorable growth even though the population of the city proper has been declining in recent years. Bank is headquartered in the downtown area. The banking alternatives in the SMSA now include banking offices of five of Virginia's top twelve banking organizations. Dominion Bankshares' lead bank, First National Exchange Bank, controls nearly 47 per cent of the market, up from about 43 per cent a year ago. Colonial American Bank is the second largest bank and controls nearly 20 per cent of market deposits.

Applicant has no banking offices in the Roanoke market. The nearest office of any banking subsidiary of Applicant to Bank is in the city of Bedford, approximately 28 miles east of Bank. There is no present competition between any of Applicant's banking subsidiaries and Bank and little likelihood that future competition would develop in view of the fact that the Bedford market is effectively separated from the Roanoke market by the Blue Ridge Mountains, and Applicant's banking subsidiaries are precluded from branching into the Roanoke market by Virginia's restrictive branching laws.

The United States Department of Justice has commented that, in its opinion, the proposed acquisition would have significantly adverse competitive effects. In the Department's view, this acquisition would eliminate existing competition between Applicant's mortgage company subsidiaries and Bank in mortgage lending and mortgage banking, remove potential competition of Applicant as a likely de novo entrant into the Roanoke banking market, further entrench the existing concentrated market structure in Roanoke, and adversely affect the development of a more competitive banking structure in Virginia by removing one of the few remaining large independent banks capable of anchoring the formation of an additional bank holding company either as a lead bank or as a significant member thereof.

For the reasons hereinafter stated, the Board does not believe that consummation of the proposal would have significant adverse effects on competition. To the contrary, the Board believes that the proposed acquisition may possibly have salutary effects on competition in the Roanoke market by strengthening Banks' managerial and financial resources enabling it to compete more effectively with the dominant bank in the market which has recently made significant gains in market share.

Applicant does compete directly with Bank in the first mortgage market through Applicant's subsidiary, First Mortgage Corporation, Richmond, Virginia ("FMC"), which has a branch in Roanoke. However, the combined market share f first mortgage loans for FMC and Bank in the Roanoke market is believed to be approximately 5 per cent. The Board does not regard as significant possible elimination of competition between FMC and Bank in this product line.

It is possible that Applicant might enter the Roanoke market through the formation of a new bank, if the application were not approved. Nevertheless, the Board is inclined to discount the significance of any possible adverse effect on potential competition in any relevant area for the reasons hereinafter stated. First, the complexion of banking competition in the Roanoke market has been affected by recent developments. Two bank holding companies have received permission to enter that market de novo, potentially increasing the number of bank competitors to eight. The new subsidiary bank of one of these holding companies, First Virginia Bankshares Corp., has already commenced operations. As a result both of new entry and additional branching by existing banks in the market, the population per banking office in the Roanoke market is now below the Statewide average.

Second, Bank does not have the potential, in the Board's judgment, to be the lead bank in developing a new regional bank holding company. Its management depth appears to be too thin for such an undertaking, and its financial resources are already strained to capacity. For example, Bank's loan-to-deposit ratio, at approximately 80 per cent, is well above average, and its loan portfolio is aggressively committed in the area of construction lending. Moreover, Bank has virtually no correspondent business and is therefore an unlikely organizer of a new holding company. The Board finds it difficult to conclude that continuation of Bank as an independent bank would significantly improve the chances for formation of a new bank holding company within the near future, and believes that there is not adequate probability of such a development to justify denial of Bank's opportunity to affiliate with an existing holding company.

Furthermore, in view of the significant increase in the market share of the largest bank in the market during the past year, the Board believes that the immediate entry of a strong competitor such as Applicant may possibly assist, rather than hinder, the deconcentration of banking resources in the market at this time.

Consummation of the proposed acquisition should therefore have no significant adverse effects on existing or potential competition in any relevant area, and competitive factors are viewed by the Board as being consistent with approval of the application.[1]

The financial and managerial resources and future prospects of Bank and of Applicant and its present subsidiary banks are regarded as satisfactory. An improvement in Bank's capital position might be desirable in view of its aggressive posture as a lender, and the Board views favorably the undertaking of Applicant to invest additional capital in Bank upon its acquisition by Applicant. Considerations relating to managerial and financial resources lend some weight in favor of approval of the application. There is no evidence that the major banking needs of the Roanoke SMSA are not being adequately served at present. Considerations relating to the convenience and needs of the community to be served are viewed as being consistent with approval.

On the basis of the record,[2] the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 26, 1973:

[SEAL] CHESTER B. FELDBERG, *Secretary of the Board.*

[FR Doc.73-16160 Filed 8-3-73;8:45 am]

FIRST PENNSYLVANIA CORP.

Order Approving Acquisition of Continental Finance Corporation of America

First Pennsylvania Corporation, Philadelphia, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), to acquire all of the voting shares of Continental Finance Corporation of America, Aurora, Colorado ("CFCA"). CFCA through various of its subsidiaries engages in the activities of (1) operating industrial banks, in the manner authorized by Colorado law, that receive time and savings deposits and make loans to individuals and (2) making consumer finance loans and purchasing installment sales finance contracts. Its subsidiaries also engage in the sale of credit life and credit accident and health insurance, physical damage insurance, and casualty insurance in connection with their extensions of credit. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(1), (2), and (9)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published 38 FR 6318. The time for filing comments and views has expired, and none have been received. The Board has considered the application in the light of the public interest factors set forth in section 4(c)(8) of the Act.

Applicant controls the second largest bank in Pennsylvania with total deposits of $2.6 billion, representing 7.9 per cent of the total commercial bank deposits in that State (as of June 30, 1972). Applicant's nonbanking subsidiaries engage in mortgage banking, investment and management services for a real estate investment trust and others, personal property and equipment leasing, data processing services, holding real estate, and consumer finance activities.

CFCA and its subsidiaries have total assets of $13.5 million (as of August 31, 1972). With regard to its finance company activities, CFCA presently operates through wholly-owned subsidiaries, 10 offices located in Denver, Colorado, and Los Angeles County, California. The industrial bank subsidiaries of CFCA are operated on the premises of, and in conjunction with, those consumer finance offices located in Denver. The proposed acquisition would have no adverse effect on existing competition since Applicant's subsidiaries neither serve nor maintain offices in any geographic market served by subsidiaries of CFCA. Applicant would not appear to be a likely de novo entrant into CFCA's market areas; and, in any event, CFCA has only a very small share of the business in the Denver market area and the Los Angeles metropolitan market area. The Board concludes that the proposed acquisition would have no adverse effects upon future competition. Further, there is no evidence in the record to suggest that the acquisition of CFCA by Applicant would have adverse effects on credit made available to independent finance companies by Applicant's subsidiary bank.

There is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interests, or unsound banking practices. Approval of the application, by permitting CFCA to gain access to Applicant's financial resources, should

[1] Bank will be able to expand in an area approximated by the Tidewater area banking market, whereas First & Merchants National Bank could not expand. Appropriate regulatory approval will be needed for each new branch.

[2] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan, Bucher and Holland. Absent and not voting: Chairman Burns and Governor Daane.

[1] In the Board's judgment, this application presents a different set of factors, as discussed in the text, than those that led the Board to deny the application of Virginia National Bankshares, Inc., Norfolk, Virginia, for approval to become a bank holding company through the acquisition of the Colonial-American National Bank of Roanoke. (1972 Federal Reserve Bulletin 494.) The attractiveness of Roanoke to de novo entry was relatively greater at the time of that application than at present, and Colonial-American had prime capability of being the lead bank in its own bank holding company system, should it choose to form one, from the standpoint of its managerial and financial resources and significant correspondent business. Furthermore, the combined market share of first mortgage loans for Virginia National Bank's mortgage banking subsidiary, Mortgage Investment Corporation, and Colonial-American in the Roanoke market appeared to be considerably larger, at approximately 10 per cent, than that of FMC and Bank.

[2] Filed as part of the original document. Copies available upon request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or to the Federal Reserve Bank of Richmond. Concurring statement of Governor Daane filed as part of the original document and available upon request.

[3] Voting for this action: Vice Chairman Mitchell and Governors Daane, Brimmer, Sheehan, Bucher and Holland. Absent and not voting: Chairman Burns.

V 38 150 AUG 6 73 XUM

enhance CFCA's competitive effectiveness an enable it to expand the range of services it offers. On the basis of the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable.

The proposed transaction is expected to be consummated by means of an exchange by Applicant of its shares for all of the shares of CFCA. For the past few years, Applicant has engaged in a vigorous expansion program through the acquisition of many consumer finance companies throughout the United States. These acquisitions have been effected either by Applicant directly or by one of Applicant's consumer finance subsidiaries. Two of Applicant's consumer finance subsidiaries, Investors Loan Corporation ("Investors") and Industrial Finance and Thrift Corporation ("Industrial Finance"), were acquired by Applicant in 1970; and, under the provisions of section 4(a)(2) of the Act, Applicant may not retain ownership of these companies beyond December 31, 1980, without Board approval. Applicant has not yet filed applications to retain shares of these companies, nor has the Board, in its consideration of the instant proposal, passed on the desirability of permitting retention beyond 1980. Under these circumstances, the Board believes that it would be in the public interest to approve the acquisition of CFCA on the condition that Applicant maintain the assets of CFCA separate and apart from those of either Investors or Industrial Finance, and, upon consummation of these acquisitions, operate CFCA as a separate business entity. This condition may be lifted at such time as the Board has an opportunity to make a determination on any application subsequently filed to retain the shares of Investors or Industrial Finance.

Accordingly, this application is hereby approved on the condition that Applicant maintain the assets of CFCA and its subsidiaries separate and apart from those of Investors and Industrial Finance and operate the company sought to be acquired as a separate business entity. The transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board. This determination is further subject to the conditions set forth in § 225.4(c) of regulation Y and the Board's authority to require such modification or termination of the activities of the holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with the conditions and purposes of the Act and the Board's regulations and orders issued thereunder or to prevent evasion thereof.

By order of the Board of Governors,[1] effective July 26, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-16164 Filed 8-3-73;8:45 am]

HATHDEL INC.

Formation of Bank Holding Company

Hathdel Inc., New Bedford, Massachuchetts, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 97.7 per cent of the voting shares of The Illinois National Bank & Trust Co. of Rockford, Rockford, Illinois ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a nonoperating Delaware corporation, was organized as a subsidiary of Berkshire Hathaway Inc. ("Berkshire"), New Bedford, Massachusetts (a Massachusetts corporation), a bank holding company which presently owns 97.7 per cent of the outstanding voting shares of Bank. The proposal involves Applicant's acquisition of all the assets (including shares of Bank) of and assumption of the liabilities of Berkshire through the merger of the latter into the former under the charter of the former. The proposed transaction is merely a corporate reorganization whereby an existing one-bank holding company will change its state of incorporation from Massachusetts to Delaware; the location, nature and scope of Applicant's banking and nonbanking activities will be identical to that of the predecessor corporation.

Bank ($136.1 million in deposits) operates its only office in Rockford. It controls approximately 22 per cent of the deposits in commercial banks in Winnebago County (which approximates the relevant market) and approximately 0.3 per cent of the total desposits held by all commercial banks in Illinois, making it the largest bank in the county and 28th largest in the State.[2] Since the proposal to acquire Bank involves a corporate reorganization representing no expansion of the holding company system, the Board concludes that consummation of the proposal will not have any adverse competitive effects.

The financial and managerial resources and future prospects of Bank and of Applicant are regarded as satisfactory and are consistent with approval of the application. Consummation of the transaction would have no immediate effect on the convenience and needs of the community to be served; considerations relating to convenience and needs are consistent with approval of the application. It is the Board's judgment that consummation of the proposed acquisition would be consistent with the public interest and that the application should be approved.

The merger of Berkshire into Applicant involves the acquisition by the latter of the nonbanking activities of the former, some of which are grandfathered under section 4(a)(2) of the Act. The Board regards Applicant as a successor to Berkshire within the meaning of section 2(e) of the Act and believes that Hathdel may engage in the nonbanking activities so transferred to the same extent as Berkshire is entitled to engage in these activities at the present time. Berkshire has filed an irrevocable declaration, pursuant to section 4(c)(12) of the Act and § 225.4(d) of Regulation Y, that it will cease to be a bank holding company by December 31, 1980. As a successor, Applicant is subject to this commitment of its predecessor, and the application is approved on the condition that Applicant, at the time of consummation of the proposal, file an irrevocable declaration to the same effect as that filed by Berkshire.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors.,[3] effective July 26, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

UNION PLANTERS CORP.

Acquisition of Bank

Union Planters Corporation, Memphis, Tennessee, has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. 1842(a)(5)) to merge with Tennessee National Bancshares, Inc., Maryville, Tennessee. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 23, 1973.

Board of Governors of the Federal Reserve System, July 27, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR E-118]

SEDANS, STATION WAGONS, AND TRUCKS

Reduction of Fuel Consumption

1. *Purpose.* This bulletin solicits the cooperation of Federal agencies in reducing motor vehicle fuel consumption through the acquisition of sedans, station wagons, and trucks which provide the greatest fuel economy while fulfilling the intended use.

2. *Expiration date.* This bulletin expires June 30, 1974, unless sooner rescinded.

3. *General.* In furtherance of the Government-wide program for conservation of energy, immediate consideration should be concentrated on the procurement of motor vehicles equipped with engines and accessories to achieve reduced gasoline consumption. The acquisition of such vehicles will accrue to the Government the cost-avoidance of higher overall operating costs and the long-range benefits of fuel economy.

4. *Suggested action.* a. Agencies should give careful consideration to requisitioning those vehicles which provide minimum performance characteristics and accessories essential for their intended use. For example, based on the vehicle definitions contained in Interim Federal Standard No. 00122, a type I, class A, subcompact vehicle may serve messenger-type functions effectively or be appropriate when projected utilization involves two occupants including the operator or equivalent loading. In such instances, this type of vehicle should be procured in lieu of a larger vehicle. Similarly, careful planning of vehicle use should be undertaken to maximize procurement of compact-type vehicles, type I, class B, in lieu of intermediate vehicles (type II), and the use of intermediate vehicles in lieu of regular vehicles, type III.

b. Power absorbing accessories and weight-adding equipment such as power brakes and steering, air conditioning, higher horsepower engines, and other similar items listed in Table VIII of Interim Federal Standard No. 00122M should be acquired only when deemed absolutely essential to operating requirements.

c. The principles outlined above should be applied in requisitioning light and heavy trucks under Interim Federal Standards No. 00307, 00292, and Interim Federal Specifications KKK-T-00720, -00701 and -00706.

d. Law enforcement vehicles are not included among those covered in this bulletin.

5. *Assistance.* The General Services Administration will assist agencies in the acquisition of vehicles. Information on specifications and their interpretation may be obtained from the Automotive Standards Division (FMA), telephone 703-557-7525. Inquiries pertaining to procurement matters should be directed to the Automotive Branch (FPNM), telephone 703-557-8300. The mailing address for both organizational elements is General Services Administration ((FMA) or (FPNM)), Washington, DC 20406.

ARTHUR F. SAMPSON,
Administrator of General Services.

Public Buildings Service

[Wildlife Order 109; D-Mass-6380]

FORT DEVENS; HARVARD, MASS.

Transfer of Property

Pursuant to section 2 of Public Law 537, Eightieth Congress, approved May 19, 1948 (16 U.S.C. 667c), notice is hereby given that:

1. By letter from the General Services Administration, Boston, Massachusetts, Regional Office, dated July 19, 1973, the property, comprised of approximately 662 acres of land and one building and identified as a portion of Fort Devens, Harvard, Massachusetts, has been transferred to the Department of the Interior.

2. The above described property was conveyed for wildlife conservation purposes in accordance with the provisions of section 1 of said Public Law 537 (16 U.S.C. 667c), as amended, by Public Law 92-432.

Date: July 31, 1973.

LARRY F. ROUSH,
Acting Commissioner,
Public Buildings Service.

COST OF LIVING COUNCIL

FOOD INDUSTRY ADVISORY COMMITTEE

Notice of Closed Meetings

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that meetings of the Food Industry Advisory Committee, created by section 7(b) of Executive Order 11695, will be held on August 13 and August 14, 1973 at 9:00 A.M., at O'Hare Plaza, 5725 East River Road, Chicago, Ill.

Since the meetings will consider sensitive policy issues and possible governmental actions in connection therewith, I have determined that the meetings would fall within exemption (5) of 5 U.S.C. 552(b) and that it is essential to close the meetings to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 3, 1973.

HENRY H. PERRITT, JR.,
Executive Secretary,
Cost of Living Council.

SMALL BUSINESS ADMINISTRATION

[License No. 09/14-5086]

LA RAZA INVESTMENT CORP.

Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that La Raza Investment Corporation (licensee), 132 South Central Avenue, Phoenix, Arizona 85004, a small business investment company licensed under section 301(d) of the Small Business Investment Act of 1958, as amended (the Act), has filed an application for exemption from the provisions of 13 CFR 107.1004 (1973).

Licensee proposes to provide $14,800 of financing to James Lucero, d/b/a Lucero Reprographics, 98 South Swadley Street, Lakewood, Colorado 80228, which financing will be evidenced by 10-year subordinated debentures bearing interest at the rate of 8.5 percent and having warrants attached to purchase approximately 25 percent of the small business concern's stock. Licensee's proposed financing represents the amount of additional injection required as a condition for a $40,000 loan to be made by a local bank.

The proposed financing comes within the purview of 13 CFR 107.1004 (1973) by virtue of the fact that Mr. James Lucero, the owner of the small business concern to be financed, is the brother of Mr. Edward R. Lucero, a director of the licensee and an officer of Colorado Economic Development Association which owns more than 10 percent of licensee's stock. However, neither of the Lucero brothers is a stockholder of the licensee.

Notice is hereby given that any person may, not later than Aug. 21, 1973, submit comments to SBA on the proposed transaction. Any such comments should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

Notice is further given that any time after said date, SBA may dispose of the application on the basis of the information set forth therein and other relevant data.

Dated: July 26, 1973.

JAMES THOMAS PHELAN,
Deputy Associate Administrator
for Investment.

[FR Doc.73-16144 Filed 8-3-73;8:45 am]

[Ex Parte 241; Rule 19, 5th Rev. Exemption 43]

BURLINGTON NORTHERN INC., ET AL.

Exemption Under Mandatory Car Service Rules

To: Burlington Northern Inc., Chicago and North Western Transportation Company, Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Chicago, Rock Island and Pacific Railroad Company, Illinois Central Gulf Railroad Company, Missouri Pacific Railroad Company, Norfolk and Western Railway Company, Soo Line Railroad Company, Union Pacific Railroad Company.

It appearing, that there is a massive harvest of wheat in progress in the states of Iowa, Minnesota, Montana, Nebraska, North Dakota, South Dakota, and Wyoming; that present supplies of plain boxcars owned by the railroads serving these states are inadequate to move the newly harvested grain to terminal elevators for safe storage; that use of available plain boxcars owned by other carriers for movements of this grain will substantially augment the car supplies of the railroads named herein.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the railroads named herein, and their short line connections, are hereby authorized to use and to accept from shippers shipments of grain originating at stations located in Iowa, Minnesota, Montana, Nebraska, North Dakota, South Dakota, and Wyoming, when loaded into plain 40-ft. narrow-door boxcars of various ownerships without regard to the requirements of Car Service Rule 2.

Exception. This exemption shall not apply to plain boxcars subject to Association of American Railroads' Car Relocation Directive No. 44.

Effective 11:59 p.m., July 31, 1973.
Expires 11:59 p.m., August 15, 1973.

Issued at Washington, D.C., July 30, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER,
Agent.

[FR Doc.73-16147 Filed 8-3-73;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 1, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 42723—*Class and Commodity Rates Between Points in Texas.* Filed by Texas-Louisiana Freight Bureau, Agent, (No. 673), for interested rail carriers. Rates on clinker, cement and paper, newsprint, in carloads, as described in the application, from, to and between points in Texas, over interstate routes through adjoining states.

Grounds for relief—Intrastate rates and maintenance of rates from and to points in other states not subject to the same competition.

Tariff—Supplement 28 to Texas-Louisiana Freight Bureau, Agent, tariff 87-J, I.C.C. No. 1159. Rates are published to become effective on August 30. 1973.

AGGREGATE-OF-INTERMEDIATES

FSA No. 42724—*Class and Commodity Rates Between Points in Texas.* Filed by Texas-Louisiana Freight Bureau, Agent, (No. 672), for interested rail carriers. Rates on clinker, cement and paper, newsprint, in carloads, as described in the application, from, to and between points in Texas, over interstate routes through adjoining states.

Grounds for relief—Maintenance of depressed rates published to meet intrastate competition without use of such rates as factors in constructing combination rates.

Tariff—Supplement 28 to Texas-Louisiana Freight Bureau, Agent, tariff 87-J, I.C.C. No. 1159. Rates are published to become effective on August 30, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-16145 Filed 8-3-73;8:45 am]

[Notice 328]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before August 27, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74476. By order of July 26, 1973 the Motor Carrier Board approved the transfer to Ernest Raymond Frame and Raymond Frame, A Partnership, doing business as E. Frame and Son, 1518 Fenton Hills Road, Fenton, Mo. 63026, of the operating rights in Permit No. MC-127262 issued August 4, 1966, to Ernest Raymond Frame, 1518 Fenton Hills Road, Fenton, Mo. 63026, authorizing the transportation of scrap iron and scrap metal, except those because of size or weight, require the use of special equipment, in shipper-owned trailers, from points in Illinois and Missouri, to St. Louis, Mo. The operations authorized herein are limited to transportation service to be performed under a contract with Lefton Iron and Metal Co.

No. MC-FC-74548. By order of July 26, 1973 the Motor Carrier Board approved the transfer to R. E. R. Trucking Co., Inc., Totowa, N.J., of Permit No. MC-128425 Sub-No. 1, issued September 15, 1967, to Alan William Transfer Co., Inc., Bergenfield, N.J., authorizing the transportation of polyurethane and vinyl foam from Moonachie, N.J., to points in New York, New Jersey, Pennsylvania, Connecticut, Massachusetts and Rhode Island; and vinyl foam from Lawrence, Mass., to Moonachie, N.J. Edward F. Bowes, Bowes & Millner, 744 Broad Street, Newark, N.J. 07102, Attorney for Applicants.

No. MC-FC-74561. By order of July 26, 1973, the Motor Carrier Board approved the transfer to John N. Apgar, Sr. (Irving L. Apgar, John N. Apgar, Jr., and the First National Bank of Central Jersey, Executors and Trustees), Sterling E. Apgar (Morris Ruter, Trustee), and Dorothy Anderson, a partnership, doing business as Apgar Bros., Bound Brook, N.J., of the operating rights in Permit No. MC-33322 issued May 21, 1969, to John N. Apgar, Sr., Sterling E. Apgar, and Dorothy E. Anderson, a partnership, doing business as Apgar Bros., Bound Brook, N.J., authorizing the transportation of numerous specified commodities, including machinery, building and contractors' material, supplies, and equipment, tile, pumps, railroad ties, magnesia products, pipe, compressed gases, in cylinders, and chemicals, between and from and to, named points in New Jersey, Pennsylvania, New York, Delaware, Maryland, Connecticut, Rhode Island, Massachusetts, and the District of Columbia. Herbert Alan Dubin, 1819 H Street, N.W., Washington, D.C. 20036 Attorney for applicants.

No. MC-FC-74589. By order of July 26, 1973 the Motor Carrier Board approved the transfer to C. J. R. Cartage Corp., Melvindale, Mich., of Certificates Nos. MC-39167 and MC-39167 Subs 2, 3, 6, 9, and 10, issued July 26, 1943, January 2, 1962, May 27, 1970, October 14, 1966, May 13, 1970, and April 21, 1972, respectively to Charles J. Rogers Transportation Company, Melvindale Mich., authorizing the transportation of iron and steel and various specified commodities, from, to and between specified points in Michigan, Kentucky, Ohio, Indiana, Arkansas, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, Oklahoma, Tennessee and Wisconsin. Eugene C. Ewald, Matheson, Bieneman, Veale & Parr, Suite 1700, One Woodward Avenue, Detroit, Mich. 48226, Attorney for Applicants.

No. MC-FC-74608. By order of July 26, 1973 the Motor Carrier Board approved the transfer to Anderson Brothers, Inc., Edgeley, N. Dak., of Certificate No. MC-2252 issued June 6, 1941, to Charles Anderson, doing business as Anderson Truck Line, Edgeley, N. Dak., authorizing the transportation of: Household goods and general commodities, with the usual exceptions, between Minneapolis, St. Paul, Newport, and South St. Paul, Minn., on the one hand, and, on the other, Streeter, Gackle, Litchville, Hastings, and Kathryn, and points in La Moure, and Ransom Counties, N. Dak.; and livestock between Edgeley, N. Dak., and points in North Dakota within 50 miles of Edgeley, on the one hand, and, on the other, Minneapolis, St. Paul, Newport, and South St. Paul, Minn.

[SEAL] ROBERT L. OSWALD,
Secretary.

[I.C.C. Order 108; Rev. S.O. 994]

CERTAIN RAILROADS OPERATING IN CANADA

Rerouting or Diversion of Traffic

In the opinion of R.D. Pfahler, Agent, certain railroads operating in Canada are unable to transport traffic over their lines because of a strike of certain of their employees.

It is ordered, That:

(a) Certain railroads operating in Canada, being unable to transport traffic over their lines because of a strike of certain of their employees, these carriers and their connections are hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroads desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 6:00 a.m., July 26, 1973.

(g) *Expiration date.* This order shall expire at 11:59 p.m., August 2, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., July 26, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER,
Agent.

PUGET SOUND VESSEL TRAFFIC SYSTEM

Notice of Proposed Rulemaking

V 38-150
AUG 6 73

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 160]

[CGD–73–158 PH]

PUGET SOUND VESSEL TRAFFIC SYSTEM

Notice of Proposed Rulemaking

This notice proposes regulations for the vessel traffic system that the Coast Guard is operating in Puget Sound, Washington, and adjacent waters. The proposal would require vessels that are required by the Bridge-to-Bridge Radiotelephone regulations (33 CFR 26) to be equipped with a radiotelephone to comply with the system's rules for communications, for movement, reporting and for transiting Rosario Strait. The proposal would also require all vessels, including small craft, to comply with the system's navigation rules when operating in its traffic separation scheme.

These proposed regulations would be added to the Code of Federal Regulations as a new part 160 to a new Subchapter P of Chapter I of Title 33. The new Subchapter P would be entitled "Vessel Traffic Services and Systems" and would contain regulations implementing Title I of the Ports and Waterways Safety Act of 1972 (Public Law 92–340, 86 Stat. 424).

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments regarding the proposal to the Commandant (G–CMC), U.S. Coast Guard, Washington, D.C. 20590. Each person submitting comments should include his name and address and organization, if any, identify the notice number (CGD73–158) and give reasons for any recommended change in proposal. Copies of all written comments received will be available for examination both in Room 8234, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. and at the Office of the Commander, Thirteenth Coast Guard District in Seattle, Washington.

All comments received on or before September 17, 1973, will be fully considered before final action is taken on this proposal.

The Coast Guard will hold a public hearing on this proposal on August 30, 1973 at 9:00 a.m. in the Orcas Room, Seattle Center, Seattle, Washington. All interested persons are invited to be present or to be represented at this public hearing. All persons will be given an opportunity to express their views on the proposed regulations and to suggest any changes that may be considered desirable. Oral statements will be heard, but for completeness and accuracy of the record, all facts and arguments should also be presented in writing at the hearing.

On July 10, 1972, the President signed into law the "Ports and Waterways Safety Act of 1972" (Public Law 92–340 86 Stat. 424). The purpose of title I of this act is "to prevent damage to, or the destruction or loss of any vessel, bridge, or other structure on or in the navigable waters of the United States, or any land structure or shore area immediately adjacent to those waters; and to protect the navigable waters and the resources therein from environmental harm resulting from vessel or structure damage, destruction, or loss." The authority to implement the provisions of title I of this Act except in the St. Lawrence Seaway has been delegated to the Commandant of the Coast Guard who may:

(1) Establish, operate, and maintain vessel traffic services and systems for ports, harbors, and other waters subject to congested vessel traffic;

(2) Require vessels which operate in an area of a vessel traffic service or system to utilize or comply with that service or system, including the carrying or installation of electronic or other devices necessary for the use of the service or system;

(3) Control vessel traffic in areas which he determines to be especially hazardous, or under conditions of reduced visibility, adverse weather, vessel congestion, or other hazardous circumstances by—

(i) Specifying time of entry, movement, or departure to, from, within, or through ports, harbors, or other waters;

(ii) Establishing vessel traffic routing schemes;

(iii) Establishing vessel size and speed limitations and vessel operating conditions; and

(iv) Restricting vessel operation, in a hazardous area or under hazardous conditions, to vessels which have particular operating characteristics and capabilities which he considers necessary for safe operation under the circumstances; • • •

(6) Establish procedures, measures, and standards for the handling, loading, discharge, storage, stowage, and movement, including the emergency removal, control and disposition, of explosives or other dangerous articles or substances • • • on structures subject to this title • • •.

At the present time the Coast Guard is operating voluntary vessel traffic systems in the Puget Sound area, in the port area of San Francisco, and on the Ohio River at Louisville, Kentucky during periods of high water 15 or more feet above flood stage. Also, vessel traffic systems are currently being developed for the Houston/Galveston area, the lower Mississippi River from Baton Rouge to the Head of Passes, and the New York area. Regulations to require vessels to comply with these vessel traffic systems will be developed. This notice proposes regulations for the Puget Sound area. The determination of the need for vessel traffic systems in other ports and waterways is the subject of a separate study presently being conducted.

The Coast Guard established the Puget Sound vessel traffic system because that area is subject to congested vessel traffic and hazardous weather conditions. More than 140 vessels subject to the Vessel Bridge-to-Bridge Radiotelephone Act other than ferry vessels, transit the Puget Sound area each day. There are seven ferry routes on which ferry vessels operate on daily established schedules. Weather conditions in Puget Sound often make these vessels transits hazardous. Reduced visibility caused by precipitation occurs 225 days out of the year. Heavy fog is present 50 days out of the year making visibility one quarter mile or less, and winds of 30 m.p.h. or more can be expected during any month. Strong tidal current prevail over much of the area.

Puget Sound also supports a valuable fishery and a habitat for an abundance of wildlife. The unpolluted beaches and clean waters of Puget Sound are situated in an area of rare natural beauty. These are valuable assets and are vulnerable to pollution. With congested vessel traffic and poor weather conditions, there exists an ever present threat of collisions, groundings, and ensuing oil pollution. The vessel traffic system in Puget Sound reduces the probability of such occurrences.

The voluntary vessel traffic system was put into operation in Puget Sound in September, 1972. Its development was based on an extensive Coast Guard-industry study. Comments and suggestions from interested parties were welcome, and many of the ideas were included in the voluntary system. The success of the voluntary system has been demonstrated by the fact that 98 percent of the commercial freighters and tankers and 40 percent of the towing vessels operating in Puget Sound during the last ten months have participated.

The regulations in this proposal would make participation in the Puget Sound vessel traffic system mandatory. They would apply to vessels in the navigable waters of the United States east of the line of demarcation for the Puget Sound area. This area would include the eastern end of the Strait of Juan de Fuca, Rosario Strait, Bellingham Bay, Padilla Bay, Admiralty Inlet, Puget Sound, Possession Sound, Elliot Bay, Hood Canal, Commencement Bay and the Narrows West of Tacoma. In the proposed regulations this area is defined as the "VTS area."

It is emphasized that the regulations in this proposal incorporate many of the features of the voluntary system. The Coast Guard VHF–FM radiocommunications capability already established in the system would be used, and those vessels subject to the Bridge-to-Bridge Radiotelephone Act, when in the VTS area, would be required to report their movements to a vessel traffic center in accordance with stated rules. These reporting rules are patterned after the reporting procedures used in the voluntary system. Also the proposal would incorporate most of the existing traffic separation scheme which consists of several pairs of one-way traffic lanes 1,000 yards wide separated by a 500 yard wide separation zone. Each pair of traffic lanes is connected at each end by a precautionary area that is circular in most cases. In Rosario Strait, however, the scheme consists only of one traffic lane connected at each end by a precautionary area. The traffic separation scheme extends from Tacoma northward through the east end of the Strait of Juan de Fuca and Rosario Strait to the area off Lummi Bay. The existing traffic separation scheme is marked by buoys and indicated on the current charts for Puget Sound.

Under the proposal all vessels operating in the traffic separation scheme would be required to proceed in the same directions that vessels now follow under the voluntary system. The proposal would not impose any restrictions on the direction of vessel movement in the waters outside the traffic separation scheme.

The proposal, in addition to implementing the procedures of the voluntary system, also provides rules for crossing, joining, and leaving the traffic separation scheme. The proposal further provides for mandatory use of the Bridge-to-Bridge Radiotelephone frequency by vessels entering or navigating in Rosario Strait, rules for the operation of ferry vessels and vessels with low power or awkward handling characteristics, and rules for emergencies, failure of equipment, and authorization to deviate from the regulations. It is important to note that the proposal includes a rule allowing control by the vessel traffic center of the time of entry, movement in, or departure from the system when necessary to prevent damage to, or loss of, any vessel.

It is anticipated that many of the rules in this proposal would be used in vessel traffic systems that are under consideration, or will be under consideration, in other ports and waterways to solve navigation problems that are similar to those in the Puget Sound area. It is recognized, too, that each other vessel traffic system will probably have navigation problems that could require the use of rules not contained in this proposal to solve those problems.

Various interested parties have been consulted in developing the voluntary vessel traffic system that is currently in operation. Interested parties consulted include Foss Launch and Tug Company, Canadian Pacific Ferries, Northwest Towboat Association, Puget Sound Pilots, Puget Sound Gillnetters Association, National Federation of Fishermen, Weyerhauser Company, Port of Olympia, Williams & Diamond and Company, American Mail Line, Ltd., Seattle Chamber of Commerce, Port of Seattle, Washington States Ferries, Alaska Maine Highways System, Commandant, 13th Naval District, American Tug Boat Company, District Engineer (U.S. Army, Seattle District, Corps of Engineers), Chevron Shipping Company, Military Sealift Command (Seattle), Puget Sound Freight Lines, States Steamship, and Sea-Land Services, Inc.

The proposed rules are designed to cope with vessel congestion, reduced visibility, adverse weather, and navigation hazards not only by requiring vessels to comply with these rules but also by providing the vessels in the system with timely, pertinent information needed for safe navigation. By providing navigation information each vessel could be made aware of the surrounding vessel traffic and developing vessel congestion and could adjust its speed and course accordingly to avoid a collision or grounding. The existing VHF–FM radiocommunications system would be the primary means of providing this information.

The communications system of the vessel traffic system has been designed to allow both transmission and reception of information in the VTS Area with a high degree of reliability. The vessel traffic center (VTC) in Seattle would operate with few exceptions in the same manner that it has operated under the voluntary system. Channel 13 is now in use for vessel traffic system communications and the VTC maintains a continuous guard on Channel 16. Remote transceivers are linked to the VTC. All transmissions from the VTC or from vessels in the system would be recorded in the VTC. The recording equipment has the capability to provide instant playback to the VTC personnel of messages received. Based on reports from vessels, the Coast Guard personnel in the VTC would manually plot the progress of each vessel in the system. Accuracy of position and speed would be dependent on reports received. Vessels would be informed of other vessels that could be encountered along their intended routes. Vessels would also be advised of abnormal conditions along their routes including reported defects in aids to navigation, reduced visibility, adverse weather, concentrations of fishing vessels or pleasure craft that would affect navigation, and concentrations of floating logs. Also, vessels would be advised of vessels along their routes which had experienced difficulties in navigation or which were carrying cargoes of particular hazard. If vessel reports indicated a danger of a potential collision situation, the VTC would coordinate traffic flow to eliminate the hazard of collision by specifying times of vessel movement. Unlike the voluntary system, however, the VTC could, under the proposal, require vessels to comply with VTC directions issued to coordinate movement of vessel traffic.

In order to assist the user of the system to operate in compliance with the proposed rules, the Coast Guard will prepare a manual to describe the Puget Sound Vessel Traffic System and suggested procedures to follow to facilitate compliance with system's rules. The manual would be updated and reissued as necessary. It will be available from the Coast Guard.

The proposed rules for the Puget Sound Vessel Traffic System are presented in six subparts. Subpart A, General, gives the definitions and explanatory rules necessary for understanding and using the system. Subpart B, Communications Rules, establishes the basic provisions for communication procedures, equipment, and use of equipment when in the VTS area. Subpart C, Vessel Movement Reporting Rules, contains the requirements for vessel movement reporting. Subpart D, Traffic Separation Scheme Rules, sets forth requirements for the navigation of vessels operating in, crossing, joining, or leaving the traffic separation scheme. Subpart E contains rules that must be followed, in addition to the other rules in this proposal, when transiting Rosario Strait. Subpart F, Description and Geographic Coordinates, presents a description of the geographic areas comprising the vessel traffic system and identifies precisely the coordinates by which these areas are defined.

An explanation of the rules in the proposal follows:

The term "master or person in charge," as defined in § 160.3(h), appears only in §§ 160.20 and 160.70 of this part. The term is intended to apply only to persons named in section 5 of the Bridge-to-Bridge Radiotelephone Act, who are required by that Act to maintain a listening watch on the designated frequency, Channel 13. The applicability of §§ 160.20 and 160.70 to persons is limited because these two rules are intended to apply only to those persons aboard a vessel who must monitor channel 13 under the Bridge-to-Bridge Radiotelephone Act.

Section 160.7 authorizes the VTC to specify times of vessel entry, movement in, or departure from the vessel VTS Area when it is necessary to prevent damage, destruction or loss of any vessel. It is expected that the need to exercise this authority will occur infrequently. The Coast Guard anticipates that VTC control that is exercised will occur primarily in harbor areas and in and around Rosario Strait. Section 160.7 also prohibits any person from operating a vessel contrary to a direction of the VTC issued under this authority.

Section 160.9(a) provides that the District Commander may authorize a deviation from any regulation in this part. It is intended that authorizations issued under this section would be issued for an extended but definite duration. These authorizations would be kept on file at the Office of the District Commander and would be available for public inspection. The VTC would advise vessels in the VTS area of the presence of vessels operating under an authorization to deviate when that information was necessary for safe navigation.

Section 160.9(b) provides that the VTC may authorize a deviation from any regulation in this part but only for a voyage or part of a voyage. These authorizations would accommodate unusual circumstances in vessel operation that could not be foreseen in advance. For example, a VTC authorization to deviate from § 160.52(a) for the period of time that a vessel could not navigate in the direction of traffic in a traffic lane because of strong currents or excessive draft.

Section 160.13 delegates the authority to the District Commander to make temporary amendments in the description of the traffic separation scheme (TSS) to provide for temporary precautionary areas necessary for the safe passage of vessels. For example, the TSS in the area off Foulweather Bluff could

V 38 150 AUG 6 73 XUM

be amended at certain times during the fishing season to provide for a temporary precautionary area to ensure safe passage of vessels and to protect fishing gear of fishing vessels. When this temporary precautionary area was in effect it could be necessary to remove temporarily one or more buoys from the area in order to accommodate the requirements of seasonal fishing. Notification of temporary amendments to the TSS would be published in the FEDERAL REGISTER and in the notice to Mariners.

Section 160.20 requires the operator of each vessel in the VTS area to monitor continuously a frequency designated in the Puget Sound VTS Operating Manual. This rule is essential for effective communications between the VTC and vessels required to have a radiotelephone while in the VTS area. The rule is also essential to ensure that these vessels can respond quickly to a call initiated by the VTC. The VTC would maintain an effective and continuous watch on each frequency designated in order to respond promptly to any call from a vessel. Because reception over a given frequency is blanked out while a vessel is transmitting on that same frequency, § 160.20 also provides that the designated frequency need not be monitored when the vessel is transmitting on that frequency.

Since vessels subject to the Bridge-to-Bridge Radio-telephone Act were already equipped to communicate on Channel 13 when the Puget Sound voluntary vessel traffic system was established, this channel was selected for use in the system. The Coast Guard contemplates continued use of Channel 13 as the designated frequency for the Puget Sound vessel traffic system until such time as it is found that congestion on this channel results in a degradation of either bridge-to-bridge communications or communications between vessels and the VTC. Should either occur, it may be necessary to employ a frequency or frequencies specifically designated for VTS operations. Until such time as there is more than one frequency designated for communications between vessels and the VTC, there will be only one sector, which will comprise the whole VTS Area. With respect to possible frequency congestion, it should be understood that an extension of the present VTS from Port Angeles to Cape Flattery, for participation on a voluntary basis, is under active consideration at this time. The Coast Guard is aware that establishment of a similar system in the adjoining Canadian waters is under development by the Canadian government. These actions may have impact on the use rate experienced on Channel 13.

Section 160.22 requires that the radiotelephone equipment that is used to transmit reports required by the proposed rules and to receive information from the VTC and other vessels must be capable of operation from the navigational bridge or principal control station of the vessel. Communications sent and received over this equipment bear on the safety of navigation and are initiated by, or intended for the urgent attention of, the person on the navigation bridge or principal control station who is directing the movements of the vessel.

Section 160.24 requires reports to be made in the English language. The purpose of this rule is to insure that the reports required by this part and navigating information transmitted by the VTC and by vessels in the VTS area would be understood by all users of the system.

Section 160.25 requires the use of Pacific Standard time or Pacific Daylight Time, as appropriate, and the use of the 24-hour clock system. The purpose of the rule is to insure that all persons receiving transmissions would be keeping the same time and expressing it in the same terms. Accurate and uniform time used in reports of positions and movements of vessels are essential to the success of the Puget Sound vessel traffic system.

Section 160.28 requires that at least one hour before entering the VTS area, or getting underway from a berth or anchorage in the VTS area, each vessel described in § 160.1(c) of Subpart A would be required to file an initial report with the VTC. This report would provide the VTC with pertinent facts concerning the vessel and its voyage during transit of the VTS area. This report also would inform the VTC of any condition, such as fire or defective electrical or mechanical equipment, that could affect its navigation, and would notify the VTC of any explosives or specified dangerous cargo carried. This information is necessary so that the VTC could keep vessels apprised of hazardous conditions and the positions of nearby vessels.

Section 160.30 requires a follow-up report to be made shortly before the vessel commences to operate in the VTS area. The report would provide VTC with updated information including any corrections to the initial report and the speed at which the vessel intended to proceed in the VTS area. This information would alert the VTC that the vessel was just about to commence operating in the VTS area.

Section 160.31 requires a final report to be made advising the VTC that the vessel has arrived at its destination or has departed from the VTS area. The VTC could then terminate its plot of this vessel.

The purpose of § 160.33 is to exempt vessels from required reports while in the VTS area far from a place where repairs could be made. This rule does not allow repairs to radiotelephone equipment necessary to make the required reports to be unreasonably delayed.

Section 160.34 requires that any deviation from the rules caused by emergency or radio failure be reported to the VTC as soon as practicable. It is recognized that an emergency or a radiotelephone failure could require deferring a report to the VTC.

The purpose of § 160.35 is to require that a report of vessel defects be made to the VTC as soon as possible so that the VTC could advise other vessels along the vessel's intended track of the need for caution. Defective machinery or electrical equipment that affects the safe navigation of a vessel could create a situation in which that vessel would constitute a hazard to other vessels navigating in the system. Similarly, a tow that is not under complete control of the towing vessel, due to wind, current or other reason, could create a situation which could be a hazard to other vessels.

Section 160.36 provides for limited reporting requirements for most ferry vessels. There are approximately 530 ferry vessel crossings per day in the VTS area. These vessels operate on published schedules, and for the most part, on routes which cross the TSS. Characteristics of these ferry vessels are well known to the VTC, and it would be unnecessary to transmit repeatedly the information listed in the initial report and follow-up report. Communications reports, if required of ferry vessels, would, due to the large number of sailings tend to overload the frequency required to be monitored.

Section 160.38 proposes a list of hazardous circumstances to be reported. The purpose of this report is to provide information necessary for the safe navigation of vessels in the VTS area. The hazards include occasional large concentrations of recreational craft, and of fishing vessels during the fishing season. These concentrations could block the passage of larger vessels creating a hazardous circumstance.

Section 160.42 contains the proposed vessel movement reporting rules. It applies to those vessels subject to the Bridge-to-Bridge Radiotelephone Act. These reports are required to provide information concerning vessel position and intentions to the VTC for use in apprising other vessels in the system.

Section 160.52 sets forth the requirements for the direction of traffic in the TSS. When in traffic lanes, vessels would be required to proceed in a direction that would keep the separation zone on the port side. When in most of the precautionary areas, vessels would be required to proceed in a counterclockwise direction, keeping the center of the precautionary area on the port side. It is intended that vessels transiting a precautionary area would govern their movements with special caution taking into account the presence of other vessels in the precautionary area.

The TSS is designed for the safe movement of vessels along identified lanes. Thus § 160.54 would prohibit vessels from anchoring in the TSS. As a practical matter it is recognized that under conditions of imminent danger or peril, it could be necessary to anchor for the safety of the vessel. Allowance is made under section 160.15 for anchoring in the TSS during an emergency. It is intended that when it is necessary for a vessel to anchor during emergency, it would do so whenever possible, as far away from the separation zone as possible or in the separation zone.

Section 160.56 sets forth the rules

under which vessels could join, leave or cross the TSS. The preferred points of joining, leaving or crossing the TSS are at the precautionary areas. Because precautionary areas are in some cases separated by considerable distances, provision is made in the rule for vessels to join, leave or cross at points other than at the precautionary areas. Vessels subject to the Bridge-to-Bridge Radiotelephone Act would be required to give the VTC advance notification upon entering the TSS at other than a precautionary area. Vessels crossing the TSS would have to do so on a course as nearly perpendicular to the traffic lane as practicable. The procedure for vessels joining or leaving a traffic lane, would depend upon whether a right turn or a left turn was involved. In the right turn situation, vessels would proceed from a traffic lane to adjacent water outside the TSS, or vice-versa. Vessels joining or leaving a traffic lane in the right turn situation would be required to steer to converge on or diverge from the direction of traffic flow in the traffic lane at as small an angle as practicable. In the left turn situation the vessel would be required to cross the separation zone and the opposing traffic lane. In this situation the vessel would be required to steer courses to converge on or diverge from the direction of traffic flow of the traffic lane being joined or left at as small an angle as practicable, but would be required to cross the opposing traffic lane on a course that was as near perpendicular to the separation zone as practicable.

The purpose of § 160.58 is to prevent the situation in which a large vessel in the TSS would have to take evasive action to avoid a small vessel. It is recognized that a small vessel is relatively maneuverable and that if a large vessel were required to take evasive action to avoid a small vessel ensuing maneuvers in the TSS could create hazardous situations that the TSS has been established to prevent. The Coast Guard anticipates that the rule will find most of its application to situations in which a small vessel would cross a traffic lane by crossing ahead of a large vessel already navigating in the TSS. Though the rule does not apply to larger vessels that also may cross a traffic lane by crossing ahead of another vessel navigating in the TSS, the larger vessel in most cases already must provide advance notification of entry in the TSS as required by § 160.56(a). It is anticipated that information gained by this advance notification could be used to avoid hazardous crossing situations involving two large vessels if necessary by controlling the time of vessel movement under § 160.7. However, the Coast Guard recognizes that prevention of hazardous crossing situations in the TSS may also necessitate making the § 160.58 requirement apply to all vessels. Comments are specifically requested concerning whether the requirement in § 160.58 should apply to all vessels rather than just to small vessels.

Subpart E proposes specific rules for application in Rosario Strait to solve specific navigation problems in that area. Rosario Strait is a deep and narrow body of water with hard bottom in which the few submerged dangers are well marked. Strong currents are experienced in this reach. Visibility is frequently reduced in rain or fog. Vessels proceeding along the reach experience crossing traffic in the vicinity of the passes between islands bordering the Strait. There is room in this reach sufficient to provide for only one traffic lane, in which large vessels usually will be able to proceed at the same time only if they proceed in the same direction.

The Bridge-to-Bridge Radiotelephone regulations at 33 CFR 26.04(b) provide that each person required to maintain a listening watch under the Bridge-to-Bridge Radiotelephone regulations "shall when necessary transmit and confirm, on the designated frequency, the intentions of his vessel and any other information necessary for the safe navigation of vessels." Section 160.70, in effect, specifies the conditions under which these transmissions are necessary when in or approaching Rosario Strait.

Section 160.72 requires that a report be made to the VTC 15 minutes prior to entering Rosario Strait so that the VTC can coordinate the entry of vessels into this Strait. The rule is intended to provide the information to the VTC necessary to prevent encounters between vessels in this reach.

The purpose of § 160.74 is to ensure that the VTC is aware of all vessels in Rosario Strait and to ensure that the vessel's radio, any radar and other electrical and mechanical equipment that affects navigation is operating.

The traffic separation scheme described by geographic coordinates in Subpart F contains certain changes from the existing traffic separation scheme which are the result of experience in operating the vessel traffic system on a voluntary basis. The configuration of these lanes was developed through cooperative effort between the Coast Guard and the local marine community. This traffic separation scheme was overprinted on the charts for Puget Sound. After a period of actual use, users of the vessel traffic system have recommended that several changes be made in the positions of buoys and the layout of the traffic lanes and separation zones, in order to make the TSS compatible with the needs of the vessels that operate in the VTS area. The Coast Guard agrees with these changes recommended in the traffic separation scheme and is in the process of making them. The traffic separation scheme as altered will be used in the voluntary vessel traffic system, and this proposal incorporates the changes in the description of the traffic separation scheme in subpart F. These changes are:

(a) Relocate the center of precautionary area "TC" approximately 2,700 yards northeast of its present position to latitude 47°19'30" N., longitude 122°-27'12" W. The present center of this precautionary area is located in an area of heavy tidal currents and most towing vessels experience difficulties in entering and leaving the present precautionary area in the proper manner. Pilots navigating large vessels have also experienced difficulties in making this turn. Relocating the center of the precautionary area should eliminate this problem.

(b) Relocate the center of precautionary area "SF" approximately 1,200 yards northeast of its present position to latitude 47°39'42" N., longitude 122°27'48" W. This new position is the preferred position for all vessels entering and leaving Elliott Bay and the Port of Seattle. This change will then allow the mariner to make the necessary course change when abeam of West Point. This precautionary area will be redesignated "SH".

(c) Relocate the center of precautionary area "SD" approximately 2,800 yards south to latitude 47°53'10" N., longitude 122°27'48" W. The present position of this precautionary area causes all northbound traffic to swing east, away from the preferred and most used navigation marks, and toward the shallow flats just south of Indian Point, Whidbey Island, and Scatchet Head. This maneuvering has been of some concern among the Puget Sound pilots navigating large vessels. The new position places the traffic lanes and turn several hundred yards southwest of the flats, considerably improving the general navigation picture in this area. This precautionary area will be redesignated "SF".

(d) Two new buoys will be placed designated as buoy "SE" and buoy "SD" realigning the traffic lanes and separation zone off Skunk Bay. "SE" will be located at latitude 47°57'21" N., longitude 122°30'16" W., and "SD" will be located at latitude 47°57'21" N., longitude 122°34'12" W. The realigning of the traffic lanes will reduce the angle of turn required by vessels navigating the area.

(e) Relocate the center of precautionary area "SC" northwesterly approximately 5,000 yards to latitude 48°01'06" N., longitude 122°37'54"W. The buoy marking the center of this precautionary area, in its present position, has been a serious problem to the gill-netter fleet this past season. In its present position, it is directly in the "driftline" the fishing vessels use while netting in this area. The season is only eight weeks, and the state of Washington severely restricts the areas and times that are open to fishing. This area is one of those open; therefore it is heavily fished. The new position of the buoy marking the center of precautionary area "SC" will remove it to the north of the normal gill net fisheries driftline; it will retain its purpose as a departing or entering point for the Hood Canal, and will allow a

V 38-150 AUG 6 73 XUM

closer preferred course between Foul Weather Bluff and Double Bluff.

(f) With addition of the additional buoys, buoy "SE" will be redesignated "SG".

(g) Relocate the center of precautionary area "CA" located in the northern end of Rosario Strait, southward approximately 5 miles to latitude 48°45'19" N., longitude 122°46'26" W. and reduce the radius of the precautionary area from 3,000 yards to 2,500 yards. This precautionary area is presently used, only marginally, by large vessels going into or out of Cherry Point. All traffic to Vancouver and other Canadian ports now exit the traffic lanes south of the present position. Vessels going to and from the oil dock at Ferndale also enter and exit the lanes south of the present area. This buoy in its present position also interfered with the gill-netters operating in this area. The relocation of the area will eliminate the situations outlined above, and still could be utilized by vessels going to and returning from Cherry Point. With respect to the reduction in size of the area, all other precautionary areas in the system are either 2,500 yards radius or 1,250 yards radius.

With the repositioning of precautionary area "CB", the buoy "CA" marking a turn in this traffic will be removed, as the turn has now been eliminated.

Although application of the proposed regulations will have a potential beneficial effect upon the environment, their promulgation is not considered a "major Federal action" within the meaning of the National Environmental Policy Act of 1969, because the regulation will make mandatory, as to certain classes of vessels, procedures heretofore voluntarily observed.

In consideration of the foregoing, the Coast Guard proposes to amend Chapter I of Title 33 of the Code of Federal Regulations by adding Subchapter P consisting at this time of Part 160 to follow reserved Part 159 to read as follows:

SUBCHAPTER P—VESSEL TRAFFIC SERVICES AND SYSTEMS

PART 160—PUGET SOUND VESSEL TRAFFIC SYSTEM

Subpart A—General

Sec.
160.1 Purpose and applicability.
160.3 Definitions.
160.5 Laws and regulations not affected.
160.7 Control of vessels by the VTC.
160.9 Authorization for deviation from these regulations.
160.11 Penalty.
160.13 Temporary precautionary areas.
160.15 Emergencies.

Subpart B—Communications Rules

160.18 Applicability.
160.20 Radio listening watch.
160.22 Radiotelephone equipment.
160.24 English language.
160.26 Time.
160.28 Initial report.
160.30 Follow-up report.
160.31 Final report.
160.33 Radio failure.
160.34 Report of emergency or radio failure.
160.35 Report of impairment to the operation of the vessel.
160.36 Ferry vessels.
160.38 Report of hazardous circumstances.

Subpart C—Vessel Movement Reporting Rules

Sec.
160.40 Applicability.
160.42 Movement reports.

Subpart D—Traffic Separation Scheme Rules

160.48 Applicability.
160.50 Conformance with the Traffic Separation Scheme (TSS).
160.52 Direction of traffic.
160.54 Anchoring in the TSS.
160.56 Joining, leaving, and crossing the TSS.
160.58 Small vessel navigation rule.

Subpart E—Rosario Strait Rules

160.68 Applicability.
160.70 Communications in Rosario Strait.
160.72 Report before entering Rosario Strait.
160.74 Entering Rosario Strait.

Subpart F—Description and Geographic Coordinates

160.78 Applicability.
160.80 VTS area.
160.83 Separation zones.
160.85 Traffic lanes.
160.87 Precautionary areas.
160.89 Reporting points.

AUTHORITY: Sec. 104, Pub. L. 92-340, 86 Stat. 424; 37 FR 21943, 49 CFR 146(o)(4).

Subpart A—General

§ 160.1 Purpose and applicability.

(a) This part prescribes rules for the operation of vessels in the Puget Sound vessel traffic system area (VTS Area) to prevent collisions and groundings and to protect the navigable waters of the VTS Area from environmental harm.

(b) Subparts A, E, and F of this part apply to all vessels.

(c) Subparts B, C, and D of this part apply only to—

(1) Each vessel of 300 or more gross tons that is propelled by machinery;

(2) Each vessel of 100 or more gross tons that is carrying one or more passengers for hire;

(3) Each commercial vessel of 26 feet or over in length engaged in the towing of another vessel astern, alongside, or by pushing ahead; and

(4) Each dredge or floating plant.

§ 160.3 Definitions.

As used in this part—

(a) "Vessel traffic center" (VTC) means the shore based facility that operates a vessel traffic system;

(b) "Vessel traffic system area" (VTS Area) means an area subject to regulations for a vessel traffic system;

(c) "Traffic separation scheme" (TSS) means the network of traffic lanes, separation zones, and precautionary areas in a VTS Area;

(d) "Traffic lane" means an area of the TSS in which all vessels ordinarily proceed in the same direction;

(e) "Separation zone" means an area of the TSS which is located between two traffic lanes to keep vessels proceeding in opposite directions a safe distance apart;

(f) "Precautionary area" means an area of the TSS at the entrance of one or more traffic lanes where vessel traffic converges from two or more directions;

(g) "Operator" with respect to vessels means any person who uses, causes to use, or authorizes the use of a vessel for the purpose of navigation;

(h) "Master or person in charge of a vessel" includes the person designated by the master or person in charge to pilot or direct the movement of the vessel;

(i) "Person" includes an individual, firm, corporation, association, and a partnership;

(j) "Reporting point" means a geographical position in the TSS where a vessel is required to make a report to the VTC; and

(k) "ETA" means estimated time of arrival.

§ 160.5 Law and regulations not affected.

Nothing in this part is intended to relieve any person from complying with—

(a) The Navigation Rules for Harbors, Rivers and Inland Waters Generally (33 U.S.C. 151–232);

(b) Part 26 of this chapter (Vessel Bridge-to-Bridge Radiotelephone Regulations);

(c) Part 80 of this chapter (Pilot Rules for Inland Waters);

(d) 33 CFR 206.93 (Puget Sound gill net fishing rule); or

(e) Any other laws or regulations.

§ 160.7 Control of vessels by the VTC.

When necessary to prevent damage to, or destruction or loss of, any vessel in the VTS Area during conditions of reduced visibility, adverse weather, vessel congestion, or other hazardous circumstances, the VTC may direct time of vessel entry in, time of movement through, or time of departure from the VTS Area, including the TSS. No person may operate a vessel contrary to any VTC direction issued under this section.

§ 160.9 Authorization for deviation from these regulations.

(a) The Commander, Thirteenth Coast Guard District, may authorize a deviation from any regulation in this part if application for the proposed authorization is submitted in writing to the District Commander at least 30 days before the operations under the proposed authorization are to begin, unless a shorter time is authorized by the District Commander. The application must state the reasons for needing the authorization and provide a comprehensive explanation of the proposed operations under the authorization.

(b) The VTC may, upon request, authorize a deviation from any regulation in this part for a voyage or part of a voyage on which a vessel is embarked or about to embark.

§ 160.11 Penalty.

Public Law 92–340 prescribes civil and criminal penalties for violations of the regulations in this part. The maximum civil penalty is $10,000. The criminal penalty for a willful violation is a fine of not less than $5,000 nor more than $50,000 and/or imprisonment for not more than 5 years.

§ 160.13 Temporary precautionary areas.

The Commander, Thirteenth Coast Guard District, may amend the description of the TSS in Subpart F of this part to establish temporary precautionary areas to provide for seasonal activities such as fishing that affect the safe passage of vessels in the TSS. The regulations establishing temporary precautionary areas are published in the FEDERAL REGISTER and in the Notice to Mariners.

§ 160.15 Emergencies.

In an emergency, any person may deviate from any regulation in this part to the extent necessary to avoid endangering persons, property, or the environment.

Subpart B—Communication Rules

§ 160.18 Applicability.

This subpart applies to the vessels described in § 160.1(c).

§ 160.20 Radio listening watch.

The master or person in charge of a vessel in the VTS Area shall continuously monitor the radio frequency designated in the Puget Sound VTS Operating Manual for the sector in which the vessel is operating, except when transmitting on that frequency.

§ 160.22 Radiotelephone equipment.

The radiotelephone equipment that is used to meet the requirements of this part must be capable of operation on the navigational bridge of the vessel, or in the case of a dredge, at its main control station.

§ 160.24 English language.

Each report required by this part must be made in the English language.

§ 160.26 Time.

Each report required by this part must specify time—

(a) In Pacific Standard Time or Pacific Daylight Time, whichever time system is in effect in the VTS Area; and

(b) Using the 24-hour clock system.

§ 160.28 Initial report.

At least one hour before a vessel enters or begins to navigate in the VTS Area, unless a shorter period is allowed by the VTC, the operator of the vessel shall report the following information to the VTC:

(a) The name of the vessel.

(b) The position of the vessel.

(c) The estimated time of entering or beginning to navigate in the VTS Area.

(d) Point of entry in the VTS Area.

(e) Destination in the VTS Area.

(f) ETA of the vessel at its destination.

(g) Any condition on the vessel, such as fire or defective mechanical or electrical equipment, that may affect its navigation in the VTS Area.

(h) Whether or not any dangerous cargo listed in § 124.14 of this part is on board the vessel.

§ 160.30 Follow-up report.

At least 15 minutes, but not more than 30 minutes, before a vessel enters or begins to navigate in the VTS Area, the operator of the vessel shall report the following information to the VTC:

(a) Name, type, length and draft of vessel.

(b) Any revisions to the initial report in § 160.28.

(c) The speed at which the vessel will proceed.

(d) Any tow not under complete control of the towing vessel.

(e) If the vessel intends to enter the TSS, the ETA and point of entry in the TSS.

§ 160.31 Final report.

When a vessel anchors in, moors at a berth in, or departs from the VTS area, the operator of the vessel shall report the place of anchoring, mooring, or departing to the VTC.

§ 160.33 Radio failure.

Whenever a vessel's radiotelephone equipment fails—

(a) Compliance with §§ 160.30, 160.38 and 160.40 is not required; and

(b) Compliance with §§ 160.28 and 160.31 is not required unless the report can be made by telephone.

§ 160.34 Report of emergency or radio failure.

Whenever a person deviates from a requirement of this part because of emergency or radio failure, he shall report the deviation to the VTC as soon as practicable.

§ 160.35 Report of impairment to the operation of the vessel.

The operator of any vessel in the VTS Area shall report to the VTC as soon as possible—

(a) Any condition on the vessel, such as fire or defective mechanical or electrical equipment, that affects its navigation; and

(b) Any tow not under complete control of the towing vessel.

§ 160.36 Ferry vessels.

(a) A ferry vessel that is operated in the VTS Area on a schedule and route that crosses the TSS, both of which have been furnished the VTC, need not comply with §§ 160.28, 160.30, and 160.42.

(b) Between sunset and sunrise and during fog, mist, falling snow, or heavy rain, the operator of each ferry vessel shall report the following information to the VTC at least five minutes before the vessel enters the TSS at any place other than Rosario Strait:

(1) The name of the vessel.

(2) Direction the vessel will proceed when crossing the TSS.

(3) The point of entering the TSS.

(4) The estimated time in the TSS.

§ 160.38 Report of hazardous circumstances.

Each operator of a vessel in the VTS Area should report by radiotelephone to the VTC any hazardous circumstances whenever observed including the following:

(a) Concentrations of fishing vessels.

(b) Reduced visibility or other adverse weather conditions.

(c) Concentrations of floating logs or other obstructions.

(d) Any defect in an aid to navigation.

(e) Any defect observed on another vessel that may affect the navigation of that vessel in the VTS Area.

Subpart C—Vessel Movement Reporting Rules

§ 160.40 Applicability.

This Subpart applies to the vessels described in § 160.1(c).

§ 160.42 Movement Reports.

(a) Whenever a vessel passes a reporting point, the operator of the vessel shall report the following information to the VTC by radiotelephone:

(1) The name of the vessel.

(2) The reporting point.

(3) The time of passing the reporting point.

(4) ETA at the the next reporting point.

(5) The next reporting point.

(6) If the vessel is at a point of entry in the TSS, any change in speed of the vessel from the speed reported in § 160.30 (c).

(7) If the vessel is at a point of departure from the TSS, the course, and destination or intentions of the vessel.

(b) Whenever the ETA of a vessel at a reporting point changes by more than 10 minutes, the operator of the vessel shall report a revised ETA to the VTC by radiotelephone.

Subpart D—Traffic Separation Scheme Rules

§ 160.48 Applicability.

This Subpart applies to all vessels.

§ 160.50 Conformance with the Traffic Separation Scheme (TSS).

The operator of each vessel in the TSS shall comply with TSS rules in §§ 160.50–160.58 and 160.74, except as allowed by § 160.15.

§ 160.52 Direction of traffic.

(a) A vessel in a traffic lane shall keep the separation zone to port.

(b) In a precautionary area, except the Port Angeles precautionary area or any temporary precautionary area, a vessel shall proceed in a counterclockwise direction and keep the center of the precautionary area to port.

§ 160.54 Anchoring in the TSS.

A vessel may not anchor in the TSS.

§ 160.56 Joining, leaving, and crossing the TSS.

(a) A vessel described in § 160.1(c) may not join, cross, or leave a traffic lane except at a precautionary area unless advance notification has been given the VTC of the point at which the vessel will join, cross, or leave the traffic lane.

(b) A vessel crossing the TSS at a traffic lane shall, to the extent practicable,

V 38-150 AUG 6 73 XUM

maintain a course that is approximately perpendicular to the direction of the flow of traffic in the traffic lane.

(c) A vessel joining or leaving a traffic lane without crossing a separation zone shall steer a course to converge on or diverge from the direction of traffic flow in the traffic lane at as small an angle as practicable.

(d) A vessel joining or leaving a traffic lane in a direction that requires crossing a separation zone and another traffic lane shall steer courses to converge on or diverge from the direction of traffic flow in the traffic lane being joined or left at as small an angle as practicable, but shall cross the other traffic lane on a course that is as near perpendicular to the separation zone as practicable.

§ 160.58 Small vessel navigation rule.

A vessel not described in § 160.1(c) when in the TSS, may not hamper the safe passage of vessels named in § 160.1 (c) that are navigating in the TSS.

Subpart E—Rosario Strait Rules

§ 160.68 Applicability.

This subpart applies to the vessels described in § 160.1(c).

§ 160.70 Communications in Rosario Strait.

Before a vessel meets, overtakes or crosses ahead of any vessel in Rosario Strait the master or person in charge shall transmit the intentions of his vessel to the master or person in charge of the other vessel on the frequency designated under the Bridge-to-Bridge Radiotelephone Act for the purpose of arranging safe passage.

§ 160.72 Report before entering Rosario Strait.

At least 15 minutes before a vessel enters the TSS at Rosario Strait, unless a shorter period is authorized by the VTC, the operator of the vessel shall report the vessel's ETA at, and point of entry in, Rosario Strait to the VTC by radiotelephone.

§ 160.74 Entering Rosario Strait.

A vessel may not enter Rosario Strait unless—

(a) The report in § 160.72 has been made;

(b) The radio equipment on the vessel that is used to transmit the reports required by this part is operating;

(c) The radar on a vessel so equipped is operating and manned during periods of visibility of 2 miles or less; and

(d) The vessel is free of any conditions, such as fire or defective mechanical or electrical equipment, that may affect its navigation.

Subpart F—Description and Geographic Coordinates

§ 160.78 Applicability.

This Subpart applies to all vessels.

§ 160.80 VTS Area.

The VTS Area consists of the area enclosed by the line described in § 82.120 of this chapter (which is the line dividing the high seas from inland waters between Angeles Point, Washington, and Point Roberts Light); thence easterly and northerly along the shoreline to the international boundary between Canada and the United States; thence easterly along the international boundary to the shoreline; thence along the shoreline of the United States to the point of beginning.

§ 160.83 Separation zones.

(a) The area of each separation zone is based on a centerline that extends from one point to another, or through several points, described in paragraph (d) of this section.

(b) Each separation zone consists of the area within two parallel boundaries 250 yards on each side of the centerline. These boundaries extend to and intersect with the boundary line of a precautionary area.

(c) No part of any separation zone is contained in a precautionary area.

(d) The latitude and longitude describing the centerline of the separation zone are:

(1) Between precautionary area "S" and "SA".

(i)	48°12′24″ N.	123°06′30″ W.
(ii)	48°11′33″ N.	122°51′30″ W.

(2) Between precautionary area "R" and "RA".

(i)	48°16′24″ N.	123°06′30″ W.
(ii)	48°19′06″ N.	123°00′09″ W.

(3) Between precautionary area "RA" and "SA".

§ 160.85 Traffic lanes.

(a) Except as provided in paragraph (b) of this section, each traffic lane consist of the area within two parallel boundaries that are 1000 yards apart and that extend to and intersect with the boundary of a precautionary area. One of these parallel boundaries is parallel to and 250 yards from the centerline of a separation zone.

(b) No part of any traffic lane is contained in a precautionary area.

(c) Rosario Strait is the traffic lane consisting of the area enclosed by a line beginning at latitude 48°26′48″ N., longitude 122°43′24″ W.; thence northerly to latitude 48°36′06″ N., longitude 122°45′00″ W.; thence northeasterly to latitude 48°39′18″ N., longitude 122°42′42″ W.; thence westerly and northwesterly along the boundary of precautionary area "C" to latitude 48°39′36″ N., longitude 122°44′00″ W.; thence southerly to latitude 48°38′24″ N., longitude 122°44′06″ W.; thence southwesterly to latitude 48°36′06″ N., longitude 122°45′42″ W.; thence southerly to latitude 48°29′42″ N., longitude 122°44′42″ W.; thence southwesterly to latitude 48°27′36″ N., longitude 122°45′30″ W.; thence northeasterly and southeasterly along the boundary of precautionary area "RB" to the point of beginning.

§ 160.87 Precautionary areas.

The precautionary areas consist of:

(a) *Port Angeles precautionary area.* An area enclosed by a line beginning on the shoreline at New Dungeness Spit at latitude 48°11′00″ N., longitude 123°06′30″ W.; thence due north to latitude 48°17′12″ N., longitude 123°27′36″ W.; thence due south to the shorelines; thence along the shoreline to the point of beginning.

(b) *Precautionary area "RA".* A circular area of 2,500 yards radius centered at latitude 48°19′45″ N., longitude 122°58′36″ W.;

(c) *Precautionary area "RB".* A circular area of 2,500 yards radius centered at latitude 48°26′24″ N., longitude 122°45′12″ W.;

(d) *Precautionary area "C".* A circular area of 2,500 yards radius centered at latitude 48°40′33″ N., longitude 122°42′42″ W.;

(e) *Precautionary area "CA".* A circular area of 2,500 yards radius centered at latitude 48°45′19″ N., longitude 122°46′26″ W.;

(f) *Precautionary area "SA".* A circular area of 2,500 yards radius centered at latitude 48°11′28″ N., longitude 122°49′43″ W.;

(g) *Precautionary area "SC".* A circular area of 1,250 yards radius centered at latitude 48°01′06″ N., longitude 122°37′54″ W.;

(h) *Precautionary area "SF".* A circular area of 1,250 yards radius centered at latitude 47°53′10″ N., longitude 122°27′48″ W.;

(i) *Precautionary area "SH".* A circular area of 1,250 yards radius centered at latitude 47°39′42″ N., longitude 122°27′48″ W.;

(j) *Precautionary area "T".* A circular area of 1,250 yards radius centered at latitude 47°34′18″ N., longitude 122°26′48″ W.;

(k) *Precautionary area "TC".* A circular area of 1,250 yards radius centered at latitude 47°19′30″ N., longitude 122°27′12″ W.

§ 160.89 Reporting points.

(a) Buoy "R" at latitude 48°16′24″ N., longitude 123°06′30″ W.

(b) Buoy "S" at latitude 48°12′24″ N., longitude 123°06′30″ W.

(c) Buoy "SA" at latitude 48°11′28″ N., longitude 122°49′43″ W.

(d) Buoy "RB" at latitude 48°26′24″ N., longitude 122°45′12″ W.

(e) Buoy "C" at latitude 48°40′33″ N., longitude 122°42′42″ W.

(f) Buoy "SC" at latitude 48°01′06″ N., longitude 122°37′54″ W.

(g) Buoy "SH" at latitude 47°39′42″ N., longitude 122°27′48″ W.

(h) Buoy "TB" at latitude 47°23′06″ N., longitude 122°21′06″ W.

(i) The boundary of the TSS.

Guide to Record Retention Requirements

[Revised as of January 1, 1973]

This useful reference tool is designed to keep businessmen and the general public informed concerning the many published requirements in Federal laws and regulations relating to record retention.

The 90-page "Guide" contains over 1,000 digests which tell the user (1) what type records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest carries a reference to the full text of the basic law or regulation providing for such retention.

The booklet's index, numbering over 2,200 items, lists for ready reference the categories of persons, companies, and products affected by Federal record retention requirements.

Price: $1.50

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 3—The President

EXECUTIVE ORDER 11735

Assignment of Functions Under Section 311 of the Federal Water Pollution Control Act, as Amended

By virtue of the authority vested in me by section 311 of the Federal Water Pollution Control Act, as amended by the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92–500; 86 Stat. 816 at 862; 33 U.S.C. 1321), hereinafter referred to as the act, by section 301 of title 3 of the United States Code, and as President of the United States, it is hereby ordered as follows:

SECTION 1. *Administrator of the Environmental Protection Agency.* The Administrator of the Environmental Protection Agency is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

(1) the authority of the President under subsections (b)(3) and (b)(4) of section 311 of the act relating to the determination of those quantities of oil and hazardous substances the discharge of which, at such times, locations, circumstances, and conditions, will be harmful to the public health or welfare of the United States and those which will not be harmful;

(2) the authority of the President under subsection (c)(2)(G) of section 311 of the act, relating to identification of dispersants and other chemicals to be used;

(3) the authority of the President under subsection (e) of section 311 of the act, relating to determinations of imminent and substantial threat because of actual or threatened discharges of oil or hazardous substances from non-transportation-related onshore and offshore facilities, and relating to securing relief necessary to abate such actual or threatened discharges through court action; and

(4) the authority of the President under subsection (j)(1)(C) of section 311 of the act, relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent discharges of oil and hazardous substances from non-transportation-related onshore and offshore facilities, and to contain such discharges.

SEC. 2. *Secretary of Department in which the Coast Guard is Operating.* The Secretary of the Department in which the Coast Guard is operating is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

V 38 - 151 AUG 7 73 XUM

(1) the authority of the President under subsection (e) of section 311 of the act, relating to determinations of imminent and substantial threat because of actual or threatened discharges of oil or hazardous substances from transportation-related onshore and offshore facilities, and relating to securing relief necessary to abate such actual or threatened discharges through court action;

(2) the authority of the President under subsection (j)(1)(C) of section 311 of the act, relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent discharges of oil and hazardous substances from vessels and transportation-related onshore and offshore facilities, and to contain such discharges;

(3) the authority of the President under subsection (j)(1)(D) of section 311 of the act, relating to the inspection of vessels carrying cargoes of oil and hazardous substances and the inspection of such cargoes;

(4) the authority to administer the revolving fund established pursuant to subsection (k) of section 311 of the act; and

(5) the authority under subsection (m) of section 311 of the act, relating to the boarding and inspection of vessels, the arrest of persons violating section 311, and the execution of warrants or other process pursuant to that section.

SEC. 3. *Federal Maritime Commission.* The Federal Maritime Commission is designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

(1) the authority of the President under subsection (p)(1) of section 311 of the act, relating to the issuance of regulations governing evidence of financial responsibility for vessels to meet liability to the United States; and

(2) the authority under subsection (p)(2) of section 311 of the act, relating to the administration of subsection (p).

SEC. 4. *Council on Environmental Quality.* The Council on Environmental Quality is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority under subsection (c)(2) of section 311 of the act, providing for the preparation, publication, revision or amendment of a National Contingency Plan for the removal of oil and hazardous substance discharges (hereinafter referred to as the National Contingency Plan).

SEC. 5. *Other Assignments.*

(a) The head of each Federal department and agency having responsibilities under the National Contingency Plan (36 FR 16215), as now or hereafter amended, is designated and empowered to exercise, without the approval, ratification, or other action of the President, in accordance with that plan, the authority under subsection (c)(1) of section 311 of the act, relating to the removal of oil and hazardous substances discharged into or upon the navigable waters of the United

States, adjoining shorelines, or into or upon the waters of the contiguous zone.

(b) The Administrator of the Environmental Protection Agency and the Secretary of the Department in which the Coast Guard is operating, respectively, in and for the waters and areas for which each has responsibility for providing or furnishing on-scene-coordinators under the National Contingency Plan, are designated and empowered to exercise, without approval, ratification, or other action of the President, the following:

(1) the authority under subsection (c)(2)(C) of section 311 of the act, relating to the determination of major ports for establishment of emergency task forces;

(2) the authority under subsection (d) of section 311 of the act, relating to the coordination and direction of the removal or elimination of threats of pollution hazards from discharges, or imminent discharges, of oil or hazardous substances, and the removal and destruction of vessels;

(3) the authority of the President under subsection (j)(1)(A) of section 311 of the act, relating to the establishment of methods and procedures for the removal of discharged oil and hazardous substances; and

(4) the authority of the President under subsection (j)(1)(B) of section 311 of the act, relating to the establishment of criteria for the development and implementation of local and regional oil and hazardous substance removal contingency plans.

(c) The Administrator of the Environmental Protection Agency and the Secretary of the Department in which the Coast Guard is operating are designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority of the President under section 311(j)(2) with respect to assessing and compromising civil penalties in connection with enforcement of the respective regulations issued by each pursuant to this order.

SEC. 6. *Consultation.* Authorities and functions delegated or assigned by this order shall be exercised subject to consultation with the Secretaries of departments and the heads of agencies with operating or regulatory responsibilities which may be significantly affected.

SEC. 7. *Agency to Receive Notices of Discharges of Oil or Hazardous Substances.* The Coast Guard is hereby designated the "appropriate agency" for the purpose of receiving the notice of discharge of oil or

V 38 - 151 AUG 7 73 XUM

hazardous substances required by subsection (b)(5) of section 311 of the act. The Commandant of the Coast Guard shall issue regulations implementing this designation.

SEC. 8. Without derogating from any action heretofore taken thereunder, Executive Order No. 11548 of July 20, 1970, is hereby superseded.

THE WHITE HOUSE,
August 3, 1973.

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER D—SPECIAL REGULATIONS

[Reg. SPR-71, Amdt. 8]

PART 378—INCLUSIVE TOURS BY SUPPLEMENTAL AIR CARRIERS, CERTAIN FOREIGN AIR CARRIERS, AND TOUR OPERATORS

Post-tour Reporting

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on August 1, 1973.

By SPR-70,[1] the Board adopted amendment No. 7 to Part 378 to authorize certificated route air carriers and, subject to conditions, foreign route air carriers, to perform inclusive tour charters.

Amendment No. 7 contains certain inadvertent technical errors. This amendment corrects these errors.

This regulation is issued by the undersigned pursuant to a delegation of authority from the Board to the General Counsel in 14 CFR § 385.19 and shall become effective on August 22, 1973, the effective date of SPR-70. Procedures for review of this amendment by the Board are set forth in Subpart C of Part 385 (14 CFR 385.50 and 385.54).

Accordingly, the Board hereby amends Part 378 of the Special Regulations (14 CFR Part 378) effective August 22, 1973, as follows:

Amend paragraphs (a) and (b) of § 378.20 to read as follows:

§ 378.20 Post-tour reporting.

(a) Within 30 days after termination of a tour or series of tours, the direct air carrier and tour operator or foreign tour operator shall jointly file with the Board (Supplementray Services Division, Bureau of Operating Rights) a post-tour report: *Provided*, That in the case of a series of tours which exceeds six months between commencement of the first tour and departure of the last tour, the direct air carrier and tour operator or foreign tour operator shall file a joint interim report within 30 days after the expiration of six months from commencement of the first tour, covering tours terminated during such six months. The post-tour and interim report shall indicate whether or not the tours authorized hereunder were, in fact, performed. To the extent that the operations differed from those described in the prospectus filed under § 378.10, such differences shall be fully detailed including the reasons therefor. However, the making of such an explanation shall not of itself operate as authority for or excuse any such deviation. The report shall be in the form attached hereto as Appendix B.[2]

(b) The direct air carrier shall promptly notify the Board regarding any tours covered by a prospectus filed under § 378.10 that are later canceled.

* * * * *

(Sec. 204(a), Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324)

By the Civil Aeronautics Board.

[SEAL] RICHARD LITTELL,
General Counsel.

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER E—POISON PREVENTION PACKAGING ACT OF 1970 REGULATIONS

PART 1700—POISON PREVENTION PACKAGING

Effective May 14, 1973, section 30(a) of the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1231; 15 U.S.C. 2079(a)), among other things, transferred from the Secretary of Health, Education, and Welfare to the Consumer Product Safety Commission functions under the Poison Prevention Packaging Act of 1970.

Before May 14, 1973, the Commisisoner of Food and Drugs, under delegated authority, promulgated regulations under the Poison Prevention Packaging Act of 1970 which appear in the Code of Federal Regulations as 21 CFR Part 295. The purpose of this document is to revise and transfer those regulations.

Accordingly, pursuant to section 30(a) of the Consumer Product Safety Act, the Consumer Product Safety Commission hereby (1) deletes Part 295 from Title 21, Chapter I, and (2) revises and reissues the regulations under the Poison Prevention Packaging Act of 1970 as Part 1700 of Title 16, Chapter II, as set forth below. This action also establishes Chapter II of Title 16 to which Chapter other regulations of the Consumer Product Safety Commission will be added.

Any provisions of 21 CFR Part 295 having delayed effective dates as of the date of publication of this document shall have the same delayed effective date in 16 CFR Part 1700, and these are noted. In some instances, effective dates that were delayed but also recently preceded the date of this publication have been noted for informational purposes.

The material is revised to update the names, titles, etc., and to add for convenience certain definitions and provisions of the Poison Prevention Packaging Act of 1970. Since no new requirements are added by this revision, notice and public procedure are not prerequisites to this issuance.

Part 1700 of Title 16, Chapter II, Subchapter E, reads as follows:

Sec.
1700.1 Definitions.
1700.2 Authority.
1700.3 Establishment of standards for special packaging.
1700.4 Effective date of standards.
1700.14 Substances requiring special packaging.
1700.15 Poison prevention packaging standards.
1700.20 Testing procedure for special packaging.

AUTHORITY: Secs. 1-9, 84 Stat. 1670-74; 15 U.S.C. 1471-76, unless otherwise noted.

§ 1700.1 Definitions.

(a) As used in this part:

(1) "Act" means the Poison Prevention Packaging Act of 1970 (Public Law 91-601, 84 Stat. 1670-74; 15 U.S.C. 1471-75), enacted December 30, 1970.

(2) "Commission" means the Consumer Product Safety Commission established by section 4 of the Consumer Product Safety Act (86 Stat. 1210; 15 U.S.C. 2053).

(b) Except for the definition of "Secretary," which is obsolete, the definitions given in section 2 of the act are applicable to this part and are repeated herein for convenience as follows:

(1) [Reserved]

(2) "Household substance" means any substance which is customarily produced or distributed for sale for consumption or use, or customarily stored, by individuals in or about the household and which is:

(i) A hazardous substance as that term is defined in section 2(f) of the Federal Hazardous Substances Act (15 U.S.C. 1261(f));

(ii) An economic poison as that term is defined in section 2(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135(a));

(iii) A food, drug, or cosmetic as those terms are defined in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321); or

(iv) A substance intended for use as fuel when stored in a portable container and used in the heating, cooking, or refrigeration system of a house.

V 38 - 151 AUG 7 73 XUM

(3) "Package" means the immediate container or wrapping in which any household substance is contained for consumption, use, or storage by individuals in or about the household and, for purposes of section 4(a)(2) of the act, also means any outer container or wrapping used in the retail display of any such substance to consumers. "Package" does not include:

(i) Any shipping container or wrapping used solely for the transportation of any household substance in bulk or in quantity to manufacturers, packers, or processors, or to wholesale or retail distributors thereof; or

(ii) Any shipping container or outer wrapping used by retailers to ship or deliver any household substance to consumers unless it is the only such container or wrapping.

(4) "Special packaging" means packaging that is designed or constructed to be significantly difficult for children under 5 years of age to open or obtain a toxic or harmful amount of the substance contained therein within a reasonable time and not difficult for normal adults to use properly, but does not mean packaging which all such children cannot open or obtain a toxic or harmful amount within a reasonable time.

(5) "Labeling" means all labels and other written, printed, or graphic matter upon any household substance or its package, or accompanying such substance.

§ 1700.2 Authority.

Authority under the Poison Prevention Packaging Act of 1970 is vested in the Consumer Product Safety Commission by section 30(a) of the Consumer Product Safety Act (15 U.S.C. 2079(a)).

§ 1700.3 Establishment of standards for special packaging.

(a) Pursuant to section 3 of the act, the Commission, after consultation with the technical advisory committee provided for by section 6 of the act, may establish by regulation standards for the special packaging of any household substance if the Commission finds:

(1) That the degree or nature of the hazard to children in the availability of such substance, by reason of its packaging, is such that special packaging is required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting sucsh substance; and

(2) That the special packaging to be required by such standard is technically feasible, practicable, and appropriate for such substance.

(b) In establishing such a standard, the Commission shall consider:

(1) The reasonableness of such standard;

(2) Available scientific, medical, and engineering data concerning special packaging and concerning childhood accidental ingestions, illness, and injury caused by household substances;

(3) The manufacturing practices of industries affected by the act; and

(4) The nature and use of the household substance.

(c) In the process of establishing such a standard, the Commission shall publish its findings and reasons therefor and shall cite the sections of the act that authorize its action.

(d) In establishing such standards, the Commission shall not prescribe specific packaging designs, product content, package quantity, or labeling except for labeling under section 4(a)(2) of the act. Regarding a household substance for which special packaging is required by regulation, the Commission can prohibit the packaging of such substance in a package which the Commission determines is unnecessarily attractive to children.

(e) Promulgations pursuant to section 3 of the act shall be in accordance with section 5 of the act as to procedure.

§ 1700.4 Effective date of standards.

(a) The FR document promulgating a regulation establishing a child protection packaging standard shall indicate the standard's effective date. Section 9 of the act specifies that the effective date shall not be sooner than 180 days or later than 1 year from the date the standard is promulgated in the FEDERAL REGISTER unless the Commission, for good cause found, determines that an earlier effective date is in the public interest and publishes in the FEDERAL REGISTER the reason for such finding, in which case such earlier effective date shall apply.

(b) Upon becoming effective, a child protection packaging standard shall apply only to household substances packaged on and after its effective date.

§ 1700.14 Substances requiring special packaging.

(a) *Substances.* The Commission has determined that the degree or nature of the hazard to children in the availability of the following substances, by reason of their packaging, is such that special packaging is required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting such substances, and that the special packaging herein required is technically feasible, practicable, and appropriate for these substances:

(1) *Aspirin.* Any aspirin-containing preparation for human use in a dosage form intended for oral administration shall be packaged in accordance with the provisions of § 1700.15(a), (b), and (c), except the following:

(i) Effervescent tablets containing aspirin, other than those intended for pediatric use, provided the dry tablet contains less than 10 percent of aspirin, the tablet has an oral LD–50 in rats of greater than 5 grams per kilogram of body weight, and the tablet placed in water releases at least 85 milliliters of carbon dioxide per grain of aspirin in the dry tablet when measured stoichiometrically at standard conditions (0° C. 760 mm. hg.).

(ii) Unflavored aspirin-containing preparations in powder form (other than those intended for pediatric use) that are packaged in unit doses providing not more than 10 grains of aspirin per unit dose and that contain no other substance subject to the provisions of this section.

(2) *Furniture polish.* Nonemulsion type liquid furniture polishes containing 10 percent or more of mineral seal oil and/or other petroleum distillates and having a viscosity of less than 100 Saybolt universal seconds at 100° F., other than those packaged in pressurized spray containers, shall be packaged in accordance with the provisions of § 1700.15(a), (b), and (d).

(3) *Methyl salicylate.* Liquid preparations containing more than 5 percent by weight of methyl salicylate, other than those packaged in pressurized spray containers, shall be packaged in accordance with the provisions of § 1700.15(a), (b), and (c).

(4) *Controlled drugs.* Any preparation for human use that consists in whole or in part of any substance subject to control under the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.) and that is in a dosage form intended for oral administration shall be packaged in accordance with the provisions of § 1700.15(a), (b), and (c).

(5) *Sodium and/or potassium hydroxide.* Household substances in dry forms such as granules, powder, and flakes, containing 10 percent or more by weight of free or chemically unneutralized sodium and/or potassium hydroxide, and all other household substances containing 2 percent or more by weight of free or chemically unneutralized sodium and/or potassium hydroxide, shall be packaged in accordance with the provisions of § 1700.15 (a) and (b).

NOTE: This subparagraph was originally promulgated October 13, 1972 (37 FR 21633), as 21 CFR 295.2(a)(5) with an effective date of April 11, 1973, except as the subparagraph applies to paste-type oven cleaners requiring a brush applicator and substances in pressurized spray containers, for which the effective date is July 10, 1973.

(6) *Turpentine.* Household substances in liquid form containing 10 percent or more by weight of turpentine shall be packaged in accordance with the provisions of § 1700.15 (a) and (b).

NOTE: This subparagraph was originally promulgated October 13, 1972 (37 FR 21635), as 21 CFR 295.2(a)(6) with an effective date of April 11, 1973. An order was published April 26, 1973 (38 FR 10267), extending the effective date of this subparagraph to July 1, 1973, for those packagers who ordered adequate stocks of special packaging well in advance of April 11, 1973, and who will immediately begin to use special packaging complying with this subparagraph when it is delivered to them.

(7) *Kindling and/or illuminating preparations.* Prepackaged liquid kindling and/or illuminating preparations, such as cigarette lighter fuel, charcoal lighter fuel, camping equipment fuel, torch fuel, and fuel for decorative or functional lanterns, which contain 10 percent or more by weight of petroleum distillates and have a viscosity of less than 100 Saybolt universal seconds at 100° F., shall be packaged in accordance with the provisions of § 1700.15(a) and (b).

NOTE: This subparagraph was originally promulgated January 30, 1973 (38 FR 2757), as 21 CFR 295.2(a)(7) and was corrected February 8, 1973 (38 FR 3598). As corrected, the effective date of this subparagraph was established as October 29, 1973, except as the subparagraph applies to cigarette lighter fuel packaged with a spout-type dispensing closure, for which the effective date is January 30, 1974.

(8) *Methyl alcohol (methanol).* Household substances in liquid form containing 4 percent or more by weight of methyl alcohol (methanol), other than those packaged in pressurized spray containers, shall be packaged in accordance with the provisions of § 1700.15(a) and (b).

NOTE: This subparagraph was originally promulgated October 13, 1972 (37 FR 21632), as 21 CFR 295.2(a)(8) with an effective date of April 11, 1973. An order was published April 26, 1973 (38 FR 10267), extending the effective date of this subparagraph to July 1, 1973, for those packagers who ordered adequate stocks of special packaging well in advance of April 11, 1973, and who will immediately begin to use special packaging complying with this subparagraph when it is delivered to them.

(9) *Sulfuric acid.* Household substances containing 10 percent or more by weight of sulfuric acid, except such substances in wet-cell storage batteries, shall be packaged in accordance with the provisions of § 1700.15 (a) and (b).

NOTE: This subparagraph was originally promulgated February 15, 1973 (38 FR 4512), as 21 CFR 295.2(a)(9) and shall become effective August 14, 1973.

(10) *Prescription drugs.* Any drug for human use that is in a dosage form intended for oral administration and that is required by Federal law to be dispensed only by or upon an oral or written prescription of a practitioner licensed by law to administer such drug, except sublingual dosage forms of nitroglycerin, shall be packaged in accordance with the provisions of § 1700.15 (a), (b), and (c).

NOTE: This subparagraph was originally promulgated April 16, 1973 (38 FR 9431), as 21 CFR 295.2(a)(10) and shall become effective April 16, 1974.

(b) *Sample packages.* (1) The manufacturer or packer of any of the substances listed under paragraph (a) of this section as substances requiring special packaging shall provide the Commission with a sample of each type of special packaging, as well as the labeling for each size product that will be packaged in special packaging and the labeling for any noncomplying package. Sample packages and labeling should be sent to the Consumer Product Safety Commission, Attention: Bureau of Compliance, 5401 Westbard Avenue, Washington, D.C. 20207.

(2) Sample packages should be submitted without contents when such contents are unnecessary for demonstrating the effectiveness of the packaging.

(3) Any sample packages containing drugs listed under paragraph (a) of this section shall be sent by registered mail.

(4) As used in subparagraph (1) of this paragraph, the term "manufacturer or packer" does not include pharmacists and other individuals who dispense, at the retail or user level, drugs listed under paragraph (a) of this section as requiring special packaging.

(c) *Applicability.* Special packaging standards for drugs listed under paragraph (a) of this section shall be in addition to any packaging requirements of the Federal Food, Drug, and Cosmetic Act or regulations promulgated thereunder or of any official compendia recognized by that act.

(Secs. 2(4), 3, 5, 84 Stat. 1670–72; 15 U.S.C. 1471(4), 1472, 1474)

§ 1700.15 Poison prevention packaging standards.

To protect children from serious personal injury or serious illness resulting from handling, using, or ingesting household substances, the Commission has determined that packaging designed and constructed to meet the following standards shall be regarded as "special packaging" within the meaning of section 2(4) of the act. Specific application of these standards to substances requiring special packaging is in accordance with § 1700.14.

(a) *General requirements.* The special packaging must continue to function with the effectiveness specifications set forth in paragraph (b) of this section when in actual contact with the substance contained therein. This requirement may be satisfied by appropriate scientific evaluation of the compatibility of the substance with the special packaging to determine that the chemical and physical characteristics of the substance will not compromise or interfere with the proper functioning of the special packaging. The special packaging must also continue to function with the effectiveness specifications set forth in paragraph (b) of this section for the number of openings and closings customary for its size and contents. This requirement may be satisfied by appropriate technical evaluation based on physical wear and stress factors, force required for activation, and other such relevant factors which establish that, for the duration of normal use, the effectiveness specifications of the packaging would not be expected to lessen.

(b) *Effectiveness specifications.* Special packaging, tested by the method described in § 1700.20, shall meet the following specifications:

(1) Child-resistant effectiveness of not less than 85 percent without a demonstration and not less than 80 percent after a demonstration of the proper means of opening such special packaging. In the case of unit packaging, child-resistant effectiveness of not less than 80 percent.

(2) Adult-use effectiveness of not less than 90 percent.

(c) *Reuse of special packaging.* Special packaging for substances subject to the provisions of this paragraph shall not be reused.

(d) *Restricted flow.* Special packaging subject to the provisions of this paragraph shall be special packaging from which the flow of liquid is so restricted that not more than 2 milliliters of the contents can be obtained when the inverted, opened container is shaken or squeezed once or when the container is otherwise activated once.

(Secs. 2(4), 3, 5, 84 Stat. 1670–72; 15 U.S.C. 1471(4), 1472, 1474)

§ 1700.20 Testing procedure for special packaging.

(a) The protocol for testing "special packaging" as defined in section 2(4) of the act shall be as follows:

(1) Use 200 children between the ages of 42 and 51 months inclusive, evenly distributed by age and sex, to test the ability of the special packaging to resist opening by children. The even age distribution shall be determined by having 20 children (plus or minus 10 percent) whose nearest age is 42 months, 20 whose nearest age is 43 months, 20 at 44 months, etc., up to and including 20 at 51 months of age. There should be no more than a 10 percent preponderance of either sex in each age group. The children selected should be healthy and normal and should have no obvious or overt physical or mental handicap.

(2) The children shall be divided into groups of two each. The testing shall be done in a location that is familiar to the children; for example, their customary nursery school or regular kindergarten. No child shall test more than two special packages, and each package shall be of a different type. For each test, the paired children shall receive the same special packaging simultaneously. When more than one special packaging is being tested, they shall be presented to the paired children in random order, and this order shall be recorded. The special packaging, each test unit of which, if appropriate, has previously been opened and properly resecured by the tester, shall be given to each of the two children with a request for them to open it. (In the case of unit packaging, it shall be presented exposed so that the individual units are immediately available to the child.) Each child shall be allowed up to 5 minutes to open the special packaging. For those children unable to open the special packaging after the first 5 minutes, a single visual demonstration, without verbal explanation, shall be given by the demonstrator. A second 5 minutes shall then be allowed for opening the special packaging. (In the case of unit packaging, a single visual demonstration, without verbal explanation, will be provided at the end of the first 5 minutes only for those test subjects who have not opened at least one unit package, and a second 5 minutes allowed for all subjects.) If a child fails to use his teeth to open the special packaging during the first 5 minutes, the demonstrator shall instruct him, before the start of the second 5-minute period, that he is permitted to use his teeth if he wishes.

V 38-151 AUG 7 73 XUM

(3) Records shall be kept on the number of children who were and were not able to open the special packaging, with and without demonstration. (In the case of unit packaging, records shall be kept on the number of individual units opened or gained access to by each child.) The percent of child-resistant effectiveness shall be the number of children tested, less the test failures, divided by two. A test failure shall be any child who opens the special packaging or gains access to its contents. In the case of unit packaging, however, a test failure shall be any child who opens or gains access to the number of individual units which constitute the amount that may produce serious personal injury or serious illness, or a child who opens or gains access to more than 8 individual units, whichever number is lower, during the full 10 minutes of testing. The determination of the amount of a substance that may produce serious personal injury or serious illness shall be based on a 25-pound child. Manufacturers or packagers intending to use unit packaging for a substance requiring special packaging are requested to submit such toxicological data to the Commission.

(4) One hundred adults, age 18 to 45 years inclusive, with no overt physical or mental handicaps, and 70 percent of whom are female, shall comprise the test panel for normal adults. The adults shall be tested individually, rather than in groups of two or more. The adults shall receive only such printed instructions on how to open and properly resecure the special packaging as will appear on the package as it is delivered to the consumer. Five minutes shall be allowed to complete the opening and, if appropriate, the resecuring process.

(5) Records shall be kept on the number of adults unable to open and the number of the other adults tested who fail to properly resecure the special packaging. The number of adults who successfully open the special packaging and then properly resecure the special packaging (if resecuring is appropriate) is the percent of adult-use effectiveness of the special packaging. In the case of unit packaging, the percent of adult-use effectiveness shall be the number of adults who successfully open a single package.

(b) The standards published as regulations issued for the purpose of designating particular substances as being subject to the requirements for special packaging under the act will stipulate the percent of child-resistant effectiveness and adult-use effectiveness required for each and, where appropriate, will include any other conditions deemed necessary and provided for in the act.

(c) It is recommended that manufacturers of special packaging, or producers of substances subject to regulations issued pursuant to the act, submit to the Commission summaries of data resulting from tests conducted in accordance with this protocol.

Dated: July 31, 1973.

GEORGE A. SMITH,
Acting Secretary, Consumer Product Safety Commission.

[FR Doc.73-16223 Filed 8-6-73;8:45 am]

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. SIPA-5]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

PART 249a—FORMS, SECURITIES INVESTOR PROTECTION ACT OF 1970

Completion of Open Contractual Commitments

The Securities and Exchange Commission today announced that it has adopted section S6d-1 [17 CFR 240.206d-1] and the forms thereunder the Securities Investor Protection Act of 1970 (SIPC Act), effective immediately. The section and forms were published for comment on December 21, 1972, in Securities Investor Protection Act Release No. 2. (38 FR 1127).[1] The Commission has considered the comments received in response to that release and now adopts that section and the forms thereunder as set forth below. The changes in the section and forms are mainly clarifying in nature, with some exceptions noted below.

Rule S6d-1. Section 6(d)(1) of the SIPC Act provides for the completion by a SIPC Act trustee of those "open contractual commitments" of the debtor in which a customer had an interest. Section S6d-1 places certain limitations on what open contractual commitments of a SIPC Act debtor shall be eligible for completion. The section provides that it is not in the public interest for the trustee of a SIPC Act debtor to complete open contractual commitments of the debtor consisting of fails to receive and fails to deliver as defined in the section open on the filing date[2] unless such fails were promptly bought-in or sold-out by the other broker-dealer[3] and certain reports made to the trustee in accordance with the provisions of the section.

The section does not affect the rights and responsibilities of the trustee regarding the completion of those open contractual commitments under section 6(d) of the SIPC Act which are not described in paragraph (a) of the section.

As the legislative history of the SIPC Act indicates, Congress provided the Commission broad rulemaking authority to determine how open contractual commitments should be handled to best serve the public interest.[4] The operation and interpretation of section 6(d)(1) has presented a great deal of difficulty, not only in determining conditions under which specific types of open contractual commitments may be completed by the trustee but also in determining what constitutes an open contractual commitment for purposes of the section. Moreover, a number of fraudulent open contractual commitments have been presented to trustees. As experience has been acquired in liquidating firms under the SIPC Act, a better assessment of how to deal with specific types of commitments can be made. Because the open contractual commitments to which the rule addresses itself, i.e. fails to receive and fails to deliver, constitute the vast majority of all commitments falling within the ambit of section 6(d)(1) of the SIPC Act, the Commission felt clarification in that area first would prove most beneficial. The Commission recognizes that certain problems have not been dealt with. In particular the section does not address itself to transactions which are cleared through a clearing organization which interposes itself as principal between brokers in the settlement of securities transactions. Also, certain types of commitments, for example underwriting commitments or when issued trades, are not dealt with by the section.[5] These and other problems require further investigation and the Commission intends to continue to study such problems with a view toward a further exercise of its rulemaking power under Subsections 6(d)(1) and 6(d)(2) of the SIPC Act if that appears to be appropriate.

In the overview, the purpose of the section is to complete only those fails to receive and fails to deliver described in paragraph (a) of the section which:

(i) Arose from a current transaction in which the other broker was acting as an agent for a customer or the other dealer was acting for a customer in certain narrowly defined principal transactions;

(ii) Are not stale as of the filing date;

(iii) Are bought-in, sold-out, or closed

[1] On January 24, 1973, in Securities Investor Protection Act Release No. 3, the Commission extended the comment period on the proposal to February 24, 1973.

[2] Filing date is defined in section 5(b)(4)(B) of the SIPC Act.

[3] Or, at the option of the trustee, completed by the delivery of securities against receipt of payment or the receipt of securities against the payment of funds.

[4] "Experience may show that there are certain types of customer transactions which should not be completed, and certain types of noncustomer transactions which should be completed. The Commission is therefore given rule-making authority to prohibit or direct completion of these types of transactions." H.R. Rep. 91-1613, 91st Cong. 2d Sess. (1970), p. 9.

[5] Such transactions would be dealt with as provided under the statutory procedures of section 6(d) of the SIPC Act.

by delivery of funds and securities, promptly in accordance with the provisions of the section; and

(iv) Are reported promptly to the trustee and supported by appropriate documentation.

To be current, a failed to receive or failed to deliver as defined in paragraph (a) must have a settlement date not more than 30 calendar days prior to or 5 business days subsequent to the filing date and have a related trade date not more than five business days prior to such settlement date. In this section the Commission intends to close off stale transactions from receiving recognition, other than as a possible claim against the debtor's estate. Discouraging open fails has been an objective of the Commission in numerous other sections recently promulgated by it, and section S6d-1 further implements that concept. Transactions which are executed on a "when issued" basis would not be within the ambit of the section and would be left to existing statutory procedures.

The net money difference payable to the other broker or dealer in regard to the buy-in or sell-out of transactions is limited to $20,000 with regard to open contractual commitments for any separate customer account.[6] At present, section 6(d) contains no specific limitation on the amount which the trustee shall expend upon the completion of open contractual commitments. The Commission and SIPC have been concerned that without the $20,000 limitation in the section, the fund administered by SIPC derived from assessments upon broker-dealer members with a one billion dollar back-up by the United States Treasury, could be seriously eroded by the need for monies to complete open contractual commitments. It is doubtful that Congress intended that another broker-dealer should receive unlimited protection in regard to transactions for his customers when it provided that customers of the debtor were to receive from SIPC advances not more than $50,000 with regard to unsatisfied claims for securities and cash, and not in excess of $20,000 for claims for cash as distinct from securities. Accordingly, the section sets a $20,000 limitation on the net money difference payable to a broker-dealer as the result of the buy-in or sell-out of open contractual commitments for any separate customer account.

The net money difference resulting from the buy-in or sell-out of open contractual commitments would be paid by the trustee to another broker-dealer with respect to any separate customer account only if that broker-dealer properly disposed of all qualified open contractual commitments with respect to such separate customer account and filed the required reports in accordance with the time limitations of the section.

In determining whether a particular commitment should be completed, the term customer is limited to a person who is not (1) a broker-dealer, (2) a person who has a relationship to the debtor or the other broker-dealer of the types set forth in section 6(f)(1)(C) of the Act,[7] or (3) a person who has a claim for property which property was part of the capital of such other broker-dealer or was subordinated to the claims of the creditors of such other broker-dealer.

Only transactions in which a customer had an interest are eligible to be completed. A customer is deemed to have an interest if a broker was acting as agent for the customer or if a dealer, who is not a market maker in the security in question, held a firm customer's order to buy or sell and prior to executing such order with the customer, and in connection therewith, purchased or sold the same or a lesser number of shares from the debtor.

In determining whether a customer had an interest in the transaction out of which an open contractual commitment arose, a broker-dealer who maintains his records on a specific identification basis is required to prove to the satisfaction of the trustee and with appropriate supporting documentation that a customer in fact had such an interest and that such interest was not sold prior to the filing date to the same broker or dealer.

Where a broker or dealer maintains his records on other than a specific identification basis he must allocate the fails to receive and fails to deliver between customer and firm positions in a manner consistent with that used prior to the filing date to allocate such fails for purposes of Rule 15c3-3 under the Securities Exchange Act of 1934, and present the trustee with appropriate supporting documentation.

In the event that a broker or dealer did not fall within either of these categories, the allocation could be on any basis which the trustee found to be fair and equitable.

Procedurally, open contractual commitments would be (i) completed at the option of the trustee by the delivery of funds against receipt of securities or the delivery of securities against receipt of funds within thirty days after settlement date unless previously bought-in or sold-out by the other broker or dealer within or promptly upon the expiration of a period of thirty days after settlement date.

Where a commitment was not completed by either of the above methods the commitment could be disposed of by any method which the trustee in his discretion felt would most benefit the estate of the debtor.[8]

Despite any payment of a net money difference made by the trustee or the transmittal by the trustee of cash or securities to a broker-dealer in completion of an open contractual commitment, the trustee would be entitled to recover such money and securities from the other broker-dealer or to obtain damages or other remedies in the context of a court proceeding if the court should find that a transaction was not entered into by the debtor, the other broker-dealer or his customer in the ordinary course of business or was entered into by any of the parties for the purpose of creating a commitment in contemplation of a possible SIPC Act liquidation proceeding.

Irrespective of the various prescribed conditions and procedures of the section, upon application from SIPC or the trustee or upon its own motion, and in order to avoid a substantial detrimental impact upon the financial condition of one or more broker-dealers the Commission may, upon finding that it is in the public interest, order completion of any open commitment.

The forms. Promptly upon the publication of notice by the trustee, pursuant to section 6(e) of the Act, of the initiation of the liquidation of the debtor, each broker-dealer who has open contractual commitments of the type described in paragraph (a) of the rule is required to report the existence of such commitments to the trustee on Forms S6(d)A-1[9] and S6(d)A-2.[10]

Upon the expiration of 45 days after filing date[11] each broker-dealer filing Forms S6(d)A-1 and 2 is required to file Form S6(d)B listing those commitments which have been bought-in or sold-out and Forms S6(d)C-1[12] and S6(d)C-2[13] reconciling all open contractual commitments.

Commission action: Pursuant to authority in section 23(a) of the Securities Exchange Act of 1934 and section 6(d) of the Securities Investor Protection Act of 1970, the Securities and Exchange Commission hereby adopts a new Subpart B under Part 240 and a new § 240.206d-1 thereunder, as well as a new Part 249a and new §§ 249a.6d-1, 249a.-6d-2, 249a.6d-3, 249a.6d-3a, 249.6d-3b, 249a.6d-4a1 and 249a.6d-4a2, under Chapter II of Title 17 of the Code of Federal Regulations reading as follows:

§ 240.206d-1 Completion of open contractual commitments.

(a) *Definitions.* For the purpose of this section, adopted pursuant to subsection

[6] Separate customer account is defined in the SIPC Act and in the Series 100 Rules thereunder.

[7] Section 6(f)(1)(C) provides that no advance of funds shall be made by SIPC to the trustee "to pay or otherwise satisfy, directly or indirectly, any claims of any customer who is a general partner, officer, or director of the debtor, the beneficial owner of 5 per centum or more of any class of equity security of the debtor (other than a non-convertible stock having fixed preferential dividend and liquidation rights) or limited partner with a participation of 5 per centum or more in the net assets or net profits of the debtor * * *."

[8] Because funds or securities in the single and separate fund may be used to complete open contractual commitments, the trustee would be benefitting mainly public customers of the debtor.

[9] For fails to deliver.

[10] For fails to receive.

[11] If by the 45th day notice pursuant to section 6(e) has not yet been published then as soon thereafter as practicable.

[12] For fails to deliver.

[13] For fails to receive.

V 38 - 151 AUG 7 73 XUM

6(d) of the Securities Investor Protection Act of 1970 (hereinafter referred to as "the Act"):

(1) The term "failed to receive" shall mean a contractual commitment of the debtor made in the ordinary course of business, to pay to another broker or dealer the contract price in cash upon receipt from such broker or dealer of securities purchased, provided that the respective obligations of the parties remained outstanding until the close of business on the filing date as defined in section 5(b)(4)(B) of the Act (hereinafter referred to as the "filing date").

(2) The term "failed to deliver" shall mean a contractual commitment of the debtor, made in the ordinary course of business, to deliver securities to another broker or dealer against receipt from such broker or dealer of the contract price in cash, provided that the respective obligations of the parties remained outstanding until the close of business on the filing date.

(3) The term "open contractual commitment" shall mean a failed to receive or a failed to deliver which had a settlement date prior to the filing date and the respective obligations of the parties remained outstanding on the filing date or had a settlement date which occurs on or within five business days subsequent to the filing date: *Provided, however,* That the term open contractual commitment shall not include any contractual commitment for which the security which is the subject of the trade had not been issued by the issuer as of the trade date.

(4) The term "customer" shall mean a person (other than a broker or dealer) in whose behalf a broker or dealer has executed a transaction out of which arose an open contractual commitment with the debtor, but shall not include any person to the extent that such person at the filing date (i) had a claim for property which by contract, agreement or understanding, or by operation of law, was a part of the capital of the broker or dealer who executed such transaction or was subordinated to the claims of creditors of such broker or dealer, or (ii) had a relationship with the debtor which is specified in section 6(f)(1)(C) of the Act, or had a corresponding relationship with such other broker or dealer.

(b) It is hereby determined to be "in the public interest," within the meaning of section 6(d)(2) of the Act, for a trustee to complete such open contractual commitments as are specified in paragraph (c) below in accordance with the procedures prescribed in this section, irrespective of whether a customer did or did not have an interest therein; and, except as otherwise provided in paragraphs (h) and (i), it is also hereby determined to be "not in the public interest," within the meaning of section 6(d)(1) of the Act, for a trustee to complete such open contractual commitments as are described in paragraph (a)(3), other than those specified in paragraph (c).

(c) An open contractual commitment shall be completed if:

(1) The open contractual commitment:

(i) Arises from a transaction in which a customer (as defined in this rule) of the other broker or dealer had an interest. For purposes of this rule a customer is deemed to have an interest in a transaction if (A) the other broker was acting as agent for the customer or (B) the other dealer was not a market maker in the security involved, to the extent such other dealer held a firm order from the customer and in connection therewith: In the case of a buy order, prior to executing such customer's order purchased as principal the same number of shares or purchased shares to accumulate the number of shares necessary to complete the order; or in the case of a sell order, prior to executing such customer's order sold the same number of shares or a portion thereof; and

(ii) (A) Had a settlement date on or within 30 calendar days prior to the filing date and the respective obligations of the parties remained outstanding on the filing date or had a settlement date which occurs on or within five business days subsequent to the filing date; and

(B) Had a trade date on or within five business days prior to such settlement date; and

(2) the other broker or dealer can establish to the satisfaction of the trustee through appropriate documentation that:

(i) In the case of a broker or dealer who maintains his records on a specific identification basis:

(A) The open contractual commitment arose out of a transaction in which his customer had such an interest, and

(B) In the case of a failed to deliver of the debtor, as of the filing date such broker's or dealer's customer's interest had not been sold to such broker or dealer; or

(ii) In the case of a broker or dealer who maintains his records other than on a specific identification basis, that he has determined that a customer had such an interest in a manner consistent with that used by such broker or dealer prior to the filing date to allocate fails to receive and fails to deliver in computing the special reserve bank account requirement pursuant to the provisions of Rule 15c3-3 under the Securities Exchange Act of 1934; or

(iii) In the case of a broker or dealer not described in paragraph (c)(2)(i) or (ii) of this section that he has made the determination in a manner which the trustee finds to be fair and equitable.

(d)(1) The completion of an open contractual commitment meeting the requirements of paragraph (c) of this section shall be effected only:

(i) By the buy-in or sell-out of the commitment by the other broker or dealer in accordance with the usual trade practices initiated by the other broker or dealer within or promptly upon the expiration of a period of 30 calendar days after settlement date; or

(ii) At the option of the trustee by the delivery of securities against receipt of the contract price or payment of the contract price against the receipt of securities at any time within thirty calendar days after settlement date unless the commitment previously has been bought-in or sold-out in accordance with paragraph (d)(i)(ii) of this section; or

(iii) In the event of the refusal of the other broker or dealer to accept completion of an open contractual commitment in accordance with paragraph (d)(1)(ii) of this section, or the failure of the other broker or dealer to promptly buy-in or sell-out a commitment in accordance with paragraph (d)(1)(i) of this section, or in the event of the failure of the other broker or dealer to provide the trustee with appropriate documentation as required by this section, by delivery of securities against receipt of the contract price or payment of the contract price against receipt of securities, or the buy-in or sell-out of the commitment or cancellation of the commitment or otherwise, as may be appropriate, as the trustee in his discretion believes will most benefit the estate of the debtor.

(2) In the event of a close-out of an open contractual commitment pursuant to paragraph (d)(1)(i) of this section, the money difference resulting from such close-out shall be payable by the other broker or dealer to the trustee or by the trustee to the other broker or dealer, whichever would be entitled to receive such difference under the usual trade practices: *Provided, however,* (i) That prior to the payment of any such money difference by the trustee to such other broker or dealer with respect to transactions executed by such other broker or dealer for any separate customer account, all open contractual commitments with respect to such account which meet the requirements of paragraph (c) of this section must have been completed by the delivery of securities against receipt of the contract price, or by payment of the contract price against receipt of the securities in conformity with paragraph (d)(1)(ii) of this section, or by buy-in or sell-out in conformity with paragraph (d)(1)(i) of this section, and (ii) that the net amount so payable by the trustee to the other broker or dealer shall not exceed $20,000 with respect to any separate customer account.

(e)(1) As soon as practicable after publication pursuant to Section 6(e) of the Act of notice of the commencement of proceedings, a broker or dealer who has executed transactions out of which arose open contractual commitments with the debtor shall furnish to the trustee such information with respect to all open contractual commitments meeting the requirements of paragraph (c) of this section (including any of such commitments which have been bought-in or sold-out by the broker or dealer), as called for by Forms S6(d)A–1 and S6(d)A–2 (17 CFR 249a.6d–1, 249a.6d–2 of this chapter) including appropriate supporting documentation.

(2) Promptly upon the expiration of 45 calendar days after the filing date, or if by the expiration of such 45-day period notice pursuant to section 6(e) of the Act of the commencement of proceedings has not been published, then as soon as practicable after publication of such notice, a broker or dealer who had executed transactions in securities out of which arose open contractual commitments with the debtor shall furnish to the trustee such information with respect to the buy-in, sell-out or other status of open contractual commitments meeting the requirements of paragraph (c) of this section as called for by Forms S6(d)B, S6(d)C–1 and S6(d)C–2 (17 CFR 249a.6d–3, 249a.6d–4a1, and 249a.6d–4a2) including appropriate supporting documentation, and schedules.

(f)(1) Nothing stated in this section shall be construed to prejudice the right of a broker or dealer to any claim against the debtor's estate, or the right of the trustee to make any claim against a broker or dealer, with respect to a commitment of the debtor which was outstanding on the filing date, but (i) which is not described in paragraph (a)(3) of this section, or (ii) which, although described in paragraph (a)(3) of this section, does not meet the requirements specified in paragraph (c) of this section or was not completed in accordance with paragraph (d) of this section or was not reported to the trustee in conformity with paragraph (e) of this section or was not supported by appropriate documentation.

(2) Nothing stated in this section shall be construed to prejudice the right of a broker or dealer to a claim against the debtor's estate for the amount by which the money difference due the broker or dealer upon a buy-in or sell-out may exceed the amount paid by the trustee to such broker or dealer.

(g) Notwithstanding the fact that an open contractual commitment described in paragraph (a)(3) of this section meets the requirements of paragraph (c) of this section and the other requirements of this section, a Court shall not be precluded from canceling such commitment, awarding damages, or granting such other remedy as it shall deem fair and equitable if, on application of the trustee or the Securities Investor Protection Corporation ("SIPC"), it determines that such commitment was not entered into in the ordinary course of business or was entered into by the debtor, or the broker or dealer or his customer, for the purposes of creating a commitment in contemplation of a liquidation proceeding under the Act. Such a determination shall be made after notice and opportunity for hearing by the debtor, such broker or dealer, or such customer, and may be made before or after the delivery of securities or payment of the contract price or before or after any buy-in or sell-out of the open contractual commitment, or otherwise.

(h) Upon application to the Commission by SIPC or the trustee or upon its own motion, the Commission may, after notice and opportunity for hearing by interested persons find it to be in the public interest, in order to prevent a substantial detrimental impact upon the financial condition of one or more brokers or dealers, for the trustee to complete an open contractual commitment, irrespective of whether it is described in paragraph (a)(3) of this section or meets the requirements of paragraph (c) of this section or has been reported in conformity with paragraph (e) of this section, or is supported by appropriate documentation.

(i) Nothing contained in this section shall be construed as affecting in any way the power of the trustee (1) to complete, in such manner as may be approved by the Court, an open contractual commitment of the debtor not described in paragraph (a)(3) of this section the completion of which, apart from this section, is authorized or required by section 6(d) of the Act, or (2) to complete an open contractual commitment of the debtor, regardless of whether it is described in paragraph (a)(3) of this section or meets the requirements of paragraph (c) of this section or has been reported to the trustee in conformity with paragraph (e) of this section, to the extent that such commitment is completed with property which constituted specifically identifiable property on the filing date of the customer of the debtor for whose account the commitment was made, or was paid or delivered by or for the account of such customer to the debtor or trustee after the filing date.

Sec.

249a.1–249a.5 [Reserved]
249a.6d–1 Form S6(d)A–1 for notification of open contractual commitments at filing dates consisting of fails to deliver and unsettled trades.
249a.6d–2 Form S6(d)A–2 for notification of open contractual commitments at filing dates consisting of fails to receive and unsettled trades.
249a.6d–3 Form S6(d)B for summary of closeouts of open contractual commitments in accordance with § 240.206(d)(1)(i).
249a.6d–3a Schedule 1 to be attached to Form S6(d)B (17 CFR 249a.6d–3).
249a.6d–3b Schedule 2 to be attached to Form S6(d)B (17 CFR 249a.6d–3).

AUTHORITY: Sec. 6(d), 84 Stat. 1646, 15 U.S.C. 78FFF(d).

§§ 249a.1–249a.5 [Reserved]

§ 249a.6d–1 Form S6(d)A–1 for notification of open contractual commitments at filing date consisting of fails to deliver and unsettled trades.

This form shall be filed as required by § 240.206d–1(e) of this chapter, as soon as practical after publication of notice of commencement of a proceeding under section 5 of the Securities Investor Protection Act of 1970 in which a trustee is appointed, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceeding, out of which arose a failed to deliver or unsettled trade as defined in § 240.206d–1(a) of this chapter.

§ 249a.6d–2 Form S6(d)A–2 for notification of open contractual commitments at filing date consisting of fails to receive and unsettled trades.

This form shall be filed as required by § 240.206d–1(e) of this chapter, as soon as practical after publication of notice of commencement of a preceeding under section 5 of the Securities Investor Protection Act of 1970 in which a trustee is appointed, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceeding, out of which arose a fail to receive or unsettled trade as defined in § 240.206d–1(a) of this chapter.

§ 249a.6d–3 Form S6(d)B for summary of close-outs of open contractual commitments in accordance with § 240.206(d)(1)(i).

This form shall be filed as required by § 240.206d–1(e)(2) of this chapter, promptly upon expiration of 45 days after the filing date as defined in section 5(b)(4) of the Securities Investor Protection Act of 1970 (SIPC Act), or if by that time notice of commencement of proceedings under section 5 of SIPC Act in which a trustee is appointed has not been published then as soon as practical after such publication of notice, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceedings, in which shall be furnished to the trustee information with respect to his close out of open contractual commitments meeting the requirements of paragraph (c) of § 204.206d–1 of this chapter.

§ 249a.6d–3a Schedule 1 to be attached to Form S6(d)B (17 CFR 249a.6d–3).

§ 249a.6d–3b Schedule 2 to be attached to Form S6(d)B (17 CFR 249a.6d–3).

§ 249a.6d–4a1 Form S6(d)c–1 for report of status of fails previously reported on Form S6(d)A–1 (§ 249a.6d–1).

This form shall be filed as required by § 240.206d–1(e)(2) of this chapter, promptly upon expiration of 45 days after the filing date as defined in section 5(b)(4) of the Securities Investor Protection Act of 1970 (SIPC Act), or if by that time notice of commencement of proceedings under section 5 of the SIPC Act in which a trustee is appointed has not been published then as soon as practiced after such publication of notice, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceedings, in which shall be furnished to the trustee information with respect to the reconcilments which were or should have been reported on form s6(d)A–1.

§ 249a.6d–4a2 Form S6(d)C–2 for report of status of fails previously reported on form S6(d)A–2 (§ 249.6d–2).

This form shall be filed as required by § 240.206d–1(e)(2) of this chapter, promptly upon expiration of 45 days after

V 38-151 AUG 7 73 XUM

the filing date as defined in section 5(b)(4) of the Securities Investor Protection Act of 1970 (SIPC Act), or if by that time notice of commencement of proceedings under section 5 of SIPC Act in which a trustee is appointed has not been published then as soon as practical after such publication of notice, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceedings, in which shall be furnished to the trustee information with respect to the reconcilments which were or should have been reported on form S6(d)A–2.

Incorporation by reference approved by the Director of the Office of the Federal Register on August 6, 1973.

Copies of all forms described above have been filed with the Office of the Federal Register, and copies thereof may be obtained on request from the Securities and Exchange Commission, Washington, D.C. 20549.

Since December 31, 1972, twenty-two firms have been placed in SIPC liquidation. The difficulties experienced in these liquidations evidence an urgent need for guidance in completing open contractual commitments and for standard forms for reporting such commitments to the trustee. Accordingly, the Commission finds that there is good cause and that it is necessary in the public interest and for the protection of investors that the foregoing rule become effective immediately. The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934 and the Securities Investor Protection Act of 1970 and particularly Sections 6(d) (1) and (2) of the Securities Investor Protection Act of 1970 and Section 23(a) of the Securities Exchange Act of 1934, hereby adopts Rule S6(d)(1) and the Forms thereunder as set forth below effective immediately. Accordingly, pursuant to section 4(c) of the Administrative Procedure Act, 5 U.S.C. 553(d), it hereby declares such amendments effective July 25, 1973.

(Sec. 23(a), 48 Stat. 901, Sec. 8, 49 Stat. 1379, Sec. 10, 78 Stat. 580, 15 U.S.C. 78w; Sec. 6, 84 Stat. 1646, 15 U.S.C. 78 FFF.)

By the Commission.

[SEAL] RONALD F. HUNT,
Secretary.

SUBCHAPTER C—DRUGS

Recodification, Technical Changes, and Updating of Chloramphenicol Monographs

A notice was published in the FEDERAL REGISTER of September 19, 1972 (37 FR 19149), proposing to recodify the chloramphenicol monographs. Interested persons were afforded sixty days to submit written comments on the proposal. Comments were received from an industry trade association and two manufacturers. Comments from one manufacturer and the trade association were concerned with the amendment which added to the general labeling section a new paragraph § 148.3(d) regarding veterinary prescription labeling. The comments were that this regulation would have the effect of placing into prescription status all veterinary antibiotic drugs packaged for dispensing. The Commissioner of Food and Drugs has considered these comments and concludes that a revision is desirable to clarify the applicability of § 148.3(d) to prescription veterinary antibiotic drugs.

Comment from an antibiotic drug manufacturer objected to the recodification in general and requested justification since the proposed action would require revision of certain printed material and would involve a realignment of past records and files. The Commissioner finds that chloramphenicol monographs, as well as a number of other antibiotic monographs covered in separate documents, are in need of significant changes in text and format. Although such amendments will require changes in filing and record keeping for both industry and FDA, those affected have generally viewed such recodification and updating as substantially clarifying the antibiotic regulations.

One comment also requested clarification of the intent with respect to the monographs for bulk chloramphenicol which were revised to read "sterile chloramphenicol" and retained in Part 141d and 146d while an identical bulk monograph was included in the newly established Part 151c. The monographs providing for antibiotic drugs that were reviewed by the National Academy of Sciences—National Research Council (NAS–NRC), Drug Efficacy Study Group, will not be rewritten or transferred until conclusions concerning the efficacy of these drugs are final. To avoid delay in the recodification of chloramphenicol, the bulk drug monographs will be retained in Parts 141d and 146d for reference purposes until all the chloramphenicol monographs can be revised and transferred. After all the chloramphenicol monographs are transferred, the bulk monographs in Parts 141d and 146d will be revoked. An identical bulk monograph was included in Part 151c to provide reference for the monographs that were transferred so that additional amendments to these sections will not be necessary when the remaining original sections are revoked. The monograph heading was re-titled "Sterile chloramphenicol" in accordance with the definition of parenterals contained in the United States Pharmacopeia XVIII and to differentiate between the sterile drug and the proposed nonsterile drug monograph included in Part 151c.

An objection was made to the revocation of one particular monograph on the basis that approval of a new animal drug application is pending for that product. The Commissioner notes that there are no drugs currently being marketed under this monograph, and concludes that revocation of such monograph is proper at this time. A new monograph, based on an approved new drug or new animal drug application, will be established when appropriate.

One manufacturer objected to the addition of the test for crystallinity to certain monographs. The requirement for a crystallinity test is not new to this proposal. The Commissioner concludes that a crystallinity test is an appropriate certification requirement for products described as crystalline.

One comment suggested changes for the blending and extraction procedures used in the potency assay of chloramphenicol ointment. The Commission finds that the suggestions do not offer signficant improvements in the proposed methods. In the experience of the Food and Drug Administration, the proposed official method gives satisfactory results for all chloramphenicol ointments, regardless of the manufacturer. The regulations do provide for the use of alternate assay methods under § 141.1a (published in the FEDERAL REGISTER of April 15, 1972 (37 FR 7497)) and we have no objections to the use of alternate methods in accordance with that regulation provided the results obtained are equivalent.

One comment asked for clarification regarding the assay procedures in § 141d.303(a) since the procedure included in the proposal differs from the procedure included in an order published in the FEDERAL REGISTER on October 28, 1972 (37 FR 23105). The Commissioner finds that the following order amends the October 28, 1972 order as it pertains to § 141d.303(a). Thus, the procedure described below in § 141d.303(a) supercedes the procedure in that paragraph appearing in the October 28, 1972 Order.

The Commissioner notes that pursuant to the provisions of the October 28, 1972 Order, the sterility requirements for the antibiotic ointments described herein are not in effect until October 28, 1973. However, §§ 141d.303 and 141d.313 have been updated in this order to include the sterility test methods specified in the October 28, 1972 order.

An objection was made to the proposed lowering of the upper potency limit from 130 percent to 120 percent for chloramphenicol ophthalmic solution (§ 151c.15). After re-evaluating the information on which the proposal was based, the Commissioner concludes that there is justification for allowing the upper potency limit to remain at 130 percent of the number of milligrams of chloramphenicol that it is represented to contain. The order has been revised accordingly.

One manufacturer objected that the heading or title of the proposal was misleading since the proposal involved more than a "recodification" of the chloramphenicol monographs. The Commissioner recognizes that while the primary purpose of the proposal is recodification of the chloramphenicol monographs, there is considerable updating of the regulation involved and a number of technical and editorial changes, some of which are substantive. Since this proposal was published, it has been the policy of the Food and Drug Administration to title such proposed amendments and orders as "Recodification, technical changes, and updating".

After consideration of all comments received the Commissioner concludes that the antibiotic drug regulations should be amended, as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 507, 512(n), 59 Stat. 463, as amended, 82 Stat. 350–351; 21 U.S.C. 357, 360b(n)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), Parts 135a, 135c, 141b, 141d, 141e, 146d, 148 and 148n are amended as follows:

PART 135a—NEW ANIMAL DRUGS FOR OPTHALMIC AND TOPICAL USE

§§ 135a.3 and 135a.9 [Amended]

1. § 135a.3 *Chloramphenicol-prednisolone-tetracaine-squalane suspension* is amended by revising the first sentence of paragraph (a) to read as follows: "The suspension conforms to the certification requirements of § 151c.16 of this chapter."

2. § 135a.9 *Chloramphenicol ophthalmic solution, veterinary* is amended by revising the first sentence of paragraph (a) to read as follows: "The solution conforms to the certification requirements of § 151c.18 of this chapter."

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

§ 135c.63 [Amended]

3. Part 135c is amended in § 135c.63 *Chloramphenicol capsules, veterinary* by revising paragraph (a) to read as follows: "Chloramphenicol capsules, veterinary contain 50, 100, 250, and 500 milligrams of chloramphenicol and conform to the certification requirements of § 151c.12 of this chapter."

PART 141b—STREPTOMYCIN (OR DIHYDROSTREPTOMYCIN) AND STREPTOMYCIN-(OR DIHYDROSTREPTOMYCIN-) CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

§ 141b.126 [Amended]

4. Part 141b is amended in § 141b.126 *Streptomycin-erythromycin ointment* by revising paragraph (b)(3) to read as follows: *"Toxicity.* Proceed as directed in § 141.5 of this chapter."

PART 141d—CHLORAMPHENICOL AND CHLORAMPHENICOL - CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

5. Part 141d is amended:

a. In § 141d.301 by changing the heading, revising paragraphs (a) through (i), and by adding a new paragraph (j), to read as follows:

§ 141d.301 Sterile chloramphenicol.

(a) *Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(1) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dissolve an accurately weighted portion of the sample in sufficient ethyl alcohol to give a solution containing 10,000 micrograms of chloramphenicol per milliliter (estimated). Add sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a concentration of 1,000 micrograms of chloramphenicol per milliliter (estimated). Further dilute an aliquot with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Spectrophotometric method.* Dissolve approximately 50 milligrams each of the sample and working standard in 100 milliliters of distilled water. Warm if necessary to hasten dissolution. Transfer 10 milliliters into a 250-milliliter volumetric flask and fill to volume with distilled water. Using a suitable spectrophotometer equipped with a 1-centimeter cell and distilled water as the blank, determine the absorbance of each solution at 278 nonometers. Calculate the potency of chloramphenicol as follows:

$$\text{Potency of sample in micrograms per milligram} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams}}$$

(b) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except use 50 milligrams in lieu of 300 milligrams.

(c) *Pyrogens.* Proceed as directed in § 141.4(a) of this chapter, using a solution containing 5 milligrams of chloramphenicol per milliliter. Apply sufficient heat to dissolve the chloramphenicol.

(d) *Safety.* Proceed as directed in § 141.5 of this chapter. Apply sufficient heat to dissolve the chloramphenicol.

(e) *Histamine.* Proceed as directed in § 141.7 of this chapter. Apply sufficient heat to dissolve the chloramphenicol.

(f) *pH.* Proceed as directed in § 141.503 of this chapter, using a saturated aqueous solution.

(g) *Specific rotation.* Accurately weigh approximately 1.25 grams of the sample in a 25-milliliter glass-stoppered volumetric flask and dissolve in about 15 milliliters of absolute alcohol, warming if necessary. Dilute the solution to 25 milliliters with absolute alcohol and mix thoroughly. Proceed as directed in § 141.520 of this chapter, using a 2.0 decimeter polarimeter tube.

(h) *Melting range.* Proceed as directed in § 141.515 of this chapter.

(i) *Absorptivity.* Proceed as directed in paragraph (a)(2) of this section except calculate the percent relative absorptivity as follows:

$$\text{Percent relative absorptivity} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams} \times 10}$$

(j) *Crystallinity.* Proceed as directed in § 141.504(a) of this Chapter.

b. By revising § 141d.303 to read as follows:

§ 141d.303 Chloramphenicol ointment.

(a) *Potency.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows:

(1) *If the ointment is water miscible.* Place an accurately weighed representative portion of the sample into a high-speed glass blender jar containing 1.0 milliliter polysorbate 80 and sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a stock solution of convenient concentration. Blend for 3 to 5 minutes. Remove an aliquot and further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *If the ointment is not water miscible.* Place an accurately weighed representative portion of the sample into a separatory funnel containing approximately 50 milliliters of petroleum ether. Shake the sample and ether until homogeneous. Add 20 to 25 milliliters of 1 percent potassium phosphate buffer, pH

V 38-151 AUG 7 73 XUM

6.0 (solution 1), and shake well. Allow the layers to separate. Remove the buffer layer and repeat the extraction procedure with each of three more 20 to 25-milliliter quantities of solution 1. Combine the buffer extractives in a suitable volumetric flask and dilute to volume with solution 1. Remove an aliquot and further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated). The potency of chloramphenicol ointment is satisfactory if it contains not less than 90 percent and not more than 130 percent of the number of milligrams of chloramphenicol that it is represented to contain.

(b) *Sterility.* If the ointment is intended for ophthalmic use, proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(3) of that section. However, if the ointment is not soluble in isopropyl myristate proceed as directed in § 141.2 of this chapter, using the method described in § 141.2(e)(2), except use 100 milligrams in lieu of 300 milligrams of solids.

c. By revising § 141d.304 to read as follows:

§ 141d.304 Chloramphenicol ophthalmic.

(a) *Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(1) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Reconstitute as directed in the labeling. Dilute an accurately measured representative aliquot of the sample with sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a convenient concentration. Further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Spectrophotometric assay.* Reconstitute the sample as directed in the labeling and dilute a 1.0-milliliter aliquot in sufficient distilled water to give a solution containing 20 micrograms of chloramphenicol per milliliter. Dissolve an accurately weighed portion of the working standard in sufficient distilled water to give a solution containing 20 micrograms per milliliter. Using a suitable spectrophotometer and distilled water as the blank, determine the absorbance of the sample and standard solutions at 278 nanometers. Calculate the potency of the sample as follows:

$$\text{Milligrams of chloramphenicol per milliliter} = \frac{\text{Absorbance of sample} \times \text{labeled potency per milliliter in milligrams}}{\text{Absorbance of standard}}$$

The potency of chloramphenicol ophthalmic is satisfactory if it contains not less than 90 percent and not more than 130 percent of the number of milligrams that it is represented to contain.

(b) *Sterility.* Use entire contents, and proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except if it contains a corticoid use 0.5 milliliter of the suspension prepared according to label directions and proceed as directed in paragraph (e)(2) of that section.

(c) *pH.* Proceed as directed in § 141.503 of this chapter, using the drug reconstituted as directed in the labeling.

d. By revising § 141d.308 to read as follows:

§ 141d.308 Chloramphenicol otic; chloramphenicol topical.

(a) *Potency.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative aliquot of the sample in sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a convenient concentration. Further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated). Its potency is satisfactory if it contains not less than 90 percent and not more than 130 percent of the number of milligrams it is represented to contain.

(b) *Moisture.* Proceed as directed in § 141.502 of this chapter.

(c) *pH.* Proceed as directed in § 141.503 of this chapter, using the sample diluted with an equal volume of distilled water.

e. By revising paragraphs (a)(1), the last sentence of paragraph (a)(2), and paragraph (b) in § 141d.313 to read as follows:

§ 141d.313 Chloramphenicol-polymyxin ointment.

(a) * * *

(1) *Chloramphenicol content.* Proceed as directed in § 141d.303. Its chloramphenicol content is satisfactory if it contains not less than 90 percent and not more than 120 percent of the number of milligrams per gram that it is represented to contain.

(2) *Polymyxin content.* * * * Its content of polymyxin is satisfactory if it contains not less than 90 percent and not more than 125 percent of the number of units per gram that it is represented to contain.

(b) *Sterility.* If the ointment is intended for ophthalmic use, proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(3) of that section. However, if the ointment is not soluble in isopropyl myristate proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(2) of that section, except use 100 milligrams in lieu of 300 milligrams of solids.

f. By revoking and reserving §§ 141d.302, 141d.305, 141d.306, 141d.307, 141d.309, 141d.310, 141d.311, 141d.312, 141d.314, 141d.315, 141d.317, 141d.318, 141d.319, and 141d.320 as follows:

§§ 141d.302, 141d.305 141d.306, 141d.307, 141d.309, 141d.310, 141d.311, 141d.312, 141d.314, 141d.315, 141d.317, 141d.318, 141d.319, and 141d.320 [Reserved]

PART 141e—BACITRACIN AND BACITRACIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

6. Part 141e is amended in § 141e.416 *Bacitracin methylene disalicylate* by revising paragraph (b) to read as follows:

§ 141e.416 Bacitracin methylene disalicylate.

* * * * *

(b) *Toxicity.* Proceed as directed in § 141.5 of this chapter.

* * * * *

PART 146d—CERTIFICATION OF CHLORAMPHENICOL AND CHLORAMPHENICOL-CONTAINING DRUGS

7. Part 146d is amended:

a. In § 146d.301 by changing the heading and revising paragraphs (b), (c), and (d) to read as follows:

§ 146d.301 Sterile chloramphenicol.

* * * * *

(b) *Packaging.* It shall be packaged in accordance with the requirements of § 148.2 of this chapter.

(c) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(d) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(1) Results of tests and assays on the batch for potency, sterility, pyrogens, safety, histamine, pH, specific rotation, melting range, absorptivity, and crystallinity.

(2) Samples required:

(i) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(ii) For sterility testing: 20 packages, each containing approximately 50 milligrams.

b. By revoking and reserving §§ 146d.302, 146d.305, 146d.306, 146d.307, 146d.309, 146d.310, 146d.311, 146d.312, 146d.314, 146d.315, 146d.317, 146d.318, 146d.319, and 146d.320 as follows:

§§ 146d.302, 146d.305, 146d.306, 146d.307, 146d.309, 146d.310, 146d.311, 146d.312, 146d.314, 146d.315, 146d.317, 146d.318, 146d.319 and 146d.320 [Reserved]

PART 148—ANTIBIOTIC DRUGS; PACKAGING AND LABELING REQUIREMENTS

8. Part 148 is amended in § 148.3 by adding a new paragraph (d) to read as follows:

§ 148.3 Labeling requirements.

* * * * *

(d) If an antibiotic drug is subject to section 512(n) of the act:

(1) It shall be labeled in accordance with the requirements prescribed by § 1.106(c) of this chapter and each package shall include information containing directions and warnings adequate for the veterinary use of the drug by the laity in lieu of the statement "Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian" (as provided in § 1.106(c)(2)(i) of this chapter) unless such statement is required by regulations issued under section 512(i) of the act.

(2) Its labeling shall bear any additional information required for the drug by specific regulations.

(3) Each package shall bear on its outside wrapper or container and the immediate container an expiration date prescribed for the drug as provided in paragraph (a)(3) of this section with the exception provided in paragraph (c) of this section.

(4) If it is intended for udder instillation in cattle, it shall be exempt from the requirements of § 1.106(c)(2)(v) of this chapter.

PART 148n—OXYTETRACYCLINE

9. Part 148n is amended in § 148n.3 *Calcium oxytetracycline* by revising paragraph (b)(2) to read as follows:

§ 148n.3 Calcium oxytetracycline.

* * * * *

(b)(2) *Toxicity.* Proceed as directed in § 141.5 of this chapter.

* * * * *

10. The following new Part 151c is added to this chapter:

PART 151c—CHLORAMPHENICOL

Sec.

151c.1 Sterile chloramphenicol.
151c.2 Chloramphenicol.
151c.3 Chloramphenicol palmitate.
151c.4 Sterile chloramphenicol sodium succinate.
151c.5—151c.10 [Reserved]
151c.11 Chloramphenicol capsules.
151c.12 Chloramphenicol capsules, veterinary.
151c.13 Chloramphenicol injection.
151c.14 Fibrinolysin and desoxyribonuclease, combined (bovine) with chloramphenicol ointment.
151c.15 Chloramphenicol ophthalmic solution.
151c.16 Chloramphenicol - prednisolone-tetracaine-squalane topicol suspension, veterinary.
151c.17 Chloramphenicol palmitate oral suspension.
151c.18 Chloramphenicol ophthalmic solution, veterinary.

AUTHORITY: The provisions of this Part 151c issued under the Federal Food, Drug, and Cosmetic Act (secs. 507, 512(n)), 59 Stat. 463, as amended, 82 Stat. 350–351; 21 U.S.C. 357, 360b(n) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

§ 151c.1 Sterile chloramphenicol.

(a) *Requirements for certification—*

(1) *Standards of identity, strength, quality, and purity.* Sterile chloramphenicol is a white to grayish-white or yellowish-white powder, occurring as needles or elongated plates. It is neutral, slightly soluble in water, but freely soluble in alcohol. It has the chemical formula (D-(—)-*threo*-1-*p*-nitrophenyl-2-dichloracetamido-1,3-propanediol. It is so purified and dried that:

(i) Its potency is not less than 900 micrograms per milligram.

(ii) It is sterile.

(iii) It is nonpyrogenic.

(iv) It passes the safety test.

(iv) It contains no histamine nor histamine-like substances.

(vi) Its pH in a saturated aqueous solution is not less than 4.5 nor more than 7.5.

(vii) Its specific rotation in absolute ethyl alcohol at 20° C. is $+20°\pm1.5°$, and at 25° C. is $+18.5°\pm1.5°$.

(viii) Its melting range is $151°\pm2°$ C.

(ix) Its absorptivity at 278 nanometers is ±3 percent of that of the chloramphenicol working standard similarly treated.

(x) It is crystalline.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3(b) of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, sterility, pyrogens, safety, histamine, pH, specific rotation, melting range, absorptivity, and crystallinity.

(ii) Samples required:

(*a*) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(*b*) For sterility testing: 20 packages, each containing approximately 50 milligrams.

(b) *Tests and methods of assay*—(1) *Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(i) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dissolve an accurately weighed portion of the sample in sufficient ethyl alcohol to give a solution containing 10,000 micrograms of chloramphenicol per milliliter (estimated). Add sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a concentration of 1,000 micrograms of chloramphenicol per milliliter (estimated). Further dilute an aliquot with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(ii) *Spectrophotometric method.* Dissolve approximately 50 milligrams each of the sample and working standard in 100 milliliters of distilled water. Warm if necessary to hasten dissolution. Transfer 10 milliliters into a 250-milliliter volumetric flask and fill to volume with distilled water. Using a suitable spectrophotometer equipped with a 1-centimeter cell and distilled water as the blank, determine the absorbance of each solution at 278 nanometers. Calculate the potency of chloramphenicol as follows:

$$\text{Potency of sample in micrograms per milligram} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams}}$$

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except use 50 milligrams in lieu of 300 milligrams.

(3) *Pyrogens.* Proceed as directed in § 141.4(a) of this chapter, using a solution containing 5 milligrams of chloramphenicol per milliliter. Apply sufficient heat to dissolve the chloramphenicol.

(4) *Safety.* Proceed as directed in § 141.5 of this chapter. Apply sufficient heat to dissolve the chloramphenicol.

(5) *Histamine.* Proceed as directed in § 141.7 of this chapter. Apply sufficient heat to dissolve the chloramphenicol.

(6) *pH.* Proceed as directed in § 141.503 of this chapter, using a saturated aqueous solution.

(7) *Specific rotation.* Accurately weigh approximately 1.25 grams of the sample in a 25-milliliter glass-stoppered volumetric flask and dissolve in about 15 milliliters of absolute alcohol, warming if necessary. Dilute the solution to 25 milliliters with absolute alcohol and mix thoroughly. Proceed as directed in § 141.520 of this chapter, using a 2.0 decimeter polarimeter tube.

(8) *Melting range.* Proceed as directed in § 141.515 of this chapter.

(9) *Absorptivity.* Proceed as directed in subparagraph (1)(ii) of this paragraph except calculate the percent relative absorptivity as follows:

$$\text{Percent relative absorptivity} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams} \times 10}$$

(10) *Crystallinity.* Proceed as directed in § 141.504(a) of this chapter.

§ 151c.2 Chloramphenicol.

(a) *Requirements for certification—*

(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol is a white or grayish-white or yellowish-white powder, occurring as needles or leongated plates. It is neutral, slightly soluble in water, but freely soluble in alcohol. It has the chemical formula D-

V 38-151 AUG 7 73 XUM

(—)-*threo*-1-*p*-nitrophenyl-2-dichloroacetamido-1,3-propanediol. It is so purified and dried that:

(i) Its potency is not less than 900 micrograms per milligram.

(ii) It passes the safety test.

(iii) Its pH in a saturated aqueous solution is not less than 4.5 nor more than 7.5.

(iv) Its specific rotation in absolute ethyl alcohol at 20° C. is +20°±1.5°, and at 25° C. is +18.5°±1.5°.

(v) Its melting range is 151°±2° C.

(vi) Its absorptivity at 278 nanometers is ±3 percent of that of the chloramphenicol working standard similarly treated.

(vii) It is crystalline.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, safety, pH, specific rotation, melting range, absorptivity, and crystallinity.

(ii) Samples required: 10 packages, each containing approximately 500 milligrams.

(b) *Tests and methods of assay*—(1) *Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(i) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dissolve an accurately weighed portion of the sample in sufficient ethyl alcohol to give a solution containing 10,000 micrograms of chloramphenicol per milliliter (estimated). Add sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a concentration of 1,000 micrograms of chloramphenicol per milliliter (estimated). Further dilute an aliquot with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(ii) *Spectrophotometric method.* Dissolve approximately 50 milligrams each of the sample and working standard in 100 milliliters of distilled water. Warm if necessary to hasten dissolution. Transfer 10 milliliters into a 250-milliliter volumetric flask and fill to volume with distilled water. Using a suitable spectrophotometer equipped with a 1-centimeter cell and distilled water as the blank, determine the absorbance of each solution at 278 nanometers. Calculate the potency of chloramphenicol as follows:

$$\text{Potency of sample in micrograms per milligram} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams}}$$

(2) *Safety.* Proceed as directed in § 141.5 of this chapter.

(3) *pH.* Proceed as directed in § 141.503 of this chapter, using a saturated aqueous solution.

(4) *Specific rotation.* Accurately weigh aproximately 1.25 grams of the sample into a 25-milliliter glass-stoppered volumetric flask and dissolve in about 15 milliliters of absolute alcohol, warming if necessary. Dilute the solution to 25 milliliters with absolute alcohol and mix thoroughly. Proceed as directed in § 141.520 of this chapter, using a 2.0-decimeter polarimeter tube.

(5) *Melting range.* Proceed as directed in § 141.515 of this chapter.

(6) *Absorptivity.* Proceed as directed in subparagraph (1)(ii) of this paragraph, except calculate the percent relative absorptivity as follows:

$$\text{Percent relative absorptivity} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams} \times 10}$$

(7) *Crystallinity.* Proceed as directed in § 141.504(a) of this chapter.

§ 151c.3 Chloramphenicol palmitate.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol palmitate is the white to grayish-white, tasteless palmitic acid ester of chloramphenicol. It is so purified and dried that:

(i) It contains not less than 555 micrograms nor more than 595 micrograms of chloramphenicol per milligram.

(ii) It passes the safety test.

(iii) Its melting range is 91°±4° C.

(iv) Its specific rotation in absolute ethyl alcohol at 25° C. is +23°±2°.

(v) It is crystalline.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3(b) of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, safety, melting range, specific rotation, and crystallinity.

(ii) Samples required: 10 packages, each containing approximately 500 milligrams.

(b) *Tests and methods of assay*—(1) *Potency.* Dissolve approximately 90 milligrams of the sample and 50 milligrams of the chloramphenicol working standard in separate 100-milliliter volumetric flasks with absolute ethyl alcohol. Fill to volume with absolute ethyl alcohol. Transfer 10.0 milliliters of each solution into separate 250-milliliter volumetric flasks and fill to volume with absolute ethyl alcohol. Using a suitable spectrophotometer equipped with a 1.0-centimeter cell and absolute ethyl alcohol as a blank, determine the absorbance of the sample at 271 nanometers and that of the chloramphenicol working standard at 276 nanometers. Calculate the potency of the chloramphenicol palmitate as follows:

$$\text{Potency of sample in micrograms per milligram} = \frac{\text{Absorbance of sample} \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{\text{Absorbance of standard} \times \text{weight of sample in milligrams}}$$

(2) *Safety.* Proceed as directed in § 141.5 of this chapter. Apply sufficient heat to dissolve the chloramphenicol.

(3) *Melting range.* Proceed as directed in § 141.515 of this chapter.

(4) *Specific rotation.* Accurately weigh approximately 1.25 grams of sample in a 25-milliliter, glass-stoppered volumetric flask and dissolve in about 15 milliliters of absolute alcohol, warming if necessary to effect solution. Bring the solution to 25° C. Dilute the solution to 25 milliliters with absolute alcohol and mix thoroughly. Proceed as directed in § 141.520 of this chapter, using a 2.0-decimeter polarimeter tube.

(5) *Crystallinity.* Proceed as directed in § 141.504(a) of this chapter.

§ 151c.4 Sterile chloramphenicol sodium succinate.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol sodium succinate is the light-yellow, water-soluble, ethanol-soluble sodium salt of the 3-monosuccinate ester of chloramphenicol. It is so purified and dried that:

(i) Its potency is not less than 650 and not more than 765 micrograms per milligram. If it is packaged for dispensing, its potency when reconstituted as directed in the labeling is satisfactory if it is not less than 90 percent and not more than 115 percent of the number of milligrams of chloramphenicol per milliliter that it is represented to contain.

(ii) It is sterile.

(iii) It is nonpyrogenic.

(iv) It passes the safety test.

(v) It contains no histamine nor histamine-like substances.

(vi) Its moisture content is not more than 5.0 percent.

(vii) Its pH in an aqueous solution containing 250 milligrams of chloramphenicol per milliliter is not less than 6.4 and not more than 7.0.

(viii) Its specific rotation in an aqueous solution containing 50 milligrams per

milliliter at 25° C. is +6.5°±1.5°.

(ix) It is crystalline.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, sterilty, pyrogens, safety, histamine, moisture, pH, specific rotation, and crystallinity.

(ii) Samples required:

(*a*) If the batch is packaged for repacking or for use in the manufacture of another drug:

(*1*) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(2) For sterility testing: 20 packages, each containing approximately 500 milligrams.

(*b*) If the batch is packaged for dispensing:

(*1*) For all tests except sterility: A minimum of 8 immediate containers.

(2) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay*—(1) *Potency*—(i) *Working standard.* Dissolve an accurately weighed portion of the chloramphenicol working standard in sufficient distilled water to give a solution containing 20 micrograms per milliliter. Using a suitable spectrophotometer and distilled water as the blank, determine the absorbance of this solution in a 1-centimeter cell at a wavelength of 278 nanometers.

(ii) *Procedure.* Dissolve an accurately weighed portion of the sample to be tested in sufficient distilled water to give a solution containing 30 micrograms of the sample per milliliter (estimated); and also if it is packaged for dispensing, reconstitute as directed in the labeling. Remove an accurately measured representative portion from each container and further dilute this portion with sufficient distilled water to give a concentration of 20 micrograms of chloramphenicol per milliliter (estimated). Using a suitable spectrophotometer and distilled water as the blank, determine the absorbance of this solution in a 1-centimeter cell at a wavelength of 276 nanometers. Calculate the micrograms per milligram of the dry powder as follows:

$$\text{Micrograms of chloramphenicol per milligram} = \frac{\text{Absorbance of sample at 276 nanometers} \times \text{micrograms of standard per milliliter} \times \text{potency of chloramphenicol working standard in micrograms per milligram}}{\text{Absorbance of standard at 278 nanometers} \times \text{micrograms of sample per milliliter}}$$

Calculate the milligrams per milliliter of the reconstituted solution in the dispensing container as follows:

$$\text{Milligrams per milliliter of the reconstituted vial} = \frac{\text{Absorbance of sample at 276 nanometers} \times \text{micrograms of standard per milliliter} \times \text{labeled content of reconstituted vial in milligrams per milliliter}}{\text{Absorbance of standard at 278 nanometers} \times 20}$$

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section.

(3) *Pyrogens.* Proceed as directed in § 141.4(a) of this chapter, using a solution containing 5 milligrams of chloramphenicol per milliliter.

(4) *Safety.* Proceed as directed in § 141.5 of this chapter.

(5) *Histamine.* Proceed as directed in § 141.7 of this chapter.

(6) *Moisture.* Proceed as directed in § 141.502 of this chapter.

(7) *pH.* Proceed as directed in § 141.503 of this chapter, using an aqueous solution containing 250 milligrams of chloramphenicol per milliliter.

(8) *Specific rotation.* Dilute the sample with sufficient distilled water to give a solution containing approximately 50 milligrams per milliliter. Proceed as directed in § 141.520 of this chapter, using a 1.0-decimeter polarimeter tube.

(9) *Crystallinity.* Proceed as directed in § 141.504(a) of this chapter.

§ 151c.11 Chloramphenicol capsules.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol capsules are composed of chloramphenicol with or without one or more suitable and harmless diluents and lubricants. Each capsule contains 50, 100, or 250 milligrams of chloramphenicol. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of chloramphenicol that it is represented to contain. The chloramphenicol used conforms to the standards prescribed by § 151c.2(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, safety, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 30 capsules.

(b) *Tests and methods of assay; potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(1) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Place a representative number of capsules into a high-speed, glass blender jar containing 100 milliliters of 95 percent ethyl alcohol. Blend for 2 minutes. Then add 400 milliliters of 1 percent potassium phosphate buffer, pH 6.0 (solution 1), and blend again for 2 minutes. Remove an aliquot and further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Spectrophotometric assay*—(i) *Preparation of working standard solution.* Dissolve approximately 50 milligrams of the working standard in 100 milliliters of distilled water. Warm if necessary to hasten dissolution. Transfer 10 milliliters into a 250-milliliter volumetric flask and fill to volume with distilled water.

(ii) *Procedure.* Place the contents of 10 capsules into a 250-milliliter volumetric flask. Add 50 milliliters of pure methyl alcohol to the flask and shake for at least 1 minute. Fill to volume with distilled water and mix thoroughly. Withdraw an aliquot and dilute with sufficient distilled water to give a concentration of 20 micrograms per milliliter. Using a suitable spectrophotometer equipped with a 1.0-centimeter cell and distilled water as the blank, determine the absorbance of the working standard and sample solutions at 278 nanometers. Calculate the potency as follows:

$$\text{Milligrams per capsule} = \frac{\text{Absorbance of sample} \times \text{labeled potency per capsule in milligrams}}{\text{Absorbance of standard}}$$

§ 151c.12 Chloramphenicol capsules, veterinary.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol capsules, veterinary are composed of chloramphenicol with or without one or more suitable diluents and lubricants. Each capsule contains 50, 100, 250, or 500 milligrams of chloramphenicol. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of chloramphenicol that it is represented to

XUM

contain. The chloramphenicol used conforms to the standards prescribed by § 151c.2(a)(1).

(2) *Labeling.* In addition to the labeling requirements of §§ 148.3 and 135c.63 of this chapter, its label and labeling shall bear the statement, "Warning: Not for use in animals which are raised for food production."

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, safety, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 30 capsules.

(b) *Tests and methods of assay; potency.* Proceed as directed in § 151c.11(b).

§ 151c.13 Chloramphenicol injection.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol injection is chloramphenicol, with or without one more suitable and harmless buffer substances, dissolved in one or more suitable and harmless solvents. Each milliliter contains 250 milligrams of chloramphenicol. Its potency is satisfactory if it is not less than 90 percent and not more than 130 percent of the number of milligrams of chloramphenicol that it is represented to contain. It is sterile. It is nonpyrogenic. It passes the safety test. It contains no histamine nor histamine-like substances. Its pH is not less than 4.7 and not more than 5.0. The chloramphenicol used conforms to the standards prescribed by § 151c.1(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency, sterility, pyrogens, safety, histamine, and pH.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch:

(*1*) For all tests except sterility: A minimum of eight immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay—*(1) *Potency.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative aliquot of the sample in sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a convenient concentration. Further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except add the contents of each container directly to the dry filter, thus eliminating the preliminary solubilization step.

(3) *Pyrogens.* Proceed as directed in § 141.4(a) of this chapter, using a solution containing 5 milligrams per milliliter.

(4) *Safety.* Proceed as directed in § 141.5 of this chapter.

(5) *Histamine.* Proceed as directed in § 141.7 of this chapter.

(6) *pH.* Proceed as directed in § 141.503 of this chapter, using the undiluted drug.

§ 151c.14 Fibrinolysin and desoxyribonuclease, combined (bovine) with chloramphenicol ointment.

(a) *Requirements for cedtification—*(1) *Standards of identify, strength, quality, and purity.* Fibrinolysin and desoxyribonuclease, combined (bovine) with chloramphenicol ointment is fibrinolysin, desoxyribonuclease, and chloramphenicol in a suitable and harmless ointment base. It contains a suitable and harmless preservative. Each gram contains 1 unit of fibrinolysin, 666 units of desoxyribonuclease, and 10 milligrams of chloramphenicol. Its chloramphenicol content is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of chloramphenicol that it is represented to contain. The chloramphenicol used conforms to the standards prescribed by § 151c.2(a)(1), except safety. In addition to the requirements prescribed by this paragraph, the drug satisfies the requirements designated therefor by the Division of Biologics Standards, National Institutes of Health, Department of Health, Education, and Welfare.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 5 containers if it is packaged in immediate containers of tin or glass, and a minimum of 20 immediate containers if it is packaged in immediate containers other than tin or glass.

(b) *Tests and methods of assay; potency.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Place an accurately weighed representative portion of the sample into a high-speed glass blender jar containing 1 milliliter polysorbate 80 and sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a stock solution of convenient concentration. Blend 3 to 5 minutes. Remove an aliquot and further dilute with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

§ 151c.15 Chloramphenicol ophthalmic solution.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.* Chloramphenical apthalmic solution contains in each milliliter 5 milligrams of chloramphenicol with or without one or more suitable and harmless preservatives, buffer substances, and surfactants in an aqueous solution. Its potency is satisfactory if it is not less than 90 percent and not more than 130 percent of the number of milligrams of chloramphenicol that it is represented to contain. It is sterile. Its pH is not less than 3 nor more than 6; however, if the solution is buffered, its pH is not less than 7.0 nor more than 7.5. The chloramphenicol used conforms to the standards prescribed by § 151c.2(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, safety, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency, sterility, and pH.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 containers, each containing approximately 300 milligrams.

(*b*) The batch:

(*1*) For all tests except sterility: A minimum of five immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filing operation.

(b) *Tests and methods of assay—*(1) *Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(i) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative aliquot of the sample in sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a stock solution of convenient concentration. Further dilute and aliquot of the stock solution with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated). Dilute a 1-milliliter aliquot of the sample in sufficient distilled water to make a solution containing 20 milligrams of chloramphenicol per milliliter. Dissolve an accurately weighed portion of the working standard in sufficient distilled water to give a solution containing 20 milligrams per milliliter. Warm if necessary to hasten solution of the working standard. Cool. Using a suitable spectrophotometer and distilled water as the blank, determine the absorbance of the sample and standard solutions at 278 nanometers. Calculate the potency of the sample as follows:

$$\text{Milligrams of chloramphenicol per milliliter} = \frac{\text{Absorbance of sample} \times \text{labeled potency per milliliter in milligrams}}{\text{Absorbance of standard}}$$

(b) The batch for potency and moisture.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 containers, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of six immediate containers.

(b) *Tests and methods of assay—*(1) *Potency.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Transfer an accurately measured portion of the sample into a separatory funnel containing 50 milliliters of petroleum ether. Shake the separatory funnel vigorously to bring about complete mixing of the sample and the petroleum ether. Add 20 milliliters of 1 percent potassium phosphate buffer, pH 6.0 (solution 1), and shake well. Remove the buffer layer and repeat the extraction with three additional 20-milliliter portions of solution 1. Combine the extractives and dilute to an appropriate volume with solution 1. Further dilute in solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(2) *Moisture.* Proceed as directed in § 141.502 of this chapter, using 1 or 2 milliliters of the suspension.

§ 151c.17 Chloramphenicol palmitate oral suspension.

(a) *Requirements for certification—*(1) *Standards of identity, strength, quality, and purity.* Chloramphenicol palmitate oral suspension is chloramphenicol palmitate and one or more suitable and harmless buffer substances, suspending agents, preservatives, colorings, and flavorings suspended in a suitable and harmless vehicle. Each milliliter contains 31.25 milligrams of chloramphenicol. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of chloramphenicol that it is represented to contain. It is sterile. Its pH is not less than 4.5 nor more than 7.0. Its content of polymorph A crystals does not exceed 10 percent. The chloramphenicol palmitate used conforms to the standards prescribed by § 151c.3(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, safety, melting range, specific rotation, and crystallinity.

(*b*) The batch for potency, pH, and content of polymorph A crystals.

(ii) Samples required:

(*a*) The chloramphenicol palmitate used in making the batch: 10 packages, each containing approximately 500 milligrams.

(*b*) The batch: A minimum of six immediate containers.

(b) *Tests and methods of assay—*(1) *Potency—*(i) *Preparation of chloramphenicol working standard solution.* Dissolve approximately 50 milligrams of the chloramphenicol working standards, accurately weighed, in a 100-milliliter volumetric flask with absolute ethyl alcohol. Fill to volume with absolute ethyl alcohol. Transfer 10.0 milliliters into a 250-milliliter volumetric flask and fill to volume with absolute ethyl alcohol.

(ii) *Procedure.* Transfer an accurately measured amount of the suspension, equivalent to about 125 milligrams of chloramphenicol, to a separatory funnel. Add 10 milliliters of water and then extract completely with 25-milliliter portions of chloroform, allowing the layers to separate and filtering each successive chloroform extract through a pledget of cotton into a 250-milliliter volumetric flask, then add chloroform to volume, and mix. Pipette 4 milliliters of the clear chloroform solution into a 100-milliliter volumetric flask, dilute with ethyl alcohol to volume, and mix. Using a suitable spectrophotometer equipped with a 1.0-centimeter cell and a blank composed of 1.0 milliliter of chloroform, U.S.P. diluted to 25 milliliters with absolute ethyl alcohol, determine the absorbance of the chloroform working standard solution at 276 nanometers and that of the sample solution at 271 nanometers. Calculate the potency of the sample as follows:

$$\text{Milligrams of chloramphenicol per milliliter} = \frac{\text{Absorbance of sample} \times \text{labeled potency per milliliter in milligrams}}{\text{Absorbance of standard}}$$

(2) *pH.* Proceed as directed in § 141.503 of this chapter, using the undiluted sample.

(3) *Content of polymorph A crystals—*(i) *Preparation of standards—*(a) *Standard containing 20 percent of polymorph A.* Prepare a thoroughly mixed, dry powder composed by weight of 1 part of polymorph A crystals of chloramphenicol palmitate and 4 parts of nonpolymorph A crystals of chloramphenicol palmitate.

(*b*) *Standard containing 10 percent of polymorph A.* Prepare a thoroughly mixed, dry powder composed by weight of 1 part of polymorph A crystals of chloramphenicol palmitate and 9 parts of nonpolymorph A crystals of chloramphenicol palmitate.

(ii) *Preparation of sample.* Place 20 milliliters of thoroughly mixed oral suspension into a 50-milliliter centrifuge tube. Add 20 milliliters of water and mix. Centrifuge for 10 to 15 minutes at a speed not less than 18,000 revolutions per minute. Decant the supernatant liquid. Wash the residue as follows: Add 2 milliliters of water to the residue, mix to make paste, add 18 milliliters of water, and mix thoroughly. Centrifuge, decant

V 38 151 AUG 7 73 XUM

the supernatant liquid, and wash the residue two more times. Remove the washed residue from the centrifuge tube and dry it at least 14 hours in a vacuum desiccator at room temperature.

(iii) *Procedure.* Weigh 150 to 200 milligrams of liquid petrolatum into an agate mortar and add about 100 milligrams of standard or sample. Mix with a small spatula and then mull thoroughly with a pestle until a uniform consistency is obtained. Adjust a suitable infrared spectrophotometer so that 100 percent transmittance is recorded over the range of 11.0 to 13.0 microns. Use two rock salt plates as an absorption cell. Place a small drop of the mull in the center of one of the plates. Gently put the other plate on the mull and slowly squeeze the plates together to spread the mull uniformly. Clamp the two plates firmly together in a metal cell holder. Examine the assembled cell by holding it up to the light. It should appear smooth and free of any air bubbles and when placed in the instrument it should give a percent transmittance of 20 to 30 percent at 12.3 microns. Place the cell in the infrared spectrophotometer and record the absorption spectrum from 11.0 to 13.0 microns.

(iv) *Treatment of spectra—(a) Standard containing 20 percent of polymorph A.* Determine by inspection of the recorded spectrum the exact wavelengths of minimum absorption at approximately 11.3 and 12.65 microns. Also determine by inspection the exact wavelengths of maximum absorption at approximately 11.65 and 11.86 microns. In the following subdivision, references to these four nominal wavelengths are to the exact wavelengths observed on the particular instrument being used.

(*b*) *Standard containing 10 percent of polymorph A.* Draw a straight baseline between the minima occurring at 11.3 and 12.65 microns. Draw straight lines at 11.65 and 11.86 microns intersecting both the recorded spectrum and the baseline. Obtain the corrected absorbances at 11.65 and 11.86 microns and calculate the absorbance ratios as follows:

$$\text{Absorbance ratio} = \frac{{}^{S}11.65 - {}^{B}11.65}{{}^{S}11.86 - {}^{B}11.86}$$

where:

$^{S}11.65$ = Absorbance value of recorded spectrum at 11.65 microns;

$^{B}11.65$ = Absorbance value at point of intersection of the 11.65-micron line with the baseline;

$^{S}11.86$ = Absorbance value of recorded spectrum at 11.86 microns;

$^{B}11.86$ = Absorbance value at point of intersection of the 11.86-micron line with the baseline.

(c) *Sample.* Proceed as described in subdivision (iv) (*b*) of this subparagraph.

(v) *Calculation.* The absorbance ratio of the sample must be greater than the absorbance ratio of the standard containing 10 percent of polymorph A.

§ 151c.18 Chloramphenicol opthalmic solution, veterinary.

(a) *Requirements for certification—(1) Standards of identity, strength, quality, and purity.* Chloramphenicol ophthalmic solution contains in each milliliter 5 milligrams of chloramphenicol with or without one or more suitable and harmless preservatives and surfactants in an aqueous solution. Its potency is not less than 90 percent and not more than 130 percent of the number of milligrams of chloramphenicol that it is represented to contain. It is sterile. Its pH is not less than 3 nor more than 6. The chloramphenicol used conforms to the standards prescribed by § 151c.2(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of §§ 148.3 and 135a.9 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The chloramphenicol used in making the batch for potency, safety, pH, specific rotation, melting range, absorptivity, and crystallinity.

(*b*) The batch for potency, sterility, and pH.

(ii) Samples required:

(*a*) The chloramphenicol used in making the batch: 10 containers, each containing not less than 300 milligrams.

(*b*) The batch:

(1) For all tests except sterility: A minimum of five immediate containers.

(2) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay—(1) Potency.* Use either of the following methods; however, the results obtained from the microbiological turbidimetric assay shall be conclusive.

(i) *Microbiological turbidimetric assay.* Proceed as directed in § 141.111 of this chapter, preparing the sample for assay as follows: Dilute an accurately measured representative portion of the sample in sufficient 1 percent potassium phosphate buffer, pH 6.0 (solution 1), to give a stock solution of convenient concentration. Further dilute an aliquot of the stock solution with solution 1 to the reference concentration of 2.5 micrograms of chloramphenicol per milliliter (estimated).

(ii) *Spectrophotometric assay.* Dilute a 1-milliliter aliquot of the sample in sufficient distilled water to make a solution containing 20 milligrams of chloramphenicol per milliliter. Dissolve an accurately weighed portion of the working standard in sufficient distilled water to give a solution containing 20 milligrams per milliliter. Warm if necessary to hasten solution of the working standard. Cool. Using a suitable spectrophotometer and distilled water as the blank, determine the absorbance of the sample and standard solutions at 278 nanometers. Calculate the potency of the sample as follows:

$$\text{Milligrams of chloramphenicol per milliliter} = \frac{\text{Absorbance of sample} \times \text{labeled potency per milliliter in milligrams}}{\text{Absorbance of standard}}$$

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section.

(3) *pH.* Proceed as directed in § 141.503 of this chapter, using the undiluted solution.

Effective date. This order shall become effective September 6, 1973.

(Secs. 507, 512(n), 59 Stat. 463, as amended, 82 Stat. 350–351; 21 U.S.C. 357, 360b(n))

Dated: July 30, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

SUBCHAPTER F—REGULATIONS UNDER SPECIFIC ACTS OF CONGRESS OTHER THAN THE FOOD, DRUG, AND COSMETIC ACT

PART 278—REGULATIONS FOR THE ADMINISTRATION AND ENFORCEMENT OF THE RADIATION CONTROL FOR HEALTH AND SAFETY ACT OF 1968

Subpart C—Performance Standards for Electronic Products

MICROWAVE OVENS

On April 9, 1973, the Commissioner of Food and Drugs published in the FEDERAL REGISTER (38 FR 9027) a notice of proposed rulemaking to amend the performance standard for microwave ovens (21 CFR 278.212) by adding performance requirements to improve the reliability of safety inter-lock systems.

As defined in § 278.212(b)(1); "microwave ovens are limited to those manufactured for use in homes, restaurants, food vending or service establishments, on interstate carriers, and in similar facilities."

Prior to publication as a proposed rule, these amendments were reviewed by the Technical Electronic Product Radiation Safety Standards Committee, a statutory committee which by law must be consulted prior to the promulgation or amendment of electronic product standards established under the Act. In addition, more than 60 representatives of manufacturers, radiation control and public health agencies, consumer groups, and others were invited to submit written comments on the proposed amendments and to discuss them in a meeting held January 9, 1973. The proposed amendments were based on these reviews and discussions as well as on research and testing carried out by the Bureau of Radiological Health.

Interested persons were given 30 days in which to file written comments regarding this proposal. No requests for extension of the review period were received.

Nine comments on the proposal were received. Eight comments generally supported all or part of the proposal and four of these anticipated that the proposed controls would result in improved reliability of ovens. None of the comments expressed significant opposition to the proposal. However, five comments suggested some changes or additions or alternative means of achieving radiation safety. Actions taken in response to comments are summarized as follows:

1. A suggestion to require the primary safety interlock to be monitored and to remove the emission limitation on the secondary interlock was not accepted, because the suggested change would result in equal or greater radiation safety to the user only in limited situations and would provide less radiation protection in all other situations.

2. A suggestion to change the test conditions of the standard to include measuring the emission of microwave radiation from the door at discrete door travel positions was not accepted on the basis that more general requirements, which provide equivalent radiation protection to the user, already are in effect.

3. One suggestion to have the power density emission limits of the microwave ovens lowered was not accepted on the basis that that present requirements were developed to keep the emissions at levels which would lead to individual exposures well below levels known to cause biological damage.

4. A suggestion to have microwave ovens bear a warning sign to alert pacemaker wearers was not accepted because the Bureau believes that a recommendation for generalized use of warning signs related to microwave oven installations would be impractical and ineffectual. Further, it would tend to focus attention on a single source of possible electromagnetic interference and would fail to warn the pacemaker wearer of other important sources of interference that could not be effectually delimited by signs. It would, in effect, label all types of microwave ovens as incompatible regardless of the quality inherent in some makes and models of the product.

5. One commentor stated it is not feasible to require interlock protect circuits to sense microwave radiation emission in excess of 5.0 mW/cm^2 and suggested that the language expressing the functions of the safety interlocks be clarified. This suggestion was not accepted because the monitor system is not expected to sense emission from the microwave oven, but only failure of the safety interlocks.

For uniformity and clarity of terminology throughout § 278.212, including this amendment, the following changes have also been made. The words "prevent microwave radiation emission' have been substituted for "not allow leakage" in two places in the first sentence of paragraph (c)(2)(v). The words "radiation emission" or "emission" have been substituted for the word "leakage" where it appears in paragraphs (b)(3) and (c)(2)(iii), (iv) and (3)(ii).

The Commissioner of Food and Drugs has determined that the amendment to § 278.212 is necessary for the protection of the public health and safety.

Therefore, pursuant to the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177–1179; 42 U.S.C. 263f) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), § 278.212 is amended by revising paragraphs (b)(3) and (c)(2) and (3) to read as follows:

§ 278.212 Microwave ovens.

* * * * *

(b) * * *

(3) "Door" means the movable barrier which prevents access to the cavity during operation and whose function is to prevent emission of microwave energy from the passage or opening which provides access to the cavity.

* * * * *

(c) * * *

(2) *Door and safety interlocks.* (i) Microwave ovens shall have a minimum of two operative safety interlocks one of which must be concealed. A concealed safety interlock on a fully assembled microwave over must not be operable by (*a*) any part of the body, or (*b*) a rod 3 millimeters or greater in diameter and with a useful length of 10 centimeters. A magnetically operated interlock is considered to be concealed only if a test magnet, held in place on the oven by gravity or its own attraction, cannot operate the safety interlock. The test magnet shall have a pull at zero air gap of at least 4.5 kilograms and a pull at 1 centimeter air gap of at least 450 grams when the face of the magnet which is toward the interlock switch when the magnet is in the test position is pulling against one of the large faces of a mild steel armature having dimensions of 80 millimeters by 50 millimeters by 8 millimeters.

(ii) Failure of any single mechanical or electrical component of the microwave oven shall not cause all safety interlocks to be inoperative.

(iii) Service adjustments or service procedures on the microwave oven shall not cause the safety interlocks to become inoperative or the microwave radiation emission to exceed the power density limits of this section as a result of such service adjustments or procedures.

(iv) Insertion of an object into the oven cavity through any opening while the door is closed shall not cause microwave radiation emission from the oven to exceed the applicable power density limits specified in this section.

(v) One (the primary) required safety interlock shall prevent microwave radiation emission in excess of the requirement of paragraph (c)(1) of this section; the other (secondary) required safety interlock shall prevent microwave radiation emission in excess of 5 milliwatts per square centimeter at any point 5 centimeters or more from the external surface of the oven. The two required safety interlocks shall be designated as primary or secondary in the service instructions for the oven.

(vi) A means of monitoring one or both of the required safety interlocks shall be provided which shall cause the oven to become inoperable and remain so until repaired if the required safety interlock(s) should fail to perform required functions as specified in this section. Interlock failures shall not disrupt the monitoring function.

(3) *Measurements and test conditions.* (i) Compliance with the power density limits in this paragraph shall be determined by measurements of microwave power density made with an instrument system which (*a*) reaches 90 percent of its steady-state reading within 3 seconds when the system is subjected to a stepped input signal and which (*b*) has a radiation detector with an effective aperture of 25 square centimeters or less as measured in a plane wave, said aperture having no dimension exceeding 10 centimeters. This aperture shall be determined at the fundamental frequency of the oven being tested for compliance. The instrument system shall be capable of measuring the power density limits of this section with an accuracy of plus 25 percent and minus 20 percent (plus or minus 1 decibel).

(ii) Microwave ovens shall be in compliance with the power density limits if the maximum reading obtained at the location of greatest microwave radiation emission does not exceed the limits specified in this paragraph when the emission is measured through at least one stirrer cycle. Pursuant to § 278.203, manufacturers may request alternative test procedures if, as a result of the stirrer characteristics of a microwave oven, such oven is not susceptible to testing by the procedures described in this subdivision.

(iii) Measurements shall be made with the microwave oven operating at its maximum output and containing a load of 275±15 milliliters of tap water initially at 20°±5° centigrade placed within the cavity at the center of the load-carrying surface provided by the manufacturer. The water container shall be a low form 600-milliliter beaker having an inside

V 38-151 AUG 7 73 XUM

diameter of approximately 8.5 centimeters and made of an electrically nonconductive material such as glass or plastic.

(iv) Measurements shall be made with the door fully closed as well as with the door fixed in any other position which allows the oven to operate.

* * * * *

Effective date. This order shall become effective August 7, 1974.

(Sec. 358, 82 Stat. 1177-1179; 42 U.S.C. 263f)

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-185]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

* * * * * * *

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
* * *	* * *	* * *	* * *	* * *	* * *	* * *
Illinois	Madison	Unincorporated areas.				Aug. 6, 1973. Emergency.
New Hampshire.	Grafton	Hanover, Town of.				Do.
New Mexico	Rio Arriba	Gallup, City of.				Do.

Title 36—Parks, Forests and Memorials

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

Guadalupe Mountains National Park, Texas; Cave Entry and Exploration

A proposal was published at page 1122 of the FEDERAL REGISTER of January 9, 1973, to establish a § 7.93 within Part 7, Special Regulations, Areas of the National Park System, to deal with Guadalupe Mountains National Park. The effect of this section is to establish restrictions on entry and exploration of all cave formations now known or to be found within the park.

Interested persons were given 30 days within which to submit written comments, suggestions, or objections with respect to the proposed section. No comments, suggestions or objections have been received pursuant to publication of the proposal, and the proposed section is hereby adopted without change and set forth below. This section shall take effect September 6, 1973.

(39 Stat. 535; 16 U.S.C. 3; 80 Stat. 920)

The section reads as follows:

§ 7.93 Guadalupe Mountains National Park.

(a) *Cave entry*—(1) *Closed areas.* No person shall enter any cave or passageway of any cave without a written permit from the Superintendent.

(2) *Permits.* The Superintendent may issue written permits for cave entry to persons engaged in scientific investigations, and educational investigations. The Superintendent shall approve issuance of a permit: *Provided,*

(i) That the investigation planned will have demonstrable value to the National Park Service in its management or understanding of park resources, and

(ii) That the permit applicant is adequately equipped and experienced so as to assure the protection and preservation of park resources, and personal safety.

(iii) Solo exploration or investigation is not permitted in any cave or passageway of any cave within the park.

FRANK J. KOWSKI,
Director, Southwest Region.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

SUBCHAPTER D—ORGANIZATION AND ADMINISTRATION

PART 226—POSTAL DATA CENTERS

Administrative Office

Correction

In FR Doc. 73-15750 appearing at page 20402 for the issue of Tuesday, July 31, 1973, make the following changes:

1. In the second line of the authority citation in the first column of page 20414, the number which reads "224" should read "226."

2. In the second column of page 20414, under § 226.3, the paragraphs beginning with "(vi)" and continuing to the third column to § 226.4 should be transferred to follow paragraph (e)(1)(vi) of § 226.4.

Title 40—Protection of Environment

CHAPTER V—COUNCIL ON ENVIRONMENTAL QUALITY

PART 1500—PREPARATION OF ENVIRONMENTAL IMPACT STATEMENTS: GUIDELINES

Correction

In FR Doc. 73-15783 appearing at page 20550 of the issue for Wednesday, August 1, 1973, on page 20557 the effective date at the end of the first paragraph, which now reads "January 28, 1973", should read "January 28, 1974".

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 18179; FCC 73-806]

PART 73—RADIO BROADCAST SERVICES

Commercial Television Stations and CATV Systems

First report and order. In the matter of amendment of Part 73 of the Commission's rules with respect to the availability of television programs produced by non-network suppliers to commercial television stations and CATV systems, Docket No. 18179.

1. On May 10, 1968, the Commission released a notice of proposed rulemaking (FCC 68-511, 33 FR 7158) proposing a new rule concerning the geographical exclusivity that would be permitted in programming contracts between television station licensees and non-network program suppliers. The proceeding was begun because of complaints of the non-availability of syndicated programs (due to exclusivity arrangements) made by independent UHF stations and because of a resolution on that subject by the Committee for the Full Development of All Channel Broadcasting. The rule, as proposed, reads as follows:

Section 73.659 *Territorial exclusivity agreements in non-network program arrangements.* No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a non-network program supplier which prevents or hinders another television broadcast station located in a different community from broadcasting the program purchased by the former station. As used in this section, the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

2. Several extensions of time were granted in response to a request by the NAB and several other requests by the law firm of Phillips, Nizer, Benjamin, Krim & Ballon representing eight program suppliers; the initial comments were due on February 10, 1969, and the reply comments on March 10, 1969. Comments and reply comments were filed by the following parties:

American Broadcasting Companies, Inc.
All-Channel Television Society (ACTS)
Appalachian Broadcasting Corporation (WCYB-TV)
Columbia Broadcasting System, Inc.
Continental Urban Television Corporation (KGSC(TV))
Covington & Burling (on behalf of 18 television stations)
Fletcher, Heald, Rowell, Kenehan & Hildreth (on behalf of 9 television stations)
General Electric Broadcasting Company, Inc.
Golden West Broadcasters (KTLA(TV))
Greensboro News Company (WFMY-TV)
Gross Telecasting, Inc. (WJIM-TV)
The Hearst Corporation (WBAL-TV)
Herald Corporation (KETV(TV))
Kaiser Broadcasting Corporation
KFIZ Broadcasting Company (KFIZ-TV)
KLOC Broadcasting Company, Inc. (KLOC (TV))
McClatchy Newspapers (KOVR(TV) and KMJ-TV)
Meredith Broadcasting Company
Multimedia, Inc. (WFBC-TV, WBIR-TV, and WMAZ-TV)
National Association of Broadcasters
National Broadcasting Company, Inc.
Northwest Publications, Inc. (WDSM-TV)
Palmer Broadcasting Company (WHO-TV)
WOC Broadcasting Company (WOC-TV)
Pappas Electronics, Inc. (KMPH(TV))
Pierson, Ball & Dowd (on behalf of 13 television stations)
Phillips, Nizer, Benjamin, Krim & Ballon (on behalf of 8 program suppliers)
Sangre de Cristo Broadcasting Corporation (KOAA-TV)
Storer Broadcasting Company
Summit Radio Corporation (WAKR-TV)
Tribune Publishing Company (KTNT-TV)
Triangle Broadcasting Corporation (WSJS-TV)
U.S. Communications Corporation
WGAL Television, Inc. (WGAL-TV and WTEV-TV)
WGN Continental Broadcasting Company
WLVA, Incorporated (WLVA-TV)
WPIX, Inc. (WPIX-TV)

Reply comments were filed by Summit, Kaiser, McClatchy, KLOC and U.S. Communications. Although labeled reply comments, Mid-Continent Television Corporation (WKTO-TV); Iowa Broadcasting Company (KWIG-TV), TVue Associates, Inc. (KVVV-TV); Toledo Telecasting Corporation (WKDS-TV); and Southwestern Ohio Television, Inc. (WSWO-TV) filed comments in the nature of initial comments. Screen Gems filed a statement controverting certain factual statements made in the comments by KLOC. By a reply comment of July 19, 1972, Channel 3, Inc., licensee of KVDO-TV, Salem, Oregon, also commented on this phase of the proceeding. Pappas filed a supplement to comments in opposition on September 19, 1972, and United Television Company of New Hampshire, Inc. (WMUR(TV)) filed a motion to supplement the record on October 10, 1972.

3. On January 18, 1971, the Commission released a further notice of proposed rulemaking (FCC 71-42, 36 FR 935) which enlarged the proceeding to also consider time exclusivity and to consider the matter as applies to cable television systems. A second further notice (FCC 72-306, April 11, 1972, 37 FR 7531) set the final dates for comments and reply comments on time exclusivity matters as June 19, 1972 and July 19, 1972, respectively. It also deleted the cable television aspects from this proceeding. The program availability question as it applies to cable television was included in this proceeding because of the Commission's rule requiring cable systems with over 3,500 subscribers to originate programs. It was deleted because of the program availability rules that were adopted by the Cable Television Report and Order issued February 3, 1972, 36 F.C.C. 2d 141. The cable rules adopted in that Report and Order represent our resolution of the problem until a body of experience has been gathered in the cable area concerning program availability. In this First Report and Order, we shall deal with the question of geographical exclusivity for television stations and shall defer action on the time exclusivity aspect of the proceeding because of the severability of the two aspects of exclusivity.

4. The comments generally fall into three general areas, viz: (1) Outright support of the proposed rule; (2) outright opposition to the rule; and (3) opposition to any rule, but should the Commission find a rule to be necessary the geographical exclusivity should extend some distance beyond the same community (as proposed in the rule) such as to a specific mileage, or within the market area, or to a certain signal intensity contour (e.g. Grade A contour).

5. While specific comments will be set forth where appropriate, the comments will generally be summarized on a topical basis. Comments directly supporting the rule were filed by Summit (WAKR-TV); KLOC Broadcasting (KLOC-TV); KFIZ Broadcasting (KFIZ); Continental Urban (KGSC-TV and Pappas (KMPH (TV)). Reply comments supporting the rule were filed by Iowa Broadcasting (KWIG-TV); Southwestern Ohio (WSWO-TV); Mid-Continent Television (WKTO-TV); Toledo Telecasting (WDKS-TV); and TVue Associates (KVVV-TV). KGSC-TV, while directly supporting the proposed rule, states that if the Commission finds the proposed rule to be too strict, geographical exclusivity should be limited to 35 miles between the main post offices of the communities. ABC, General Electric and Sangre de Christo (KOAA-TV) support the philosophy of the rule because it would permit more free competition in bargaining for programming and would minimize abuses as to exclusivity provisions. However, KOAA-TV believes that the "same community" limitation may be too restrictive, and that the rule should permit exclusivity against all stations in cities with which a station has the right to identify.

6. Comments in direct opposition were filed by Meredith, Gross, U.S. Communications, and CBS relying mainly on the great reservoir of programs and the impracticality of any general rule. NAB, NBC, Kaiser, Pierson, Ball & Dowd (on behalf of 13 stations), and Covington & Burling (on behalf of 16 commercial and

V38-151 AUG 7 73 XUM

2 educational stations) oppose any rule on the theory that any violations can be reached by complaint based on antitrust law and policy. ACTS opposes any general rule, stating that the Commission should issue a policy statement outlining its concern over excessive geographical exclusivity when it reaches into another television market (especially a smaller one) and that any abuses could then be handled on a complaint basis.

7. Pierson, Ball & Dowd urge that any general rule would be unworkable, but state that if one must be adopted minimum exclusivity should be permitted through Grade A contour, if substantial overlap does not exist; if it does exist, then exclusivity should be permitted within a 75 mile radius of a station. Hearst (WBAL) and WPIX do not object to a geographical exclusivity rule, but state that a same community exclusivity rule is too stringent. Hearst says that a rule should permit exclusivity within the metropolitan area of the station; WPIX urges that exclusivity be permitted against stations whose transmitters are located within the station's Grade B contour. Herald (KETV(TV)), WGN (WGN–TV), Golden West (KTLA–TV), Palmer (WHO–TV) and WOC (WOC–TV), Appalachian (WCYB–TV), Triangle (WSJS–TV), Greensboro (WFMY–TV), WGAL (WGAL–TV and WTEV–TV), WLVA (WLVA–TV), Multimedia (WFBC–TV, WBIR–TV, and WMAZ–TV), Storer, the law firm of Fletcher, Heald, Rowell, Kenehan & Hildreth (on behalf of 9 television stations) and the law firm of Phillips, Nizer, Benjamin, Krim & Ballon (on behalf of 8 program suppliers) oppose the adoption of a geographical exclusivity rule, but set forth various alternatives if the Commission finds that adoption of a rule is necessary. The following alternatives were set forth: Herald and WGN—against stations whose transmitters are located in a station's predicted Grade B contour; Golden West, Palmer, WOC, Tribune, McClatchy, Northwest Publications, Appalachian, Triangle and Gross—against stations whose predicted Grade A contour would invade a station's predicted Grade A contour; Greensboro, WGAL, WTEV, and WLVA—against stations serving substantially the same market; Multimedia, the law firm of Fletcher, Heald, Rowell, Kenehan & Hildreth and the law firm of Phillips, Nizer, Benjamin, Krim & Ballon—against stations whose transmitters are located in the predicted Grade A contour of a station; and Storer—the Area of Dominant Influence (ADI) as shown in the ARB ratings.

8. The comments supporting the proposed rule rest on the theory that negotiations will be opened and there will be more free competition for the bargaining for non-network programming. ABC, GE, Summit, Sangre de Cristo, and KFIZ state that the pattern of present program distribution would not change greatly, but that programs could be negotiated for and excessive geographic exclusivity abuses would be minimized. They also point out that geographical exclusivity is a problem only where there is overlap of service areas and in these cases the bargaining for programming is most vigorous. The most critical areas are in the overshadowed markets. The "overshadowed" problem is most extensively presented by Summit, the licensee of WAKR–TV, Akron, which is located slightly less than 30 miles from Cleveland. Summit also stresses the point of its objective to serve as an Akron station and does not object to the same programs being shown in Cleveland. Summit, Continental Urban, Iowa, Toledo, Mid-Continent, TVue Associates, Southwestern Ohio and KFIZ urge that the Commission support the "separate community" theory underlying its Table of Assignments by not permitting geographical exclusivity in non-network program contracts of stations located in one community (usually a larger market) that have the effect of barring even negotiation for a program by a station in another community, especially a smaller community. They point out that, under existing conditions, all that is available for bargaining are the "leftover" programs. KLOC–TV, Modesto, KGSC–TV, San Jose, WMUR(TV), Manchester, New Hampshire, and WAKR–TV set forth several examples of their frustrations in negotiation attempts to secure programming from non-network sources due to geographic exclusivity provisions in contracts by stations located in Stockton, San Francisco, Boston and Cleveland, respectively.

9. The opponents of the proposed rule contend that there has been no showing of a need for the rule, and even if need had been shown, any general rule would be unworkable and impractical because of the unique situations present in every market and contract situation. Some of the various factors present in each contractual situation are the location of the communities, the power and antenna height, geographical terrain, and the presence or absence of other markets. These parties urge the thesis that exclusivity will never be excessive, because exclusivity is an element of the cost in the contract price—a station will buy no more than is needed and a supplier will sell no more since it wants to sell to as many stations as reasonably possible. As set forth in paragraph 6, Kaiser, NAB, NBC, Pierson, Ball & Dowd, and Covington & Burling stress that any abuses in non-network contracts can be clearly reached by existing antitrust laws and policies and that these should be handled on a case-by-case complaint basis.

10. Many of the opponents of the rule urge that the adoption for non-network programs of the rule applicable to network programs [1] is completely inappropriate, because there is simply no analogy between the two situations and types of distribution. It is said that without any understandings with stations, the networks are not going to affiliate with stations close together and having considerable duplication of coverage. This is true, we are told, because they must keep network television a reasonably efficient medium for advertisers, so that it will be competitive with other media, and thus must avoid wasteful duplication. By contrast, it is said, in the case of non-network programs the suppliers have no motive but to sell to as many stations as possible, which they will be free to do if stations are precluded from securing reasonable exclusivity. Thus there is "built-in exclusivity" in one case but not the other. It is said that exclusivity agreements serve the same purpose as the network system, and are necessary if the analogy is to be valid. It is urged that independent stations—already under some handicaps in competing with network-affiliated stations and their popular programs—should not be additionally handicapped by not being able to obtain the degree of exclusivity which the latter obtain for their network programs. Existing independents, it is urged, should not be penalized for the benefit of "small-market" stations.

11. Other differences are also noted and advanced as reason for different treatment. It is said that network affiliates risk only their time in a network program, and are usually reasonably well compensated for it regardless of whatever duplication by other affiliates may occur; whereas stations procuring non-network programming risk not only time but the large amount of money they must put up to buy the program, a risk which entitles them to reasonable exclusivity with respect to what they have bought. It is asserted that program success is no certainty, so that there is a real risk involved. Moreover, it is pointed out that with network programs the advertising support involved is furnished by and through the network; with non-network programs the station itself must make the effort to sell the time and run the risk of not doing so.

12. The parties contend that without this geographic exclusivity, there will be substantial duplication of programming rather than diversity which is the programming objective stated on numerous occasions by the Commission. This, they state, will in turn act as a deterrent to the creation of new programs. It is also maintained that stations need geographical exclusivity to give certainty to their operations after purchasing a program so that another station will not, during the term of the contract, dilute their audience. These parties contend that exclusivity is sorely needed by the independent stations (especially UHF) to develop and retain shares of an audience within their respective service areas. Kaiser states that a station needs both geographic exclusivity and time exclusivity—geographic, to prevent dilution of audience, and time, to recoup high costs of programming by reasonably resting programs during the contract period. This position is strongly supported by U.S. Communications and others. A number of the parties maintain that there is no shortage of available non-network program materials. Meredith avers that the proposed rule is illegal because it enters into the normal business practices of the industry and would abrogate legal rights of copyright holders and licensees.

13. Most of the comments stress the market concept that governs television broadcasting, i.e., programs are bought to serve a market from which advertising revenues are secured to defray those costs. In the comments that oppose the rule but also set forth an alternative to the same community standard of the proposed rule, the alternatives presented are their respective concepts of the best definition of the television market (which are set forth in paragraph 7, supra). Northwest Publications, Appalachian, Triangle, Gross, Greensboro, WGAL, WTEV and WLVA stress that excusivity should be given against all stations serving substantially the same market and they set forth the specific cities applicable to their respective market situations. Storer contends that the problem is not one of exclusivity, but of price—that is, smaller, near-by stations are simply not willing to pay the price necessary to secure a particular program. Pierson, Ball & Dowd, Kaiser, WPIX and Phillips, Nizer, Benjamin, Krim & Ballon also point out the problem of duplication that would be presented in situations in which stations use the same or a nearby transmitter site. For example it is stated that Los Angeles stations use Mt. Wilson as their transmitter site, as does the station licensed to serve Fontana (about 60 miles from Los Angeles). Because of this, the Fontana station places at least a Grade A signal into Los Angeles. It is argued that it would be unfair and unrealistic to preclude Los Angeles stations from bargaining for exclusivity over the Fontana station which clearly is in substantial competition with the Los Angeles stations and serves a substantial part of the same audience. Similar situations are pointed out with regard to Philadelphia-Burlington, N.J., and New York City-Linden, N.J.

14. The reply comments of Summit state that the case-by-case approach is not practical and that the alternatives (e.g. Grade A, etc.) will not help the Akron situation. While exclusivity may well help a Cleveland UHF station, it contends it will result in the Akron station's demise. Summit, while recognizing that adoption of the proposed rule is not a "cure-all", believes it would promote bargaining competition for programs. Summit also believes that with the rule, programs may be able to be sold in both Cleveland and Akron at reasonable prices. The reply comments of McClatchy and of Screen Gems (a program supplier) deny statements of KLOC–TV at Modesto that McClatchy and the program suppliers acted in concert to deny programs to KLOC–TV. U.S. Communications, in reply comments, reiterates that it considers KGSC–TV at San Jose to be a competitor of its San Francisco station because of service contours and advertising sales.[2] KGSC–TV submitted a letter from U.S. Communications to a program supplier in which it stated that it would require exclusivity against KGSC–TV and would not consider any program owned by KGSC–TV.

15. Most of the opposition comments rule out the Commission alternatives set forth in the Notice, e.g., percentage of overlap, percentage of duplicated circulation, etc., as being either impractical or unworkable. Kaiser and NBC pointed out that the sliding scales exemplified by percentage of overlap and duplicated circulation are too cumbersome and nearly impossible to administer in the marketplace. Covington & Burling state that the specific mileage and contour standards do not necessarily reflect a television market.

16. Information submitted concerning exclusivity provisions in existing contracts indicates about every type of geographic provision ranging from same-city exclusivity through exclusivity against stations located in the Grade B contour. It appears that the most common exclusivity given is against stations located in the Grade A contour. (As to time provisions, which we are not here directly considering, it appears that feature films have 5 to 7 years exclusivity, and series not more than two years or a specific number of runs. Specials quite often have only a one-year or one-showing time exclusivity. Usually the film or series contract terminates on the expiration of the contract, but in some cases, the contract terminates upon a specific number of showings of the film or series. In most cases, the contracts were not assignable.)

17. The alternative urged most strenuously is the ad hoc concept based on complaints, that would rely on antitrust principles as well as other law, rules and policies. An administrative agency, with certain limitations, may proceed either by a general rule or on the case-by-case method. See SEC v. Chenery Corp., 332 U.S. 194 (1947). The most apparent advantage of the use of the ad hoc method in situations is that the particular facts of the case may be more fully explored and the specifically needed remedy in the situation may be adopted. Thus, it gives an edge of flexibility not available under a general rule. However, such proceedings are usually very time consuming. We believe the benefit of a simple self-executing rule is more applicable to the situation here where time is such a significant factor. By the time the ad hoc proceeding would be completed, the term of the non-network contract might well have expired.

18. As mentioned previously, several of the parties, even though opposing any rule, suggested the alternative of limiting territorial exclusivity in syndicated program contracts as against stations in "the market" or against stations located within a particular signal contour or within the Area of Dominant Influence (ADI). Use of the foregoing standards would create uncertainty in negotiations because of factual disputes concerning the location of the boundaries and because such boundaries would be changing. To avoid these complications we are rejecting these proposed standards.[3]

19. It would appear that one reasonable standard would be the specified zone of a television broadcast station, which is defined as the area extending 35 air miles from the Commission's specific reference point in a given community. The purpose of the specified zone concept is to govern carriage of television signals on a cable system as set forth in the Commission's rules. (It has no direct connection to the provisions of § 76.151 which prescribe exclusivity that cable systems must give to non-network syndicated programming which provisions are not based on mileage standards.) Although the 35-mile specified zone has proved a useful standard for cable we are of the view that it would not serve to solve the problems presented to us in this voluminous record as to overshadowed markets. Accordingly, we seek a standard more nearly tailored to the uniqueness of the overshadowed market problem.

20. In addition to rejecting the approaches mentioned in the immediately preceding paragraphs, we regard various other proposals, e.g., permitting exclusivity within a 75-mile radius of a station, as thwarting the objectives of this proceeding, i.e., opening up contract negotiations for syndicated programming. On the other hand, we believe that our proposed rule that would provide exclusivity only as against stations in the same community as unduly restrictive. The standard adopted today, which will operate prospectively,[4] is that geographical exclusivity will be permitted in non-network contracts only against stations licensed to the same community or to a community whose reference point contained in § 76.53 of the rules is located

[1] Section 73.658(b) of the Commission's rules.

[2] U.S. Communications no longer is operating the San Francisco UHF station.

[3] An additional drawback to using ADI as a standard is that some cities, e.g., Akron, Ohio, do not appear in an ADI.

[4] Contracts, arrangements, or understandings that are complete under the practices of the industry prior to August 7, 1973 (publication of this Report and Order in the FEDERAL REGISTER) will not be disturbed. Extensions or renewals of such agreements are not permitted because they would in effect be new agreements without competitive bidding. However, such agreements that were based on the broadcaster's advancing "seed money" for the production of a specific program or series that specify two time periods—a tryout period and a period thereafter for general exhibiting—may be extended or renewed as contemplated in the basic agreement.

V 38 151 AUG 7 73 XUM

within 25 miles of the said reference point of the station entering into the contract. Such a rule will give administrative certainty with regard to programming and economic judgments of stations seeking to purchase programs that are being shown on other stations.

21. The Commission has developed a Table of Assignments for television with the objective of providing a complete television service for the nation based on the priorities set forth in the Sixth Report and Order, 1 R.R. (Volume 3) 91:601 at 91:620 (1962). We believe adoption of the gographical exclusivity rule using a 25-mile standard will assist in the implementation of that nationwide television service. Such a rule will allow the numerous stations more than 25 miles from a TV community to attempt to secure many programs not now available because of exclusivity provisions in contracts.[4] By having a specific mileage criterion, excess geographic exclusivity cannot be secured by contract.

22. The 25-mile standard gives the degree of specificity required and gives stations in the major cities a protected area of approximately 1,900 square miles in any given contract. The Commission believes that this reasonable standard strikes an equitable and readily understandable standard for the use of negotiating non-network contracts. The twenty-five mile standard between reference points will permit geographical exclusivity against adjacent communities and other nearby communities. We hope that this rule will assist the development of a national television service that is envisioned in the Communications Act and the Commission's rules and policies by the institution of new program distribution techniques. It is further hoped that the competitive bargaining will be based on vigorous competition and that a larger audience will be able to view good non-network programs. This hope recognizes the fact that programs will not necessarily be sold to all stations participating in the bidding competition.

23. The arguments of the opponents of the proposed rule have merit. This is especially true of the need for reasonable exclusivity to protect a station and give incentive to program suppliers to create and develop new programs. We believe the 25-mile standard meets that criterion. Most of the opposition comments rest on the theory that exclusivity is needed throughout the market area. The Commission believes that overshadowed stations some distance from a large community (although located in the same television market) must be permitted to attempt to secure programs contracted to major market stations so that, based on competition, those overshadowed stations have a chance to develop. With regard to possible duplication, it is believed that the parties (competing stations and the program suppliers) will adequately protect their respective interests as to excessive duplication by negotiations. The adopted rule may well promote program diversification to many "fringe area" station audiences.

24. The parties contend that the network rule analogy relied on in the Notice is not a proper support for a non-network programming rule (paras. 10–11, supra). It is recognized that the creation and distribution patterns of network and non-network programming are different. However, since we have abandoned our proposed "different community" standard, we need not discuss this subject in detail. Suffice it to say that the rule we adopt recognizes the degree of station commitment involved in obtaining non-network programming to the extent it is appropriate; and, like the network rule, which allows fringe area stations to seek affiliations, permits stations in overshadowed markets to negotiate for non-network programming.

25. Some parties urge that exclusivity should run against any station in a community that is a part of a generally recognized hyphenated market. Because the geographic separations of communities in such hyphenated markets may vary from small to quite significant distances, we do not believe that for hyphenated market situations there should be any departure from the 25-mile rule adopted herein.

26. One of the parties raised the point that the proposed rule is illegal. Such a contention is not valid. The Commission is charged with the duty under the Communications Act (sections 303(g) and 307(b)) of regulating broadcasting in the public interest. Ability to secure programing is a very important factor for a station to be able to render the proper service to a community in the public interest. It is the Commission's duty to create conditions favorable to the development of broadcast stations to operate in the public interest. When possible antitrust or anti-competitive forces in the marketplace render it difficult, if not nearly impossible to operate, it has the duty to act. That is the purpose of this rule enacted under out statutory mandate.

27. In view of the foregoing, and pursuant to authority contained in sections 4(i), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended: *It is ordered*, That effective September 7, 1973, § 73.658 of the Commission's rules and regulations is amended as set forth below.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: July 26, 1973.

Released: August 3, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[5]
VINCENT J. MULLINS,
Acting Secretary.

Part 73 of the Commission's rules is amended as follows:

1. Section 73.658 is amended by changing the headnote and by adding new paragraph (m) to read as follows:

§ 73.658 Affiliation agreements and network program practices; territorial exclusivity in non-network program arrangements.

* * * * *

(m) *Territorial exclusivity in non-network arrangements.* No television station shall enter into any contract, arrangement or understanding, express or implied, with a non-network program producer, distributor, or supplier, or other person which prevents or hinders another television station located in a community over 25 miles away, as determined by the reference points contained in § 76.53 of this chapter, from broadcasting any program purchased by the former station from such non-network program producer, distributor, supplier, or other person. As used in this subsection, the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

NOTE: Contracts, arrangements, or understandings that are complete under the practices of the industry prior to August 7, 1973, will not be disturbed. Extensions or renewals of such agreements are not permitted because they would in effect be new agreements without competitive bidding. However, such agreements that were based on the broadcaster's advancing "seed money" for the production of a specific program or series that specify two time periods—a tryout period and a period thereafter for general exhibition—may be extended or renewed as contemplated in the basic agreement.

Title 7—Agriculture

CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE

SUBCHAPTER G—DETERMINATION OF PROPORTIONATE SHARES

PART 859—TEXAS CANE SUGAR PRODUCING AREA

Farm Proportionate Shares Not Required for 1974-Crop Sugarcane

The Sugar Act requires the Secretary of Agriculture to determine whether the production of sugar from any crop of sugarcane in the Texas Cane Sugar Producing Area will, in the absence of proportionate shares (farm acreage allotments) be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory. The sugarcane producing area in the lower Rio Grande Valley of Texas has an annual quota of not more than 100,000 short tons of sugar, raw value.

Such determination may be made only after due notice and opportunity for an informal public hearing. A public hearing was held in Washington, DC, on May 18, 1973.

Pursuant to the provisions of section 302 of the Sugar Act of 1948, as amended, the following determination is hereby issued.

§ 859.8 Proportionate shares for the 1974 crop of sugarcane not required.

It is determined for the 1974 crop of sugarcane in the Texas Cane Sugar Area that, in the absence of proportionate shares, the production of sugar from such crop will not be greater than the quantity needed to enable the area to meet its quota for 1975, the calendar year during which the larger part of the sugar from such crop normally will be marketed, and provide a normal carryover inventory. Consequently, proportionate shares will not be in effect in the Texas Cane Sugar Producing Area for the 1974 crop.

(Sections 202, 301, 302, 403, 61 Stat. 924, as amended, 929, as amended, 930, as amended, 932; 7 U.S.C. 1112, 1131, 1132, 1153)

STATEMENT OF BASES AND CONSIDERATIONS

Requirements of the Act. Section 302 of the Sugar Act of 1948, as amended (7 U.S.C. 1132), provides, in part, that the Secretary shall determine for each crop year whether the production of sugar from any crop of sugarcane will, in the absence of proportionate shares, be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory, as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar from such crop normally would be marketed. Such determination may be made only after due notice and opportunity for an informal public hearing.

Public hearing. In accordance with the provisions of the Act, an informal public hearing was held in Washington, DC, on May 18, 1973. Interested persons were invited to submit views and recommendations on the need for establishing proportionate shares for the 1974 crop of Texas sugarcane.

Written statements were submitted by representatives of the Rio Grande Valley Sugar Growers, Inc. They recommended that proportionate shares not be established for the 1974 crop of Texas sugarcane. They pointed out that only 24,500 acres of the area's initial allocation of 25,700 acres were planted to the 1973 crop of sugarcane; and that due to these underplantings coupled with the expectation that yields will be somewhat lower than originally anticipated, the current estimate of 1973-crop production is only 90,000 tons of raw sugar. The representatives further indicated that about 500 acres of 1973 crop sugarcane will be used as seed to replant a number of poor stands and to plant enough additional acreage to bring the 1974 crop up to a total of 27,500 acres. They expect this target of 27,500 acres of sugarcane to be sufficient to produce the area's quota of not more than 100,000 short tons of sugar, raw value, and provide a 12–13 percent carryover, plus enough seed to establish an orderly crop rotation plan of 25 percent per year.

Determination. This determination provides that proportionate shares will not be established for farms in the Texas Cane Sugar Producing Area for the 1974 crop of sugarcane.

A thorough review of all pertinent information indicates that the production of sugar from the 1974 crop of sugarcane will not, in the asbence of proportionate shares, be greater than the quantity needed to enable the Texas Cane Sugar Area to meet its quota and provide a normal carryover inventory.

Accordingly, I hereby find and conclude that the foregoing regulation will effectuate the applicable provisions of the Sugar Act of 1948, as amended.

Effective date: August 7, 1973.

Signed at Washington, DC on: August 2, 1973.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.73-16279 Filed 8-6-73;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Papaya Reg. 3, Amdt. 2]

PART 928—PAPAYAS GROWN IN HAWAII

Limitation of Shipments

This amendment to Papaya Regulation 3, as amended (37 FR 28410; 38 FR 2959) requires that all papayas handled grade at least Hawaii No. 1 grade. Such fruit when handled to destinations within the production area must weight at least 14 ounces while papayas grading Hawaii Fancy must weigh not less than 16 ounces. The current regulation, in regards to handling within the production area, permits Hawaii No. 2 grade fruit which must weigh not less than 12 ounces. Ample supplies of papaya of the Hawaii No. 1 and higher grades are available to supply the market. The proposal was recommended by the Papaya Administrative Committee established pursuant to the said marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The 1973 crop of Hawaiian papayas is estimated at 33 million pounds, 31 percent larger than last year's record crop of 25.1 million pounds. Fresh shipments are expected to account for 88 percent of the total produced and will approximate 29 million pounds. Slightly less than half of the fresh shipments are for local consumption with most of the remainder shipped to the mainland.

The committee estimates that production in the last six months of this year will total 17.8 million pounds, 12 percent greater than the January-June period of this year and 34 percent more than July-December last year.

Findings. (1) Pursuant to the marketing agreement and Order No. 928 (7 CFR Part 928), regulating the handling of papaya grown in Hawaii, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the Papaya Administrative Committee, and upon other available information, it is hereby found that the limitation of shipments of papaya, as hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) The recommendation by the Papaya Administrative Committee reflects current appraisal of the 1973 Hawaiian papaya crop and the current and prospective market conditions for such fruit. Shipments of Hawaiian papayas are now in progress and current regulations permit handling of Hawaiian No. 2 grade papayas within the production area. The amendment will provide fruit of a more desirable quality to the Hawaiian consumer without materially reducing the total supply available, while standardizing the quality of all papayas offered for consumption throughout the United States.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than the date hereinafter specified. A telephone meeting was held by the Papaya Administrative Committee, after giving due notice hereof, to consider the need for increasing the quality of papayas being handled within the State of Hawaii and the recommendation and supporting information where promptly submitted to the Department after such meeting was held.

Shipments of the current crop of such papayas are currently underway; this regulation should be applicable to all such shipments in order to effectuate the declared policy of the act; the regulatory provisions of this amendment are identical with the aforesaid recommendation of the committee, information concerning such provisions and effective time has been disseminated among handlers of such papayas; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof. Such committee

[4] In just New York and Chicago, there are approximately 20 UHF channel assignments within 75 miles of those cities, a number of which are idle.

[5] Commissioners Burch, Chairman; Johnson, Reid, and Wiley concurring in the result; Commissioner H. Rex Lee absent.

V 38 151 AUG 7 73 XUM

meeting was held on July 20, 1973.

Order. During the period August 8, 1973 through September 9 Subparagraph (a)(1) of § 928.303 is revised to read as follows:

§ 928.303 **Papaya Regulation 3.**

(a) • • •

(1) To any destination within the production area unless said papayas grade at least Hawaii No. 1 and are of a size which individually weigh not less than 14 ounces: *Provided,* That papayas may be shipped if they grade Hawaii Fancy and are of a size which individually weigh not less than 16 ounces.

• • • • •

Dated: August 3, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[21 CFR Parts 301, 311]

MANUFACTURE & IMPORT OF CONTROLLED SUBSTANCES

Extension of Time for Filing Comments

On July 6, 1973, the Drug Enforcement Administration published a notice of proposed rule making in the FEDERAL REGISTER (38 FR 18032) regarding application procedures for the registration and reregistration of bulk manufacturers and importers of schedule I and II substances. At the request of an interested party the time for filing comments and objections has been extended.

All interested persons are invited to submit their comments and objections in writing regarding this proposal. Comments and objections should be submitted in quintuplicate to the Hearing Clerk, Office of Chief Counsel, Drug Enforcement Administration, Department of Justice, Room 611, 1405 I Street, NW., Washington, D.C., 20537, and must be received no later than August 30, 1973.

Dated: July 30, 1973.

JOHN R. BARTELS, Jr.,
Acting Administrator, Drug Enforcement Administration.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 931]

FRESH BARTLETT PEARS GROWN IN OREGON AND WASHINGTON

Proposed Handling Limitations

This notice proposes to extend the regulatory requirements of Bartlett Pear Regulation 8 from September 2, 1973, to August 31, 1974. Such extension is designed to provide consumers with an ample supply of acceptable quality pears. Bartlett Pear Regulation 8 requires that pears in several commonly used containers grade U.S. No. 1 grade and be 180 size, although U.S. No. 2 grade pears may be handled if at least 150 size. Bartlett pears in the western lug shall grade at least U.S. No. 2, and have a minimum size of 2¼ inches. Pears in 14 to 15 pound, net weight, containers shall grade at least U.S. No. 2 and have a minimum size of 2⅛ inches.

Notice is hereby given that the Department is considering the following proposal of the Northwest Fresh Bartlett Pear Marketing Committee, established under the marketing agreement and Order No. 931 (7 CFR Part 931), regulating the handling of Bartlett Pears grown in Oregon and Washington, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposal would extend the grade, size, pack and container limitations, in Bartlett Pear Regulation 8, for the period September 3, 1973, through August 31, 1974.

The recommendation of the Northwest Fresh Bartlett Pear Marketing Committee reflects its appraisal of the need for continued regulation on and after September 3, 1973, based on current and prospective market conditions. The Washington-Oregon Bartlett pear crop is estimated at 191,000 tons, compared with last season's production of 150,000 tons. Total fresh shipments are expected to total 54,112 tons. This proposed amendment to Bartlett Pear Regulation 8 is designed to prevent the handling on and after September 3, 1973, of lower quality and smaller size Bartlett pears and provide orderly marketing in the interest of producers and consumers, consistent with the objectives of the act.

The proposal is as follows:

Amend paragraph (a) of Bartlett Pear Regulation 8 (38 FR 20234) to read as follows:

§ 931.308 **Bartlett Pear Regulation 8.**

(a) *Order.* During the period August 1, 1973, through August 31, 1974, no handler shall handle any lot of Bartlett pears unless such pears meet the following applicable requirements, or are handled in accordance with subparagraphs (4) or (5) of this paragraph:

• • • • •

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112–A, Administration Building, Washington, D.C. 20250, not later than August 16, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 2, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-16277 Filed 8-6-73;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 3]

LABELING OF NONSTANDARDIZED BAKERY PRODUCTS FORTIFIED WITH VITAMINS AND IRON

Notice of Termination of Proposed Rule Making

A proposed statement of policy concerning labeling of nonstandardized bakery products fortified with vitamins and iron was published in the FEDERAL REGISTER of January 20, 1971 (36 FR 928).

Subsequently, an order published in the FEDERAL REGISTER of March 14, 1973 (38 FR 6951), adding § 1.17 to Part 1 of Title 21, established comprehensive rules governing nutrition labeling of foods.

Section 1.17 applies to foods including nonstandardized bakery products, and its publication renders this proposed statement of policy unnecessary and obsolete.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047–1048, as amended, 1055; 21 U.S.C. 341, 371(a)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), notice is hereby given that the above identified proposal in the matter of labeling of nonstandardized bakery products fortified with vitamins and iron is terminated.

Dated: July 27, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-16171 Filed 8-6-73;8:45 am]

Social Security Administration

[20 CFR Part 422]

ORGANIZATION AND PROCEDURES

Issuance of Social Security Numbers

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendments to the regulations set forth in tentative form are proposed by the Acting Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. The proposed amendments implement, for the most part, section 137 of the Social Security Amendments of 1972 (P.L. 92–603) which (1) directs the Secretary to take affirmative measures to assign social security numbers to aliens at the time of their lawful admission to

V 38-151 AUG 7 73 XUM

the United States for permanent residence or under other authority of law permitting them to engage in employment in the United States, to other aliens at such time as their status is so changed as to make it lawful for them to engage in employment, and to members of other groups or categories of individuals, and (2) directs the Secretary to require applicants for social security numbers to furnish evidence to establish their age, citizenship, or alien status, and true identity, and to furnish evidence to enable the Secretary to determine whether a social security number has previously been assigned to the individual and, if so, the number already assigned. The proposed amendments to the regulations also reflect the new procedures for issuance of social security numbers from the Central Office of the Social Security Administration. These measures are designed to enable the Secretary to more effectively carry out his responsibilities of establishing and maintaining records of earnings for individuals.

The proposed amendments to the regulations also provide for the issuance of social security numbers for a nonwork purpose to aliens who are legally in the United States but without authority to engage in employment. They also provide in § 422.107(d) that the Social Security Administration will furnish to the Immigration and Naturalization Service, under specified conditions, certain information obtained in connection with an application for a social security number by an alien, or in connection with the issuance of the number. For example, it is proposed that the Immigration and Naturalization Service will be notified where an alien applicant refuses to comply with a request for information, or where earnings are reported by an employer for an alien who has been issued a number for a nonwork purpose. This proposal is a change from the present policy of furnishing information about aliens to the Immigration and Naturalization Service only in response to specific requests.

Additional regulations are being developed for measures to be taken in connection with issuance of social security numbers to welfare program beneficiaries, and for a definition of the term "benefits under any program financed in whole or in part from Federal funds" as a basis for enumeration policies with respect to persons who are applicants for or recipients of such benefits.

Prior to the final adoption of the proposed amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare Building, Fourth and Independence Avenue SW., Washington, D.C. 20201, on or before September 6, 1973.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Public Affairs, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue SW., Washington, D.C. 20201.

The proposed amendments to the regulations are to be issued under the authority contained in sections 205 and 1102, 53 Stat. 1368, as amended, and 49 Stat. 647, as amended; 42 U.S.C. 405 and 1302.

(Catalog of Federal Domestic Assistance Program Nos. 13.800–13.806, Social Security)

Dated: June 26, 1973.

ARTHUR E. HESS,
Acting Commissioner of Social Security.

Approved: July, 31, 1973.

CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare.

Subpart B of Regulation No. 22 is amended as set forth below.

1. Section 422.103 is revised to read as follows:

§ 422.103 Social security numbers for employees and self-employed persons.

(a) *General.* The Social Security Administration maintains a record of the earnings reported for each individual. (When an individual obtains a social security number card, a social security earnings record is set up.) The individual's name, together with the number on the card, identifies the record so that the wages or self-employment income reported for or by the individual can be properly posted to such individual's record. Additional procedures concerning social security numbers may be found in Internal Revenue Service, Department of the Treasury regulation 26 CFR 31.-6011(b)–2.

(b) *Applying for a number.* Every individual required to have a social security number may apply for one by filing Treasury Department Form SS–5, "Application for Social Security Number," at any local social security office, or, if the individual is in the Philippines, at the Veterans' Administration Regional Office, Manila, Philippines. Form SS–5 may be obtained at:

(1) Any local social security office;

(2) The Social Security Administration, Baltimore, Maryland 21235;

(3) Offices of District Directors of Internal Revenue;

(4) U.S. Postal Service offices (except the main office in cities having a social security office);

(5) U.S. Employment Service offices in cities which do not have a social security office; and

(6) The Veterans' Administration Regional Office, Manila, Philippines.

Upon request, the social security office will distribute a quantity of application forms SS–5 to labor unions, employers, or other representative organizations.

(c) *Assignment procedure.* Social security numbers are assigned by the Central Office of the Social Security Administration in Baltimore, Maryland. Upon receipt of a completed form SS–5, the local social security office, or the Veterans' Administration Regional Office, Manila, Philippines, will require the applicant to furnish evidence, as necessary, to assist the Social Security Administration in establishing his or her age, citizenship, alien status, true identity, and previously assigned social security number(s), if any. (See § 422.107 for evidence requirements.) Upon satisfactory establishment of the pertinent items, the social security office or Veterans' Administration Regional Office forwards the application to the Social Security Administration Central Office for checking against the Administration's files. If the applicant requests a social security number card immediately, a temporary unnumbered card (form OAAN–5028) will be issued. If the investigation does not disclose a previously assigned number, the Central Office assigns a number and forwards to the applicant Form OA–702, "Social Security Number Card." If the investigation discloses a previously assigned number, a duplicate social security number card is issued to the applicant. For issuance of social security numbers to aliens and other groups or categories, see § 422.104.

(d) *Replacement of lost or damaged social security number card.* In case of loss of or damage to the social security number card, a duplicate card bearing the same number will be issued. If the individual has the "stub" portion of the card or the damaged card in legible condition, any local social security office or the Veterans' Administration Regional Office, Manila, Philippines will issue the duplicate card. In all other instances the individual should submit a properly completed application for a social security number (form SS–5).

2. Section 422.104 is added to read as follows:

§ 422.104 Assignment of social security numbers to groups and categories of persons.

In carrying out its responsibilities of establishing and maintaining a record of earnings reported for each individual, the Social Security Administration, to the maximum extent practicable, shall assign social security numbers to members of groups and categories as follows:

(a) To aliens at the time of their lawful admission to the United States either for permanent residence or under other authority of law permitting them to engage in employment in the United States;

(b) Upon request, to aliens who are legally in the United States but not under authority of law permitting them to engage in employment, but only for a nonwork purpose (see § 422.107(d)(1) and (2));

(c) To other aliens already in the United States at such time as their status is so changed as to make it lawful for them to engage in employment in the United States;

(d) To any individual who is an applicant for or recipient of benefits under any program financed in whole or in part from Federal funds, e.g., an applicant for or recipient of periodic benefits or other financial assistance to persons in need provided by "grants to States" programs under the Social Security Act, including any child on whose behalf such benefits are claimed by another person; and

(e) To any other individual when it appears that he could have been but was not assigned a social security number under paragraph (a), (b), (c), or (d) of this section, but only after satisfactory establishment of the identity of the individual, the fact that the individual does not have a previously assigned number, and the fact that the individual is not an alien who is prohibited from engaging in employment.

3. Section 422.105 is added to read as follows (present §§ 422.105 and 422.110 are renumbered §§ 422.110 and 422.112 respectively):

§ 422.105 Obtaining applications from immigrants and certain nonimmigrant classes.

As a part of the visa process, United States consular offices throughout the world obtain applications for social security numbers from immigrants entering the United States for permanent residence, from fiances of U.S. citizens and children of these fiances. The consular office also verifies the age, identity, and alien status of these individuals. The Immigration and Naturalization Service performs a similar function with respect to aliens who are already in the United States. When an alien's status changes so as to make it lawful for such person to engage in employment, the Immigration and Naturalization Service obtains from such person an application for a social security number. After verification of the age, identity, and alien status of the individual, the consular office or the Immigration and Naturalization Service, as applicable, forwards the application to the Central Office of the Social Security Administration. If investigation does not disclose a previously assigned number, the Central Office assigns a number and forwards a social security number card to the applicant at the United States address given on the application.

4. Section 422.107 is added to read as follows:

§ 422.107 Evidence requirements.

Applicants for social security numbers are required to submit such evidence as may be necessary to establish their age, citizenship, or alien status, and true identity. An applicant is also required to submit evidence to assist the Administration in determining the existence and identity of any previously assigned number(s). In the case of a noncitizen, evidence is also required to establish whether the applicant, because of his alien status, is prohibited from engaging in employment in the United States. A social security number will not be assigned unless all of the evidence requirements are met. (For verification of age, identity, and alien status of immigrants and certain nonimmigrant classes entering the United States, see § 422.105.)

(a) *Evidence of age.* Upon request, all applicants for a social security number are required to submit evidence of age to support the date of birth alleged. Examples of the types of evidence which may be submitted are birth or baptismal certificates, school and church records, census records, insurance policies, marriage records, employment records, and passports.

(b) *Evidence of identity.* Upon request, all applicants for a social security number are required to submit corroborative evidence of their identity. Corroborative evidence of identity may consist of a driver's license, a voter registration card, a birth certificate, a passport, or other similar document serving to identify the individual. It is preferable that the document contain the applicant's signature for comparison with his signature on the application for a social security number.

(c) *Evidence of U.S. citizenship.* Generally, an allegation of U.S. citizenship by birth will be supported by the evidence of age and identity described in paragraphs (a) and (b) of this section. Upon request, however, additional evidence must be supplied. Where an applicant indicates that he is foreign born and that he is a U.S. citizen, he is required to present documentary evidence of U.S. citizenship. Any of the following is acceptable evidence of U.S. citizenship:

(1) Certificate of naturalization;

(2) Certificate of citizenship;

(3) U.S. passport;

(4) U.S. citizen identification card (INS form I–179 or I–197); or

(5) Consular report of birth (State Department form FS–240). If such required evidence is not available, and U.S. district court records do not confirm the allegation of U.S. citizenship, the Immigration and Naturalization Service will be contacted. If the Service has no record of the applicant's citizenship, a social security number will not be assigned until satisfactory evidence of U.S. citizenship is furnished.

(d) *Evidence of alien status*—(1) *Citizen of country other than Canada or Mexico.* Where the applicant is a foreign citizen (of a country other than Canada or Mexico), such applicant is required to have an Alien Registration Receipt Card (I–151) or an Arrival-Departure Record (I–94) and will be asked to produce such document. If the applicant fails to do so, a social security number will not be issued and the Immigration and Naturalization Service will be notified of these circumstances. If the applicant produces an Alien Registration Receipt Card, or produces an Arrival-Departure Record which contains an authorization to work, a social security number card will be issued. However, if the Arrival-Departure Record does not contain authorization to work and the social security number is for a work purpose, it will not be issued and the Immigration and Naturalization Service will be notified of the circumstances. If the applicant requests the number for a nonwork purpose, e.g., an Internal Revenue Service purpose, the number will be issued and the record will be annotated. In the latter case, if earnings are later reported to the Administration, the Immigration and Naturalization Service will be notified of such report.

(2) *Mexican or Canadian citizen.* If a Canadian or Mexican citizen has an Alien Registration Receipt Card or an Arrival-Departure Record, the rules in paragraph (d)(1) of this section apply. If a Canadian or Mexican citizen is legally in the United States with a border crossing card, a border visitor's permit (or, in the case of a Canadian citizen, without documentation), but does not have an Alien Registration Receipt Card or an Arrival-Departure Record, and wishes a social security number for a nonwork purpose, e.g., an Internal Revenue Service purpose, the Administration will assign a number to the applicant and issue a number card, except that the record will be annotated and, in addition, the Immigration and Naturalization Service will be notified if earnings are reported to the earnings record.

(3) *Failure to submit evidence.* In any case where an alien applicant refuses to comply with a request for evidence of citizenship or other information or where he or she furnished invalid or expired Immigration and Naturalization Service documents, the Administration will immediately notify the Immigration and Naturalization Service. If the applicant does not comply with a request for needed evidence or other information within a reasonable time, the Administration will again attempt to contact him. If there is still no response, the Immigration and Naturalization Service will be notified.

(4) *Notice to alien applicant.* An alien who applies for a social security number will be advised that information obtained by the Social Security Administration in connection with his application for, and issuance of, a social security number might be transmitted to the Immigration and Naturalization Service.

5. Section 422.108 is added to read as follows:

§ 422.108 Criminal penalties.

A person may be subject to criminal penalties for furnishing false information in connection with earnings records or for wrongful use or misrepresentation in connection with social security numbers, pursuant to section 208 of the Social Security Act and sections of Title 18 of the United States Code (42 U.S.C. 408; 18 U.S.C. 1001 and 1546).

6. Renumbered § 422.110 (former § 422.105) is revised to read as follows:

§ 422.110 Individual's request for change in record.

Form OAAN–7003, "Request for Change in Social Security Records," should be completed by any person who wishes to change the name or other personal identifying information previously

V 38-151 AUG 7 73 XUM

submitted. This form may be obtained from any local social security office or from one of the sources noted in § 422.103(b). The completed request for change in records may be submitted to any office of the Social Security Administration, or, if the individual is in the Philippines, to the Veterans' Administration Regional Office, Manila, Philippines. If the request is for a change in name, a new social security number card will be issued to the person making the request bearing the same number previously assigned.

7. Present § 422.110 is renumbered § 422.112 as follows:

§ 422.112 Employer identification numbers.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 71, 75]

[Airspace Docket No. 72-SW-74]

JET ROUTE AND REPORTING POINT

Proposed Designation

The Federal Aviation Administration (FAA) is considering amendments to Parts 71 and 75 of the Federal Aviation Regulations that would designate the United States portion of a jet route from Humble, Tex., via Houston, Tex., to Tampico, Mex., and a reporting point at the intersection of this route with Houston Oceanic CTA/FIR boundary.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before September 6, 1973, will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

As parts of these proposals relate to the navigable airspace outside the United States, this notice is submitted in consonance with the ICAO International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside the domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertain to the establishment of air navigation facilities and services necessary to promoting the safe, orderly and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting State, derived from ICAO, wherein air traffic services are provided and also whenever a contracting State accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting State accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting State, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since these actions involve, in part, the designation of a route outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854. At the request of the Department of Defense, a minimum enroute altitude of flight level 290 is proposed for this route.

The route proposed herein would be shorter than overland routes between Houston and Tampico and would have an alignment identical to that presently used by several air carrier flights when Warning Area W-228B is not being used by the Navy for its established purpose.

The airspace actions proposed in this docket would:

a. Designate the Kan, Tex., reporting point at Lat. 26°00'00" N., Long. 69°35'26" W. (intersection of the Houston, Tex., 198°T (190°M) radial and the Houston Oceanic CTA/FIR boundary.)

b. Designate J-177 to extend from Humble, Tex., via Houston, Tex., to Tampico, Mex., excluding the portion south of Lat. 26°00'00" N.

(Sec. 307(a), 1110, Federal Aviation Act of 1958, 49 U.S.C. 1348(a), 1510, Executive Order 10854, 24 FR 9565; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on July 31, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

CIVIL AERONAUTICS BOARD

[14 CFR Part 221]

[Docket No. 24415; EDR-225A]

PUBLICATION OF TARIFFS FOR SERVICES NOT ACTUALLY PROVIDED TO THE PUBLIC

Notice of Proposed Rulemaking

AUGUST 1, 1973.

Notice is hereby given that the Civil Aeronautics Board has under consideration proposed amendment of Part 221 of the Economic Regulations (14 CFR Part 221) to require that tariffs on file with the Board with respect to fares, rules, classifications, practices or services for passenger service correspond with the services actually scheduled in the particular market. The principal features of the proposed rule are set forth in the attached Explanatory Statement, and the amendment is proposed under the authority of sections 204, 403, and 404 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 758 (as amended by 74 Stat. 445) and 760; 49 U.S.C. 1324, 1373 and 1374.

Interested persons may participate in the proposed rulemaking through submission of twelve (12) copies of written data, views or arguments pertaining thereto, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All relevant matters received on or before September 7, 1973, will be considered by the Board before taking final action on the proposed rule. Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 712 Universal Building, 1825 Connecticut Avenue, NW, Washington, D.C. upon receipt thereof.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

EXPLANATORY STATEMENT

By Advance Notice of Proposed Rule Making, EDR-225, issued on April 14, 1972, the Board announced that it had under consideration the adoption of new or amended regulations which would be directed to the elimination of the practice on the part of some air carriers of maintaining tariffs representing services which were not actually provided by the carrier. (Hereafter for convenience, such tariffs will be referred to as "dormant tariffs.") The principal impetus for initiating this rule making was an action on the part of Eastern Air Lines, Inc. and Pan American World Airways, Inc. whereby the carriers ceased to offer service at the third-class fare in the Miami-San Juan market and offered in lieu thereof a newly-instituted second-class service at the previously dormant tariff rate for second-class service. Through this approach, an increase was effected in the lowest basic fare in the market without the necessity for any tariff filing and concomitantly without such increase being subject to review and possible suspension by the Board.

In the Advance Notice, the Board concluded that continuance of this practice was incompatible with the intent and purpose of the Act and the Board's responsibilities thereunder. We then suggested three possible amendments to the regulations which we believed might be effective in preventing recurrence of such a problem. Those alternatives were: (1) An amendment to the regulations absolutely prohibiting the elimination of a class of service in a market, or the institution of such service, except upon the cancellation or amendment of the appropriate tariff, or the filing of a new tariff; (2) an amendment which would subject a carrier's general schedule filings effectuating changes in services offered to the public to suspension and/or investigation by the Board; or (3) either of the above alternatives or some other restriction upon a carrier's discretion to make changes in classes of service offered in a market by general schedule filings, but only in cases where the changes have substantial impact upon the public or upon air transportation in the affected market.

Comments have been filed in response to the Advance Notice by Braniff Airways, Inc. (Braniff), Continental Air Lines, Inc. (Continental), Delta Air Lines, Inc. (Delta), Eastern Air Lines, Inc. (Eastern), Northwest Airlines, Inc. (Northwest), Southern Airways, Inc. (Southern), Trans World Airlines, Inc. (TWA), the Commonwealth of Puerto Rico (Commonwealth), the American Society of Travel Agents, Inc. (ASTA), and the General Services Administration (GSA). GSA, the Commonwealth and ASTA all support the principle that the Board should be in a position to prevent an air carrier from simply designating a class of service into or out of existence without any notice to the public or without responsibility to public complaint, but do not offer specific suggestions as to the means for effecting such regulation.[1] Two of the air carriers, Eastern and Northwest, are absolutely opposed to any action on the part of the Board aimed at eliminating the practice of maintaining dormant tariffs. They argue that the alternatives suggested in the Advance Notice are beyond the Board's statutory authority; that the public is not harmed by the existence of dormant tariffs; and that, indeed, in some instances dormant tariffs are necessary for purposes of constructing other fares. Therefore, they urge that the Board dismiss the proceeding.

The remaining air carriers appear to agree that a problem exists and generally do not oppose some regulation on the part of the Board in this area, but they oppose the alternatives set forth in the Advance Notice, and most propose alternatives which they consider more acceptable.

Braniff, in its comments, has suggested that the Board simply amend Part 221 to provide that tariffs shall not contain matter pertaining to services which the issuing carrier does not provide. Continental has suggested instead that the Board adopt a regulation requiring that dormant tariffs be canceled after a reasonable period of dormacy. It suggests a period of one year as appropriate.

Delta has urged that any regulation of dormant tariffs be applied, as suggested in the third alternative of the Advance Notice, only in markets where service changes would have substantial impact. It specifically urges that off-peak services be excepted from any new rule relating to unused tariffs.

Southern would have the Board deal with each specific problem of dormancy on a case-by-case basis rather than adopt any regulation which would have overall applicability. No regulation is suggested, however, for implementing such an ad hoc approach. In the event that the Board intends to adopt a regulation having overall application, Southern urges that it follow its third alternative limiting application to situations involving substantial impact. Southern would limit the definition of "substantial" to situations wherein the elimination by a carrier of a class of service or fare would leave the market entirely without the service (*i.e.*, elimination of a fare class by only one carrier in a multicarrier market would not be prohibited). The carrier would also limit the scope of any such regulation to only the usual daytime service classes—first, coach, thrift, economy, standard and the like.

TWA has urged that any regulation adopted by the Board to deal with dormant tariffs be strictly circumscribed to deal specifically with the factual pattern illustrated by the Miami-San Juan fare-class change. It would limit the rule not only to major markets but also to only those markets having a three-class fare structure. To accomplish this end, TWA suggests that the rule provide that where a carrier operates a three-tier service, the carrier's configuration tariff must reflect not only each class of service, but also each major market in which the lowest class fare is offered. Thus, reasons TWA, elimination of the lowest class of service in one of those markets would require an amendment to the carrier's configuration tariff which would assure the opportunity for complaint and review with possible suspension by the Board.

We find unpersuasive the arguments urging that any additional regulation by the Board in this area is both unwarranted and beyond the scope of the Board's statutory authority. The basic premise for these arguments appears to be that: (1) The Board already has adequate authority to deal with this problem through an adequacy-of-service proceeding, and (2) any attempt at further regulation in this area would run afoul of section 401(e)(4) of the Act prohibiting certificate restrictions on the right of a carrier to add or change schedules. These arguments wholly misconstrue the impact of the Advance Notice. It is not the Board's intent in this proceeding to question the propriety of any carrier's schedules nor to attempt in any way the regulation of those schedules. The matter which concerns us here and to which we address our proposed regulations is that there be an accurate correspondence between the services specified in a carrier's tariff and the services actually provided to the public. The Federal Aviation Act of 1958, and particularly section 403, clearly empowers us to adopt regulations designed to assure truth in tariff filings, and to exclude the specification in tariffs of rates and fares, etc., for which no service is provided. This clearly comports with the statutory intent that the carrier's tariffs shall be the official representations to the public and the Board of services and fares available to the public. Moreover, as in the factual situation which prompted this rule making, the maintenance of such dormant tariffs can be used to effect a fare increase which is completely insulated from review by the Board. This is clearly contrary to the requirements of the Act that fare changes be made only upon 30 days' notice and subject to complaint and to possible suspension by the Board.

Accordingly, we find unpersuasive the carrier arguments regarding lack of need or authority for the adoption of new regulations to deal with dormant tariffs. We propose, therefore, to adopt a regulation along the lines of alternative one in the advance notice requiring that tariffs be maintained in conformance with services offered. We therefore propose to add to Part 221 of the Economic Regulations two new sections which will (1) forbid the adding or dropping of a class of service in a market without corresponding amendment of the underlying tariff pursuant to which such service is offered, and (2) forbid the maintenance of tariffs for which no service is offered. The principle which these two regulations embody, that tariffs should not be maintained for service which is not in fact provided, is in our view a clearly logical corollary of the mandate of section 403 of the Act that tariffs must be maintained for all services offered. Moreover, the essence of the proposed regulations, simply that tariffs shall be truthful and accurate in their representations as to services offered and at what price, is so clearly consistent with, and indeed required by considerations of the public interest and the letter and spirit of the Act that the Board's power and duty to act in this regard is manifestly clear.

We take note that Delta urges that any proposed rules include a specific exception for off-peak fare service. In support, Delta states that the ability to provide off-peak schedules depends to a significant extent upon the first-class/day-coach schedules and equipment rotation pattern in effect at any particular time

[1] ASTA has also urged that the Board provide for increased notice to the public and to travel agents for all fare changes, but appeared to recognize that such was beyond the scope of the Advance Notice. To the extent that the ASTA comment is intended as a petition to include such issues in this rule making proceeding, we will deny the request as unduly broadening the intent and scope of this proceeding.

V 38 151 AUG 7 73 XUM

and that the schedules upon which the latter service is provided are periodically revised. As a result, the carrier states that off-peak fare service is occasionally eliminated for a period of time, and it asserts that the public and travel agents have come to expect an ebb and flow in off-peak fare services.

We are not persuaded that the burden of filing tariff changes to conform to changes in off-peak fare service warrants the exception urged by Delta. Delta has made no showing of undue burden in its comment, and the comments as a whole do not indicate that there is any particular problem necessitating an exception for off-peak fare service. On the present record we shall not, therefore, propose an exception for off-peak service or other services which may be susceptible to temporary interruption for operational reasons.[2] Nevertheless, the Board will be receptive to specific suggestions raised in comments on the proposed rule directed to exceptions which would be consistent with the purposes of the regulation and which are demonstrated to be needed to alleviate undue burden.

Under the proposed rules, the maintenance of a tariff which is or has become dormant will be inconsistent with the regulations and the issuing or participating air carrier will have the duty to promptly cancel such tariff. In the event of the air carrier's failure to so cancel pursuant to § 221.4(a) of the regulations to reject or order canceled such a tariff. However, to avoid the uncertainty which could arise, were a dormant tariff activated by the institution of service without refiling the tariff, with the accompanying potential for later rejection of the dormant tariff by the Board, the proposed rule has been drafted to provide that such rejection by the Board must occur within thirty days after the institution of service pursuant to a dormant tariff. In effect, provision of service pursuant to a dormant tariff for a period of more than thirty days will cure the dormancy.

We are not disposed to limit the prohibitions against maintenance of dormant tariffs to the particular factual pattern which prompted this rule making proceeding. Whatever their nature, dormant tariffs involve misrepresentations to the public as to the availability of services which in fact are not provided, in addition to the occasional outright abuse which, as here, develops from their existence. Moreover, except for those used for fare construction purposes for which we have already provided, we know of no need which dormant tariffs serve in terms of carriers' operational flexibility, given the rather long period of non-use which we propose to permit before declaring a given tariff dormant.

Finally we expect the carriers to put forth a good faith effort at removing existing instances or dormancy when discovered.

It is therefore proposed to amend Part 221 of the Economic Regulations (14 CFR Part 221) as follows:

1. Amend the Table of Contents by adding new § 221.8 and § 221.9.

* * * * *

221.8 Conformance between tariffs and services operated.
221.9 Dormant tariffs prohibited.

2. Add new § 221.8 and § 221.9 as follows:

§ 221.8 Conformance between tariffs and services operated.

The initiation or termination of a class of service offered in a particular market, where such change would be inconsistent with the terms of the existing tariff for that market, shall not occur except upon a contemporaneous effective amendment of the existing tariff to reflect such changed service pattern.

§ 221.9 Dormant tariffs prohibited.

(a) Tariff publications shall not contain rates, fares, or charges, or their become dormant, except that tariffs which are intended solely for use in constructing other rates or fares, when clearly designated on the face of the tariff as having such sole purpose, shall not be prohibited by this section. For purposes of this section tariff matter shall be considered as dormant when the issuing or participating carrier provides no regularly scheduled service pursuant to the given rate, fare or charge.

(b) It shall be the duty of every air carrier to promptly cancel any of its filed tariffs upon such tariff's becoming dormant. In the event such a tariff is not canceled by the air carrier, the Board may reject the tariff or require the cancellation thereof: *Provided, however,* That if, after a tariff has become dormant, new service is offered pursuant to such tariff, the power of the Board to reject or require cancellation shall terminate upon the conclusion of the thirtieth (30th) day following such institution of service.

[FR Doc.73-16235 Filed 8-6-73;8:45 am]

[2] We are of the view, however, that tariffs which are used solely for construction purposes do not create a problem of dormancy so long as these tariffs are clearly labeled as to their intended purpose. The proposed rule is drafted accordingly.

COST ACCOUNTING STANDARDS BOARD

[4 CFR Part 406]

COST ACCOUNTING PERIOD

Proposed Cost Accounting Standard

Notice is hereby given of a proposed cost accounting standard on the selection of cost accounting periods which the Cost Accounting Standards Board is considering for promulgation to implement further the requirements of section 719 of the Defense Production Act of 1950, as amended, Public Law 91-379, 50 U.S.C. App. 2168. When promulgated, the standard will be used by all relevant Federal agencies and national defense contractors and subcontractors.

The proposed standard, if adopted, will be one of a series of cost accounting standards which the Board is promulgating "to achieve uniformity and consistency in the cost-accounting principles followed by defense contractors and subcontractors under Federal contracts." (See section 719(g) of the Defense Production Act of 1950, as amended.) It is anticipated that any contractor receiving an award of a contract on or after the effective date of this standard will be required to follow it as of the date of such award.

The Cost Accounting Standards Board solicits comments on the proposed cost accounting standard from any interested person on any matter which will assist the Board in its consideration of the proposal.

Interested persons should submit written data, views, and arguments concerning the proposed cost accounting standard to the Cost Accounting Standards Board, 441 G Street, NW., Washington, D.C. 20548.

To be given consideration by the Board in its determination relative to final promulgation of the cost accounting standard covered by this notice, written submissions must be made to arrive no later than Friday, October 5, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Board's office during regular business hours.

PART 406—COST ACCOUNTING STANDARD—COST ACCOUNTING PERIOD

Sec.
406.10 General applicability.
406.30 Definitions.
406.40 Fundamental requirement.
406.50 Techniques for application.
406.60 Illustrations.
406.70 Exemptions.
406.80 Effective date.

AUTHORITY: Sec. 719 of the Defense Production Act of 1950, as amended, Public Law 91-379, 50 U.S.C. App. 2168.

§ 406.10 General applicability.

This standard shall be used by defense contractors and subcontractors under Federal contracts entered into after the effective date hereof and by all relevant Federal agencies in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and subcontract national defense procurements with the United States in excess of $100,000 other than contracts or subcontracts where the price negotiated is based on: (a) Established catalog or market prices of commercial items sold in substantial quantities to the general public, or (b) prices set by law or regulation.

§ 406.20 Purpose.

The purpose of this Cost Accounting Standard is to provide criteria for the selection of the time periods to be used for contract cost accumulation and allocation. This Standard should enhance objectivity, consistency, and verifiability; reduce the effects of variations in the flow of costs within a year; and promote uniformity and comparability in contract cost measurements.

§ 406.30 Definitions.

(a) The following definitions which are prominent in this Standard are reprinted from Part 400 of this chapter for convenience. Other terms which are used in this standard and are defined in Part 400 of this chapter have the meanings ascribed to them in that part unless the text demands a different definition or the definition is modified in paragraph (b) of this section.

(1) *Allocate.* To assign an item of cost, or a group of items of cost, to one or more cost objectives. This term includes both direct assignment of cost and the reassignment of a share from an indirect cost pool.

(2) *Cost objective.* A function, organizational subdivision, contract or other work unit for which cost data are desired and for which provision is made to accumulate and measure the cost of processes, products, jobs, capitalized projects, etc.

(3) *Fiscal year.* The accounting period for which annual financial statements are regularly prepared, generally a period of 12 months, 52 weeks, or 53 weeks.

(4) *Indirect cost pools.* Groupings of incurred costs identified with two or more cost objectives but not identified specifically with any final cost objective.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable. None.

§ 406.40 Fundamental requirement.

(a) A contractor shall use his fiscal year for contract cost accumulation and allocation purposes, except that:

(1) Costs of a function which exists only for a portion of a fiscal year may be allocated on a directly measured representation of activity or output to cost objectives of that same portion of the fiscal year;

(2) A fixed annual period other than the fiscal year may be used where it is mutually agreed that its use will assist in allocating costs to cost objectives on a causal or beneficial basis; and

(3) A transitional period other than a year may be used in connection with a change of fiscal year.

(b) Each contractor shall follow consistent practices from one fiscal year to the next in his selection of the fiscal year in which individual types of expenses and individual types of adjustments to expenses, including prior-period adjustments, are accumulated and allocated.

(c) The time period used for accumulating costs in an indirect cost pool shall be the same as the time period used for establishing its base.

§ 406.50 Techniques for application.

(a) With respect to the allocation of the costs of an indirect function which exists for only a part of the fiscal year, it is permissible to use a period corresponding to the period of existence of the function within a fiscal year where the cost is (1) material in amount, (2) accumulated in a separate pool, and (3) allocated based on an appropriate direct measure of the activity or output of the function during the same period. This Standard, however, does not require that a short period must be used.

(b) The practices to be followed consistently in accordance with the provisions of § 406.40(b) shall include appropriate techniques (such as deferrals, accruals, and other adjustments) to be used in identifying the time periods among which individual types of costs and expenses and individual types of adjustments to costs and expenses are distributed. If an expense, such as taxes, insurance or employee leave, is identified with a fixed, recurring period which is different from the contractor's fiscal year, the Standard does not require a change in that period. Rather, such expenses shall be distributed to fiscal years in accordance with the contractor's established practices for handling accruals, deferrals and other adjustments.

(c) For the purpose of expediting the settlement or closing of contracts which are terminated or completed prior to the end of a fiscal year, overhead rates other than those finally determined or negotiated may be used for that fiscal year based on a combination of actual and estimated cost data, including prior year data, for a full fiscal year.

(d) Pursuant to the provisions of § 406.40(a)(2), a contractor may, upon mutual agreement with the Government, use as his cost accounting period a fixed annual period which is other than his fiscal year, where the use of such a period is an established practice and is consistently used for managing and controlling the business, and where appropriate accruals, deferrals or other adjustments are made with respect to such annual periods. In such cases, the term "fiscal year" as used in this Standard shall be deemed to mean the agreed-upon fixed annual period.

§ 406.60 Illustrations.

(a) A contractor allocates general and administrative expenses (G&A) on the basis of total cost input. In a proposal for a covered negotiated fixed-price contract, he estimates the allocable G&A based solely on the estimated amount of the G&A pool and the amount of the total cost input base estimated to be incurred during the eight months in which performance is scheduled to be commenced and completed. Such a proposal would be in violation of the requirements of this Standard that the calculation of the amounts of both the indirect cost pools and the allocation bases be based on the contractor's fiscal year.

(b) A contractor whose fiscal year is the calendar year installs a computer service center to begin operations on May 1. The operating expense related to the new service center is expected to be material in amount, will be accumulated in a separate indirect cost pool, and will be allocated to the benefiting cost objectives on the basis of measured usage (adjusted for the scheduling priority, if any, requested). The total operating expenses of the eight-month period may be allocated to the work of that same eight-month period.

(c) A contractor's established fiscal year had been the calendar year. For valid reasons not related to contract costing, his fiscal year is changed to the 12 month period ending May 31. For financial reporting purposes he has a five-month transitional "fiscal year." The change in his fiscal year ending date is a change in accounting practices. An adjustment of the contract price may therefore be required in accordance with the contract clause set out at § 331.5 of this title.

(d) Financial reports to stockholders are made on a calendar year basis for the entire contractor corporation. However, the contractor does all internal financial planning, budgeting, and internal reporting on a "model year" basis. The contracting parties agree to negotiate overhead rates on the "model year" basis, and they agree on an acceptable technique for prorating fiscal year assignments of corporate home office expenses to model years. This agreement is an appropriate application of the Standard.

(e) Financial accounts and contract cost records are generally maintained on the basis of a fiscal year which ends November 30 each year. However, employee vacation allowances are regularly managed on the basis of a "vacation year" which ends September 30 each year. Vacation expenses are estimated uniformly during each "vacation year." Adjustments are made each October to adjust the accrued liability to actual, and the estimating rates are modified to the extent deemed appropriate. This use of a separate annual period on vacation allowance conforms to the provisions of the Standard.

§ 406.70 Exemptions.

None for this Standard.

§ 406.80 Effective date.

(a) The effective date of this Standard is [reserved].

(b) This Standard shall be followed by each contractor as of the beginning of his fiscal year next beginning after receipt of a contract to which this Standard is applicable, but in no event earlier than (Date).

ARTHUR SCHOENHAUT,
Executive Secretary.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

[Public Notice CM-48]

STUDY GROUP 6 OF U.S. NATIONAL COMMITTEE FOR INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Notice of Meeting

The Department of State announces that Study Group 6 of the U.S. National Committee for the International Radio Consultative Committee (CCIR) will meet on August 20, 1973, at 9:00 a.m. in Room 1107, Radio Building, Department of Commerce Laboratories, Boulder, Colorado.

Study Group 6 deals with matters relating to the propagation of radio waves through the ionosphere. The meeting on August 20 will consider new draft texts in the following areas which are proposed as U.S. contributions to the international meeting of Study Group 6 in 1974:

a. Ionospheric effects on satellite communications;

b. Communication parameters in ionospheric propagation;

c. Nonlinear effects in the ionosphere induced by radio waves.

Members of the general public who desire to attend the meeting on August 20 will be admitted up to the limits of the capacity of the meeting room.

Dated: July 31, 1973.

GORDON L. HUFFCUTT,
Chairman,
U.S. CCIR National Committee.

NATIONAL REGISTER OF HISTORIC PLACES

List of Additions, Deletions and Corrections

By notice in the FEDERAL REGISTER of February 28, 1973, Part II, there was published a list of the properties included in the National Register of Historic Places. This list has been amended by a notice in the FEDERAL REGISTER of March 6, (pp. 6084-6086), April 10 (pp. 9095-9097), May 1 (pp. 10745-10748), June 5 (pp. 14770-14777), and July 3 (pp. 17744-17749). Further notice is given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in accordance with section 106 of the National Historic Preservation Act of 1966, 80 Stat. 915, 16 U.S.C. 470.

The following properties have been demolished and removed from the National Register:

California

AREA DIRECTORS, ET AL.

Delegation of Authority

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant to the Secretary for Indian Affairs in Amendment 2 to Secretarial Order 2950.

Section 3.1 of 10 BIAM was published on page 813 of the January 4, 1973, FEDERAL REGISTER (38 FR 813). It is being amended to give the Project Officer of the Joint Use Administrative Office similar authorities to those given to Area Directors.

As amended, 10 BIAM 3.1 reads as follows:

3.1 *Authorities from the Commissioner.* The authorities of the Secretary of the Interior delegated to the Commisisoner in Secretarial Order 2508 (10 BIAM 2.1), 25 CFR, 43 CFR 2.6, and 43 CFR 417.5 are hereby redelegated to the Area Directors; the Director of Southeastern Agencies; and the Project Officer, Joint Use Administrative Office.

This redelegation also includes future authorities of the Secretary of the Interior to the Commissioner which:

A. Do not by their own terms disallow exercise by officials below the Commissioner;

B. Are not within the generally applicable exceptions in section 3.3 below; or

C. Are not expressly excluded, by additional provisions to this Chapter, from being exercised by officials below the Commissioner.

MARVIN L. FRANKLIN,
Assistant to the Secretary of the Interior.

[FR Doc.73-16191 Filed 8-6-73;8:45 am]

DEPARTMENT OF AGRICULTURE

Office of the Secretary

NATIONAL MEAT AND POULTRY INSPECTION ADVISORY COMMITTEE

Notice of Reestablishment

Pursuant to section 9(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), and after consultation with the Office of Management and Budget, notice is hereby given that the Secretary of Agriculture has reestablished the National Meat and Poultry Inspection Advisory Committee. Reestablishment of this Committee is in the public interest in connection with the duties imposed on the Department by law.

The purpose of this Committee is to provide advice to the Department of Agriculture on the broad range of its activities concerning State and Federal programs with respect to meat and poultry inspection and related matters within the scope of the Wholesome Meat Act and the Wholesome Poultry Products Act. Membership on this Committee consists of individuals who are responsible for or engaged in State meat and poultry inspection systems.

Dated: August 2, 1973.

JOSEPH R. WRIGHT, JR.,
Assistant Secretary for Administration.

[FR Doc.73-16278 Filed 8-6-73;8:45 am]

DEPARTMENT OF COMMERCE

Domestic and International Business

COLLEGE OF PHYSICIANS & SURGEONS OF COLUMBIA UNIVERSITY

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00517-33-46040. Applicant: College of Physicians and Surgeons of Columbia University, Department of Pathology—15th floor, 630 West 168th Street, New York, N.Y. 10032. Article: electron microscope, model Elmiskop IA. Manufacturer: Siemens, West Germany. Intended Use of Article: The article is intended to be used for studies of human brain biopsies, experimental animals (BALB mice), tissue culture cells (Hamster cells), viruses (including Harvery virus, and Picronavirus), human fibroblasts, HeLa cells, Vero, L, KB, H Ep 2, and MDBK and myoblast cell lines. Ultrastructural changes in cells organelles and membranes associated with exposure to Murine Sarcoma Virus and the effects of carcinoidal agents will be investigated. A separate study will examine effects of cytochalasin D (CD) on various cell lines with particular attention to aggregations of microfilaments and effects of CD on fibrillogenesis in cell cultures of human fibroblasts. A separate study will also be made of murine sarcoma virus examining ultrastructurally for cell changes and tracing the development of the viruses at cell surfaces. Effects of altered polyamine concentrations on virus development and tumor transformation is also to be studied using aminoguanidine, a diamine oxidase inhibitor. In addition the article is to be used for training of selected residents involved in research projects.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article has a specified resolving capability of 3.5 Angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forgflo Corporation. The Model EMU-4C has a specified resolving capability of 5 Angstroms. (The lower the numerical rating in terms of Angstrom units, the better the resolving capability.) We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated July 20, 1973 that the additional resolving capability of the foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C is not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

[FR Doc.73-16216 Filed 8-6-73;8:45 am]

STANFORD UNIVERSITY HOSPITAL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00523-33-46500. Applicant: Stanford University Hospital, 820 Quarry Road, Palo Alto, Calif. 94304. Article: Ultramicrotome, model LKB 8800 A. Manufacturer: LKB Produkter AB, Sweden. Intended Use of Article: The article is intended to be used in the processing and cutting of myriad types of tissues for various members of the faculty. The article will also be used for analyzing all routine renal biopsies for the hospital.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: Examination of the applicant's thin sections under the electron microscope will provide optimal information when such sections are uniform in thickness and have smoothly cut surfaces. Conditions for obtaining high quality sections depend to a large extent on the properties of the specimen being sectioned (e.g., hardness, consistency, toughness, etc.), the properties of the embedding media and the geometry of the block. In connection with prior case (Docket No. 69-00665-33-46500) which relates to the duty-free entry of an identical foreign article, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting, (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior case (Docket No. 70-00077-33-46500) relating to the duty-free entry of an identical foreign article, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness, etc." requires a maximum range in cutting speed and, further, that "The production of ultrathin serial sections of specimens that have great variation in physical properties is very difficult." The foreign article has a cutting speed range of 0.1 to 20 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by HEW in its memorandum of July 20, 1973 that cutting speeds in the excess of 4mm/sec. are pertinent to the applicant's research studies.

We therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director Special Import Programs Division.

[FR Doc.73-16213 Filed 8-6-73;8:45 am]

SUPERIOR AUDIO REHABILITATION CORP.

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 30 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00521-99-03400. Applicant: Superior Audio Rehabilitation Corp., 823 Belknap Street, Superior, Wisconsin 54880. Article: Auditory Training Unit consisting of one each; Selective Auditory Filter Amplifier, Friction Indicator, Set of Ten Vibrators, Selector and Intensity Indicator. Manufacturer: Institute for Experimental Phonetics and Speech Pathology, Yugoslavia. Intended use of article: The article is intended to be used for intensive group and individual training in the language and communication classes for the deaf and hard of hearing children (kindergarten through ninth grade).

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The article provides a variety of modalities for selective amplification in the 80 to 120 decibel range and filtering with visual and tactile outputs. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated July 20, 1973 that the capabilities described above are pertinent to the applicant's use in interactive individual and group teaching of language and communication to hard of hearing children. HEW also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

[FR Doc.73-16214 Filed 8-6-73;8:45 am]

TULANE UNIVERSITY, ET AL.

Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before August 27, 1973.

Amended regulations issued under cited Act, as published in the February 24, 1972 issue of the FEDERAL REGISTER, prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00017-33-46040. Applicant: Tulane University, Delta Regional Primate Reseach Center, Covington, Louisiana 70433. Article: Electron Microscope, Model Elmiskop 101. Manufacturer: Siemens AG, West Germany. Intended Use of Article: The article will be used to examine neoplastic and other pathological tissues of nonhuman primates for evidence of viruses that can be correlated with the disease. Particular emphasis will be placed on the recognition of viral particles in tumor tissues

V 38 - 151 AUG 7 73 XUM

arising spontaneously or by experimental induction in nonhuman primates. Viral particles as small as 20 nm in diameter lying within the ultrastructure of infected cells will be examined. In addition quantitative ultrastructural determinations of the effects of environmental insults on presynaptic and post synaptic dense material or specializations, types of synaptic vesicles and on differentiation of various types of synapses will be performed. Subtle alterations in cytoplasmic and pre- and postsynaptic membrane structure and relationships, synaptic clefts, and glia/neuron relationships will be under investigation. The objectives pursued in the course of these investigations are: (1) Recognition and description of viral pathogens for diagnosis of clinical disease, (2) determination of viral etiology in naturally occurring and experimentally induced neoplastic diseases, (3) a better understanding of tumor induction by viruses and viral replication or latency in infected primates, (4) to determine the effects of ionizing irradiation on growth of the brain and ultrastructural maturation of the cerebral cortex in the squirrel monkey, (5) to determine the effects of postnatal malnutrition on the ultrastructural maturation of brain and on learning, neurochemistry and general growth of the brain in infant squirrel monkeys, and (6) to evaluate the effects of chronic radiation on aging changes including ultrastructural alterations in the brain of the rat and rhesus monkey.

The article will also be used in a Freshman neuroscience (neuroanatomy) course in which electron micrographs of brain tissues from normal and experimental subjects will be employed in lectures and other instructional programs to provide instruction in principles of neuroscience as applied to the practice of medicine. Application received by Commissioner of Customs: July 9, 1973.

Docket Number: 74–00018–01–11000. Applicant: Yale University, Purchasing Department, 260 Whitney Avenue, New Haven, Connecticut 06520. Article: Gas Chromatograph-Mass Spectrometer, Model MAT–111 and accessories. Manufacturer: Varian MAT GmbH, West Germany. Intended Use of Article: The article will be used for the separation and structure identification of the endogenous metabolites in blood and urine from patients with metabolic diseases and also from control subjects. The main emphasis will be placed on the analysis of organic acids and amino acids. However, fatty acids, sterols, steroids and sugars will also be analyzed. Application received by Commissioner of Customs: July 11, 1973.

Docket Number: 74–00019–33–46500. Applicant: New York State Institute for Basic Research in Mental Retardation, 1050 Forest Hill Road, Staten Island, New York 10314. Article: Ultramicrotome, Model Om U3. Manufacturer: C. Reichert Optische Werke, Austria. Intended Use of Article: The article will be used to examine through serial sectioning, the nuclear and cytoplasmic ultrastructural characteristics of human blast-like cells derived from short term leucocyte cultures with the objective of screening large populations of individuals as well as cells, which have been exposed to different in vivo or in vitro environmental conditions with the hope of delineating striking and/or subtle differences between various individuals or groups of individuals and perhaps, further defining mentally retarded populations. The article will also be used for training research scientists as well as assistants in specimen preparation for electron microscopy and to make available demonstrations for students and professionals touring the laboratory. Application received by Commissioner of Customs: July 5, 1973.

Docket Number: 74–00021–37–46040. Applicant: Children's Hospital of Philadelphia, Department of Pathology, 18th and Bainbridge Streets, Philadelphia, Pennsylvania 19146. Article: Electron Microscope, Model EM 201. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended Use of Article: The article will be used in the following research and clinical diagnostic projects:

(1) Research into the role of bilirubin in the pathogenesis of intrahepatic cholestasis, as investigated through the manganese-bilirubin model, with studies on bile composition;

(2) Research into the effect of Novobiocin on bile flow rate, and the pathogenesis of such effects, with studies of bile composition;

(3) Research into the evolution of the pathologic lesions of childhood inherited renal disease, particularly cystinosis, in order to elucidate the mechanisms of tissue injury in this disease;

(4) Study of renal biopsy material for the purposes of diagnosis, prognostication, and evaluation of therapeutic approaches in childhood renal disease;

(5) Examination of tumors for the purpose of diagnosis classification, and evaluation of therapy; and

(6) Examination of various other tissues removed in the course of surgical and/or autopsy procedures for diagnosis of conditions in which this procedure is of established value (e.g., primary myopathies, storage disorders, etc.)

The article will also be used in the following educational projects:

(1) Ongoing training of pathology and pediatric trainees and medical students on electives in pediatric pathology in the use and application of electron microscopy in research and human disease;

(2) Preparation of electron micrographs of normal and pathologic material for use in conferences for the instruction of practicing physicians; and

(3) Preparation of electron micrographs of normal and pathologic material for use in the instruction of medical students in pediatrics and in sophomore pathology.

Application received by Commissioner of Customs: July 11, 1973.

Docket Number: 74–00022–01–07500. Applicant: University of Florida, Department of Materials Science and Engineering, Gainesville, Florida 32611. Article: LKB Batch Microcalorimeter, Model 10700–2. Manufacturer: LKB Produkter AB, Sweden. Intended Use of Article: The article is intended to be used for teaching and research in the general area of surface reactions between liquids and various solid substrates. In particular, it will be used to determine the heats of reaction between polyelectrolytes and phosphate slimes and to measure the energy evolved when collagen-like polypeptides interact with powdered glasses. Application received by Commissioner of Customs: July 11, 1973.

Docket Number: 74–00023–33–90000. Applicant: University of Iowa Hospitals & Clinics, Newton Road, Iowa City, Iowa 52242. Article: EMI Scanner system. Manufacturer: EMI Limited, United Kingdom. Intended Use of Article: The article will be used to evaluate a diagnostic technique based on studying differential absorption coefficients of tissue densities within the skull. Application received by Commissioner of Customs: July 11, 1973.

Docket Number: 74–00024–33–46040. Applicant: University of Virginia School of Medicine, Department of Neurological Surgery, Charlottesville, Virginia 22901. Article: Electron Microscope, Model HU–12A and accessories. Manufacturer: Hitachi, Ltd., Japan. Intended Use of Article: The article will be used for an ultrastructural analysis of central nervous system tissue. The following problems will be under investigation:

1. Examination of the ultrastructure of normal and abnormal synaptic types in the visual cortex of the rat and tree shrew, especially the investigation of the lower laminae of visual cortex after laminar lesions have been made on the surface of the cortex. In this study the degenerating boutons will be examined at different survival times in the attempt to determine if there is a selective loss of certain types of synapses on particular areas of the neuron or its processes with the hope of correlating the behavioral changes induced by this lesion with the morphological changes seen with the electron microscope.

2. Examination of the morphology of normal and abnormal synaptic complexes. This involves determining whether the synapses fall into symmetrical or asymmetrical categories as determined by differences in the synaptic cleft and vesicle size and shape. The capability for a high degree of tilt at high resolution is also of high priority for examining the region of the synaptic cleft and more importantly the postsynaptic density. In addition, this analysis will include serial section composites of normal and abnormal neurons, processes and synaptic complexes in different laminae under investigation.

Application received by Commissioner of Customs: July 5, 1973.

Docket Number: 74–00025–33–46040. Applicant: Louisiana State University and A & M College, School of Veterinary Medicine, Baton Rouge, LA 70803. Article: Electron Microscope, Model EM 10. Manufacturer: Carl Zeiss, West Germany. Intended Use of Article: The foreign article will be used for research and educational programs related to the professional curriculum at the applicant institution. This consists of faculty research and curriculum objectives which are divided into three phases, i.e., Phase I, basic sciences, (normal biochemistry, ultrastructure, microstructure, gross structure and normal functions of the various cells, tissues and organs of the body); Phase II, preclinical sciences, (abnormal structure and function) and Phase III, clinical sciences, (involving complexities related to diagnosis of various animal diseases). In Phase I (nine courses) the article will be used to strengthen didactic methodology in meeting instructional objectives and students achievement criteria, in Phase II (4 courses) the article will be used to define the ultrastructure of animal viruses as well as to associate viral ultrastructure with cytopathic changes occuring in invaded animal cells and in Phase III (2 courses) the article will be used as a tool for teaching diagnostic pathology. Application received by Commissioner of Customs: July 5, 1973.

Docket Number: 74–00026–33–46040. Applicant: Bridgewater State College, Bridgewater, Mass. 02324. Article: Electron Microscope, Model EM 9S–2. Manufacturer: Carl Zeiss, West Germany. Intended Use of Article: The article will be used in, or in conjunction with, several biology courses for the training of college freshmen, sophomores, juniors and seniors in the techniques of electron microscopy and the operation of the electron microscope. Application received by Commissioner of Customs: July 11, 1973.

Docket Number: 74–00027–33–46040. Applicant: Leo Goodwin Institute for Cancer Research, 3301 College Avenue, Fort Lauderdale, Florida 33314. Article: Electron Microscope, Model EM 201. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended Use of Article: The article is intended to be used in a number of programs concerned with the nature of malignant disease. These include investigations of viral and chemically induced tumors; the immune response in experimental cancers; the search for viruses in human and animal tumors; development of new chemotherapeutic drugs and the biochemical changes in malignant transformations.

The article will also be used in graduate courses leading to the Ph.D. degree in microbiology. Pre-doctoral as well as domestic and international post-doctoral students are to be trained in virology, immunology, biochemistry and cytology which includes instruction in basic principles of electron microscopy as well as related techniques in photography. After appropriate training, selected students will be permitted to operate the article independently in the conduct of their own thesis research. Application received by Commissioner of Customs: July 9, 1973.

Docket Number: 74–00029–33–46040. Applicant: The University of Iowa, Department of Anatomy, Iowa City, Iowa 52242. Article: Electron Microscope, Model EM 201 and accessories. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended Use of Article: The article will be used for research in (1) collateral nerve sprouting (2) fine structure of interneurons and synapses (3) electron-microscopic and EM radio autographic studies of the synthesis and release of hormones produced in the hypothalmus and (4) ultrastructural study of electron-dense particles in the cholinergic synaptic vesicles. The article will also be used in teaching courses in electron microscopy to graduate students and faculty members. Application received by Commissioner of Customs: July 9, 1973.

A. H. STUART,
Director, Special Import Programs Division,

[FR Doc.73–16219 Filed 8–6–73;8:45 am]

UNIVERSITY OF OREGON

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73–00520–33–09300. Applicant: University of Oregon, Department of Chemistry, Eugene, Oreg. 94703. Article: Microcell for T-Jump, gold electrodes. Manufacture: Messanlagen Studiengesellschaft m.b.H., West Germany. Intended Use of Article: The article is intended to be used in a scholarly research study of conformation changes in model biological macromolecules. The article will also be used by graduate and undergraduate students in the pursuit of their respective research projects.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to a compatible accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes.

The Department of Commerce knows of no similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

A. H. STUART,
Director Special Import Programs Division.

[FR Doc.73–16215 Filed 8–6–73;8:45 am]

UNIVERSITY OF MICHIGAN

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73–00513–33–46040. Applicant: The University of Michigan, Department of Environmental and Industrial Health, 109 South Observatory, Ann Arbor, Mich. 48104. Article: Electron microscope, model Corinth 275. Manufacturer: AEI Scientific Apparatus, Ltd., United Kingdom. Intended Use of Article: The article is intended to be used for research purposes to examine ultrathin sections and freeze etch replicas of biological materials. Specifically, the article will be used to elucidate the structural differences of epidermal desmosomes in normal epidermis and in chemically induced basal cell carcinoma (BCC) (epidermis) of rats as a model system. This study is part of an overall research program to determine the structural and biochemical characteristics of epidermal cancer and to further our knowledge of the epidermal differentiation process. A second research for which the article is intended to be used deals with the general area of subcellular responses to environmental stress. The response of interest in this study is the formation of the autophagic vacuoles (AV), an intracellular organelle which has some enzymatic properties of lysosomes and consists of a series of wholed myclin-like membranes inside of which are trapped components of the cell such as mitochondria, peroxisomes, endoplasmic reticulum, glycogen, etc. In addition the article is to be used for educational purposes in the following courses:

Environmental and Industrial Health (EIH) 536,
Introductory Biochemistry—Biochem 416,
Elements of Environmental Biology EIH 507,
Microbial Elology EIH 576,
Fund. of Instrumental Methods of Chemical Analysis, and
Thesis Research EIH 995.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The applicant requires an electron microscope which is suitable for instruction in the basic principles of electron microscopy. The foreign article is a relatively simple, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programming. The most closely comparable domestic instrument is the Model EMU–4C electron microscope manufactured by the Forgflo Corporation. The Model EMU–4C electron microscope is a relatively complex

V 38 - 151 AUG 7 73 XUM

instrument designed for research, which requires a skilled electron microscopist for its operation. We are advised by the Department of Health, Education, and Welfare in its memorandum dated July 20, 1973 that the relative simplicity of design and ease of operation of the foreign article is pertinent to the applicant's educational purposes. We, therefore, find that the Model EMU-4C electron microscope is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

[FR Doc.73-16217 Filed 8-6-73;8:45 am]

WEST VIRGINIA UNIVERSITY SCHOOL OF MEDICINE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00475-33-46500. Applicant: W.V.U. School of Medicine, Department of Anesthesiology, Morgantown, W. Va. 26506. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended Use of Article: The article is intended to be used in carrying out experiments on the normal, physiological structure of cells and tissues in regard to the transport and ingestion of macromolecules. In addition, variations in the structure of cells and tissues under experimental pathological conditions will be studied. Special projects include: (1) The passage of protein tracers into skeletal muscle cells during pathological conditions induced by degeneration; (2) immunocytochemical localization of autonomic nervous system proteins; and (3) autoradiographic localization of anesthetic agents at the level of the electron microscope. Studies will be conducted to determine the effect of anesthetic agents on lung cytology and to study the damage of lung tissue resulting from pulmonary edema. The article will also be used for graduate level teaching in various courses depending on students point of origin.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The applicant requires an instrument that allows systematic solution of sectioning problems as an aid in teaching standard techniques in microtomy at the graduate student level. The foreign article provides a knife-edge viewing system consisting of a rotatable microscope and light source, which is equipped with scales for measuring the true angle at the knife edge to an accuracy of one degree, thereby facilitating precise knife angle settings. The article also provides a mobile dual light system which can be positioned in a manner that contributes to accurate adjustment of block face and knife edge alignment, and a wide range of cutting speeds (0.1 to 20 millimeters/second (mm/sec)) which facilitates sectioning in situations involving a large variety of specimens and embedding materials. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B can be provided with a spot illuminator which provides a means for visual inspection of the knife edge and selection of that portion of the edge that is free from defects.

Knife edge angle can be roughly estimated during this inspection. Cutting speeds of the MT-2B range from 0.09 to 3.2 mm/sec. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated June 22, 1973 that the Sorvall Model MT-2B does not have the capability for accurately measuring the true knife edge angle. HEW further advises that the features of the article which allow systematic variation of sectioning parameters such as the knife edge angle measurement and the dual illumination system are pertinent to the applicant's educational purposes. HEW cites as a precedent its prior recommendation relating to Dockets No. 72-00026-33-46500 and 73-00317-33-46500 which conform in certain particulars to the captioned application.

For the foregoing reasons, we find that the Sorval Model MT-2B is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

Maritime Administration

[Docket No. S-378]

PACIFIC FAR EAST LINE, INC. AND WATERMAN STEAMSHIP CORP.

Notice of Application

Notice is hereby given of the applications of Pacific Far East Line, Inc., as owner and of Waterman Steamship Corp. as charterer for written permission under section 805(a) of the Merchant Marine Act, 1936, as amended (the Act), to subcharter the SS AMERICA BEAR, to be renamed SS JOHN PENN to load a full cargo of bulk barytes at Castle Island, Alaska, for Arnold and Clark Chemical Co. during the period August 5-15, 1973, for discharge at Houston, Tex.

Interested parties may inspect this application in the Office of the Secretary, Maritime Administration, Department of Commerce Building, Fourteenth & E Streets, NW, Washington, D.C. 20230.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in this application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on August 9, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for August 10, 1973, in Room 4896 Department of Commerce Building, Fourteenth & E Streets, NW, Washington, D.C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act.

By Order of the Maritime Administration.

Dated: August 3, 1973.

JAMES S. DAWSON, Jr.,
Secretary.

National Bureau of Standards

COMMERCIAL STANDARDS

Notice of Intent to Withdraw

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the intent to withdraw two Commercial Standards CS 125-47, "Prefabricated Homes" and CS 233-63, "Laminated Hardwood Block Flooring." It has been tentatively determined that these standards are no longer technically adequate and revision would serve no useful purpose.

Any comments or objections concerning the intended withdrawal of these standards should be made in writing and directed to the Office of Engineering Standards Services, National Bureau of Standards, Washington,, D.C. 20234, on or before September 6, 1973. The effective date of withdrawal, if appropriate, will be not less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of the withdrawal.

Dated: July 31, 1973.

RICHARD W. ROBERTS,
Director.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

MARYLAND

Notice of Proposed Action Plan

The Maryland Department of Transportation has submitted to the Federal Highway Administration of the U.S. Department of Transportation a proposed Action Plan as required by Policy and Procedure Memorandum 90-4 issued on June 1, 1973. The Action Plan outlines the organizational relationships, the assignments of responsibility, and the procedures to be used by the State to assure that economic, social and environmental effects are fully considered in developing highway projects and that final decisions on highway projects are made in the best overall public interest, taking into consideration: (1) Needs for fast, safe and efficient transportation; (2) public services; and (3) costs of eliminating or minimizing adverse effects.

The proposed Action Plan is available for public review at the following locations:

1. Maryland Department of Transportation
   Headquarters Building
   Friendship International Airport
   Room—Division of Public Affairs
2. State Highway Administration
   Bureau of Highway Information
   Room 307
   300 West Preston Street
   Baltimore, Maryland 21201
3. State Highway Administration District Offices:
   District #1—
   William K. Lee III
   West Road (off Booth Street)
   Salisbury, Maryland 21801
   District #2—
   James M. Wright
   Old American Legion Building
   Morgnec Road
   Maryland Route 291
   Chestertown, Maryland 21620
   District #3—
   M. S. Caltrider
   9300 Kenilworth Avenue
   Greenbelt, Maryland 20770
   District #4—
   Harry J. Pistel, Jr.
   Joppa and Falls Road
   Baltimore Beltway—Exit 23
   Brooklandville, Maryland 21022
   District #5—
   Allen W. Tate
   Patuxent River Administration Building
   Maryland Route 231
   Prince Frederick, Maryland 20678
   District #6—
   John D. Bushby
   1221 Braddock Road
   Maryland Route 49
   La Vale, Maryland 21502
   District #7—
   Thomas G. Mohler
   4 Locust Street
   Frederick, Maryland 21701
4. Maryland Division Office—FHWA
   31 Hopkins Plaza
   Baltimore, Maryland 21201
5. FHWA Regional Office—Region 3
   31 Hopkins Plaza
   Baltimore, Maryland 21201
   (Room 1615)
6. U.S. Department of Transportation
   Federal Highway Administration
   Environmental Development Division
   Nassif Building—Room 3246
   400 7th Street, S.W.
   Washington, D.C. 20590

Comments from intereted groups and the public on the proposed Action Plan are invited. Comments should be sent to the FHWA Regional Office shown above before September 1, 1973.

Issued on July 31, 1973.

RALPH BARTELSNEYER,
Deputy Federal Highway Administrator.

ATOMIC ENERGY COMMISSION

[Docket Nos. 50-315, 50-316]

INDIANA AND MICHIGAN ELECTRIC CO.

Notice of Availability of Final Environmental Statement

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulations in Appendix D to 10 CFR Part 50, notice is hereby given that the Final Environmental Statement prepared by the Commission's Directorate of Licensing, related to the proposed Donald C. Cook Nuclear Plant, Units 1 and 2, currently under construction by the Indiana and Michigan Electric Company, in Berrien County, Michigan, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in the St. Joseph Public Library, 500 Market Street, St. Joseph, Michigan 49085. The Final Environmental Statement is also being made available at the Office of Planning Coordination, Executive Office of the Governor, Lewis Cass Building, Lansing, Michigan 48913.

The notice of availability of the Draft Environmental Statement for the Donald C. Cook Nuclear Plant, Units 1 and 2, and requests for comments from interested persons was published in the FEDERAL REGISTER on December 21, 1972 (37 FR 28204). The comments received from Federal, State, local officials and interested members of the public have been included as appendices to the Final Environmental Statement.

Single copies of the Final Environmental Statement may be obtained by writing the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Md., this 2d day of August 1973.

For the Atomic Energy Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch 1, Directorate of Licensing.

[FR Doc.73-16329 Filed 8-6-73;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS ACRS SUBCOMMITTEE ON RANCHO SECO NUCLEAR GENERATING STATION, UNIT ONE

Notice of Meeting

AUGUST 3, 1973.

In accordance with the purposes of section 29 and 182 b. of the Atomic En-

V 38 151 AUG 7 73 XUM

ergy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards Subcommittee on Rancho Seco Nuclear Generating Station, Unit One, will hold a meeting on August 22, 1973, in Room 1046, 1717 H Street, NW., Washington, D.C. The purpose of this meeting will be to review the application of the Sacramento Municipal Utility District a license to operate Unit One which is located in Sacramento County, about 25 miles southeast of Sacramento, California.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

WEDNESDAY, AUGUST 22, 1973, 9:30 A.M.—3:30 P.M.

Review of the application for an operating license (presentations by the AEC Regulatory Staff and the Sacramento Municipal Utility District and its consultants, and discussions with these groups).

In connection with the above agenda item, the Subcommittee will hold an executive session at 8:30 a.m. which will involve a discussion of its preliminary views, and an executive session at the end of the day, consisting of an exchange of opinions of the Subcommittee members and internal deliberations and formulation of recommendations to the ACRS. In addition, prior to the executive session at the end of the day, the Subcommittee may hold a closed session with the Regulatory Staff and Applicant to discuss privileged information relating to plant security and nuclear fuel design, if necessary.

I have determined, in accordance with subsection 10(d) of Public Law 92–463, that the executive sessions at the beginning and end of the meeting will consist of an exchange of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b); and that a closed session may be held, if necessary, to discuss certain documents which are privileged, and fall within exemption (4) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect such privileged information and to protect the free interchange of interval views and to avoid undue interference with agency or Committee operation.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda item may do so by mailing 25 copies thereof, postmarked no later than August 15, 1973 to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon the application for an operating license and related documents which are on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545, and the Sacramento City County Library, 1930 T Street, Sacramento, California 95814.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1:00 p.m., and 3:00 p.m. on the day of the meeting, August 22, 1973.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been cancelled or rescheduled, and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted can be obtained by a prepaid telephone call on August 20, 1973, to the Office of the Executive Secretary of the Committee (telephone: 301–973–5651) between 8:30 a.m. and 5:15 p.m., e.d.t.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come-first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Atomic Energy Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545 and within approximately nine days at the Sacramento City County Library, 1930 T Street, Sacramento, California 95814. On request, copies of the minutes of the meeting will be made available for inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545 on or after October 22, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Acting Advisory,
Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Docket No. 22908; Order 73-7-147]

AMERICAN AIRLINES, INC. ET AL.

Order of Investigation and Interim Approval of a Capacity Reduction Agreement Relating to Four Transcontinental Markets

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 27th day of July 1973.

In the period October 1971–April 1973, nonstop passenger capacity offered by American, TWA and United (hereafter the "agreement carriers" or "applicant") was limited by a Board-approved capacity agreement in four markets: New York/Newark-Los Angeles; New York/Newark-San Francisco; Baltimore/Washington-Los Angeles; and Chicago-San Francisco (hereafter the "agreement markets").[1] In February 1973 the agreement carriers requested Board approval of discussions looking toward extension of their capacity agreement in the agreement markets. By Order 73–4–98, the Board authorized those discussions.

The discussions were held, and on May 24 a new agreement (hereafter "the agreement") was submitted to the Board. In basic outline the agreement is much the same as the previous one. As in the case of the agreement's predecessor, each of the three agreement carriers is allotted a level of capacity that it ordinarily may not exceed in the agreement markets. Allotments are on a city-pair market basis (Baltimore/Washington and New York/Newark each being treated as one city) and maximum capacity varies by season of the year. (See Appendix A)[2]

Nineteen parties filed comments in respect to the agreement.[3] The Virginia and Washington, D.C. parties support the agreement without qualification. The Port Authority of New York and New Jersey also asks that the agreement be approved. The Chicago and Maryland parties oppose the agreement, as do the Department of Justice, DOT, the Postmaster General, and, in general, all commenting carriers other than the applicants. The Air Line Pilots Association seeks an immediate hearing.

For reasons we shall discuss below, the Board has determined to (1) hold a hearing on the agreement; and (2) approve the agreement on an interim basis, for six months or until the conclusion of the hearing proceeding, whichever is first.

I. At the outset, the Board rejects the argument that the agreement must be disapproved—without a hearing—because of its antitrust implications. The Act, of course, favors "competition to the extent necessary to assure the development of" an economically sound air transportation system (49 U.S.C. 1302 (d)). Accenting the pro-competition as-

[1] See Orders 71–8–91 and 72–11–6. The original agreement expired in September 1972, but was extended by Order 72–11–6.

[2] Filed as part of the original document.

[3] The three applicants (American, TWA, and United), Braniff, Continental, Delta, Northwest, the National Air Carrier Association, the Air Line Pilots Association, the Environmental Defense Fund, the City of Chicago, the Fairfax County Economic Development Authority, the Maryland Department of Transportation, the Metropolitan Washington Board of Trade, the Port Authority of New York and New Jersey, the State Corporation Commission of Virginia, the Department of Justice, the Department of Transportation ("DOT"), and the Postmaster General. The Environmental Defense Fund's comments are in the form of a Petition for the preparation and circulation of an environmental impact statement.

pect of this mandate, the agreement's opponents say that if the agreement carriers want to continue reduced capacity in the agreement markets, they are compelled to rely exclusively upon unilateral restraint.

Under the Act, the Board is not permitted to take such a dogmatic approach. Our statute recognizes that free competition is not a categorical imperative. In fashioning the Act Congress determined that the air transportation industry could not operate successfully if left wholly subject to the forces of the open market place. The Board was therefore given extensive regulatory powers and told to consider "competition to the extent necessary" as one, but only one, of several policy objectives. Being granted the right to confer antitrust immunity, the Board was clearly empowered to approve agreements which would otherwise violate the antitrust laws. By the same token, the Board was enjoined to give weight to pro-competitive considerations in its decisions. Put another way, when (as here) an agreement is challenged as contrary to the antitrust principles, the Board is called upon to judge whether pro-competition objections are outweighed by a serious transportation need, or by the need to secure important public benefits. See Local Cartage Agreement Case, 15 C.A.B. 850, 852–53 (1952).

In the past, the Board has been reluctant to authorize capacity or schedule limitation agreements. Where the Board believed that individual carriers could control schedules or capacity by unilateral action, the Board regarded this course as preferable and could not conclude that a serious transportation need outweighed the anti-competitive effects of multilateral agreements. But where individual carriers could not solve capacity or schedule problems unilaterally, the Board has authorized discussions and resulting agreements of a limited nature.

When this agreement's predecessor was presented, its sponsors noted developments which, they believed, justified a more permissive policy towards capacity agreements. The Board, however, concluded that the agreement was of such short duration and scope that it constituted only a "limited departure" from the "normal" policy. Because of this, the Board did not feel required to institute a proceeding that would provide for a full scale reexamination of past policy.

However, the time is now ripe for such a proceeding. The Board has embarked upon a comprehensive program to encourage and develop an economically sound air transportation system which can assure high quality service to the consumer at the lowest reasonable fares. During most of the last 15 years, the airline industry's financial results have been generally disappointing, with cyclical periods of large losses, investor disenchantment, and fare increases. Recognizing the interdependence of rate and route matters, the Board hopes to create a milieu in which responsible airline management can stabilize economic conditions, avoid wasteful practices, and pass along to rate payers the benefits of new technology. The question is whether our policy towards capacity reduction agreements should be reevaluated to determine whether such agreements can or should play a part in the Board's overall program.

A keystone of our current approach is a new ratemaking policy designed to promote low-cost air transportation. In the Domestic Passenger-Fare Investigation (DPFI), Phase 6B, the Board determined that it would not allow airlines to charge the public for excess capacity, and would henceforth establish fares on a basis that disregards the costs of those wasteful practices. Obviously, for this Board policy to succeed, carriers must have an opportunity to hold the line against the operation of wasteful overcapacity so that they can bring their actual costs into line with those which the Board will recognize for ratemaking purposes.

In some regulated industries, the regulatory agency can enforce its ratemaking proscriptions against wasteful overcapacity through its control over capacity additions. For example, some agencies are empowered to license all new capacity and can withhold approval for excessive plant additions; other agencies can refuse to permit new financing which would be used to underwrite uneconomic plant additions. Because the Board lacks these powers, it is forced to rely upon fare policy and voluntary carrier efforts to curb excess capacity. The present carrier agreement represents one form of such a voluntary effort and, its sponsors contend, is necessary to help them conform their route operations to the Board's new ratemaking standards.

In the long run, the Board believes that individual carriers can tailor their aircraft purchases so that schedules can be operated at economic load factors. This view, which underlies the Board's past attitude towards capacity controls, has led the Board to approve capacity agreements only for very temporary periods. According to the agreement carriers, however, inhibitions to unilateral actions may persist for the moderate near term. The carriers have already acquired large fleets of aircraft whose capacity exceeds the available traffic needs. In the latter part of the 1960's, when future traffic was almost universally overestimated, the carriers ordered many new aircraft, particularly widebodied types which offer so many seats that their schedules cannot easily be fine-tuned to traffic demands. Concurrently, the passenger traffic (on which the carriers depended to fill their new planes) failed to grow as expected. According to the agreement carriers, the carriers' introduction of the excess new aircraft on highly competitive routes (such as the agreement markets) can hinder any one carrier's ability to reduce excess capacity by unilateral action.

Earlier we noted that—when the Board approved the present agreement's predecessor—it was dealing with a "limited" agreement which did not compel the Board to reexamine past policy, particularly without a hearing. In addition, the Board was faced with vigorous contentions that the predecessor agreement would harm nonparties. Although the Board was unconvinced by these assertions, its predictions about the future operations of the agreement were necessarily somewhat conjectural at that time. As actual experience with the agreement accumulated, however, it began to become evident that no such disastrous consequences as had been predicted by the objectors had in fact come to pass. In addition, it appeared that the agreement, at least on the short-term basis approved to date, has also had a favorable financial impact on the agreement carriers without having a demonstrably unfavorable adverse effect on non-agreement carriers or on service to the traveling public.

In addition to these factors, since the issuance of Board orders in respect to the previous capacity agreement, it has become increasingly apparent that all practicable steps must be taken to conserve the nation's energy resources. It appears that capacity limitation agreements such as the one here at issue can effect significant fuel savings.

Accordingly, in Order 73–4–98, the Board authorized discussions looking towards an agreement like the one filed. Nonetheless, as discussed above, Board approval of the agreement for its proposed two-year term would constitute an important step. Moreover, the Board wishes to make this agreement a vehicle for a thorough policy reevaluation. For these reasons, the Board has decided that the agreement should be fully examined in an evidentiary hearing.

Accordingly we are setting down for hearing the question of whether the agreement is adverse to the public interest or in violation of the Federal Aviation Act of 1958. As specified in the subsequent pages of this order, the issues at the hearing shall include all those raised by the Board, the objecting parties, and the agreement's sponsors, as well as a searching analysis of the agreement's environmental impact.

II. Having decided to hold a hearing on the agreement, the Board must face the question whether to allow the three carriers to continue an agreed-upon reduction of capacity on a provisional basis. This is not a case where interim approval will allow the parties to change their operations radically and thus to put a new policy into effect before its propriety has been determined. On the contrary, since late 1971 the three carriers have reduced their capacity in the agreement markets pursuant to the Board's approval of this agreement's predecessor. The sole function of interim approval would be to enable the carriers to maintain the legal status quo pending further Board action.

The Board has considered whether action other than interim approval would be preferable. One possibility is to take

V 38 - 151 AUG 7 73 XUM

no action at all and to trust that the carriers, acting unilaterally, could not only avoid the reinstitution of wasteful capacity, but actually achieve the higher load factors contemplated by the new agreement. But, as noted later, this appears unlikely, at least during the months immediately ahead. Indeed, one of the applicants has already begun to add capacity in the agreement markets. In May 1973 (the month following the end of the previous agreement), United increased the capacity it operated in the agreement markets by an average of 16 percent over the previous month.[4] (See Appendix B.)[5] A refusal by the Board to approve the agreement for an interim period could thus have at least some appreciable deleterious effects on the nation's fuel conservation program, on the environment, and on the finances of the agreement carriers.

Another alternative would be for the Board to attempt to revive the predecessor agreement, now expired, and approve its extension to govern the interim period. We recognize, of course, that the new agreement differs in some respects from its predecessor. But the differences are not great, and a Board order requiring the carriers to duplicate the prior agreement would require further discussion among the carriers, might possibly prevent agreement among the carriers, and, in any event, would delay implementation of the agreement.

In sum, for reasons touched upon above, and as will be more fully discussed below, the facts presently available to the Board indicate that a refusal by the Board to permit the agreement to be implemented may have a net detrimental effect on the public interest. We are not persuaded that short-term interim approval—and maintenance of the legal status quo—will have any serious injurious effects. But even assuming for the sake of argument that such effects could occur, we believe it probable that they will be considerably less significant, and more easily remedied by subsequent Board action, if necessary, than the adverse effects that might result from Board inaction on, or disapproval of, the agreement at this time.[6]

The Board will limit its interim approval of the agreement to a six-month period in order to enable the Board to re-evaluate the agreement in the light of the additional information then available.

III. Our decision to grant interim approval is justified by available information indicating, at least provisionally, that the agreement can achieve important public benefits in the months ahead in two areas—improved financial results for the agreement carriers and fuel savings.

A. It appears that the previous agreement led to substantial cost savings by the agreement carriers (see Appendix C)[7] and commensurate profit increases. In respect to the proposed agreement, the extent of the cost savings that may be achieved during the period of our interim approval depends on several possible assumptions.

One assumption is that, if interim approval is denied, the carriers would not restrain capacity unilaterally in the agreement markets and, consequently, would drift back into the excessive capacity in pre-agreement days. If that occurred, the carriers' load factors would sink from the 60 percent level contemplated by the agreement to the 42 percent level which prevailed before this agreement's predecessor came into effect. As detailed in Appendix E,[7] that would result in additional monthly costs of about $7 million. Even if load factors in the agreement markets fell to only 53 percent—the agreement carriers' domestic systemwide average—the additional monthly costs would approximate $2 million.

An alternate assumption would be that the agreement carriers would exercise unilateral restraint and would not permit their load factors in the agreement markets to fall below the levels already achieved,[8] or might even raise those levels somewhat. Nevertheless, it is not likely that during the interim period they could raise their load factors in these markets from the achieved average level of 54 percent to the 60 percent level contemplated by the new agreement. Even assuming that the carriers could in this space of time achieve one-third of the contemplated gain in agreement market load factors (e.g., by freezing present capacity in the face of normal traffic growth), their monthly costs would still exceed those achievable under the agreement by $1 million.[9]

The above assumptions frame the range of possible cost savings attributable to the agreement during the period of our interim approval. Thus pending examination of these assumptions at the hearings, the Board believes that it is reasonable to assume at this time that the agreement will produce costs savings of at least $1 million a month and possibly substantially more.

Thus available information shows that the agreement will materially help in the improvement of the finances of the agreement carriers specifically and thus of the air transportation system generally.[10] None of the three carriers is financially on the ropes. They are, however, emerging from a period of dismal operating results. This agreement's predecessor appears to have been a significant factor in the carriers' recovery. Although some parties argue that the agreement carriers have clear sailing ahead, the most recent information suggests continued cause for concern. Indeed, one of the three carriers is now predicting resumed losses. Rather than attempt to determine in the abstract what significance should be attached to this announcement, or to the other two carriers' complaints that their profits are "softening," the Board believes the matter should be evaluated in the context of the full scale evidentiary hearing. Meanwhile, the Board can continue the legal status quo in the agreement markets.

In the Domestic Passenger Fare Investigation, Phase 8, the Board decided to set a reasonable rate of return on investment of 12 percent (up from an earlier target of about 10½ percent). The Board believes that interim approval is especially appropriate because, by either ratemaking standard, none of the three carriers has earned a reasonable return on investment since 1967 (and in that year only United did):

RATE OF RETURN, 1967–1972

	1967	1968	1969	[1] 1970	[1] 1971	[1] 1972
American	8.77	6.66	7.06	0.34	3.39	3.38
TWA	7.16	6.09	6.07	−2.98	2.84	5.86
United	10.39	6.04	6.71	0.61	2.42	6.30

[1] On system operating investment.

The year 1973 will not bring a change in this pattern. Based on the most current information available to the Board, including the three carriers' reported 1973 earnings to date and current passenger yields, the agreement carriers will not attain a fair return on investment.[12]

B. Fuel savings can be another important advantage resulting from the agreement. The President, noting America's "serious energy problem," made fuel conservation a national priority. In fact, the President stated that "• • • I have directed the Secretary of Transportation to work with the Nation's airlines, the Civil Aeronautics Board, and the Federal Aviation Administration to reduce flight speeds and, where possible, the frequency of commercial airline flights." (See the President's Energy and Natural Resources message of June 29, 1973, 9 Presidential Documents: Richard Nixon, 1973 at 867, 872.)

Consequently, there can be no argument that actions that will economize the nation's fuel resources must be considered a public benefit. In this respect it is the Board's provisional estimate that implementation of the agreement will, on the average, result in fuel savings of between 1 million and 5 million gallons a month.[13]

It is no answer to say, as some of the agreement's opponents do, that fuel savings can be derived from other actions. The carriers should seek through all possible means to conserve as much fuel as possible. At the hearings, the parties will be expected to explore the risk that fuel shortages can disrupt flight operations. And they should attempt to determine whether schedule reductions, reductions in cruising speed, and other steps, taken together or separately, will be ample to avoid the possibility of such operational disruptions—or to ease fuel shortages in other areas of the economy. Meanwhile, the Board believes that it can conclude provisionally that fuel savings of the magnitude promised by the agreement are of real public benefit.

IV. A number of opposing parties acknowledge that the above benefits will indeed flow from the implementation of the agreement. They and the other parties opposing approval nonetheless argue against approval on the grounds that the problems the agreement would engender outweigh those benefits, and that there are alternative means of achieving the benefits the agreement would provide. Final resolution of these arguments will best be made in the course of the hearing proceeding. However, presently available facts persuade us, for purposes of interim action on the agreement, that any detrimental effects of the agreement likely to occur during the period of interim approval will be outweighed by the agreement's benefits during such period, and that the alternative actions various parties put forward as substitutes for Board approval of the agreement would not provide the benefits that will result from interim approval of the agreement.

To begin, we turn to contentions related to the agreement's alleged effects on service.

A. The City of Chicago is the only party to complain in terms about the extent of the passenger capacity reduction that would stem from the agreement. Chicago argues that: (1) Under previous Board orders, 65-percent load factors were an indication of a need for new service rather than appropriate goals; and (2) the target load-factors of the agreement are inconsistent with the Board's 55-percent load-factor standards.

The agreement carriers originally sought to achieve an agreement that provided for 65-percent load factors. As submitted to the Board, however, the agreement will result in load factors in the agreement markets of about 60 percent initially, and 63 percent by summer 1974.[14] In the past, the Board has considered load factors in the 65-percent range as one evidentiary factor in deciding whether new service was needed. The Board, however, is in the process of re-evaluating its criteria as to what load factors indicate a need for new service. Further, the issue of appropriate load-factor goals for agreement markets will be considered at the hearing. In the meantime, we have not been shown that 60 percent load factors will result in inadequate service for travelers in the Chicago-San Francisco market.[15] While we believe that also holds true with respect to the 63 percent load factors forecast for the summer months of 1974, that need not be resolved here in view of the limited period of our approval.

In regard to the variance between the agreement's load factor goals and the Board's load-factor standard, that standard is intended as an average for all markets. In order for that overall standard to be attained, it is evident that some markets will have to have higher load factors, some lower. The Board's decision in the Domestic Passenger-Fare Investigation, Phase 6B, made this plain. In this same connection, we note that in arriving at the 55-percent load-factor standard, the Board's computation took into account an adjusted load factor for the Chicago-San Francisco market of 65 percent. (Order 71-4-54, App. C.)

B. The City of Baltimore opposes the agreement on the ground it has resulted in insufficient service to Friendship Airport vis-a-vis service at Dulles International. (The agreement treats Baltimore and Washington, D.C. as one point.) The applicants and several Washington, D.C. and Virginia parties disagree.

On the facts before us we are unwilling to order the agreement carriers to add capacity at that airport. The ratio of Dulles versus Friendship flights in the the Baltimore/Washington-Los Angeles market (the only agreement market involving Baltimore/Washington) does not appear out of line with comparable ratios in other markets, and the level of service in the Baltimore/Washington-Los Angeles market appears satisfactory. For example, the percentage of flights operated at 95-percent load factors generally has been lower in the Baltimore/Washington-Los Angeles market than any of the other three agreement markets.[16] However, we agree that the hearing we have ordered should deal with the question of whether the agreement ought to be conditioned with respect to minimum levels of service at Friendship.[17]

C. DOT argues that if the Board approves the agreement, it should condition its approval to require lower fares in the agreement markets. In a similar vein, the city of Chicago also states that approval of the agreement should result in lower fares in the Chicago-San Francisco market. We are putting into issue in the hearing the question of whether the agreement should affect fares. But we cannot conclude at this juncture that requiring such fare reductions would be warranted. One problem is that lower fares in the agreement markets might have ripple effects throughout the air transportation system, perhaps unduly affecting non-agreement carriers. Further, as previously stated the near-term profits of any of the agreement carriers are unlikely to reach, much less exceed, the Phase 8 rate of return.[18] Finally, the Board has explained that the fact that load factors in the agreement markets will be higher than average domestic load factors is not inconsistent with the Board's passenger fare policies. (See n. 9 and pp. 9-10, supra.)

D. The Postmaster General urges that we condition approval of the agreement on the retention by the agreement carriers of a number of existing flights that are considered important for the carriage of mail. As the agreement carriers point out, only one of the flights will be directly affected by the agreement. We are cognizant of our responsibilities under sections 412 and 102(a) of the Act, insofar as they relate to the needs of the Postal Service. However we cannot conclude that the possibility that the implementation of the agreement will affect one flight of interest to the Postal Service warrants action in an interim order of approval.

V. The agreement does lessen capacity competition, and we consider that the agreement's impact on competition is an important factor in public interest and accordingly must be weighed in the Board's evaluation of whether the agreement meets the standards of section 412 of the Act. In evaluating the weight to

[4] According to reports filed by the agreement carriers, United's capacity increases continued into June (even taking account of seasonal changes.)

[5] Filed as part of the original document.

[6] The Board will at all times be in a position to modify the agreement, or terminate it, if conditions so warrant.

[7] Filed as part of the original document.

[8] The agreement carriers' average load factors in the agreement markets for the year ended June 30, 1973, were 54.1 percent.

[9] See Appendix E. These estimates are predicated on the assumptions that (a) the agreement carriers will not increase their capacity in other markets to any substantial extent—or, at least, more than they would do so in any event (see p. 12, infra); and (b) that the equipment mix in the agreement markets, with or without the agreement, will be approximately the same as during the course of the prior agreement (see Appendix D which is filed as part of the original document).

[10] In 1972, American, TWA, and United operated 52 percent of revenue passenger miles flown by the trunkline industry domestically.

[11] Excludes most nontransport investment and nontransport profits or losses. 1967–1969 rate of return figures are not available on this basis.

[12] It is the Board's expectation that, as a result of the agreement, the carriers will earn in excess of the Board established 12 percent reasonable rate of return in the agreement markets. However it has been generally believed that in order for carriers to be able to earn a reasonable rate of return, carrier profits in some markets have to be considerably above that level in order to offset below-par profits or losses in other markets.

[13] See Appendix F which is filed as part of the original document. The variables which determine fuel savings are essentially the same as those which determine cost savings. For the Board's tentative conclusions on these points, see page 6 supra. Fuel savings are also discussed on page 15 infra.

[14] See Appendix A.

[15] For the period November 1972–May 1973 (the period for which figures are available) relatively few flights in the agreement markets operated with all seats filled. See Appendix H. While load factors will be higher under the interim agreement, we do not expect that the percentage of such flights will increase substantially. We note that passengers in the agreement markets generally have had fewer complaints about the service they received than passengers traveling on the agreement carriers in other markets. See Appendix G. It should also be noted that the agreement permits the carriers to add extra sections and use larger aircraft on an ad hoc basis where demand so warrants. See Appendix A.

[16] See Appendix H which is filed as part of the original document. See also Appendix G for a tabulation of passenger complaint figures in the Baltimore/Washington-Los Angeles market.

[17] The Port Authority of New York and New Jersey, while favoring approval of the agreement, exresses concern about operations to and from Newark, and asks for reporting conditions in this respect. As we shall discuss below, the Board has determined to adopt in large part the Port Authority's proposed conditions.

[18] See p. 7 supra.

V 38 151 AUG 7 73 XUM

be given to this factor, however, we believe that the following matters are appropriate for consideration.

First, competition in the form of excess capacity is an expensive and wasteful form of competition in the air transportation industry. Further, excess capacity generally is of marginal or no utility to the traveling public.

Second, as a result of its form, the agreement affects maximum capacity levels, but over the period of our interim approval it should not lessen the incentive of each carrier member to gain traffic at the expense of its fellow agreement members. For this reason it is our judgment that interim approval of the agreement will have minimal impact on the agreement carriers' concern for providing service that is attractive to the public.[19]

Third, noncapacity forms of competition between the agreement carriers appear to have continued unabated. There has been no showing, in other words, that the prior agreement led the carriers to settle down into a comfortable status quo. For example, since the Board first approved the prior agreement, the following have occurred: (a) United began offering travel group charter service at prices that have enabled travelers to travel in several of the agreement markets at prices far below scheduled fares. (b) TWA began offering low fare ninety-day advance-purchase transportation in the three transcontinental agreement markets. (American and United both opposed TWA's tariff filing.) American, but not United, followed suit. (c) American first, and subsequently TWA, began offering one-stop night coach service in several of the agreement markets. (Both United and TWA opposed American's night coach tariff filing. American opposed TWA's.)

We have no reason to believe that interim approval of the agreement now before us will have a different competitive impact than did approval of the prior agreement.

VI. Various parties argue that the agreement will permit the agreement carriers to add capacity in non-agreement markets, to the detriment of competing carriers in those markets. Those parties also point out that the use of capacity freed by the agreement would to a large extent nullify the intended benefits of the agreement. We have not been shown that the past capacity agreements had any causative effect on the capacity offered by the agreement carriers in other markets. Any large scale shifting of capacity would require our reconsideration of our interim approval of the agreement, and we have retained jurisdiction over the agreement with this matter, among others, in mind.[20]

Several parties have asked that our approval of the agreement be conditioned upon the acceptance by the applicants of reporting requirements by which the applicants would account for the use made of capacity freed by the agreement. However, no party has proposed how such a reporting requirement should be fashioned, and the applicants argue that there is no practicable way to provide that kind of accounting. It would appear that a reporting condition concerning freed capacity could be useful to an evaluation of the merits of the agreement, even if the data thereby produced were not necessarily definitive. The Board does not now have sufficient information, however, to be able to formulate a requirement of that nature that would be both effective and within the ability of the applicants to meet without incurring excessive added costs. Accordingly, the Board will be receptive to petitions for reconsideration that put forth suggested freed-capacity reporting conditions.

VII. The Justice Department and Department of Transportation argue that load factors can be best increased by permitting greater price competition between carriers, by the formulation of a cost-based fare structure, and by the establishment of higher load factor standards and a concomitant decrease in the fare level.

The Justice Department recognizes, in respect to its price competition argument, that the question whether the Board should permit greater price competition among carriers, and, if so, the appropriate extent of that competition, is squarely an issue in Phase 9 of the Domestic Passenger Fare Investigation and will be decided in that proceeding on the basis of the record therein.

In respect to the claim that the Board should increase load factors through the use of load factor standards for ratemaking purposes and by revision of the current fare structure, those also are issues pending in the Fare Investigation.

Further, even assuming, arguendo, that DOT's fare proposals would be a viable alternative course of action in respect to increasing load factors in the agreement markets to the level that will obtain under the agreement, the agreement would still be far more effective during the immediate future in reducing fuel consumption than would Board fare action. Fuel use is a function of aircraft use. The agreement can lead to reduced aircraft use. A fare reduction, on the other hand, would increase load factors in large part by attracting more traffic. Aircraft use might decline very little and, in fact, might even increase, depending upon elasticity of demand.

VIII. Other objections do not preclude interim approval. To be sure, DOT argues that the agreement would violate the ongoing price freeze. However the agreement does not go into effect until the freeze ends (even assuming the agreement would otherwise be in violation of the price freeze). Indeed, the Cost of Living Council has proposed regulations for the post-freeze period that would exempt air carriers from Phase IV controls. (38 FR 19464, 19472 (July 20, 1973).)

The Air Line Pilots Association expresses concern about the effect of the agreement on employees. ALPA seeks a hearing on the agreement, however, not disapproval; and a hearing will be held. Insofar as interim approval is concerned, it would appear that the effect of the agreement on employees for the relatively short period our interim approval will be in effect will be very limited. We thus conclude that the impact of the agreement on employees, together with the other adverse effects of the agreement, will not outweigh the beneficial aspects of the agreement during the period of our interim approval.

IX. The Environmental Defense Fund and DOT argue that Board action on the agreement would amount to "major" Federal action "significantly affecting the quality of the human environment" within the meaning of section 102 of the National Environmental Policy Act ("NEPA"). The Board agrees that Board action on the agreement might well fall within that standard. That, in turn, raises difficult questions. Plainly a full environmental impact statement (or perhaps, a negative statement) would be useful in considering even interim action on the agreement. On the other hand, as we shall discuss below, on the basis of the limited data now available it appears that the effect of the agreement on the environment will be almost wholly beneficial.[21] It is by no means clear that NEPA's requirement for an environmental impact statement applies in such a case.[22] More importantly, available facts show that any delay by the Board in acting on the agreement in order to prepare, circulate and finalize an environmental impact statement could itself have a detrimental impact on the environment.

Because of this, and because the introductory language of section 102 recognizes that agencies may find themselves in circumstances in which all the usual requirements of section 102 of NEPA cannot be met, we have determined to issue this interim order of approval without awaiting the completion of an environmental impact statement. However the procedures set forth in § 399.110 of the Board's Policy Statement ("Implementation of the National Environmental Policy Act of 1969") will be followed in the hearing proceeding we are ordering. Moreover, because of the likelihood that final Board action in this proceeding would have a significant impact on the quality of the human environment, we are directing the Director, Bureau of Operating Rights, to have prepared a draft environmental impact statement for consideration at the hearing. The draft statement will be circulated for the consideration and comment of the parties, other environmentally concerned Federal agencies, and other interested persons, at least 15 days prior to the hearing date.

In respect to the probable impact of the agreement on the environment, we have already discussed the fuel savings that could result from implementation of the agreement. As indicated in the proposed guidelines recently issued by the Council on Environmental Quality [23] fuel savings can be deemed to be beneficial to the quality of the human environment.

Secondly, the agreement could result in a decrease in aircraft operations on the part of the three agreement carriers. That, in turn, can have a salutary impact on noise pollution (see Appendix I)[24] and can decrease the generation by the agreement carriers' aircraft of air pollutants in and around the agreement market airports. (Id.)

Thirdly, while it is not clear that approval of the agreement will necessarily lessen airport congestion and the air pollution and noise that results therefrom, it is reasonably clear that disapproval of the agreement might well add to airport congestion.[25]

We are not aware of any significant adverse secondary effects that would accrue from Board approval of the agreement on an interim basis, although this matter will undoubtedly be dealt with in the impact statement to come out of the hearing process. In markets of such great traveling distance, the Board believes it is unlikely that implementation of the agreement will result in a significant increase in persons traveling by surface vehicle. But even if that would be the case, and an increase in the quantity of pollutants would thereby occur, the increase would appear to be de minimis.[26]

We know of no alternative action that would achieve the same level of environmental benefits that will result from the agreement during the period of our interm approval.[27] However, we do note that the agreement before us has not been drafted to provide maximum environmental benefits. For example, the agreement might result in greater environmental benefits if it provided for the operation of less capacity than does the present order, and, perhaps, if the "standard seating configurations" used in the agreement were varied.[28] However, these matters, which raise highly complex issues of fact and judgment, are more appropriately left to the hearing.

X. In accordance with the comments of the Port Authority of New York and New Jersey and the City of Chicago, the agreement carriers will be required to continue the reports they submitted pursuant to our prior capacity orders, with the following changes: (1) Figures for monthly totals [29] should be broken out by airport, in the case of Baltimore/Washington and New York/Newark and, in respect to the Chicago-San Francisco market in terms of flights to and from San Francisco International, on the one hand, and Oakland and San Jose, on the other; and (2) the carriers' 95-percent reports [30] should list the flight number of each flight that departed with 95 percent or more of its seats filled.

XI. The Board has accumulated considerable data on the workings of capacity limitation agreements in the agreement markets as a result of the agreement that was in effect from October 1971 to April 1973. However, factual gaps remain, particularly in the environmental area. It is the Board's hope that those gaps will be filled by the evidence adduced at the hearing we are ordering.

Recognizing that the present agreement is of limited duration, the Board intends to make every effort to see that the evidentiary hearing is concluded speedily. Nonetheless, Board inaction on the agreement, pending conclusion of the hearing, would not be neutral. Rather, as explained, it would appear that such inaction could have a net detrimental impact on the air transportation system, on the nation's fuel conservation program, and on the environment. Accordingly, we are approving the agreement on an interim basis.[31] We emphasize, however, that should circumstances upon which our interim approval is based change, or if additional facts come to light that call into question the predicates for our action, we shall be in a position to take whatever action in respect to the agreement may be appropriate. In the meantime, the reports filed by the carriers pursuant to Board-imposed reporting conditions, other periodic reports submitted to the Board, and the additional information which will become available in the hearing proceeding, will enable the Board and its staff to monitor the effects of the agreement closely.

XII. The evidentiary hearing the Board is here ordering is of major scope and considerable complexity. Nonetheless, we will instruct the Board's staff and the Administrative Law Judge assigned to the case that we expect it to be commenced and processed as a matter of the highest priority and with the utmost expedition consistent with a fair opportunity for all interested persons to be heard. We furthermore expect the cooperation of all parties, particularly the applicants, in seeing that every stage of the case is thus expedited. If necessary, the time demands of other Board proceedings will have to give way to the urgency of this one. Our goal will be to have all the essential evidence submitted prior to the time our six-month interim approval expires. The Board is making no present commitment to extend its interim approval of the agreement beyond this six-month period. If it is necessary for the applicants to seek extension of this interim approval, the Board will expect parties to file briefs based on the record compiled as of that date. Whether or not the Board will extend its approval, if necessary, will depend not only upon the data then available but also upon how forthcoming the parties have been with their evidence and arguments.

Accordingly, it is ordered, That:

1. The joint application of American Airlines, Inc., Trans World Airlines, Inc., and United Airlines, Inc., for approval of an agreement be and it hereby is set for hearing before an Administrative Law Judge of the Board, at a time and place to be hereafter designated.

2. The issues at the hearing shall include (but not be limited to) the following:

(a) The effect of the agreement on the traveling and shipping public and the Postal Service.

---

[19] DOT argues that the agreement lessens the incentive of each agreement carrier to compete for passengers since, with capacity fixed, gains in passengers means more flights filled, which in turn means that prospective passengers will turn back to the other two carriers. We do not agree with DOT's reasoning. An airline's share of the traffic may be appreciably greater or less than its share of the capacity operated in the markets. Further, the available evidence shows that agreement carriers work hard to gain traffic in the agreement markets. Finally, even assuming that DOT's reasoning would be valid in the case of a two-year agreement, we are here approving the agreement for a lesser, interim period.

[20] See also Order 73-4-98, at 5. Complaining carriers will, of course, have the opportunity to present evidence at the hearing and cross-examine witnesses in respect to the use made by the agreement carriers of capacity freed by the agreement. The hearing is also the place to take evidence on the suggestion that freed capacity cannot be effectively traced. There has been some claim that the agreement carriers will be in a position to compete unfairly as a result of the financial gains resulting from the agreement. That argument appears unsound on a number of counts. Unfair competition is not a function of profitability, and in any event other carriers are more profitable than the agreement carriers. Further, the Board will be in a position to deal with such matters as they arise.

[21] DOT suggests that the agreement could possibly have a detrimental impact on the environment if it were to cause a substantial increase in one-stop and multi-stop operations in the agreement markets. However, there has been no showing that the agreement is likely to have that effect.

[22] See, *e.g.*, Howard v. E.P.A., 4 E.R.C. 1371 (W.D. Va., Sept. 1972). Compare Council on Environmental Quality Guidelines, section 5(c), 36 FR 7724 (1971).

[23] 38 FR 10856 (May 2, 1973).

[24] Filed as part of the original document.

[25] O'Hare, Los Angeles International, Kennedy, and San Francisco International airports are among the busiest in the country. By airport congestion, we refer to congestion caused by too many aircraft. We are unaware of any facts indicating that the agreement will have a perceptible impact on passenger congestion or surface vehicle congestion at or near the airports.

[26] See also Office of Emergency Planning Study entitled, "The Potential for Energy Conservation" (October, 1972) at page 11 and Appendix C.

[27] See, in this regard, p. 13, supra.

[28] See Appendix J.

[29] See Appendix to Order 72-4-63.

[30] See Order 72-11-6, at p. 6, Ordering Paragraph 1(b).

[31] The Board will deny Continental's request to withhold approval until after that carrier completes negotiations looking towards capacity limitation agreements in the Chicago-Los Angeles and Chicago-Denver markets. The Board has no reason for assuming that the three transcontinental carriers will not act in good faith towards Continental and other carriers if the transcontinental agreement is approved. The Board's retained power to further condition or withdraw its approval of the transcontinental agreement is a sufficient safeguard in this respect.

V 38 151 AUG 7 73 XUM

(b) The effect of the agreement on the health of the nation's air transportation system.

(c) The effect of the agreement on competition between carriers generally, and between the applicants in the agreement markets, specifically.

(d) Whether the agreement will reduce aviation fuel consumption, and the importance of any such reductions.

(e) If approval of the agreement would achieve public interest benefits, whether such benefits could be better achieved through practicable alternative means.

(f) Whether the load-factor goals of the agreement are appropriate, and, if not, what the load factor goals should be. Whether such goals should vary on a city-pair, or airport-pair, basis. To what extent should load-factor goals be left to the discretion of the agreement carriers.

(g) Whether the Board should condition the agreement in respect to schedule spread.[32] Could such condition be imposed without also allowing the carriers to agree among themselves as to schedules. Should the Board condition the agreement in respect to the allocation of flights between airports at multi-airport points (Friendship/Dulles and Kennedy/Newark).[33]

(h) Should there be *ad hoc* fare adjustments in the agreement markets to reflect the economic impact of the agreement.

(i) If the agreement should be approved, what conditions, if any, should be imposed on the agreement carriers.

(j) What would be the effect of the agreement on airline employees. What impact would that have on the public interest. Should labor protective conditions be imposed.

(k) What would be the environmental impact of the various possible Board actions in respect to the agreement.

3. Pending final Board action upon conclusion of the aforesaid hearing, or until March 15, 1974, whichever occurs first, the joint application be and it hereby is approved subject to the following conditions:

(a) Within 15 days after the end of each calendar month each applicant shall submit to the Docket Section three copies of a report in the form required by Order 72-4-63, stating for each total market affected by the agreement (including satellite airports in each market)[34] and for each flight flown therein (including extra sections), by flight number, departure time and aircraft type, the revenue passengers carried, number of seats flown, and load factor for each day of the week and for the month; and as an attachment to that report, each applicant shall report the number of times an aircraft being operated in any of the four markets departed with 95 percent or more of its seats filled.[35]

(b) A copy of such reports shall be served upon each airport operator in the cities which are the subject of the report.

4. Pursuant to section 412 of the Federal Aviation Act, 49 U.S.C. 1382, the Board shall retain continuing jurisdiction over this agreement and may modify or amend its interim approval of, or disapprove, the agreement at any time, or take whatever other action may be deemed appropriate.

5. Any comments or requests filed by any person with the Board pertaining to Agreement CAB 23703 shall be served on the carrier parties, the subject cities and airport operators, the Departments of Justice and Transportation, and the Postal Service, and replies thereto shall be filed within 10 days thereafter, and shall be similarly served.

6. The motions of American, TWA, and the State Corporation Commission of Virginia for permission to file otherwise unauthorized documents be and they hereby are granted.

7. This proceeding shall be conducted in accordance with the standards established in 14 CFR 399.110; provided, the Director, Bureau of Operating Rights, shall have a draft environmental impact statement prepared and circulated at least 15 days prior to the date of the hearing to be held pursuant to paragraph 1, supra.

8. To the extent not granted, the requests herein be and they hereby are denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,[36] *Secretary.*

[FR Doc.73-16232 Filed 8-6-73;8:45 am]

[Docket No. 23719; Order 73-8-3]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Passenger Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of August 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of Traffic Conference 3 of the International Air Transport Association (IATA). The Agreement, which was adopted by mail vote, has been assigned the above-designated C.A.B. agreement number.

By Agreement C.A.B. 23619, the IATA member carriers proposed to increase normal first-class and economy fares within the area comprised of Asia/Australia/Australasia. This agreement was approved by Order 73-4-93 of April 24, 1973, insofar as it applied between foreign points and was not therefore directly applicable in air transportation. Action on that portion of the agreement involving the U.S. points Guam and American Samoa was deferred for simultaneous disposition with the overall trans-Pacific fare agreement. Subsequently, the Board disapproved the proposed increases in North/Central Pacific normal fares between all U.S. points and the Far East including those to/from Guam.[1]

The agreement now before the Board proposes somewhat lesser increases in normal fares between Guam and Tokyo/Osaka. Since the fares would remain at a level above that of present fares, the Board will herein disapprove the agreement for the reasons outlined in Order 73-7-54.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, finds that the following resolutions, incorporated in Agreement C.A.B. 23719 as indicated, are adverse to the public interest and in violation of the Act:

Agreement C.A.B. 23719	*IATA Resolution*
R-1	300(Mail 405)053
R-2	300(Mail 405)063

Accordingly, it is ordered, That:

Agreement C.A.B. 23719, R-1 and R-2, be and hereby is disapproved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND, *Secretary.*

[FR Doc.73-16233 Filed 8-6-73;8:45 am]

[Docket No. 25682, etc.; Order 73-8-1]

WESTERN AIR LINES, INC.

Order Rejecting Tariff Regarding Compensation for Failure to Provide Advertised Features of First-Class Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of August 1973.

By tariff revision[1] marked to become effective August 15, 1973, Western Air Lines, Inc. (Western) proposes a rule which provides that a first-class passenger will receive the following compensation when the carrier fails to provide one of its advertised special first-class services:

Scheduled, enroute flight time of the passenger's first-class flight	*Amount of Compensation*
Under one hour	$ 5.00
One or two hours	10.00
Two to three hours	15.00
Over three hours	25.00

In support of the proposal, Western states that its system first-class load factor was only 37 percent for the year 1972, allegedly due principally to its lack of wide-bodied equipment which have proven especially attractive to first-class passengfiers on those competitive routes with a high proportion of first-class traffic. Western plans to institute a special promotional campaign describing the deluxe quality of its first-class service on all of its DC-10 (which went into service June 16, 1973), B-707, B-720, and B-727 flights. The carrier alleges that, since it is placing special emphasis on its first-class service features, the passenger has legitimate reason to expect some redress should these special services not be provided as the passenger had been led to anticipate. Western alleges that its proposal is closely analogous to the existing tariff rules providing compensation for denied boarding since in both situations the carrier has failed to provide the expected services, and in both situations a measure of redress is provided.

Northwest Airlines, Inc. (Northwest), Pan American World Airways, Inc. (Pan American), Trans World Airlines, Inc. (TWA), and United Air Lines, Inc. (United) have filed complaints against the proposal requesting its rejection, or suspension and investigation. The carriers allege, inter alia, that the tariff should be rejected since it does not comply with § 221.38(e) of the Board's Economic Regulations, which specify that indefinite terms or language shall not be used. They state that at no place in the tariff rule are the so-called first-class features described and that the passenger is therefore unable to determine his entitlement under the rule.

These carriers further allege that the rule is not cost related,[2] but rather is related to the duration of the flight. The compensation therefore reflects an uneven treatment among first-class passengers, since failure to provide the same amenity will result in payment of $5.00 if the flight is under one hour and $25.00 if the flight is over three hours. The rule is also alleged to discriminate against second- and third-class passengers inasmuch as they may be subjected to inadvertent loss-of-service amenities without any recourse to compensation.

In answer to the complaints, Western alleges that its proposal is a legitimate effort to "catch up" with the rest of the industry in the first-class travel market by promising customer satisfaction in the strongest possible terms. It asserts that the amount of compensation proposed seeks only to parallel the degree of inconvenience to which a passenger may have been subjected, and that lack of a given amenity will tend to be magnified on a long journey.

The Board concludes that the proposed rule does not meet the criteria established by § 221.38(e) of the Board's Economic Regulations which requires that tariffs be clear and explicit, and accordingly the tariff will be rejected. The rule fails to define with any degree of detail the "special, first-class service features" to which it relates, other than to state that those features are as described in Western's advertising and other promotional material. There is no single, stable outside reference as to the first-class features covered, and indeed the content of the carrier's advertising can and very likely will vary from time to time.[3]

Aside from the proposal's technical deficiency, we have difficulty with the fact that the compensation tendered appears to have no discernible relationship to the cost of the particular amenity the carrier fails to furnish. We recognize that value of service considerations may be a valid factor in a proposal such as this. However, we believe it most important to protect against the possibility that the provision of first-class service might have the ultimate effect of burdening second- and third-class passengers. Stated differently, we have serious reservations about any proposal which would have the net result of lowering the first-class fare level.

Finally, we are unable to agree with Western that the proposed rule is closely analogous to the existing denied boarding compensation rule. Denied boarding compensation is tied to a very specific and readily identifiable occurrence—failure to accommodate the passenger on a flight for which he has a reservation. Moreover, the amount of compensation bears a reasonable relationship to that which the passenger has not been furnished—the dollar value of the air transportation. On the other hand, we perceive no such visible relationship in the case of Western's proposal.

Accordingly, it is ordered, That:

1. Seventh revised page 17 of Airline Tariff Publishers, Inc., Agent, Tariff C.A.B. No. 142 is hereby rejected;

2. The complaints in Dockets 25682, 25683, 25685, and 25689 are dismissed as moot; and

3. Copies of this order will be filed in the aforesaid tariff and served upon Northwest Airlines, Inc., Pan American World Airways, Inc., Trans World Airlines, Inc., United Air Lines, Inc., and Western Air Lines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

FEDERAL POWER COMMISSION

ALGONQUIN GAS TRANSMISSION CO.

Notice of Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

JULY 30, 1973.

Take notice that Algonquin Gas Transmission Co. (Algonquin Gas), on July 24, 1973, tendered for filing Substitute Second Revised Sheet No. 3–A to its FPC Gas Tariff, Original Volume No. 1.

Algonquin Gas states that this sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision set forth in section 22 of the General Terms and Conditions of its FPC Gas Tariff, Original Volume No. 1, as approved by the Commission Order Approving Settlement Agreement in Docket Nos. RP70–30, RP71–92, and RP72–110, issued September 7, 1972. The rate adjustment, amounting to a reduction of 0.02¢ per Mcf in Algonquin Gas' sales rates, is being filed to reflect amortization of the balance in Account 186, according to the company's statement.

The proposed effective date of the revised tariff sheet is September 1, 1973.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8, 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16260 Filed 6-8-73;8:45 am]

[Docket No. CP73-322]

CROWN ZELLERBACH CORP.

Notice of Amendment to Application

AUGUST 1, 1973.

Take notice that on July 9, 1973, Crown Zellerbach Corporation (Applicant), One Bush Street, San Francisco, California 94119, filed in Docket No. CP73-322 an amendment to its application filed June 1, 1973, in said docket pursuant to section 7(c) of the Natural Gas Act providing for the continued operation of Applicant's existing facilities for the transportation of gas from various points in Mississippi to Applicant's pulp mill in Bogalusa, Louisiana, all as more fully set forth in the application, as amended, which is on file with the Commission and open to public inspection.

Applicant amends its application by deleting therefrom the request for certification of its 0.10195005 interest in a hydrocarbon recovery unit at Pistol Ridge, Mississippi, operated by Sun Oil Company and the three compressor units used to gather small volumes of gas from three gas fields adjacent to Applicant's pipeline system. Applicant submits that these facilities are not subject to the Commission's jurisdiction. Applicant further amends its application by stating that it is not offering facilities used for the production and gathering of natural gas for certification in the instant proceeding.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before August 27, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed protests and petitions to intervene need not file again.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-16248 Filed 8-6-73;8:45 am]

[Docket No. CI72-845]

EMERALD PETROLEUM CORP. ET AL

Notice of Petition To Amend

JULY 31, 1973.

Take notice that on July 24, 1973, Emerald Petroleum Corporation (Petitioner), P.O. Box 15325, Lafayette, Louisiana 70501, filed in Docket No. CI72-845 a petition to amend the order issuing a certificate of public convenience and necessity in said docket pursuant to section 7(c) of the Natural Gas Act so as to authorize the continued sale for resale and delivery of natural gas in interstate commerce to Transcontinental Gas Pipe Line Corporation (Transco) from the Southwest Lake Boeuf Field, Lafourche Parish, Louisiana, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner was authorized by the order issued August 1, 1972, in said docket to sell approximately 2,000 Mcf of gas per day at 35.0 cents per Mcf at 15.025 psia for one year ending August 10, 1973, pursuant to § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Petitioner now proposes to continue said sale for an additional year to Transco at an increased rate of 50.0 cents per Mcf at 15.025 psia within the contemplation of Section 2.70.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

MARY B. KIDD,
Acting Secretary.

[Docket No. CI74-42]

GAS MARKETING, INC.

Notice of Application

JULY 30, 1973.

Take notice that on July 20, 1973, Gas Marketing, Inc. (Applicant), P. O. Box 748, Salina, Kansas 67401, filed in Docket No. CI74-42 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Northern Natural Gas Company from acreage in Stafford County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 30,000 Mcf of gas per month for one year at 42.5 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Initial downward Btu adjustment is expected to be 2.5 cents per Mcf.

It appears reasonable and consistent with the public intrest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 16, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person

wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH. F. PLUMB,
Secretary.

[Docket No. CI74-46]

GLENWOOD, INC.

Notice of Application

JULY 30, 1973.

Take notice that on July 23, 1973, Glenwood, Inc. (Applicant), 1011 Hamilton Building, Wichita Falls, Texas 76301, filed in Docket No. CI74-46 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Company from the Colburn No. 1 Well, Steward County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 750 Mcf of gas per day for two years at 50.0 cents per Mcf at 14.65 psia, subject to Btu adjustment, within the contemplation of § 2.70 of the Commission's General Policy Interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 16, 1973, file with the Federal Power Commission, Washington D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP66-110]

GREAT LAKES GAS TRANSMISSION CO.

Notice of Petition To Intervene and for Interconnection of Facilities and Allocation of Gas

JULY 31, 1973.

Take notice that on July 23, 1973, Michigan Power Company (Petitioner), P. O. Box 43, Three Rivers, Michigan 49093, filed in Docket No. CP66–110 a petition to intervene, pursuant to section 15(a) of the Natural Gas Act and § 1.8 of the Commission's rules of practice and procedure (18 CFR 1.8), in opposition to the grant of the petition to amend certificate filed by Great Lakes Gas Transmission Company (Great Lakes) on May 23, 1973, in said docket, all as more fully set forth in the petition to intervene which is filed with the Commission and open to public inspection.

Great Lakes was authorized by the order of June 20, 1967, in said docket (37 FPC 1070), among other things, to sell up to 57,000 Mcf of gas per day to Michigan Consolidated Gas Company (Michigan Consolidated) for resale in six communities in Michigan, including Manistique, Newberry and St. Ignace. After Michigan Consolidated failed to initiate service to Manistique, Great Lakes was ordered in Opinion No. 640, issued December 13, 1972, in Docket No. CP72–68 to sell gas to Petitioner for resale in Manistique. On May 23, 1973, Great Lakes filed a petition to amend the order of June 20, 1967, in Docket No. CP66–110 so as to delete authorization for the construction of delivery facilities necessary for Michigan Consolidated to sell gas to Newberry and St. Ignace after being advised that Michigan Consolidated does not intend to require Great Lakes to install such delivery facilities. In the alternative to amendment of the order issuing certificate, Great Lakes requests a declaratory order clarifying its obligations under the certificate issued in Docket No. CP66–110.

Petitioner requests that it be permitted to intervene in opposition to the granting of the amendment in Great Lakes' application and be treated as a party in any proceeding therein. Petitioner proposes that an order be issued deleting Great Lakes' authority to sell gas to Michigan Consolidated for resale in St. Ignace and Newberry and directing Great Lakes to connect its facilities with those of Petitioner and to sell and deliver to Petitioner fourth year peak day requirements of 1,318 Mcf of gas for resale in St. Ignace and 2,649 Mcf of gas for resale in Newberry. Estimated fourth year annual requirements for St. Ignace and Newberry are 159,033 and 412,437 Mcf of gas, respectively. To facilitate said resale Petitioner states that it intends to construct and operate a distribution system in the two towns at a total cost of $1,693,300 which will be financed from available funds. Petitioner states that St. Ignace and Newberry support Petitioner's efforts to supply gas therein.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI74-43]

UNION TEXAS PETROLEUM, AND ALLIED CHEMICAL CORP.

Notice of Application

JULY 31, 1973.

Take notice that on July 16, 1973, Union Texas Petroleum, a Division of Allied Chemical Corporation (Applicant), Post Office Box 2120, Houston, Texas 77001, filed in Docket No. CI74–43 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipeline Company from the Chaney Dell processing plant, Major County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 30,000 Mcf of gas per month for

V 38-151 AUG 7 73 XUM

a term of 36 months from the first day of the month in which deliveries are commenced at 45.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. CI74-53]

LOUIS H. HARING, JR.

Notice of Application

JULY 31, 1973.

Take notice that on July 25, 1973, Louis H. Haring, Jr. (Applicant), 742 Milam Building, San Antonio, Texas 78205, filed in Docket No. CI74-53 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Texas Eastern Transmission Corporation from acreage in San Patricio County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that he commenced the sale of gas on July 19, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for one year from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell up to 1,000 Mcf of gas per day at 45.0 cents per Mcf at 14.65 psia, subject to downward Btu adjustment. Deliveries are estimated at 30,000 Mcf of gas per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. RP73-82]

PACIFIC GAS TRANSMISSION CO.

Notice of Further Extension of Time and Postponement of Prehearing Conference and Hearing

AUGUST 1, 1973.

On July 25, 1973, Pacific Gas Transmission Co. filed a motion for a further extension of all of the procedural dates fixed by notice issued June 28, 1973, in the above-designated matter. The motion states that Staff Counsel and Counsel for the California Public Utilities Commission and People of the State of California are not opposed to the motion.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Service of testimony and exhibits by Pacific Gas Transmission Co., September 24, 1973.
Service of testimony and exhibits by Staff, October 15, 1973.
Prehearing Conference, October 23, 1973 (10 am, e.d.t.).
Service of testimony and exhibits by interveners, October 29, 1973.
Service of rebuttal evidence by Pacific Gas Transmission Co., November 13, 1973.
Cross-examination, November 26, 1973 (10 am, e.s.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16264 Filed 6-8-73;8:45 am]

[Docket Nos. CI73-723, CI73-724, CI73-732]

PETROLEUM CORP. OF DELAWARE, ET AL.

Extension of Time and Postponement of Hearing

JULY 30, 1973.

On July 27, 1973, Florida Gas Transmission Co. and Florida Gas Exploration Co. requested an extension of the procedural dates as fixed by order issued July 16, 1973, in the above-designated matter. The request states that neither applicants nor staff counsel have any objection to the request.

Upon consideration, notice is hereby given that the procedural dates in the above matter are postponed as follows:

Testimony and exhibits by applicants Hearing, August 13, 1973, August 27, 1973, (10 am, e.d.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16268 Filed 8-6-73;8:45 am]

[Docket No. CI73-869]

PHILLIPS PETROLEUM CO.

Order Granting Intervention, Setting Hearing Date and Prescribing Procedure

JULY 31, 1973.

On June 8, 1973, Phillips Petroleum Company (Phillips) filed an application in Docket No. CI73-869 for a limited term certificate of public convenience and necessity with pregranted abandonment authority, pursuant to § 157.23 of the Commission's regulations under the Natural Gas Act and § 2.70 of the Commission's General Policy and Interpretations under the Natural Gas Act, for the sale of gas to El Paso Natural Gas Company (El Paso) from the Drag B-2 well in Eddy County, New Mexico (Permian Basin).

Specifically, Phillips proposes to sell approximately 46,000 Mcf per month to El Paso for one year pursuant to a letter agreement dated March 23, 1973. The proposed rate is 52.0 cents per Mcf, subject to upward and downward Btu adjustment.

Phillips commenced a 60 day emergency sale pursuant to § 157.29 of the Commission's regulations under the Natural Gas Act from the subject well on May 31, 1973.

A timely petition to intervene in support of the application was filed by El Paso on June 25, 1973.

The application in this proceeding represents a sizeable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers, nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

The Commission finds.

(1) The intervention of El Paso in this proceeding may be in the public interest.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the issues in this proceeding be scheduled for hearing in accordance with the procedures set forth below.

The Commission orders.

(A) El Paso is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervener shall be limited to matters affecting asserted rights and interests as specifically set forth in said petition for leave to intervene: *And provided, further,* That the admission of said intervener shall not be construed as recognition by the Commission that it might be aggrieved by any order or orders of the Commission entered in this proceeding.

(B) Pursuant to the authority of the Natural Gas Act, particularly sections 7 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act, a public hearing shall be held on September 6, 1973, at 10 a.m. e.d.t. in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the issue of whether a certificate of public convenience and necessity should be granted as requested by the applicant.

(C) On or before August 23, 1973, Phillips and any supporting party shall file with the Commission and serve upon all parties, including Commission Staff, their testimony and exhibits in support of their positions.

(D) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure and the purposes expressed in this order.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16252 Filed 8-6-73;8:45 am]

[Docket No. E-7669, etc.]

PUBLIC SERVICE CO. OF INDIANA, INC. ET AL

Order Instituting an Investigation on Complaint, Accepting for Filing and Suspending Proposed Rate Changes in Agreement, Consolidating Proceedings, Prescribing Hearing Procedures, and Permitting Intervention

JULY 31, 1973.

On August 2, 1971, Public Service Company of Indiana, Inc. (PSI) tendered for filing a superseding Kentucky-Indiana Pool Planning and Operating Agreement dated July 9, 1971, (KIP Agreement) on behalf of and between PSI, Indianapolic Power and Light Company (IPL), Kentucky Utilities Company (KU) and East Kentucky Rural Electric Cooperative Corporation (EK). Subsequently, PSI submitted the Kentucky-Indiana Pool Facilities Agreement No. 2 (Facilities Agreement) to supplement the above KIP Agreement. Certificates of concurrence to the KIP filings were submitted by IPL and KU. All related KIP filings were assigned a filing date of October 1, 1971, upon completion of the filings. The proposed effective date was September 1, 1971.

PSI, IPL and KU are interconnected and operated under a 1968 KIP pooling agreement which provides for coordinated planning and operation and equalization of reserves. The new Agreement effects revisions in the existing KIP Pool by reason of the addition of a new member, EK. Since EK allegedly peaks diversely with respect to the existing three members, the instant agreement embodies changes and additions designed to take advantage of such seasonal diversity.

Public notice of the proposed filing was issued on December 28, 1971, which set January 25, 1972, as the date by which petitions or protests should be filed. On January 25, 1972, the Electric and Water Plant Board of the City of Frankfort, Kentucky (Frankfort) filed a protest and petition to intervene, a motion to reject the rate schedule filing, or, in the alternative to suspend the operation of the rate schedule for five months to order a hearing, and for other appropriate relief. On January 25, 1972, the City of Paris, Kentucky, (Paris) filed a conditional petition to intervene in the event the matter is set for hearing.

Frankfort asserts two reasons for rejecting the KIP Agreement filing: (1) It imposes conditions which prevent or tend to prevent East Kentucky from entering into joint transmission or generation arrangements with Frankfort and (2) it appears to violate Kentucky law by restricting the use of the transmission facilities of KIP members. On March 1, 1972, the four utilities answered Frankfort's petition to intervene denying Frankfort's allegations concerning anticompetitive behavior.

The proposed superseding KIP Agreement and related filings in Docket No. E-7669 became effective by operation of law on November 1, 1971, or such later date as was authorized by the Cost of Living Counsel under Executive Order 11615.

On February 18, 1972, the four parties filed a motion to strike certain antitrust and/or anticompetitive allegations contained in Frankfort's petition to intervene, which pertain to the Interconnection Agreement between PSI, Southern Indiana Gas and Electric Company, Indiana Statewide Rural Electric Cooperative, Inc., and the United States of America, acting by and through the Administrators of the Rural Electrification Administration. In the alternative, the movants request that the Commission issue an order that such allegations will not be considered and determined in this docket, or, in the alternative, to treat such allegations as a complaint under section 306 of the Federal Power Act and consolidate with Docket No. E-7647. On March 2, 1973, Frankfort answered this motion and requested it be denied. Frankfort asserts that PSI has presented no justification for removing these issues to Docket No. E-7647. On March 31, 1972, the utilities replied to Frankfort's answer.

The issues raised by the above pleadings cannot be decided summarily but rather require development in an evidentiary proceeding. Accordingly, we shall deny Frankfort's January 25, 1972, motion to reject and treat the matters raised by Frankfort and Paris as a complaint under section 306 of the Federal Power Act so that they can have the opportunity to present evidence in support of their assertions. Accordingly, the above mentioned petitions to intervene and the answer of the utilities will be treated as a complaint and answer thereto, respectively, and a public hearing will be held. Since none of the parties or petitioners in this proceeding except PSI are parties to Docket No. E-7647, we will deny the four parties February 18, 1972, request for consolidation.

At the hearing established herein Frankfort and Paris shall have the burden of proving that the four utilities have engaged in anti-competitive conduct, that such acts and practices are continuing or are likely to continue, and to what extent the Commission has jurisdiction to remedy such acts and practices.

On December 11, 1972, PSI tendered for filing Amendment No. 1 to the KIP Agreement in Docket No. E-7669 on behalf of and between the four parties to the KIP Agreement. The proposed Amendment was designated as Docket No. E-7937. IPL and KU filed certificates of concurrence.

V 38-151 AUG 7 73 XUM

In support of its filing, in Docket No. E–7937, PSI states that it has redesignated the units from which Unit Power Sales may be made in order to improve the reliability of Unit Power Transactions and that it will have no effect upon the present schedule of the quantity of unit power to be exchanged among the parties. Further, PSI states that no changes in the existing demand and energy charges are proposed.

Public notice of PSI's proposal in Docket No. E–7937 was issued on January 22, 1973, which required petitions to intervene and protests be filed by February 2, 1973. On February 6, 1973, a petition to intervene and a request to file out of time was filed by Frankfort. Since Frankfort's petition to intervene raises issues of law and fact which may be similar to those in Docket No. E–7669, we will, consistent with our actions above, treat Frankfort's petition as a complaint under Section 306 of the Act, consolidate Docket No. E–7937 with Docket No. E–7996, and hold public hearings.

The proposal filed in Docket No. E–7937 became effective by operation of law on January 22, 1973, thirty days after the completion of the filing by receipt of KU's certificate of concurrence.

On February 28, 1973, KU tendered for filing proposed changes in Service Schedule B of the KIP Agreement on behalf of and between PSI, KU, IPL, and EK. The proposal is designated Docket No. E–8053. The proposal provides for an increase in the demand charge for unit power for the 1973 unit year. The four utilities requested an effective date of April 1, 1973. On March 30, 1973, the Commission's Secretary notified KU that the filing was deficient and informed KU that a filing date would not be assigned this docket until it has been cured. On July 2, 1973, KU cured the deficiency and requested an effective date of August 2, 1973, or in the alternative April 1, 1973, as originally requested.

Public notice of Docket No. E–8053 was issued March 12, 1973, with protests or petitions to intervene due on or before March 23, 1973. On March 23, 1973, Frankfort filed a protest and petition to intervene, request for hearing, and request for consolidation of this docket with the proceedings in Docket Nos. E–7669 and E–7937. Frankfort incorporates by reference in its petitions to intervene in this docket its petition to intervene dated January 25, 1972, in Docket No. E–7669.

Review of the rate filing and the pleadings in Docket No. E–8053 indicate that issues are raised which require development in an evidentiary hearing. The proposed increased rates and charges have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful. Accordingly, we shall suspend the proposed charges for one day and order a public hearing. Moreover, since all three dockets involve the KIP Agreement and may involve similar issues of fact and law, we will consolidate the proceedings in Docket No. E–8053 with Docket Nos. E–7669 and E–7937.

The Commission finds.

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in the KIP Agreement, Service Schedule B, as proposed to be amended in Docket No. E–8053 and that the proposed changes be suspended as hereinafter provided.

(2) It is necessary and appropriate in the proper exercise of the Commission's responsibilities under the Federal Power Act that the issues raised by Frankfort and Paris in their petitions filed in Docket No. E–7669 and the issues raised by Frankfort in its petition filed in Docket No. E–7937 be investigated as a complaint pursuant to section 306 of the Federal Power Act to determine the merits of the assertions contained therein and to provide such relief, if any, which is within this Commission's authority to grant.

(3) The disposition of the proceedings in Docket Nos. E–7669, E–7937, and E–8053 should be expedited in accordance with the procedure set forth below.

(4) The participation of Frankfort in Docket No. E–8053 may be in the public interest.

The Commission orders.

(A) Pursuant to the authority of the Federal Power Act, particularly section 205(e) thereof, the Commission's rules of practice and procedure, and the regulations under the Federal Power Act (18 CFR Ch. I), a public hearing shall be held commencing with a prehearing conference on November 27, 1973, at 10:00 a.m., e.s.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the lawfulness of the rates, charges, classifications and services contained in the KIP Agreement, Service Schedule B as proposed to be revised in Docket No. E–8053.

(B) Pending hearing and a final decision in Docket No. E–8053, the proposed changes in Service Schedule B of the KIP Agreement originally tendered on February 23, 1973, and with an official filing date of July 2, 1973, are hereby accepted for filing, suspended, and the use thereof deferred until August 2, 1973.

(C) Pursuant to the authority of the Federal Power Act, particularly section 306 thereof and the Commission's rules of practice and procedure, an investigation is hereby instituted to determine through an evidentiary hearing the issues raised by the complaints of Frankfort and Paris in Docket No. E–7669 and the issues raised by Frankfort's complaint in Docket No. E–7937 and, if necessary, to prescribe such relief as is appropriate within the Commission's authority under the Federal Power Act.

(D) Since Docket Nos. E–7669, E–7937 and E–8053 involve the KIP Agreement and may involve similar issues of law and fact, we shall consolidate these proceedings.

(E) Frankfort and Paris shall file with the Commission and serve on all parties to the proceedings in Docket No. E–7669 and Frankfort shall also file with the Commission and serve on all parties to the proceedings in Docket No. E–7937, direct testimony and exhibits in support of their allegations on or before October 9, 1973.

(F) With respect to Docket Nos. E–7669 and E–7937 the dates for service of evidence are as follows: on or before October 23, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of PSI, IPL, KU, and EK shall be served on or before November 6, 1973. Any rebuttal evidence by Frankfort in Docket Nos. E–7669 and E–7937 and Paris in Docket No. E–7669 shall be served on or before November 20, 1973.

(G) With respect to Docket No. E–8053 the dates for service of evidence are as follows: on or before October 23, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of Frankfort shall be served on or before November 6, 1973. Any rebuttal evidence by the four utilities shall be served on or before November 20, 1973.

(H) Cross-examination on the evidence submitted shall commence on December 4, 1973, at 10 a.m.

(I) At the prehearing conference on November 27, 1973, all prepared testimony in the three dockets together with KU's entire rate filing in Docket No. E–8053 shall be admitted to the record subject to appropriate motions, if any, by parties to the proceedings. All parties will be expected to come to this conference prepared to effectuate the provisions of the Commission's Rules of Practice.

(J) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5 (d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control the proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure.

(K) The above-named petitioner in Docket No. E–8053 is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenor shall be limited to matters affecting rights and interests specifically set forth in the petition to intervene: *And Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it, might be aggrieved because of any order or orders issued by the Commission in these proceedings.

(L) Nothing contained in this order shall relieve the applicant of any responsibility imposed by the Economic Stabilization Act of 1970, (Public Law 91–379, 84 Stat. 799, as amended by Public Law 92–15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

(M) The Secretary of the Commission shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

[FR Doc.73–16255 Filed 8–6–73;8:45 am]

[Docket No. E–8242]

PUBLIC SERVICE CO. OF OKLAHOMA

Order Accepting for Filing and Suspending Proposed Rate Increases and Permitting Interventions

JULY 30, 1973.

Public Service Co. of Oklahoma (PSCO) on May 30, 1973, tendered for filing proposed changes in its FPC Rate Schedule Nos. 163, 168–171, 173, 176–179, 182, and 189 [1] with a proposed effective date of August 1, 1973. PSCO asserts that the increased rates are occasioned by: (1) A need to equalize charges to similarly situated customers; (2) a desire to simplify rate schedules; (3) a necessity to more adequately cover the cost of service of the company; and finally (4) an attempt to increase revenue to assure necessary expansion for future needs and attract capital. The proposed charges would increase revenues from jurisdictional sales by approximately $505,862, based on a test year of calendar year 1971.

Notice was given of the filing on June 19, 1973, specifying that protests and/or petitions to intervene be filed on or before July 12, 1973. A timely petition to intervene was filed by the Oklahoma Consumer Protection Agency, a private organization, on June 1, 1973. In addition, petitions to intervene, protest and motion to reject were filed by six customers of PSCO on July 12, 1973.[2]

In support of their motion to reject, Cities claim that the proposed filing violates the Mobile-Sierra [3] doctrine; or that the effective date of the rates be postponed until their lawfulness is determined.

Cities also complain that the increase in rates to certain wholesale customers while retaining rates of other customers constitutes discrimination under section 205 of the Federal Power Act and requests an investigation of them under section 206 of the Act; the prohibited capacity charge adjustment of PSCO's proposed rate schedule violates section 205 of the Federal Power Act; and the tax clause and fuel clause of the proposed rate schedule should be rejected on the basis of previous Commission holdings, in particular New England Power Co., Opinion No. 633 (October 30, 1972).

Intervenors also maintain that the proposed rate schedules restrict the ability of the petitioners to seek alternative sources of power and therefore are discriminatory.

The proposed rate schedules will purportedly prevent petitioners from effectively competing with PSCO for industrial customers and therefore are discriminatory. The proposed rate schedules are based on "stale" data and are therefore unrepresentative and prohibited under the Federal Power Act, and therefore should be rejected, the rate of return is excessive, the proposed 80 percent ratchet may be unfair and unjust, the method of allocation of cost of service is questionable, and the proposed rates are inflationary and violate current Phase III guidelines.

Finally, petitioners recommend a suspension of the rates for the full five-month period if the application is not rejected.

With regard to the contention of the applicability of the Mobile-Sierra doctrine to the proposed changes in terms and conditions we agree.

Our review of the applicable contracts indicates that PSCO does not have the contractual authority to unilaterally file changes in terms and conditions of the contract during the life of the contract. Therefore, since the contract presently bars a change in the terms and conditions the filing is not appropriate under section 205. We will, however, institute a proceeding under section 206 as to the justness and reasonableness of the proposed changes in terms and conditions to be conducted in conjunction with the section 205 proceeding ordered herein.

Concerning the City of Pawhuska and the Anadarko Public Works Authority, who have not intervened in this proceeding, our reading of their respective contracts with PSCO leads us to conclude that the company in these two instances is contractually prohibited not only from unilaterally altering the terms and conditions but also from unilaterally changing the rates in the contracts as well. Accordingly, the section 206 proceeding will consider both the terms and conditions and the rates to be charged in these two instances.

As to the possible anti-competitive issues raised by petitioners, by order issued May 31, 1973, in Indiana and Michigan Electric Company, Docket No. E–7740 we set minimum standards for those who would raise anti-competitive issues. These standards are that the petition to intervene must clearly specify (1) the facts relied upon, (2) the anti-competitive practices challenged, (3) the requested relief which is within this Commission's authority to direct. Our review of the petition to intervene indicates that it fails to specify the relief it seeks from this Commission which is within our authority to grant. Accordingly, we shall limit petitioners' participation in this proceeding to matters other than the alleged anti-competitive activities. This action is without prejudice to petitioners' right to file an appropriate amended petition which set forth the relief for the alleged anti-competitive conduct that is within this Commission's authority to grant.

The other questions raised by the petition for intervention have either been resolved by action taken herein or require development at an evidentiary hearing and cannot be dealt with summarily.

Our review of the application indicates that the rates and charges included therein have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. In addition, our review of the filing and the complaints raised by the protest and petition to intervene discussed above indicates issues that may require development in an evidentiary hearing. Accordingly, we will suspend the effectiveness of the proposed rates for the full five-month statutory period.

In order that we may have a complete record, in light of our caveat in Duke Power Company, Opinion No. 642 (December 18, 1972), we are going to direct PSCO to file within 60 days of this order an updated cost of service study for the twelve-month period ending June 30, 1973 (including statements A through O as required by regulation § 35.13).

The Commission finds.

(1) Participation by the petitioners for intervention in this proceeding may be in the public interest.

(2) The proposed increased rates and charges may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful under section 205 of the Federal Power Act and accordingly shall be suspended as hereinafter ordered.

(3) The motion to reject the filing should be denied for the reasons stated above.

(4) Good cause exists to institute a proceeding under section 206 with respect to the terms and conditions proposed to be changed in the instant filing and with respect to the rates charged the City of Pawhuska and the Anadarko Public Works Authority.

The Commission orders:

(A) PSCO's proposed rate increase is accepted for filing under section 205 of

[1] City of Mannford (FPC #163), City of Altus (FPC #168), City of Frederick (FPC #169), City of Cordell (FPC #170), City of Kaw City (FPC #171), Anadarko Public Works Authority (FPC #173), City of Pawhuska (FPC #176), Verdigris Valley Electric Cooperative, Inc. (FPC #177), Indian Electric Cooperative, Inc. (FPC #178), Red River Valley Rural Electric Association (FPC #179), Kiwash Electric Cooperative, Inc. (FPC #182), and City of Marlow (FPC #185).

[2] The cities of Frederick, Cordell, Altus, and Mannford, Oklahoma and by the Verdigris Valley Electric Cooperative, Inc. and the Indian Electric Cooperative. (Cities).

[3] United Gas Pipe Line Co. v. Mobile Service Corp., 350 U.S. 332 (1956); F.P.C. v. Sierra Pacific Power Co., 350 U.S. 348 (1956).

V 38 151 AUG 7 73 XUM

the Federal Power Act and an investigation under section 206 is initiated as to the proposed changes in terms and conditions of the contracts between PSCO and its customers herein and with respect to the rates charged the City of Pawhuska and the Anadarko Public Works Authority. Pending a hearing and decision, thereon, the proposed rates are hereby suspended and the use thereof deferred until January 1, 1974, or until such time as they are made effective in the manner provided in the Federal Power Act. Increased rates and charges collected after January 1, 1974, and found by the Commission in this proceeding to be unjustified, shall be refunded according to the Commission's regulations.

(B) The petitioners for intervention are hereby permitted in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting rights and interests specifically set forth in the respective petitions to intervene and specifically limited to matters other than alleged anti-competitive activities: *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they, or any of them, might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(C) Petitioners' motion to reject the filing is hereby denied.

(D) On or before October 1, 1973, PSCO shall file an updated cost of service study for the twelve-month period ended June 30, 1973, including statements A through O as required by § 35.13 of the Commission's regulations.

(E) Pursuant to the authority of the Federal Power Act, particularly section 205(d) thereof, the Commission's rules of practice and procedure, and the regulations under the Federal Power Act (18 C.F.R., Chapter I) a public hearing shall be held, commencing with a prehearing conference on January 8, 1974, at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the lawfulness of the rates, charges, classifications, and services contained in PSCO's rate increase filing.

(F) At the prehearing conference on January 8, 1974, PSCO's prepared testimony together with its entire rate filing shall be admitted to the record as its complete case-in-chief subject to appropriate motions, if any, by parties to the proceedings. All parties will be expected to come to this conference prepared to effectuate the provisions of the Commission's rules of practice and procedure.

(G) On or before November 27, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony of intervenors shall be served on or before December 13, 1973. Any rebuttal evidence by PSCO shall be served on or before January 3, 1974. Cross-examination of the evidence will commence on January 15, 1974.

(H) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control the proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure.

(I) Any future change in rates resulting from application of the tax adjustment clause of PSCO's FPC Electric Tariff should be accompanied by appropriate data and computations showing the basis for change in rates.

(J) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16287 Filed 6-8-73;8:45 am]

[Docket No. CI74-50]

R. M. MORAN, ET AL.

Notice of Application

JULY 31, 1973.

Take notice that on June 25, 1973, R. M. Moran, et al. (Applicants), P.O. Box 1919, Hobbs, New Mexico 88240, filed in Docket No. CI74-50 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the sale of natural gas in interstate commerce to Skelly Oil Company from the Drinkard Field, Lea County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that they make percentage sales of casinghead gas to Skelly Oil Company which resells the gas to El Paso Natural Gas Company (El Paso), that the producing well has been reclassified from an oil well to a gas well by the New Mexico Oil Conservation Commission, and that Applicants intend to sell their gas to El Paso under an existing contract.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, filed with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determing the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-16250 Filed 8-6-73;8:45 am]

[Docket No. CI73-870]

RYDER SCOTT MANAGEMENT CO., INC., ET AL.

Order Granting Intervention, Setting Hearing Date and Prescribing Procedure

JULY 31, 1973.

On June 8, 1973, Ryder Scott Management Co., Inc. (Ryder) filed an application in Docket No. CI73-870 for a limited term certificate of public convenience and necessity with pregranted abandonment authority, pursuant to § 157.23, as amended, of the Commission's regulations under the Natural Gas Act, for the sale of gas to Natural Gas Pipeline Company of America (Natural) from acreage in Wise County, Texas.

Specifically, Ryder proposes to sell approximately 60,000 Mcf per month to Northern for one year pursuant to a letter agreement dated March 27, 1973. The proposed rate of 50.0¢, subject to upward and downward Btu adjustment from a 1,000 Btu base, exceeds the applicable area ceiling rate for wellhead deliveries of 22.5¢.

Ryder commenced a 60 day emergency sale to Natural on May 25, 1973, pursuant to § 157.29 of the Commission's regulations under the Natural Gas Act.

Ryder, in its application has requested that the intermediate decision be omitted, that oral hearing be waived and that the application be heard under the shortened procedure afforded by § 1.32 of the Commission's rules of practice and procedure.

A petition to intervene in support of the application was filed by Natural Gas Pipeline Company of America (Natural) on July 2, 1973.

The application in this proceeding represents a sizeable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers, nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and

expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

The Commission finds.

(1) The intervention of Natural in this proceeding may be in the public interest.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the issues in this proceeding be scheduled for hearing in accordance with the procedures set forth below.

The Commission orders.

(A) Applicant's request that the intermediate decision be omitted, that oral hearing be waived and that the Application be heard under the shortened procedure afforded by § 1.32 of the Commission's rules of practice and procedure is not in the public interest and is hereby denied.

(B) Natural is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervener shall be limited to matters affecting asserted rights and interests as specifically set forth in said petition for leave to intervene: *And Provided, further,* That the admission of said intervener shall not be construed as recognition by the Commission that it might be aggrieved by any order or orders of the Commission entered in this proceeding.

(C) Pursuant to the authority of the Natural Gas Act, particularly sections 7 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act, a public hearing shall be held on August 29, 1973, at 10 am (e.d.t.) in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the issue of whether a certificate of public convenience and necessity should be granted as requested by the applicant.

(D) On or before August 15, 1973, Ryder and any supporting party shall file with the Commission and serve upon all parties, including Commission Staff, their testimony and exhibits in support of their positions.

(E) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority 18 CFR 3.5(d)—shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure and the purposes expressed in this order.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16266 Filed 6-8-73;8:45 am]

[Docket No. CP74-22]

TENNESSEE GAS PIPELINE CO., AND TENNECO INC.

Notice of Application

JULY 30, 1973.

Take notice that on July 23, 1973, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Applicant), P. O. Box 2511, Houston, Texas 77001, filed in Docket No. CP74-22 an application pursuant to section 7 of the Natural Gas Act and § 157.7 (g) of the regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval for the abandonment, during the remainder of 1973 and the operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilities which will not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment will not exceed $3,000,000 and the cost for any single project will not exceed $500,000. These costs will be financed from general funds and/or from revolving credit borrowings.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16261 Filed 6-8-73;8:45 am]

[Docket No. RP73-113]

TENNESSEE GAS PIPELINE CO., AND TENNECO INC.

Order Accepting for Filing, and Suspending, Proposed Increased Rates and Establishing Hearing Procedures

AUGUST 1, 1973.

Tennessee Gas Pipeline Company, a Division of Tennco Inc. (Tennessee) on June 15, 1973, filed revised tariff sheets to its FPC Gas Tariff, Ninth Revised Volume No. 1 and Sixth Revised Volume No. 2.[1] The proposed effective date is August 1, 1973.

According to Tennessee, the proposed rates would increase revenues from jurisdictional sales by $150,194,754 based on a test year ended February 28, 1973, adjusted for changes known and measurable through November 30, 1973. Tennessee's filing also reflects cancellation of Tennessee's Rate Schedule TWS, under which they state they no longer render service.

Tennessee states that the increased rates are required to reflect a proposed book depreciation and amortization rate of 5.75 percent, substantial additional advance payments to obtain additional natural gas supplies, a rate of return of 9.25 percent, increases in cost of material, supplies and wages, and increases in property, franchise, payroll and state income taxes.

Tennessee has included $18,694,743 million of non-certificated facilities in its rate base. Tennessee has likewise included certain other gathering facilities costs of $14,877,790, some of which is in excess of the dollar limitation in its 1973 budget certificate in Docket CP73-129. Tennessee has requested an increase in the expenditure limitation, and this application is pending before the Commission. Therefore, Tennessee requests waiver of § 154.63(e)(2)(ii) of the Commission's regulations to permit inclusion of such costs. In the event these facilities are not certificated and placed in service prior to January 1, 1974, Tennessee shall file revised tariff sheets adjusting its rates to reflect elimination of non-certificated facilities and shall also file supplemental cost and revenue data which reflects the elimination of these non-

[1] See appendix A, attached.

V 38 - 151 AUG 7 73 XUM

certificated facilities from its section 4(e) application in these proceedings.

Numerous petitions to intervene have been filed. (See Appendix B below) The proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. We will therefore suspend the filing for the full statutory period and establish hearing procedures.

The Commission finds.

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in Tennessee's FPC Gas Tariff, as proposed to be amended in this docket, and that the tendered tariff sheets be accepted for filing and suspended as hereinafter provided.

(2) The disposition of this proceeding should be expedited in accordance with the procedure set forth below.

(3) In the event this proceeding is not concluded prior to the termination of the suspension period herein ordered, the placing of the tariff changes applied for in this proceeding into effect, subject to refund with interest while pending Commission determination as to their justness and reasonableness, is consistent with the purpose of the Economic Stabilization Act of 1970, as amended.

(4) Participation of the above-named petitioners for intervention (See Appendix B below) in this proceeding may be in the public interest.

(5) Because the petitioners who did not timely file may be affected by the rates proposed herein and because their participation will not delay this proceeding, good cause exists to permit the late filings and to permit their participation in future proceedings in this docket.

(6) Waiver of § 154.63(e)(2)(ii) of the Commission's regulations subject to the conditions herein specified may be in the public interest.

(7) Good cause exists to permit Tennessee to cancel its existing Rate Schedule TWS.

The Commission orders.

(A) The above-named petitioners are hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting rights and interest specifically set forth in their respective petitions to intervene: *And provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they, or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(B) Tennessee's tendered tariff sheets are accepted for filing subject to the conditions stated in this order.

(C) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 5 thereof, the Commission's rules of practice and procedure, and the regulations Under the Natural Gas Act (18 CFR Ch. I), a public hearing shall be held, commencing with a prehearing conference on January 24, 1974 at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the lawfulness of the rates, charges, classification, and services contained in Tennessee's FPC Gas Tariff, as proposed to be amended herein.

(D) At the prehearing conference on January 24, 1974, Tennessee's prepared testimony (Statement P) together with its entire rate filing shall be admitted to the record as its complete case-in-chief subject to appropriate motions, if any, by parties to the proceeding. All parties will be expected to come to this conference prepared to effectuate the provisions of §§ 1.18 and 2.59 of the Commission's rules of practice and procedure.

(E) On or before December 14, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of all intervenors shall be served on or before January 4, 1974. Any rebuttal evidence by Tennessee shall be served on or before January 14, 1974. The public hearing herein ordered shall convene on January 29, 1974, at 10:00 a.m., e.s.t.

(F) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in § 2.59 of the Commission's rules of practice and procedure.

(G) Pending hearing and a decision thereon Tennessee's tariff sheets are suspended for five months and the use thereof deferred until January 1, 1974, or until such further time as they are made effective in the manner provided in the Natural Gas Act provided that Tennessee must file appropriate substitute rates to reflect only facilities which have been in certified and in service on or before January 1, 1974.

(H) Waiver of § 154.63(e)(2)(ii) of the Commission's regulations is hereby granted to Tennessee.

(I) Tennessee's Rate Schedule TWS is hereby cancelled.

(J) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

UNITED GAS PIPE LINE CO.

Notice of Application

JULY 31, 1973.

Take notice that on July 23, 1973, United Gas Pipe Line Company (Applicant), 1500 Southwest Tower, Houston, Texas 77002, filed in Docket No. CP74-21 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon service to Co-op Gas Company, Inc. (Co-op), near Arp, Smith County, Texas, and to abandon by removal and salvage certain measuring facilities used to serve Co-op, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The service to be abandoned was authorized by the order of August 1, 1952, in G-2019 (11 FPC 1162). Said order authorizes Applicant to sell gas to Co-op for resale to fifteen consumers. Applicant was requested in a letter dated July 15, 1973, by Co-op that gas service to it should be terminated as of July 31, 1973, as all consumers previously served would have butane service available as of that date. Applicant also proposes to abandon by removal and salvage the measuring facilities used to serve Co-op at a cost of $375.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 1979]

WISCONSIN PUBLIC SERVICE CORP.

Notice of Application for New License for Constructed Project

AUGUST 1, 1973.

Public notice is hereby given that application for new license was filed on March 29, 1971, under the Federal Power Act (16 U.S.C. 791a–825r) by Wisconsin Public Service corporation (Correspondence to: Mr. C. A. McKenna, Secretary, Wisconsin Public Service Corporation, 700 North Adams Street, P.O. Box 700, Green Bay Wisconsin 54305) for its constructed Alexander Project No. 1979, located in Lincoln County, Wisconsin, near the City of Merrill, on the Wisconsin River. The project affects navigable waters of the United States.

The existing Alexander Project includes a dam, which consists of a concrete section in the northeast end 148 feet long, a tainter gate section 338 feet long with eleven 26 foot steel gates and an 8 foot trash sluiceway, and a power house section 95 feet long, housing three vertical water wheels. There are three vertical turbo generators each having a capacity of 1400 kw at .8 power factor. A concrete retaining wall and an earth dyke extend upstream from the power house on the westerly side. The reservoir has an area of approximately 803 acres.

The project occupies 3.59 acres of land of the United States in lot 7, sec. 4, and lot 4, sec. 5, T. 31 N., R. 6 E., 4th principal meridian, Wisconsin. The land is more commonly known as Rock Island.

According to the application: (1) The estimated net investment is $276,304, (2) the estimated fair value is $1,193,947, (3) the estimated severance damages in the event of takeover are $130,000, and (4) the annual taxes paid to local governmental bodies are about $15,000.

Applicant states that public recreational activities within the project boundaries include: boating, bathing, hiking, water sports, and hunting.

Any person desiring to be heard or to make protest with reference to said application should on or before October 8, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. CP74-19]

ALGONQUIN GAS TRANSMISSION CO.

Notice of Application

JULY 27, 1973.

Take notice that on July 20, 1973, Algonquin Gas Transmission Company (Applicant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP74-19 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the relocation of a meter and regulating station and for permission and approval to abandon by sale to Southern Connecticut Gas Company (Southern Connecticut) certain pipeline and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to relocate a meter and regulator station used as a delivery point for gas service to Southern Connecticut from New Haven to North Haven, Connecticut.

The total cost of the proposed relocation is $240,682 which will be financed from funds on hand.

Applicant also proposes to abandon by sale to Southern Connecticut at the depreciated book value as of June 30, 1973, ($242,314.23) approximately 54 feet of 10-inch pipeline and approximately 38,412 feet of 12-inch pipeline all located in New Haven County, Connecticut. The purpose of the proposed abandonment is to enable Southern Connecticut to provide better gas service to its customers in the area contiguous to such facilities through improved system integration. Applicant asserts that the proposed abandonment by sale will also result in eliminating the need to construct a 1.2 mile 16-inch pipeline loop between North Haven and New Haven, Connecticut, at a cost, estimated in 1969, to be $463,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

V 38 151 AUG 7 73 XUM

[Docket No. RP74-4]

CITIES SERVICE GAS CO.

Notice of Proposed Changes in Rates and Charges

JULY 30, 1973.

Take notice that on July 23, 1973, Cities Service Gas Company (Cities Service) tendered for filing the following revisions to its FPC Gas Tariff, Second Revised Volume No. 1:

Sixth Revised Sheet PGA-1
First Revised Sheet No. 37D
Original Sheet Nos. 37H, 37I, 37J, 37K, 37L, 37M, and 37N

The increase in revenues from jurisdictional sales will be $20,990,103 based on a twelve-month test period ending March 31, 1973. An effective date of August 23, 1973 is requested.

Cities Service claims that the additional revenues from the proposed rate increases are essential to offset a revenue deficiency of that amount that occurred during the test period. The revisions to its gas tariff are explained by Cities Service as follows:

Sixth Revised Sheet PGA-1 would replace the currently effective rates of Fifth Revised Sheet PGA-1;

First Revised Sheet No. 37D provides for a change in the base cost of purchased gas in Cities Service Purchased Gas Cost Rate Adjustment Provision (PGA);

Original Sheet Nos. 37H-37N reflects the inclusion of a coal gasification rate adjustment provision and an advance payment rate adjustment provision.

In seeking approval of its application, Cities Service requests waiver of several of the Commission's rules and regulations. First, Cities Service states that it realizes that coal gasification and advance payments rate adjustment provisions are precluded by section 154.38(d)(3) of the Commission's regulations, but asserts that the need to augment its gas supplies (as it asserts these provisions would do) should constitute good cause for waiver of this section. If these provisions are not waived and Original Sheet Nos. 37H-37H are rejected, Cities Service requests that the rest of its application still be accepted for filing.

Second, Cities Service requests waiver of section 154.63 (e)(2)(ii) so that certificates of public convenience and necessity may be issued for selected facilities. Application is pending for certification of these facilities in Docket Nos. CP74-6 and CP74-10, according to Cities Service, and their minor nature and the need to have them completed before the winter of 1973-74 should constitute good cause for waiver of the designated provisions.

Third, Cities Service requests waiver of the provisions of Commission Order No. 441 which excluded advance payments for lease acquisition under agreements executed after November 10, 1971. Advance payments for lease acquisition by Cities Service to Woods Petroleum Company were derived from an agreement dated December 15, 1971, but Cities Service states that the actual agreement was negotiated prior to November 10, 1971, and thus should be removed from the requirements of Order No. 441.

Finally, Cities Service asks that it be exempted from the extensive filing requirements of Commission Order No. 488 (July 17, 1973). Their application had already been compiled and bound when Order No. 488 was issued, according to Cities Service, and the company claims that it would be unfair to force them to submit a new filing at this date. Cities Service only requests waiver to allow them extra time to supplement the application to bring it within the perameter of Order No. 488.

In addition, Cities Service requests authorization to charge nonrecoverable advance payments to Monsanto to FPC Account 186 and amortize it over a five-year period to FPC Account 813, as of the effective date of the proposed rates.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 14, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16241 Filed 8-6-73;8:45 am]

[Project No. 2016]

CITY OF TACOMA, WASHINGTON

Notice of Application for Approval of Exhibit R

AUGUST 1, 1973

Public notice is hereby given that application was filed on July 6, 1971, under the Federal Power Act (16 U.S.C. 791a-825r) by the City of Tacoma, Washington (Correspondence to: City of Tacoma, Department of Public Utilities, P.O. Box 1107, Tacoma, Washington 98411, attention: Mr. A. J. Benedetti, Director of Utilities) for approval of Exhibit R for constructed Project No. 2016, known as the Cowlitz Project, located on the Cowlitz River, in Lewis County, Washington, in the vicinity of Centralia and Chehalis, Washington.

The Exhibit R (recreational use plan) was filed in compliance with Articles 39 and 51 contained in an order issued on November 17, 1964, which further amended the project's license.

The project has two reservoirs, Mayfield Lake formed by Mayfield Dam and Davisson Lake formed by Mossyrock Dam. Applicant is presently developing Mossyrock Park on Davisson Lake which will include picnicking, camping, boating, swimming, and sanitary facilities. Applicant has a visitor's center near Mossyrock Dam and a vista overlook point near Mayfield Dam. Visitors are welcome at the salmon and trout hatcheries, both located downstream from Mayfield Dam. Boat launching facilities are provided near both hatcheries.

Additional recreation facilities are currently provided by the State of Washington, Lewis County, and certain private concerns on land leased from the Applicant at Mayfield Lake.

Future facilities planned by the Applicant include an additional park at both reservoirs and boat camps at Davisson Lake, with and without automobile access.

Applicant has estimated that the total acreage needed for public recreation will be 844 acres by 1985 and an additional 516 acres by the year 2015. Such acreage can be found within the existing project boundary.

Any person desiring to be heard or to make reference to said application should on or before September 11, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

MARY B. KIDD,
Acting Secretary.

[Docket No. RP72-157]

CONSOLIDATED GAS SUPPLY CORP.

Notice of Proposed Changes in FPC Gas Tariff

JULY 27, 1973.

Take notice that Consolidated Gas Supply Corporation (Consolidated), on July 24, 1973, tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1. The proposed changes are an amendment of Consolidated's PGA filing previously submitted on June 15, 1973, which as amended would increase revenues from jurisdictional sales and service by approximately $4.1 million based on the 12 month period ending April 30, 1973.

Consolidated states that the amendment is due to a rate increase filed by Texas Eastern Transmission Corporation (Texas Eastern), a major pipeline supplier of Consoliated, on June 13, 1973, for effectiveness August 1, 1973. Consolidated further states that it did not receive notice until July 19, 1973, and accordingly was unable to include this change in its June 15, 1973 filing. An effective date of August 1, 1973, is requested.

Copies of the filing were served upon Consolidated's jurisdictional customers, as well as interested state commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-7803]

CONSUMERS POWER CO.

Further Extension of Time and Postponement of Prehearing Conference and Hearing

JULY 30, 1973.

On July 26, 1973, Staff Counsel requested an extension of time in which to file its testimony and for an equivalent extension of the other procedural dates as set by the order issued July 25, 1973. The request states that no party objects to the extension.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Service of direct case by Staff, August 17, 1973.
Service of Interveners' direct case, August 31, 1973.
Prehearing Conference, September 20, 1973 (10 a.m., e.d.t.).
Service of rebuttal by Consumers, October 5, 1973.
Cross-examination, October 29, 1973 (10 a.m., e.s.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16271 Filed 8-6-73;8:45 am]

[Docket No. CP74-20]

EL PASO NATURAL GAS CO.

Notice of Application

JULY 27, 1973.

Take notice that on July 20, 1973, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP74-20 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of tap facilities and the sale and delivery of gas to Pioneer Natural Gas Company (Pioneer) and Arizona Public Service Company (APS) for resale to right-of-way grantors on Applicant's Southern Division System, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate the E. A. Bass Tap in Parmer County, Texas, the Kenneth Thomas Tap in Lamb County, Texas, and the Irene Arnold Tap in Maricopa County, Arizona, for sale and delivery of gas to Pioneer and APS for resale to three of Applicant's right-of-way grantors for residential and irrigation uses. Estimated peak day and annual natural gas requirements during the third year of operation are 7.8 Mcf and 694 Mcf. Applicant proposes to render said service according to the appropriate rate schedules contained in its FPC Gas Tariff, Original Volume No. 1. The total estimated cost of the proposed facilities is $3,215 which will be financed from working funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16240 Filed 8-6-73;8:45 am]

[Docket Nos. CI73-593 and CI73-656]

GETTY OIL CO. AND CITIES SERVICE GAS RESOURCES CO.

Notice of Amendment to Application

JULY 30, 1973.

Take notice that on July 23, 1973, Getty Oil Company (Applicant), P. O. Box 1404, Houston, Texas 77001, filed in Docket No. CI73-593 an amendment to its application pending in said docket to withdraw its request for a certificate of public convenience and necessity under § 2.75 of the Commission's General Policy and Interpretations (18 CFR 2.75) and to request that a certificate be issued at the prevailing area ceiling rate without pregranted abandonment authorization, all as more fully set forth in the amendment to the application which is on file with the Commission and open to public inspection.

In its application filed March 6, 1973, pursuant to section 7(c) of the Natural Gas Act, Applicant requests that the Commission issue a certificate of public convenience and necessity within the contemplation of § 2.75 of the Commission's General Policy and Interpretations authorizing the sale for resale and delivery of natural gas in interstate commerce to Cities Service Gas Company from the Locke (Brown Dolomite) Field, Roberts County, Texas, for 20 years at an initial rate of 40.0 cents per Mcf at 14.65 psia plus periodic escalations. By order of July 6, 1973, the subject application was consolidated for hearing with the application filed by Cities Service Gas Resources Company in Docket No. CI73-656.

Applicant now requests that it be authorized to sell gas at the area ceiling rate without pre-granted abandonment authorization, that Docket No. CI73-593 be severed from the consolidated proceeding, that the Commission set aside its order of July 6, 1973, insofar as said order provides for a formal hearing on the subject application, and that the proceeding in Docket No. CI73-593 be terminated except for issuance of a certificate as requested in the instant amendment. Applicant states the reserves available for the proposed sale are too little to justify the expenditures for participation in a contested, adversary proceeding on the certificate application.

Any person desiring to be heard or to make any protest with reference to said application, as amended, should on or before August 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Persons who have heretofore filed petitions to intervene need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-16272 Filed 8-6-73;8:45 am]

V 38-151 AUG 7 73 XUM

[Docket No. E-8282]

GULF STATES UTILITIES CO.

Order Authorizing Issuance of First Mortgage Bonds, Granting Intervention, and Consolidating Proceedings

JULY 27, 1973.

Gulf States Utilities Co. (Applicant) a corporation organized under the laws of the State of Texas and doing business in the States of Texas and Louisiana, filed an application on June 15, 1973, seeking an order pursuant to section 204 of the Federal Power Act authorizing it to issue and sell at competitive bidding $50,000,000 principal amount of First Mortgage Bonds, series due 2003.

The Applicant proposes to issue the Bonds under its Indenture of Mortgage to Manufacturers Hanover Trust Company dated September 1, 1926, as supplemented and proposed to be further supplemented by a Thirty-First Supplemental Indenture, to be dated as the first day of the month in which the New Bonds are to be issued.

Applicant proposes to sell its New Bonds at competitive bidding in compliance with the Commission's requirements of § 34.1(a) of the regulations under the Federal Power Act.

Applicant's public invitation for bids will provide that each bid for the proposed Bonds must be for the purchase of all the Bonds and may be made by a single bidder or a group of bidders. All bids shall be presented to the company at Manufacturers Hanover Trust Company, The Federal Room, Fourth Floor, 40 Wall Street, New York, New York 10015, before 11:00 a.m. New York Time on August 8, 1973 (or such later time as may be designated by the Company according to the procedures set forth in their public invitation). Each bid must be accompanied by a certified or official bank check or checks in the aggregate amount of $1,500,000.

In addition, each bid must be on the form of bid furnished by the Company and signed by the bidder or bidders and shall specify (1) the interest rate of the Bonds, which shall be a multiple of ⅛ of 1 percent; and (2) the price (expressed as a percentage of the principal amount) exclusive of the accrued interest to be paid to the Company for the Bonds, which will not be less than 99 percent and not more than 102½ percent of the principal amount of the Bonds, and that accrued interest on the Bonds from the first day of the month in which the bonds are issued to the date of payment therefor and delivery thereof will be paid to the company by the purchaser or purchasers.

The Applicant states that the proceeds from the sale of the New Bonds will be used by the Company to refund and payoff a portion of its commercial paper and short-term bank loans expected to be outstanding as of the date of the issuance. The Applicant estimates that on the date the securities are expected to be sold, there will be outstanding approximately $65,000,000 principal amount of commercial paper and short-term loans. The aforesaid commercial paper and short-term bank loans constitute an issuance of securities previously authorized by the Commission (Docket No. E-7805).

Written notice of the application has been given to the Texas Railroad Commission, the Louisiana Public Service Commission and to the Governor of each of those States. Notice has also been given by publication in the FEDERAL REGISTER on July 10, 1973 (38 FR 18429) stating that any person desiring to be heard or to make any protest with reference to the application should on or before July 16, 1973, file a petition or protest with the Federal Power Commission, Washington, D.C. 20426.

On July 13, 1973, the Cities of Lafayette and Plaquemine, Louisiana, (Cities) filed a Protest and Petition to Intervene in the proceeding, stating inter alia:

> In Docket E-7805 the Company represented that the purpose of the short-term authorization there was to obtain money and that "the proceeds from the notes will be added to the general funds of the Company to be used, among other things, to provide part of the interim funds for construction expenditures." Thus the refinancing proposed by Gulf States in the instant application will act to free $50,000,000 to use for purposes which the Cities have previously contended may be illegal and anticompetitive in nature and violative of the objectives of the Federal Power Act, particularly Section 202, 204, 205 and 206 * * *.
>
> Cities further state:
>
> The application filed by Gulf States herein if approved will place $50,000,000 into the company's hands without any indication as to the lawfulness of its use. This is clearly inconsistent with the recent Supreme Court decision in Gulf States Utilities v. F.P.C. — U.S. — 36 L.Ed. 2d 635 (1973), where the Court held at page 642 that under Section 204 the Commission is impowered "to authorize the issue of a security * * * only 'if it finds that such issue * * * is for some lawful object within the corporate purposes of the Applicant and compatible with the public interest.'" (emphasis in original). The Court concluded that this review must include consideration of the anticompetitive aspects of the proposed security issue.
>
> As the Supreme Court stated in its decision in Gulf States Utilities, the Commission's duty of inquiry under Section 204 does not end where it finds that the object of a proposed security issue is lawful. "For, in addition, the object must be 'compatible with the public interest.'" Gulf States Utilities, supra at page 642. Thus, even if the Commission should determine that the specific purpose of the instant security issue, as stated in the application filed by Gulf States, (i.e., the refunding and refinancing of outstanding short-term debt) is lawful, the Commission must also satisfy itself that the funds which will accrue in the hands of Gulf States as a result of the refinancing will be used for a purpose which is "compatible with the public interest."

The Cities therefore, oppose the authorization sought by Gulf States and request that the Application be set for hearing in accordance with the provisions of section 204 of the Federal Power Act or in the alternative; if Cities requested hearing, prior to Commission action, on the authorization as denied, the Cities request that this proceeding be consolidated with a previous Commission proceeding (Docket No. E-7676) for hearing purposes, and provision be made for subsequent action to rescind or condition any authorization granted if it is determined after hearing that the funds are to be used for anticompetitive or otherwise unlawful purposes.

As further support, the Cities incorporate by reference the protest and petitions and interventions filed by the Cities in Docket Nos. E-7567, E-7663, E-7696, E-7682, and E-7805 in addition to all pleadings previously filed by them in Docket No. E-7676.

On July 19, 1973, Applicant filed "Answer of Gulf States Utilities Company to Protest and Petition to Intervene." Applicant's Answer to Cities Petition to Intervene denies all incorporated allegations of Cities that Applicant has over a period of years in the past combined or conspired in restraint of trade; to expand or maintain monopoly; to obtain captive markets or allocate same; or destroy the Cities Pool Agreement and compress competition. Applicant further states:

> The lawful object of the proposed financing to refinance authorized short-term borrowings is evident from Applicant's application. Refinancing is implicit within the original Commission authorization for short-term notes. It is not only "compatible with" but essential to the public interest that the financial integrity of Applicant be preserved so that reliable electric service can be maintained at reasonable costs. Basis for such finding is evident in the application filed and in other voluminous records and reports on file with the Commission concerning Applicant, its business and finances.

Applicant in its Answer requests the Commission to deny the Petition to Intervene and without hearing, issue its order approving its application for the issuance of securities.

The Commission in reaching its determination with regard to this application must consider the filing in the light of other previous proceedings. Applicant has previously filed applications for authorization of various types of security issues in Docket Nos. E-7567, E-7682, E-7663, and E-7805. Protests and petitions to intervene alleging antitrust violations were filed in each of those dockets by the Cities of Lafayette and Plaquemine, Louisiana.

Docket No. E-7567 was appealed to the United States Circuit Court of Appeals for the District of Columbia, and on October 12, 1971, the Court of Appeals issued a decision, City of Lafayette, Louisiana v. SEC 454 F.2d 921, wherein it remanded to the Commission for further proceedings not inconsistent therewith, an order issued by the Commission stating in part that:

> The alleged violations which Petitioners attempt to raise in this proceeding are irrelevant to requested authorization of securities. There is no relief that the Commission can order in authorizing the issuance of bonds for refinancing purposes that would have any effect on the interest on the Petitioners, or solve any of the problems outlined by them.

On May 30, 1972, the Supreme Court granted a writ of certiorari to Gulf States Utilities to review the Court of Appeals decision.

Prior to the Supreme Court grant of a writ of certiorari, Applicant filed three additional securities application with the Commission pursuant to section 204 (Docket Nos. E-7663, E-7682, and E-7805). The Commission in following the guidelines of the Court of Appeals decision approved the securities issuances in the above dockets but severed the antitrust allegations into a separate complaint proceeding under section 306 of the Federal Power Act (Docket No. E-7676). Pursuant to the grant of certiorari the Commission by order issued in Docket No. E-7676 on June 1, 1972 stated all further proceedings in the docket before the Commission until the Supreme Court entered a final decision on the appeal of the City of Lafayette Case.

The Commission in its order of December 29, 1972, in Docket No. E-7805 quoted a previous order issued by them on November 4, 1971 in Docket No. E-7663, stating that:

> The Commission in reviewing Cities contentions as set forth in their petition has done so in the light of its overall responsibilities under the Federal Power Act. The Commission is aware of its responsibilities with regard to interconnection and coordination of the facilities, for purposes throughout the United States with the greatest possible economy and with regard to proper utilization and conservation of natural resources. Further, the Commission is aware of its responsibilities to enhance optimum interconnection and interchange of electric energy as well as other activities in furtherance of electric energy capabilities. All of the Commission's responsibilities being directed toward safe-guarding cost rates and reliability.
>
> At the same time, the Commission realizes that security issues to provide funds for utility construction and financing programs must be decided in a time frame much more limited than that contemplated for consideration of the alleged anticompetitive activities.
>
> With an awareness of its responsibilities, the Commission, however, is unable to determine the merits of the Cities contention and the Commission's authority to grant relief sought without further proceedings and the benefit of a hearing in which evidence is presented and legal authority is cited to grant the relief sought.

The Commission by using the above language made it clear that it did not intend to pre-judge the merits of anticompetitive allegations without a full and complete hearing, and at the same time, the Commission made it clear that it did not intend to jeopardize adequate electrical service to consumers of Gulf States Utilities Company by placing undue restrictions on Gulf States' ability to finance electric facilities required to provide adequate service.

This Commission cannot allow consumers served by utilities under its jurisdiction to suffer inadequate service by precipitous Commission action. The consideration of public interest must necessarily take into account a myriad of factors including anticompetitive allegations. The Commission cannot however, allow a utility to stop efficient operations pending its determination of the validity of the merits of such allegations. Until a complete evidentiary record has been developed in this Docket and other related dockets the Commission cannot assign weight to unproved anticompetitive allegations by the Cities or unproved defenses by the Company when the result of doing so would occasion the loss or reduction of a vital service to the consuming public. To do so would only encourage a private interest to the subversion to the public interest.

The Commission in reaching this conclusion feels it is in complete compliance with the Supreme Court's ruling in Gulf States Utilities Company v. F.P.C. — U.S.—36 L.Ed 2nd 635 (1937), where at page 642 the Court said:

> In making its determination under Section 204(a) the Commission is given broad powers of inquiry and enforcement. By Section 204(b) it may hold hearings on the application, may grant the application "in whole or conditions as it may find necessary or appropriate." After opportunity for hearing and for good cause shown, it may supplement, modify, or condition any previous order "as it may find necessary or appropriate." * * * The court went on further to say at page 646: Our conclusion that, as a general rule, the Commission must consider anticompetitive consequences of the security issue under Section 204 does not mean that the Commission must hold a hearing on objections on every case. Neither does it mean that every allegation must be fully investigated regardless of its facial merit, or that consideration of the allegations may not, in appropriate circumstances, be deferred, or that a major portion of the securities issue may not forthwith be authorized and only the remainder withheld for further study.

The Commission agrees with Intervenors to the extent that, "even if the Commission should determine that the specific purpose of the instant security issue, as stated in the application filed by Gulf States, (i.e., the refunding and refinancing of outstanding short-term debt) is lawful, the Commission must also satisfy itself that the funds which will accrue in the hands of Gulf States as a result of the refinancing will be used for a purpose which is compatible with the public interest."

The Commission cannot allow the private interest of either the Applicant or the Cities to override the consideration we must necessarily give to the public now being provided adequate electric service.

Inasmuch as the issues presented by the Cities in this proceeding involve the same subject matter as those presently being considered in Docket No. E-7676, the Commission feels that it is appropriate to consider the petitions to intervene filed in this Docket as complaints under Section 306 of the Federal Power Act and to consolidate those complaints with the complaints previously filed in Docket No. E-7676.

Since the $50,000,000 aggregate principal amount of Bonds proposed to be issued by Applicant will be used to refinance short-term borrowings authorized by the Commission in Docket No. E-7805, the Commission feels it appropriate to reduce the previously granted dollar authority in Docket E-7805 by $50,000,000.

The Commission finds:

(1) The Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act subject to the jurisdiction of this Commission as heretofore determined and set forth in the Commission's order issued November 27, 1957, in the matter of Gulf States Utilities Co., Docket No. E-6785 (18 FPC 701).

(2) The proposed issuance and sale of First Mortgage Bonds as described above will constitute an issuance of securities within the purview of section 204 of the Act.

(3) Applicant is not organized and operating in a State under the laws of which the securities issue here involved is regulated by a state commission within the meaning of section 204(f) of the Act; and the proposed issuance of securities is, therefore, not exempt by virtue of that section from the requirements of section 204 of the Act.

(4) The proposed issuance and sale of bonds of common Stock is hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform in that service, and is reasonably necessary and appropriate for such purposes.

(5) Intervention by the above mentioned Petitioners may be in the public interest for purposes of Commission consideration of their petition.

(6) Matters of certain activities alleged in the filed protest and petition to intervene by the Cities of Lafayette and Plaquemine, Louisiana, raise issues which should be heard in the proceeding separate from this docket.

(7) The protest and petitions to intervene filed in this docket by the Cities of Lafayette and Plaquemine, Louisiana should be considered as a complaint filed under section 306 of the Federal Power Act.

(8) The protest and petitions to intervene filed in this docket by Lafayette and Plaquemine, Louisiana raise issues similar to those being considered in Docket No. E-7676, a complaint proceeding now before the Commission, and it is therefore appropriate that the complaints filed in this Docket should be consolidated with Docket No. E-7676 for purposes of hearing and decision.

(9) The period of public notice given in this matter is reasonable.

The Commission orders.

(A) The above-mentioned petitioners are hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission. Provided, however, The admission of the aforementioned petitioners shall not be construed as recognition by the Commission that the petitioners might be aggrieved because of any order or orders of the Commission entered in this proceeding.

V 38-151 AUG 7 73 XUM

(B) The proposed issuance and sale of First Mortgage Bonds upon the terms and conditions and for the purposes specified in the application as described above, is hereby authorized subject to the provisions of this order.

(C) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of § 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and § 34.2(h) of those Regulations relating to affiliation, and shall have either filed such amendments, or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in § 34.9 of the regulations.

(ii) The Commission, by further order shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates, or determination of cause or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

(F) Pursuant to the authority of the Federal Power Act, particulary §§202, 306, and 307 thereof in the Commission's rules of practice and procedure, an investigation is hereby instituted to determine the justification of the Protest and Petitions to Intervene by the Cities of Lafayette and Plaquemine, Louisiana and, if necessary, to prescribe such relief as is appropriate within the boundaries of the Federal Power Act.

(G) All further proceedings in this docket shall be consolidated with the Complaint proceeding previously instituted in Docket No. E–7676.

(H) Inasmuch as Louisiana Power and Light Co. and Central Louisiana Electric Co. as well as Gulf States Utilities Co. were named as parties in Docket No. E–7676, with which this proceeeding will be consolidated, a copy of the Cities complaint shall be served on Louisiana Power and Light Co. and Central Louisiana Electric Co. and their response thereto shall be filed with the Commission within 15 days from the date of issuance of this order.

(I) The Commission's order issued December 29, 1972 in Docket No. E–7805, authorizing the issuance of $125,000,000 aggregate amount of short-term borrowing is hereby amended to reduce the total aggregate amount outstanding at any one time to $75,000,000. The reduction of $50,000,000 in this Docket represents the face value of the Bonds authorized to be issued by this order. All other terms and conditions of the Commission's order issued in Docket No. E–7805 on December 29, 1972, shall remain in full force and effect.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73–16274 Filed 8–6–73;8:45 am]

[Docket No. CP74–23]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Notice of Application

JULY 31, 1973.

Take notice that on July 23, 1973, Kansas-Nebraska Natural Gas Co., Inc. (Kansas-Nebraska), Hastings, Nebraska 68901, filed in Docket No. CP74–23 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued operation of certain pipeline, compressor and storage facilities in central Kansas, the construction and operation of certain pipeline and compression facilities, the establishment of a new redelivery point for the exchange of gas with Cities Service Gas Co. (Cities Service), and the continuation of gas service to certain customers for resale in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Kansas-Nebraska proposes to operate in interstate commerce the Adolph Storage facilities near Pawnee Rock, Kansas, including its 1,000 horsepower injection-withdrawal compressor, the Pawnee Rock Compressor Station with 1,275 compression horsepower and gas sweetening and dehydration facilities, the Otis Station with 960 horsepower of compression, approximately 105 miles of 2-inch to 12-inch pipeline, two town border stations, and metering and appurtenant facilities by which Kansas-Nebraska makes both direct sales and sales for resale to its customers. It is stated that heretofore these facilities were used only in intrastate commerce. Kansas-Nebraska further proposes to sell in interstate commerce for resale and to deliver natural gas, heretofore sold and delivered in intrastate commerce, to Central Kansas Power Co., Inc., at Toulon, Kansas, to Producers Gas Equities, Inc., at points in Ellis, Ness, and Rush Counties, Kansas, to Greeley Gas Company at Alexander, Bazine, McCraken and Ness City, Kansas, and to the City of Albert, Kansas. Kansas-Nebraska states that it intends to make such sales according to its FPC Gas Tariff, Second Revised Volume No. 1 for Zone 1 customers.

Kansas-Nebraska also proposes to construct and operate approximately 600 feet of 6-inch interconnecting pipeline in Edwards County, Kansas, to facilitate the proposed new redelivery point and a 500 horsepower compressor station to be located in Rooks County, Kansas.

Kansas-Nebraska was authorized by order of July 22, 1970, as amended in Docket No. CP70–239 (44 FPC 149), among other things, to exchange gas with Cities Service. Kansas-Nebraska now proposes to establish a new redelivery point for said exchange in the vicinity of its gathering system and Cities pipeline in Edward County, Kansas. It is stated that Cities will construct and operate the facilities at a site provided by Kansas-Nebraska.

The estimated cost of the proposed new facilities is $180,000 which will be financed from working capital and interim bank loans.

The stated purpose of these proposals is to conserve gas reserves in central Kansas by making quantities available to Kansas-Nebraska's interstate system at times when the deliverable capacity of the area producing fields exceeds the area needs while assuring central Kansas customers of future reliable service by the addition of an interconnecting point south of the area between Kansas-Nebraska's Pawnee Rock Unruh gathering system and Cities Service's transmission line.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matters finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73–16276 Filed 8–6–73;8:45 am]

[Docket Nos. CI74–37, CI74–38, CI74–39]

KOPPERS CO., INC., ET AL.

Notice of Applications Pursuant to Section 2.75 of the Commission's General Policy and Interpretations and for Declaratory Orders

JULY 27, 1973.

Take notice that on July 16, 1973, Koppers Company, Inc. (Koppers), 1500 Koppers Building, Pittsburgh, Pennsylvania 15219, in Docket No. CI74–37, St. Regis Paper Company (St. Regis), 916 Pacific Avenue, Takoma, Washington 98401, in Docket No. CI74–38, and Escuhbia Oil Company (Escuhbia), Scott Plaza, Philadelphia, Pennsylvania 19113, in Docket No. CI74–39, filed applications pursuant to section 7(c) of the Natural Gas Act and § 2.75 of the Commission's general policy and interpretations (18 CFR 2.75) for certificates of public convenience and necessity authorizing sales for resale and deliveries of natural gas in interstate commerce to Southern Natural Gas Company (Southern) from the Big Escambia Creek Field, Escambia County, Alabama. In addition, Applicants request declaratory orders that the transportation and sale of condensate and light liquid products to Southern, together with Applicants' facilities for such operations, are not subject to the Commission's jurisdiction under the Natural Gas Act. Applicants proposals and requests are more fully set forth in the applications which are on file with the Commission and open to public inspection.

Koppers in Docket No. CI74–37 proposes under the optional gas pricing procedure to sell all the gas it can deliver, estimated initially at 275 Mcf per day, from its acreage in the Big Escambia Field, Escambia County, Alabama to Southern at an initial rate of 55.0 cents per million Btu at 14.65 psia, pursuant to a contract dated December 1, 1972. Said contract provides for a 1.0-cent per million Btu price escalation every two years after initial deliveries, for tax reimbursement to the seller for ⅞ of any new or additional taxes and for a term of twenty years from the end of the month upon which deliveries commence. Koppers estimates monthly deliveries of gas at 7,250 Mcf.

St. Regis in Docket No. CI74–38 proposes to sell all the gas it can deliver, estimated initially at 275 Mcf per day, from its acreage in the Big Escambia Creek Field to Southern at an initial rate of 55.0 cents per million Btu at 14.65 psia, pursuant to a contract dated December 1, 1972. Said contract provides for a 1.0-cent per million Btu price escalation every two years after initial deliveries, for tax reimbursement to the seller for ⅞ of any new or additional taxes and for a term of twenty years from the end of the month upon which deliveries commence. St. Regis estimates monthly deliveries of gas at 7,250 Mcf.

Escuhbia in Docket No. CI74–39 proposes to sell all the gas it can deliver, estimated initially at 650 Mcf per day, from its acreage in the Big Escambia Creek Field to Southern at an initial rate of 55.0 cents per million Btu at 14.65 psia, pursuant to a contract dated December 1, 1972. Said contract provides for a 1.0-cent per million Btu price escalation every two years after initial deliveries, for tax reimbursement to the seller for ⅞ of any new or additional taxes and for a term of twenty years from the end of the month of initial deliveries. Escuhbia estimates monthly deliveries of gas at 17,700 Mcf.

Applicants state that the gas offered for certification pursuant to the contracts with Southern has not been previously sold in the interstate market nor have any applications been previously filed with the Commission for certification of the sales of such gas.

Applicants assert that the instant sales at the proposed initial rates with escalations are of critical importance in assisting Southern to meet its requirements for gas on its system as Southern is confronted with increasing shortages of natural gas supplies. Applicants further assert that the proposed rates are competitive with offers from other potential buyers, including those in the intrastate market and is lower than prices for base load and peak-shaving liquefied natural gas and synthetic gas. In addition, it is stated that the Applicants will incur substantial costs in removing sulfur from the gas prior to delivery to Southern.

Applicants also request that the Commission issue declaratory orders disclaiming jurisdiction over the transportation and sale of condensate and light liquid products to Southern (on an optional basis) and the facilities necessary therefor. Applicants state that they will construct a gas treating plant to remove sulfur, carbon dioxide, and liquid hydrocarbons from the gas proposed to be sold to Southern in the instant applications. After stabilization, the condensate and light liquid products will be removed and stored for subsequent delivery to Southern. Applicants are advised that upon delivery, Southern will transport both commodities to a Maximum Utilization Plant to be constructed in Escambia County where it will be converted into methane and subsequently sold in interstate commerce through Southern's system.

Any person desiring to be heard or to make any protest with reference to said applications should on or before August 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on these applications if no petitions to intervene are filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificates is required by the public convenience and necessity. If petitions for leave to intervene are timely filed, or if the Commission on its own motion believes that formal hearings are required, further notice of such hearings will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Filed Doc.73–16244 Filed 8–6–73;8:45 am]

[Docket Nos. E–8251, E–8169]

NEW ENGLAND POWER CO.

Order Accepting for Filing and Suspending Proposed Electric Rate Schedule Supplement, Permitting Interventions, Consolidating Prior Docket, Providing for Hearing, and Establishing Procedures

JULY 30, 1973.

On June 1, 1973, New England Power Service Co. (NEPCO) tendered for filing a proposed rate schedule supplement, constituting an amendment to the Contract for Primary Service for Resale between NEPCO and each of thirty-three named customers presently served under rate R–6.[1] NEPCO requests that the proposed increased rates be permitted to become effective on August 1, 1973.

Notice of NEPCO's proposed rate schedule supplement was issued on June 15, 1973, providing for protests or petitions to intervene to be filed on or before July 13, 1973. Petitions to intervene were filed on June 15, 1973, by the Rhode Island Consumer's Council, and on July 13, 1973, by the Commonwealth of Massachusetts through its Attorney General, and by the NEPCO Customer Rate Committee and twenty-seven other parties.[2] NEPCO states that the proposed rate, R–7, will increase the Demand Charge from $2.96/KW/Mo. to $3.18/KW/Mo. and the Energy Charge from 6.9 mills per KWh to 7.3 mills per KWh, and that such changes will increase NEPCO's annual revenues by approximately $12,500,000 based on a calendar 1972 test year. According to NEPCO, this filing is necessary to increase revenues to continue to raise the debt capital required for construction of generation and transmission facilities necessary to meet projected increased customer demand, while at the same time providing a fair rate of return to shareholders.

Our review of NEPCO's proposed rate schedule supplement indicates that there are issues raised in the pleadings that may require development in an evidentiary hearing. Accordingly, the proposed

[1] See Appendix A
[2] See Appendix B

V 38 - 151 AUG 7 73 XUM

rate schedule supplement will be accepted for filing and suspended for a period of five months and set for hearing.

An April 30, 1973, NEPCO filed an amendment to its Contract for Primary Service for Resale with Narragansett Electric Co., at Docket No. E–8169. Intervenors in that case requested that the Commission consolidate that case with NEPCO's newly filed proposed rate schedule, Docket No. E–8251. At the time of our order in Docket No. E–8169, June 29, 1973, we stated that the Commission had insufficient opportunity to review the filing in Docket No. E–8251 and therefore denied the request for consolidation as premature. Our review of that filing indicates that there may be raised issues of law and fact common to both filings and that consolidation of Docket Nos. E–8169 and E–8251 is appropriate. Consistent with this action, we will amend our order of June 29, 1973, to provide procedural dates reflecting our action herein.

The Commission finds.

(1) It is necessary and proper in the public interest and in carrying out the provisions of the Federal Power Act, that the Commission enter upon a hearing concerning the lawfulness of NEPCO's proposed general rate schedule supplement, and that such rate schedule supplement be suspended as hereinafter provided.

(2) The proposed increased rate and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful.

(3) The prior order of the Commission issued in Docket No. E–8169 should be amended as hereinafter ordered.

(4) Good cause exists to consolidate the proceedings at Docket Nos. E–8251 and E–8169.

(5) Good cause exists to grant the petitions to intervene mentioned above.

The Commission orders.

(A) Pursuant to the authority of the Federal Power Act, particularly sections 205, 206, 301, 308, and 309 thereof, and the Commission's rules and regulations, a public hearing shall be held concerning the lawfulness of NEPCO's proposed rate schedule herein, commencing with a prehearing conference to be held on December 18, 1973.

(B) Pending such hearing and decision thereon, NEPCO's proposed rate schedule (R–7) to its Contract for Primary Service for Resale with the thirty-three customers is hereby accepted for filing, suspended for five months, and the use thereof deferred until January 1, 1974, or until such time as they are made effective in the manner in the Federal Power Act.

(C) At the prehearing conference on December 18, 1973, all evidence shall be admitted into the record, and procedures adopted for an orderly and expeditious hearing.

(D) On or before November 20, 1973, the Commission's Staff shall serve its prepared testimony and exhibits if any. The prepared testimony and exhibits of intervenors, if any, shall be served on or before November 29, 1973. Any rebuttal evidence by NEPCO shall be served on or before December 13, 1973. Cross-examination of the evidence filed shall commence at 10:00 A.M. on December 19, 1973, in a hearing room of the Federal Power Commission.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose shall preside at the hearing initiated by this order, and shall conduct such hearing in accordance with the Federal Power Act, the Commission rules and regulations, and the terms of this order.

(F) The above named petitioners are hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: Provided, however, That the participation of such intervenors shall be limited to matters affecting rights and interests specifically set forth in the respective petitions to intervene, and Provided, further, That the admission of such intervenors shall not be construed as recognition by the Commission that they, or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(G) Docket Nos. E–8251 and E–8169 are hereby consolidated and the procedural dates previously established in Docket No. E–8169 are amended to coincide with the dates set forth above.

(H) Nothing contained in this order shall relieve the applicant of any responsibility imposed by the Economic Stabilization Act of 1970, (Public Law 91–379, 84 Stat. 799, as amended by Public Law 92–15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

(I) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket No. E–8252]

NORTHERN STATES POWER CO.

Order Accepting for Filing and Suspending Proposed Electric Rate Increase and Permitting Interventions

JULY 30, 1973.

Northern States Power Co. (NSP) tendered for filing on June 1, 1973, First Revised Schedule A to NSP's contracts with sixteen total requirements wholesale customers.[1] NSP asserts that the resulting rate increase of nearly 30% is necessary to bring the rate of return on total requirements wholesale business into line with the rate of return on overall electric business. The revenues resulting from the requested increase, NSP states, would be approximately $1,400,610, based on a calendar 1972 test-year basis with a projected rate of return of 7.80 percent on the affected business. An effective date of August 1, 1973, is requested.

The notice of the proposed changes, published in the FEDERAL REGISTER on June 21, 1973, provided that the closing date for petitions to intervene, protests, and comment would be July 12, 1973. On July 9, 1973, the City of Anoka, Minnesota filed a motion requesting an extension of the period for intervention and/or protest and on July 13, 1973, fifteen of the sixteen affected customers, including the City of Anoka, filed a protest, motion to reject, and petition to intervene (Cities).[2] Cities allege the following defects in NSP's application:

The inclusion of the addition of pollution control facilities in NSP's rate base, as well as the inclusion of working capital, depreciation, and income taxes relating thereto is claimed to be improper. In addition, Cities state that NSP's computation of working capital requirements for its fuel stock inventory by using December, 1972 replacement costs rather than the original cost of such inventory does not conform to the Commission's regulations. It is also maintained that NSP's inclusion of out-of-period wage increases without regard for increased revenues is in violation of the Commission's guidelines in Union Electric Co., Opinion No. 609 (January 24, 1972).

Cities submit that the inclusion by NSP of pension cost increases is improper; and that NSP's proposed rate compensates it for past inflation. Cities also allege that the revision in rate design, fuel adjustment clause, power factor provision, billing determinant provision and the continuation of the sole supplier provisions of its contracts are unjustified and anti-competitive in their effects on Cities.

Cities request that the Commission reject NSP's application or, in the alternative, suspend the proposed rates and allow Cities to intervene in the proceedings.

As to the anti-competitive issues raised above, by order issued May 31, 1973, in Indiana and Michigan Electric Co., Docket No. E–7740, we set standards for those who would raise anti-competitive issues. These standards are that the petition to intervene must clearly specify (1) the facts relied upon, (2) the anti-competitive practices challenged, and (3) the requested relief which is within this Commission's authority to direct. (mimeo p. 3). Our review of Cities' petition to intervene indicates that it fails to specify the relief sought which is within this Commission's authority to grant. Accordingly, we shall limit Cities' participation in this proceeding to matters other than the alleged anti-competitive activities. This action is without prejudice to Cities' right to file an appropriate amended petition which sets forth the relief for the alleged anti-competitive conduct that is within this Commission's authority to grant.

With respect to the other allegations by Cities, these involve matters that cannot be dealt with summarily but rather require development at an evidentiary hearing.

Our review of the application indicates that the rates and charges requested have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. We will suspend the effectiveness of the proposed rates for sixty days and provide for hearing.

The Commission finds.

(1) Participation by petitioners for intervention in this proceeding may be in the public interest.

(2) The proposed increased rates and charges may be unjust, unreasonable, unduly discriminatory, preferential, otherwise unlawful under Section 205 and accordingly shall be suspended as hereinafter ordered.

The Commission orders.

(A) NSP's application is accepted for filing under Section 205 of the Federal Power Act. Pending a hearing and decision thereon, the requested rates and charges are hereby suspended for sixty days and the use thereof deferred until October 1, 1973, or until such time as they are made effective in the manner prescribed by the Federal Power Act.

(B) Increased rates and charges collected after October 1, 1973, and found by the Commission in this proceeding to be unjustified shall be refunded according to the Commission's rules and regulations.

(C) The above-named petitioners are hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: Provided, however, That the participation of such intervenors shall be limited to matters affecting rights and interests specifically set forth in the respective petitions to intervene, except that Cities' participation is limited to matters other than alleged anti-competitive activities, and Provided, further, That the admission of such intervenors shall not be construed as recognition by the Commission that they, or any of them, might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(D) Pursuant to the authority of the Federal Power Act, particularly § 205 thereof, the Commission's rules of practice and procedure, and the Regulations Under the Federal Power Act (18 CFR, Chapter 1), a public hearing shall be held, commencing with a prehearing conference on December 18, 1973, at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the lawfulness of the rates, charges, classifications, and services contained in NSP's rate increase filing.

(E) At the prehearing conference on December 18, 1973, NSP's prepared testimony together with its entire rate filing shall be admitted to the record as its complete case-in-chief subject to appropriate motions, if any, by parties to the proceedings. All parties will be expected to come to this conference prepared to effectuate the provisions of § 1.18 of the Commission's rules of practice.

(F) On or before November 6, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of any and all intervenors shall be served on or before November 20, 1973. Any rebuttal evidence by NSP shall be served on or before December 4, 1973. Cross-examination of the evidence shall commence on December 19, 1973.

(G) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)) shall preside at the hearing initiated by this order, shall prescribe relevant procedural matters not herein provided, and shall control the proceeding in accordance with the Commission's rules of practice and procedure.

(H) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

V 38 - 151 AUG 7 73 XUM

[Docket No. CI74–41]

PETROLEUM, INC.

Notice of Application

JULY 27, 1973.

Take notice that on July 20, 1973, Petroleum, Inc. (Applicant), 300 West Douglas, Wichita, Kansas 67202, filed in Docket No. CI74–41 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Northern Natural Gas Company from acreage in the Mocane-Laverne Field, Harper County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 17,500 Mcf of gas per month for two years at 45.0 cents per Mcf at 14.65 psia the first year and 46.0 cents per Mcf at 14.65 psia the second year, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's general policy and interpretations.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petititon to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72–98]

TEXAS EASTERN TRANSMISSION CORP.

Notice of Motion for Approval of Second Revised Stipulation and Agreement

AUGUST 1, 1973.

Take notice that on July 25, 1973, Texas Eastern Transmission Corporation (Texas Eastern) filed a motion for approval of a Second Revised Stipulation and Agreement providing for a proposed settlement of the issues in the above-entitled proceedings.

Copies of the motion and the Second Revised Stipulation and Agreement were served on all parties to the proceeding, Texas Eastern's jurisdictional customers and interested state regulatory commissions.

Any person desiring to do so may file comments in writing with the Commission concerning the proposed settlement. Such comments should be filed on or before August 17, 1973. The motion and the Second Revised Stipulation and Agreement are on file with the Commission and available for public inpsection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73–16247 Filed 8–6–73;8:45 am]

[Docket No. CI74–51]

TEXACO INC.

Notice of Application

JULY 31, 1973.

Take notice that on July 25, 1973, Texaco Inc. (Applicant), P.O. Box 3109, Midland, Texas 79701, filed in Docket No. CI74–51 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Northern Natural Gas Company from the Vacuum (Morrow) Field, Lea County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on July 18, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for two years from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell up to 10,000 Mcf of gas per day at 50.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment. Upward Btu adjustment is estimated at 7.6 cents per Mcf. Deliveries are estimated at 102,000 Mcf of gas per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[Docket No. RP72–99]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Order Denying Motion for Reconsideration, Permitting Intervention, Fixing Date of Hearing, Specifying Procedures, and Suspending Proposed Revised Tariff Sheets

JULY 30, 1973.

This proceeding arises out of Transcontinental Gas Pipe Line Corp. (Transco) filing on May 17, 1971, of tariff changes pursuant to Order No. 431 in order to effectuate a gas curtailment policy in the event of a gas shortage. By order of November 15, 1971, in Docket No. RP71–118, the Commission approved an interim curtailment plan effective for the period November 16, 1971, through November 15, 1972, and provided that Transco file a permanent curtailment plan which it filed on January 17, 1972, in this Docket. The Commission suspended this filing and provided for a hearing. However, after discussions between Transco, its customers and the staff, an interim settlement agreement to cover the period November 16, 1972, through November 15, 1973, was arrived at which interim settlement agreement was approved by this Commission by order of November 15, 1972. On May 1, 1973, Transco filed a motion requesting a one-year extension of its interim curtailment plan which motion was denied by order of the Commission issued May 23, 1973. The Commission's May 23, 1973, order also ordered Transco to file an appropriate curtailment plan on or before July 1, 1973. On June 29, 1973, Transco submitted for filing in conformance with the Commission's May 23, 1973, order revised tariff sheets[1] to its presently effective FPC Gas Tariff First Revised Volume No. 1 constituting its permanent curtailment plan. The Commission issued a notice of filing of Transco's proposed curtailment plan on July 11, 1973, (38 FR 19253). On July 6, 1973, Transco filed a renewal of its motion for a one-year extension of its interim curtailment plan.

We shall construe Transco's July 6, 1973, refiling of its motion as a petition for reconsideration and deny same. Review of the curtailmen provisions contained in Transco's current interim curtailment plan currently in effect shows that they do not conform to the standards for priorities of deliveries during periods of curtailment as enunciated by Order Nos. 467, 467–A and 467–B. Consistent with our order of April 11, 1973, in Docket No. RP72–64, Texas Gas Transmission Corporation, we cannot grant a motion to extend Transco's present interim plan for an additional year when such plan deviates from our announced policy on curtailment priorities. Accordingly, Transco's motion for a one-year extension of its interim curtailment plan, constituting a motion for reconsideration, should be denied.

In addition to the parties already granted intervention in this Docket, petitions to intervene in this proceeding have been received from: General Motors Corp., The Brick Institute of America, Owens-Corning Fiberglas Corp., Ball Corp., and Brick Association of North Carolina.

In summary, Transco's proposed permanent curtailment plan embodies the end-use priorities established by the Commission in Order No. 467–B as modified in Opinion No. 647–A issued May 30, 1973, in United Gas Pipe Line Company, Docket Nos. RP71–29 and RP71–120. The proposed tariff sheets utilize the definitions of service proposed by the Commission in Docket No. R–474.

Transco's proposed curtailment plan, however, deviates from Order No. 467–B in the following respects:

(1) Transco requests that its direct interruptible customers be completely curtailed prior to any other curtailment on its system.

(2) Customers which obtain more than the system average gas supply will pay $.25 per Mcf for such over supply of gas and customers which receive less than the system average gas supply will obtain a credit of $.25 per Mcf for such under supply.

Additionally, certain other changes have been made. The definition of gas supply deficiency has been broadened to include any occurrence which adversely affects the supply of gas into Transco's main line including gathering system outages, the possibility of husbanding, and the failure of producers and other suppliers to deliver for any reason. Concomitantly, the definition of force majeure has been narrowed to eliminate gas supply related outages from that definition. Transco, however, still proposes to make demand charge adjustments for gas supply deficiency curtailments and assess these charges to its customers through a deferred accounting and tracking procedure.

Since Transco's proposed curtailment procedures contain, inter alia, the procedures set forth in our Statement of Policy, Order No. 467–B, issued March 2, 1973, in Docket No. R–469, we are of the view that intervenors opposing the proposed 467–B procedures should be required to submit testimony and exhibits in support of any deviations therefrom in Transco's proposed curtailment plan, as well as in support of their objections to other tariff provisions contained in Transco's filing of June 29, 1973. Transco, on the other hand, should submit evidence supporting its revised tariff provisions other than those relating to priority of service during curtailed deliveries.

The Commission finds.

(1) The proposed changes to Transco's FPC Gas Tariff have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed revised tariff sheets filed by Transco and that such tariff sheets be suspended and the use thereof be deferred as herein provided.

(3) The participation in the above-named petitioners may be in the public interest.

The Commission orders.

(A) Pursuant to the authority of the Natural Gas Act, particularly §§ 4, 5, and 15 thereof, the Commission's rules of practice and procedure and the regulations of the Natural Gas Act (18 CFR Chapter I) a public hearing shall be held commencing August 27, 1973, at 10:00 a.m. in a hearing room of the Federal Power Commission, 825 North Capitol St., Washington, D.C. 20426, concerning the lawfulness of the curtailment provisions contained in Transco's FPC Gas Tariff as proposed to be revised herein. The hearing shall begin with admission into the record of Transco's direct case, subject to appropriate motions, followed by cross examination of Transco's witnesses.

(B) Pending hearing and decision on the issues raised by Transco's filing in Docket No. RP72–99, the proposed tariff sheets filed by Transco, and identified in footnote 1, are hereby suspended and the use thereof is deferred until November 16, 1973, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(C) On or before August 13, 1973, Transco shall prepare and file with the Commission and serve on the Commission Staff and all parties to this proceeding its direct testimony and exhibits in support of the proposed tariff sheets submitted on June 29, 1973.

(D) Testimony in opposition to Transco's curtailment procedures shall be filed on or before August 13, 1973.

(E) The above-named petitioners are hereby permitted to become intervenors in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in said petitions for leave to intervene; and, *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(F) Transco's renewal of its motion for a one-year extension of its interim curtailment plan, constituting a motion for reconsideration, and filed on July 6, 1973, is hereby denied.

(G) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see delegation of authority 18 CFR 3.5 paragraph (d)) shall preside at the hearing in this proceeding pursuant to the Commission's rules of practice and procedure.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

BANKAMERICA CORPORATION

Order Denying Acquisition of GAC Finance, Inc.

BankAmerica Corporation, San Francisco, California, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under sections 4 (c) (8) and (13) of the Act and § 225.4 (b)(2) of the Board's Regulation Y, to acquire voting shares of GAC Finance, Inc., Allentown, Pennsylvania. GAC Finance, Inc. through its subsidiaries engages in the activities of making direct loans to consumers; purchasing sales finance paper; financing inventory of distributors of and dealers in various consumer durable goods through agreements with manufacturers in the case of distributors and with distributors in the case of dealers; servicing manufacturer-funded receivables arising from inventory financing by certain manufacturers of consumer durable goods; rediscount financing for non-affiliated consumer sales finance companies; and sale to its

V 38-151 AUG 7 73 XUM

direct consumer borrowers of credit life and credit health and accident insurance and of insurance coverage against damage to personal property securing extensions of credit made by the subsidiary to its direct consumer borrowers. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 6103). The time for filing comments and views has expired, and the Board has considered all comments received, including those of the Department of Justice, in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

On the basis of the record, the application is denied for the reasons set forth in the Board's Statement, which will be released at a later date.

By order of the Board of Governors,[1] effective July 27, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-16198 Filed 8-6-73;8:45 am]

CITIZENS COMMERCIAL CORPORATION

Formation of Bank Holding Company

Citizens Commercial Corporation, Flint, Michigan, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of all of the voting shares of the successor by merger to Citizens Commercial & Savings Bank, Flint, Michigan. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 13, 1973.

Board of Governors of the Federal Reserve System, July 27, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.73-16195 Filed 8-6-73;8:45 am]

COMMERCE BANCSHARES, INC.

Proposed Retention of Commerce Mortgage Company

Commerce Bancshares, Inc., Kansas City, Missouri, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to retain voting shares of Commerce Mortgage Company, Kansas City, Missouri which were previously held under authority of section 4(c)(5) of the Act. Notice of the application was published on May 10, 1973 in the Kansas City Star, a newspaper circulated in Kansas City, Jackson County, Missouri; on April 18, 1973 in the Columbia Missourian, a newspaper circulated in Columbia, Boone County, Missouri; and on April 9, 1973 in the St. Louis Globe-Democrats, a newspaper circulated in St. Louis, Missouri.

Applicant states that the subsidiary would continue to engage in the activities previously engaged in pursuant to section 4(c)(5) of the Bank Holding Company Act: Making, purchasing, or otherwise obtaining loans for itself and as agent for others, taking or receiving evidences of indebtedness therefor, and obtaining as security for the payment thereof mortgages, trust deeds, pledges or security creating documents upon real estate, improved or unimproved, as well as servicing mortgage loans for itself and for others, including foreclosure in event of default. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissable for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 26, 1973.

Board of Governors of the Federal Reserve System, July 30, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

MULTIBANK FINANCIAL CORP.

Acquisition of Bank

Multibank Financial Corp., Boston, Massachusetts, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of Northampton National Bank, Northampton, Massachusetts. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Boston. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 26, 1973.

Board of Govenors of the Federal Reserve System, July 30, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[1] Voting for this action: Chairman Burns and Governors Brimmer, Bucher, and Holland. Voting against this action: Governors Mitchell, Daane, and Sheehan.

Applicant states that the proposed subsidiary would sell or spin off certain subsidiaries and will only engage in the activities of mortgage banking. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 23, 1973.

Board of Governors of the Federal Reserve System, July 27, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

SOUTH MIDLAND FINANCIAL CORP.

Formation of Bank Holding Company

South Midland Financial Corp., Milwaukee, Wisconsin, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of approximately 99 per cent of the voting shares of South Midland Bank, Milwaukee, Wisconsin. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit his views in writing to the Federal Reserve Bank, to be received not later than August 26 1973.

Board of Governors of the Federal Reserve System, July 30, 1973.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.; Temporary Reg. F-188]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in rulemaking proceedings before the Internal Revenue Service, Department of the Treasury.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Internal Revenue Service, Department of the Treasury, in rulemaking proceedings concerning the adoption of proposed rule 1.167(l)-1, regarding "Property of Certain Public Utilities Proposed Depreciation Allowance."

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

ARTHUR F. SAMPSON,
Administrator of General Services.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

I. D. PRECISION COMPONENTS CORP.

Order Suspending Trading

JULY 31, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, $.10 par value, and all other securities of I. D. Precision Components Corporation being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

It is ordered, pursuant to section 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from 10 a.m. (e.d.t.) on July 31, 1973 and continuing through August 9, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,
Secretary.

MIDDLE SOUTH UTILITIES, INC.

Notice of Proposed Issue and Sale of Short-Term Promissory Notes to Banks for Borrowings Under a Revolving Credit Agreement

JULY 31, 1973.

Notice is hereby given that Middle South Utilities, Inc., 280 Park Avenue New York, New York 10017 ("Middle South"), a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Middle South proposes, under a $135,000,000 revolving credit agreement dated as of July 1, 1973, to initially issue and sell its unsecured promissory notes, in an aggregate amount not to exceed $30,000,000 outstanding at any one time, to a group of 7 commercial banks headed by Manufacturers Hanover Trust Company of New York ("MHTC"). Middle South proposes to (a) apply $10,000,000 of the proceeds of the initial borrowing to purchase an additional 435,000 shares of common stock without nominal or par value of Mississippi Power & Light Company, its electric utility subsidiary, for an aggregate of $10,005,000 in cash (such purchase is a subject of a pending application-declaration filed by Mississippi Power & Light Company and Middle South, File No. 70-5371) and (b) use the balance of the proceeds of the borrowing, $20,000,000, to pay off a similar principal amount of short-term notes held by MHTC and Chase Manhattan Bank, in the amounts of $10,000,000 each. Such borrowings were under an interim arrangement, pending the development of the present credit agreement, and were used to purchase common stock of Arkansas Power & Light Company, an electric utility subsidiary of Middle South (Holding Company Act Rel. No. 17958, dated May 10, 1973).

Under the terms of the revolving credit agreement, Middle South may borrow and reborrow until June 30, 1975, up to an aggregate of $135,000,000 outstanding at any one time. The names of the banks participating in the agreement and their respective commitments are as follows:

Bank	Commitment
Manufacturers Hanover Trust Company, New York	$55,000,000
First National City Bank, New York	25,000,000
Bank of America National Trust & Savings Association, Los Angeles	15,000,000

V 38 - 151 AUG 7 73 XUM

Bank	Commitment
Continental Illinois National Bank and Trust Company of Chicago	10,000,000
Irving Trust Company, New York	10,000,000
Northern Trust Company Bank, Chicago	10,000,000
The First National Bank of Chicago	10,000,000
	135,000,000

Each borrowing and each payment by Middle South will be made pro rata among the lending banks according to their original commitment. The credit agreement additionally provides that loans thereunder will be evidenced by unsecured promissory notes payable 90 days from the date of issuance thereof, but in no event later than June 30, 1975; will bear interest on the unpaid principal amount thereof from the date thereof at a rate per annum equal to MHTC's prime rate, defined as the commercial loan rate of MHTC from time to time in effect on borrowings having a 90-day maturity, until and including June 30, 1974, and thereafter at a rate per annum equal to ¼ of 1 percent above MHTC's prime rate, as defined. The notes will be prepayable at any time on two business days notice in whole or in part without premium. The effective cost of borrowing to Middle South under the credit agreement after the full $135,000,000 has been borrowed, assuming compensating balances of approximately 15 percent to be maintained with each of the banking institutions, and assuming a MHTC prime rate of 8½ percent, as defined, would be 10.4 percent per annum.

In connection with the line of credit, Middle South has agreed to pay the banks a commitment fee for the period from and including July 1, 1973 to June 30, 1975, (or earlier date of termination of the commitments), computed at the rate of ½ of 1 percent per annum on the average daily unused portion of the commitments in effect during the period for which payment is made. Such commitment fee will be payable to each bank quarterly on the last day of each March, June, September and December, commencing September 30, 1973, and on the date on which Middle South shall terminate its commitments.

Middle South intends to pay the principal of its proposed notes out of the proceeds of the sale of additional shares of its common stock. It is stated that repayments so made from the proceeds of the sale of common stock shall reduce borrowings authorized by this Commission by the amount of such repayments.

Middle South states it intends to utilize the balance of the bank loan agreement to make capital contributions to Louisiana Power & Light Company and Arkansas Power & Light Company, its wholly-owned electric utility subsidiaries, aggregating $55,000,000 during the last quarter of 1973, and $50,000,000 during the first and second quarter of 1974. Middle South states the aggregate borrowings under the proposed line of credit will total $135,000,000 at the close of the second quarter of 1974. All such additional borrowings and reborrowings under the credit agreement will be subject to subsequent filings and approval by this Commission.

The declaration states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. No special or separate expenses are anticipated in connection with the various transactions referred to herein.

Notice is further given that any interested person may, not later than August 24, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[FR Doc.73-16202 Filed 8-6-73;8:45 am]

[811-1488]

MOODY'S CAPITAL FUND, INC.

Notice of Proposal to Terminate Registration

JULY 31, 1973.

Notice is hereby given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act"), to declare by order upon its own motion that Moody's Capital Fund, Inc., 100 Church Street, New York, New York 10007 ("Fund"), a corporation organized under the laws of the State of Maryland, and registered under the Act as an open-end, diversified management investment company, has ceased to be an investment company as defined in the Act.

Fund was organized in Maryland on March 28, 1967; it filed a notification of registration on Form N-8A on April 5, 1967 and a registration statement on Form N-8B-1 on April 11, 1967.

At a Special Meeting of Stockholders of the Fund, held on February 26, 1972, the holders of a majority of Fund's outstanding voting securities approved (1) a Plan of Reorganization ("Plan") providing for the acquisition by Smith, Barney Equity Fund, Inc. ("Equity", also an investment company registered under the Act) of substantially all of the assets of the Fund in exchange for shares of Equity common stock; (2) the Articles of Exchange ("Articles") necessary to effectuate the Plan; (3) the distribution of Equity common stock to the Fund's shareholders; and (4) the dissolution of the Fund.

Pursuant to the foregoing action by shareholders of the Fund, substantially all of the assets of the Fund were acquired by Equity as of February 26, 1972; the Equity common stock was distributed to Fund shareholders on February 28, 1972; and the Fund was dissolved on April 28, 1972 by filing Articles of Dissolution with the Maryland Department of Assessments and Taxation.

Counsel represents that while the Fund has been formally dissolved, its directors, acting as trustees for the dissolved corporation, are still in the process of winding up the company's financial affairs. This process will be completed upon the final liquidation of the Fund's remaining assets, which include the settlement proceeds of certain litigation in which the Fund had been involved. Counsel to the Fund further represents that all but approximately $1,400 of the Fund's current assets, which amount to $432,585.43, are being held in interest-bearing accounts at the Chase Manhattan Bank, with the balance deposited in a checking account at the Irving Trust Company.

Counsel further represents that upon the resolution by the Internal Revenue Service of the proper treatment of these assets under the federal income tax laws, such assets will be distributed to shareholders of record of the Fund as of the close of business on February 25, 1972.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its own motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, which may be issued upon the Commission's own motion where appropriate, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 27, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communications should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Fund at the address stated above. Proof of service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the matter herein may be issued by the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[812-3419]

PUTNAM INVESTORS FUND, INC.

Notice of Filing of Application for Order Exempting Proposed Transactions

JULY 31, 1973.

Notice is hereby given that the Putnam Investors Fund, Inc., 265 Franklin Street, Boston, Massachusetts 02110 ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end diversified management investment company, has filed an application pursuant to Section 6(c) of the Act for an order of the Commission exempting from the provisions of section 22(d) of the Act and from Rule 22c-1 under the Act a transaction in which Applicant's redeemable securities will be issued at a price other than the current public offering price in exchange for substantially all of the assets of Southern Mill Supply Company, Inc. ("Southern").

Southern is a personal holding company all of whose outstanding stock is owned of record and beneficially by only one person. It is exempt from registration under the Act under the provisions of section 3(c)(1) of the Act.

On January 15, 1973, Applicant and Southern entered into an Agreement and Plan of Reorganization ("Agreement") whereby substantially all of the cash and securities owned by Southern, with a value of approximately $256,502 as of February 23, 1973, are to be transferred to Applicant in exchange for shares of Applicant's capital stock. Pursuant to the Agreement, the number of shares of Applicant to be issued to Southern is to be determined by dividing the aggregate market value of the assets of Southern to be transferred to Applicant by the net asset value per share of Applicant.

The application states that as a condition to the consummation of the transaction by the Applicant at least 60 percent of the value of the assets of Southern being transferred to the Applicant at the valuation time shall consist of securities which the Applicant wishes to acquire and hold for investment in its portfolio.

Pursuant to the Agreement, the value of the assets of Southern to be transferred and the net asset value of the shares of Applicant to be issued in exchange therefor, will be determined as of the close of business on the first full business day prior to the actual issue of said shares. The Agreement also requires that in determining the number of shares of Applicant to be delivered to Southern, the aggregate market value of the assets of Southern shall be reduced by an amount, if any, determined by application of a formula designed to compensate Applicant for any increased tax liability which may result by reason of its acquisition of the assets of southern. If the valuation under the Agreement had taken place on February 23, 1973, when the net asset value of Applicant's stock was $10.29 per share, Southern would have received 24,927 shares of Applicant's stock.

When received, Southern will distribute Applicant's shares to its shareholder and will dissolve. The stockholder of Southern has represented to Applicant that his present intention is to hold the shares of Applicant received in the transaction for at least 12 months after the close of the transaction.

Applicant represents that there is no affiliation or relationship between Applicant or its officers and directors and Southern or its officers and directors. The application also states that the proposed transaction is a result of arms-length negotiations.

Section 22(d) of the Act, in pertinent part, prohibits a registered investment company from selling any redeemable security issued by it to any person except to or through a principal underwriter for distribution or at a current public offering price as described in the prospectus. The public offering price of Applicant's shares is net asset value plus varying sales charges depending upon the amount purchased and owned.

Section 22(c) of the Act and Rule 22c-1 thereunder, taken together, provide, in pertinent part, that a registered investment company may not issue its redeemable securities except at a price based on the current net asset value of such security computed as of the close of trading on the New York Stock Exchange next following receipt of the order to purchase the security. Because the valuation date will precede the closing date by one business day in the proposed transaction, the provisions of section 22(c) and Rule 22c-1 may be deemed to be contravened.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act.

NOTICE IS FURTHER GIVEN that any interested person may, not later than August 24, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for a hearing thereon shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

PUTNAM INVESTORS FUND, INC.

Notice of Filing of Application for Order Exempting Proposed Transactions

JULY 31, 1973.

Notice is hereby given that the Putnam Investors Fund, Inc., 265 Franklin Street, Boston, Massachusetts 02110, ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end diversified management investment company, has filed an application pursuant to section 6(c) of the Act for an order of the Commission exempting from the provisions of section 22(d) of the Act and from Rule 22c-1 under the Act a transaction in which Applicant's redeemable securities will be

V 38 151 AUG 7 73 XUM

issued at a price other than the current public offering price in exchange for substantially all of the assets of Refractory Service, Inc. ("Refractory").

Refractory is a personal holding company all of whose outstanding stock is owned of record and beneficially by only one person. It is exempt from registration under the Act under the provisions of section 3(c)(1) of the Act.

On January 15, 1973, Applicant and Refractory entered into an Agreement and Plan of Reorganization ("Agreement") whereby substantially all of the cash and securities owned by Refractory, with a value of approximately $364,438 as of February 23, 1973, are to be transferred to Applicant in exchange for shares of Applicant's capital stock. Pursuant to the Agreement, the number of shares of Applicant to be issued to Refractory is to be determined by dividing the aggregate market value of the assets of Refractory to be transferred to Applicant by the net asset value per share of Applicant.

The application states that as a condition to the consummation of the transaction by the Applicant at least 60 percent of the value of the assets of Refractory being transferred to the Applicant at the valuation time shall consist of securities which the Applicant wishes to acquire and hold for investment in its portfolio.

Pursuant to the Agreement, the value of the assets of Refractory to be transferred and the net asset value of the shares of Applicant to be issued in exchange therefor, will be determined as of the close of business on the first full business day prior to the actual issue of said shares. The Agreement also requires that in determining the number of shares of Applicant to be delivered to Refractory, the aggregate market value of the assets of Refractory shall be reduced by an amount, if any, determined by application of a formula designed to compensate Applicant for any increased tax liability which may result by reason of its acquisition of the assets of Refractory. If the valuation under the Agreement had taken place on February 23, 1973, when the net asset value of Applicant's stock was $10.29 per share, Refractory would have received 35,417 shares of Applicant's stock.

When received Refractory will distribute Applicant's shares to its shareholder and will dissolve. The sole stockholder of Refractory has represented to Applicant that his present intention is to hold the shares of Applicant received in the transaction for at least 12 months after the close of the transaction.

Applicant represents that there is no affiliation or relationship between Applicant or its officers and directors and Refractory or its officers and directors. The application also states that the proposed transaction is a result of arms-length negotiations.

Section 22(d) of the Act, in pertinent part, prohibits a registered investment company from selling any redeemable security issued by it to any person except to or through a principal underwriter for distribution or at a current public offering price as described in the prospectus. The public offering price of Applicant's shares is net asset value plus varying sales charges depending upon the amount purchased and owned.

Section 22(c) of the Act and Rule 22c-1 thereunder, taken together, provide, in pertinent part, that a registered investment company may not issue its redeemable securities except at a price based on the current net asset value of such security computed as of the close of trading on the New York Stock Exchange next following receipt of the order to purchase the security. Because the valuation date will precede the closing date by one business day in the proposed transaction, the provisions of section 22(c) and Rule 22c-1 may be deemed to be contravened.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 24, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

TARIFF COMMISSION

[AA1921-127]

ELEMENTAL SULPHUR FROM CANADA

Rescheduling of Hearing Date

Notice is hereby given that the hearing in Investigation No. AA1921-127, scheduled to be held in the Tariff Commission's Hearing Room, Tariff Commission Building, 8th and E Streets, NW., Washington, D.C., beginning at 10 a.m., e.d.t., on September 5, 1973, has been rescheduled for 10 a.m., e.d.t., on September 25, 1973. Requests to appear at the public hearing should be received by the Secretary of the Tariff Commission, in writing, at its offices in Washington, D.C., no later than noon, Thursday, September 20, 1973.

Written submissions, Interested parties may submit written statements of information and views, in lieu of their appearance at the public hearing, or they may supplement their oral testimony by written statements of any desired length. In order to be assured of consideration, all written statements should be submitted at the earliest practicable date, but not later than the close of business on October 9, 1973.

The hearing is being held in connection with a Commission investigation under the provisions of section 201(a) of the Antidumping Act, 1921, as amended, to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established by reason of the importation of elemental sulphur from Canada which the Assistant Secretary of the Treasury has determined are being, or are likely to be, sold at less than fair value. Notice of the investigation was published in the

FEDERAL REGISTER of July 31, 1973 (38 FR 20381).

Issued: August 2, 1973.

By order of the Commission.

COLLECTION OF F.O.B. AND C.I.F. DATA ON IMPORTS

Notice of Amendment of General Statistical Headnote of the Tariff Schedules of the United States Annotated (TSUSA)

Pursuant to section 484(e) of the Tariff Act of 1930 (19 U.S.C. 1484(e)), general statistical headnote 1 of the TSUSA is hereby amended, effective with respect to imported articles entered, or withdrawn from warehouse, for consumption on or after October 1, 1973, as hereinafter provided.

The primary purpose of amendments to the headnote provisions is to provide for the collection and reporting of additional information on all imported merchandise, as follows:

(1) Its purchase price (i.e., its actual transaction value) adjusted, when necessary, to obtain its so-called f.o.b. value at the port of exportation (or the equivalent thereof for merchandise not acquired by purchase).

(2) In the case of merchandise not acquired in an arm's-length transaction, the equivalent of the arm's-length value therefor to be derived, to the extent practicable, from customs values, as generally determined under section 402 and 402a, Tariff Act of 1930, as amended.

(3) Separately, the aggregated costs incurred in bringing the merchandise from the port of exportation in the country of exportation to the first port of entry in the United States.

The responsibility for obtaining and providing the data required by the statistical annotations of the TSUSA rests with the person making entry or withdrawal of articles imported into the customs territory of the United States. Entries or withdrawals not complying with statistical requirements will be cause for rejection by customs officers.

In the following, the new provisions of the headnote are underscored, and changes in the format are obvious and are, therefore, not included.

General statistical headnotes: 1. *Statistical requirements for imported articles.* (a) Persons making customs entry or withdrawal of articles imported into the customs territory of the United States shall complete the entry or withdrawal forms, as provided herein and in regulations issued pursuant to law, to provide for statistical purposes information as follows:

(i) The number of the Customs district and of the port where the articles are being entered for consumption or warehouse, as shown in Statistical Annex A of these schedules;

(ii) The name and flag of the vessel or the name of the airline, or in the case of shipment by other than vessel or air, the means of transportation by which the articles first arrived in the United States;

(iii) The foreign port of lading;

(iv) The United States port of unlading for vessel and air shipments;

(v) The date of importation;

(vi) The country of origin of the articles expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(vii) The country of exportation expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(viii) The date of exportation;

(ix) A description of the articles in sufficient detail to permit the classification thereof under the proper statistical reporting number in these schedules;

(x) The statistical reporting number under which the articles are classifiable;

(xi) Gross weight in pounds for the articles covered by each reporting number when imported in vessels or aircraft;

(xii) The net quantity in the units specified herein for the classification involved;

(xiii) The U.S. dollar value in accordance with the definition of section 402 or 402a of the Tariff Act of 1930, as amended, for all merchandise including that free of duty or dutiable at specific rates;

(xiv) The purchase price (i.e., the actual transaction value), in U.S. dollars, of imported merchandise plus, when not included in such price, all charges, costs, and expenses incurred in placing such merchandise alongside the carrier at the port of exportation in the country of exportation (or, in the case of merchandise not acquired by purchase, e.g., acquired on consignment, lease, or as gifts, the equivalent of such price, charges, costs, and expenses);

(xv) In addition to the value required under subparagraph (xiv), if the merchandise was not acquired in an arm's-length transaction, the equivalent of the arm's-length value therefor, in U.S. dollars, plus, when not included in such value, all charges, costs, and expenses incurred in placing such merchandise alongside the carrier at the port of exportation in the country of exportation;

(xvi) The aggregate cost (not including U.S. import duty, if any), in U.S. dollars, of freight, insurance, and all other charges, costs, and expenses (each of which charges, costs, and expenses shall be separately itemized on or attached to the related invoice) incurred in bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first U.S. port of entry (in the case of overland shipments originating in Canada or Mexico, such cost, if any, shall not be reported); and

(xvii) Such other information with respect to the imported articles as is provided for elsewhere in these schedules.

(b) *For the purpose of paragraph (a), the following definitions shall govern.* (i) The country of exportation shall be the country of origin, except when the merchandise while located in a third country is the subject of a new purchase in which event the third country shall be regarded and reported as the country of exportation, and the date of exportation from the third country shall be regarded and reported as the date of exportation.

(ii) The value of imported merchandise contemplated by subparagraph (xv) shall be, to the extent practicable, a value derived from the value of such merchandise as generally determined under section 402 or 402a of the Tariff Act, as the case may be.

(iii) An arm's-length transaction shall be a transaction between a buyer and seller independent of each other, i.e., persons who are not related in any respect specified in section 402(g)(2) of the Tariff Act of 1930, as amended.

Issued: August 3, 1973.

For the Committee.

A. F. PARKS,
Chairman.

COMMITTEE FOR IMPLEMENTATION FOR TEXTILE AGREEMENTS

COTTON, WOOL, MAN-MADE FIBER TEXTILES AND TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF CHINA

Entry or Withdrawal From Warehouse for Consumption

JULY 30, 1973.

On October 3, 1972, there was published in the FEDERAL REGISTER (37 FR 20745), a letter dated September 27, 1972 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs prohibiting entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textiles and textile products produced or manufactured in the Republic of China and exported from the Republic of China for which the Republic of China had not issued a visa. One of the visa require-

V 38 151 AUG 7 73 XUM

ments is that each visa include the signature of an official authorized to issue visas. The Government of the Republic of China has requested that Mr. C. S. Pan be authorized to issue visas replacing Mr. P. Y. Liu. Textile shipments having visas signed by either of the previously named officials and which have been exported from the Republic of China to the United States prior to October 1, 1973, will not be denied entry.

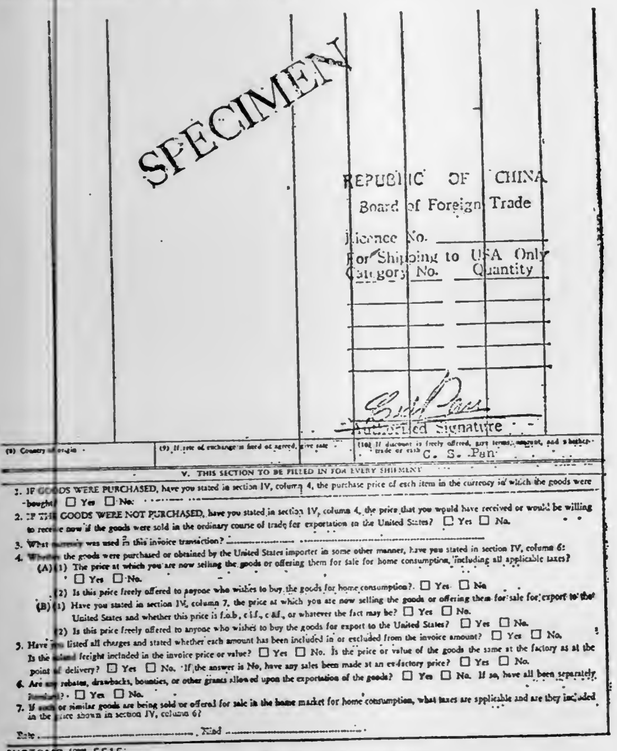
Accordingly, there is published below a letter of July 30, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that Mr. C. S. Pan be authorized to issue visas for textile shipments exported from the Republic of China to the United States; and further directing that textile shipments exported from the Republic of China to the United States prior to October 1, 1973 which have visas signed by either Mr. Pan or Mr. Liu shall not be denied entry. A facsimile of Mr. Pan's signature is published as an enclosure to that letter.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

JULY 30, 1973.



DEAR MR. COMMISSIONER: This directive amends but does not cancel, the directive of September 27, 1972, from the Chairman, Committee for the Implementation of Textile Agreements, that directed you to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products in Categories 1–64; wool textile products in Categories 101–126, 128, and 131–132; and man-made fiber textile products in Categories 200–243 produced or manufactured in the Republic of China for which the Republic of China had not issued a visa. One of the visa requirements is that the visa include the signature of an official authorized to issue visas.

Under the provisions of the bilateral Cotton Textile Agreement and the bilateral Wool and Man-Made Fiber Agreement, both of December 30, 1971, between the Governments of the United States and the Republic of China, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, the directive of September 27, 1972 is amended to authorize Mr. C. S. Pan to issue visas replacing Mr. P. Y. Liu. The signatures of both Mr. Pan and Mr. Liu will be recognized as valid for shipments exported prior to October 1, 1973. A facsimile of Mr. Pan's signature is enclosed.

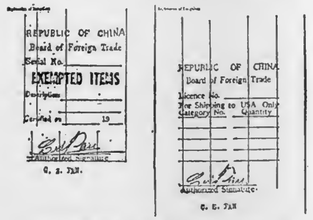
The actions taken with respect to the Government of the Republic of China and with respect to imports of cotton, wool, and man-made fiber textiles and textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.73-16327 Filed 8-6-73;8:45 am]

CERTAIN WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF CHINA



Entry or Withdrawal From Warehouse for Consumption

JULY 30, 1973.

On April 24, 1973, there was published in the FEDERAL REGISTER (38 FR 10132) a letter dated April 19, 1973 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs announcing an administrative mechanism to certify for exemption from the levels of restraint established by the Bilateral Wool and Man-Made Fiber Textile Agreement of December 31, 1971, between the Governments of the United States and the Republic of China, specific wool and man-made fiber textile products comprising Annex C of that agreement. To qualify for exemption each shipment must be accompanied by a visa for exempt items and the visa agreed to by the Governments of the United States and the Republic of China on August 16, 1972 (See 37 FR 20745). Each visa must also include, among other specifications, the signature of an official authorized to issue such visas. The Government of the Republic of China has requested that Mr. C. S. Pan be authorized to issue the visas, replacing Mr. P. Y. Liu. Exempt textile shipments having visas signed by either of the previously named officials and which have been exported from the Republic of China to the United States prior to October 1, 1973 will not be denied entry.

Accordingly, there is published below a letter of July 30, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that Mr. C. S. Pan be authorized to issue visas for exempt wool and man-made fiber textile shipments exported from the Republic of China to the United States; and further directing that such shipments exported from the Republic of China to the United States prior to October 1, 1973 which have visas signed by either Mr. Pan or Mr. Liu shall not be denied entry. A facsimile of Mr. Pan's signature on each of the required visas is published as an enclosure to that letter.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

JULY 30, 1973.

DEAR MR. COMMISSIONER: This directive amends but does not cancel the directive issued to you on April 19, 1973 by the Chairman of the Committee for the Implementation of Textile Agreements which established an export visa requirement for the entry into the United States for consumption and withdrawal from warehouse for consumption of certain wool and man-made fiber textile products, produced or manufactured in the Republic of China which are exempt from the levels of restraint of the Bilateral Wool and Man-Made Fiber Textile Agreement of December 30, 1971 between the Governments of the United States and the Republic of China.

Under the provisions of the aforementioned agreement and in accordance with the procedures of Executive Order 11651 of March 3, 1972, the directive of April 19, 1973 is hereby amended to authorize Mr. C. S. Pan to issue visas, replacing Mr. P. Y. Liu. The signature of both Mr. Pan and Mr. Liu will be recognized as valid for such shipments exported prior to October 1, 1973. A facsimile of Mr. Pan's signature on each of the required visas is enclosed.

The actions taken with respect to the Government of the Republic of China and with respect to imports of wool and man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COST OF LIVING COUNCIL

FOOD INDUSTRY WAGE AND SALARY COMMITTEE

Notice of Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212(f) of the Economic Stabilization Act, as amended, section 4(a)(iv) of Executive Order 11695, and Cost of Living Council Order No. 14, will meet at 10 a.m., Wednesday, August 15, 1973, at 2025 M Street, N.W., Washington, D.C.

The agenda will consist of discussions leading to recommendations on specific

V 38 151 AUG 7 73 XUM

Phase II and Phase III wage cases in the food area, and future wage policy.

Since the above stated meeting will consist of discussions of future food wage policy and Phase II and III cases for decision, pursuant to authority granted me by Cost of Living Council Order 25, I have determined that the meeting would fall within exemption (5) of 5 U.S.C. 552 (b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 3, 1973.

HENRY H. PERRITT, JR.,
Executive Secretary,
Cost of Living Council.

LABOR-MANAGEMENT ADVISORY COMMITTEE

Determination To Close Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that a meeting of the Labor-Management Advisory Committee created by section 8 of Executive Order 11695 will be held on August 14, 1973.

The purpose of the meeting is to discuss policy matters relating to the timing and substance of Phase IV.

Pursuant to authority granted me by Cost of Living Council Order 25, I have determined that the meeting of the Labor-Management Advisory Committee will consist of exchanges of opinions, that the discussions, if written, would fall within exemption (5) of 5 U.S.C. 552 (b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 3, 1973.

HENRY H. PERRITT, JR.,
Executive Secretary,
Cost of Living Council.

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 2, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 1100.40 of the general rules of practice (49 CFR 1100.40) and filed on or before August 22, 1973.

FSA No. 42725—Soybean Flour or Grits to Gulf Ports, Pensacola, Florida to Corpus Christi, Texas for Export. Filed by Southwestern Freight Bureau, Agent, (No. B-426), for interested rail carriers. Rates on soybean flour or grits, in bags or in packages, in carloads, as described in the application, from Arkansas, Colorado, Iowa, Kansas, Missouri (including East St. Louis, Ill.), Nebraska, Oklahoma, Texas and Wyoming, to Gulf Ports Pensacola, Florida to Corpus Christi, Texas, for export.

Grounds for relief—Motor competition and rate relationship.

Tariffs—Supplement 53 to Texas-Louisiana Freight Bureau, Agent, tariff 61-I, I.C.C. No. 1137, and 8 other schedules named in the application. Rates are published to become effective on September 10, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 329]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before August 27, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matter relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74202. By order of July 30, 1973, the Motor Carrier Board approved the transfer to Ebb Van Lines, Inc., Garden City Park, N.Y., of the operating rights in Certificate No. MC-74674 issued July 23, 1970, to Robert Case, doing business as Ebb Vans, Queens Villiage, N.Y., authorizing the transportation of household goods as defined in Practices of Motor Common Carriers of Household Goods, between New York, N.Y., on the one hand, and, on the other, points in New York, Connecticut, New Jersey, and Pennsylvania. Ira Wallace, 212-29 Jamaica Avenue, Queens Village, N.Y. 110.40. Attorney for applicants.

No. MC-FC-74580. By order of July 31, 1973, the Motor Carrier Board approved the transfer to Security Storage Company, Inc., Goldsboro, N.C., of Certificate of Registration No. MC-97817 (Sub No. 1) issued to Harry J. Kane, dba Coastal Plains Distributing Company, Kinston, N.C., authorizing the transportation of: Groceries, canned goods, and paper products, between specified points solely within the State of North Carolina. Vaughan S. Winborne, Attorney, 1108 Capitol Club Bldg., Raleigh, N.C. 27601.

No. MC-FC-74590. By order of July 30, 1973, Motor Carrier Board approved the transfer to Priority Freight Systems, Inc. Charlotte, N.C., of the operating rights in Certificate No. MC-3810 issued February 12, 1964, to Bison Fast Freight, Inc., Charlotte, N.C., authorizing the transportation of general commodities, with exceptions, radially, between Augusta and Savannah, Ga., and points in North Carolina and South Carolina, on the one hand, and, on the other, Parkersburg and Charleston, W. Va., and roofing, builders supplies, and hardware, rock, granite, rock and granite memorial products, cotton yarn, fabric, empty spools, bottling machinery, beer and wine, and bottle caps, from specified points in South Carolina, Ohio and Illinois, to specified points in North Carolina, South Carolina, West Virginia, Indiana, Illinois, and Ohio, varying with the particular commodity involved. John P. McMahon, 100 East Broad Street, Columbus, Ohio 43215 Attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

GENERAL, STATE AND LOCAL ASSISTANCE GRANTS

Proposed Policy Requirements

V 38 - 151 AUG 7 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 30, 35]

GENERAL, STATE AND LOCAL ASSISTANCE GRANTS

Proposed Policy Requirements

Notice is hereby given that the Environmental Protection Agency proposes to amend general grant regulations (40 CFR Part 30) and the State and local assistance grant regulations (40 CFR Part 35) to more fully implement the grants policy requirements of Office of Management and Budget Circular No. A–102, Attachment A through O.

Interested parties are encouraged to submit written comments, views, or data concerning the proposed regulations to the Director, Grants Administration Division, Environmental Protection Agency, Washington, D.C. 20460. All such submissions received within 30 days of the date of publication will be considered prior to the promulgation of final EPA general or supplemental regulations.

Any Environmental Protection Agency grants awarded after publication of the proposed regulation, but prior to promulgation of final regulations, may be subject to a special grant condition incorporating these regulations by reference.

ROBERT W. FRI,
Acting Administrator.

JULY 24, 1973.

A. Pursuant to the authorities cited in 40 CFR 30.101, Part 30 is amended as follows:

§ 30.301–1 [Amended]

Change first sentence to read:

"An application for an EPA grant shall be submitted upon such form as the Director, Grants Administration Division shall prescribe."

* * * * *

§ 30.304 [Amended]

Change section title to read: "Responsible grantee."

§ 30.304–1 [Amended]

Change sentence to read:

"The policy and procedures established by this section shall be followed to determine, prior and subsequent to award of any grant, whether a grantee will qualify as responsible."

§ 30.304–2 [Amended]

Change last sentence to read:

* * * * *

"A responsible grantee is one which is found to meet, and will maintain for the life of the grant, the minimum standards set forth in § 30.304–3 and such additional standards as may be prescribed and promulgated for a specific purpose.

§ 30.304–3 Substitute the following:

In order to qualify as responsible, a grantee must meet and maintain for the life of the grant the following standards as they relate to a particular grant:

(a) Has adequate financial resources for performance, or has the ability to obtain such resources as required;

(b) Has the necessary experience, organization, technical qualifications, and facilities, or has the ability to obtain them (including proposed subagreements);

(c) Is able to comply with the proposed or required completion schedule for the project;

(d) Has a satisfactory record of integrity, judgment, and performance, including, in particular, any prior performance upon grants and contracts from the Federal Government;

(e) Has an adequate financial management system which provides an efficient and effective accountability and control of all property, funds, and assets. Standards applicable to State and local grantees are further defined in OMB Circular A–102, Attachment G. (Appendix D)

(f) Maintains an internal audit procedure which as a minimum reviews, at least once every two years, the fiscal integrity of financial transactions and reports, compliance with laws, regulations, and administrative requirements and provides for the resolution of audit findings and recommendations in a timely manner. Standards applicable to State and local grantees are further defined in OMB Circular A–102, Attachment G. (Appendix D)

(g) Maintains a standard of procurement which as a minimum provides for a code of conduct for the grantee's procurement agents, which protects the interests and rights of potential contractors and grant sponsors; and which results in procurement actions by the grantee which provide required goods or services in a timely and cost effective manner. Standards applicable to State and local grantees are further defined in OMB Circular A–102, Attachment O. (Appendix D)

(h) Maintains a property management system which provides adequate administrative procedures for the acquisition, maintenance, and/or the disposition of real, personal, nonexpendable personal, expendable personal, and excess properties. Standards applicable to State and local grantees are further defined in OMB Circular A–102, Attachment N. (Appendix D)

(i) Conforms with the Equal Opportunity requirements of these regulations;

(j) Is otherwise qualified and eligible to receive a grant award under applicable laws and regulations.

Acceptable "ability to obtain" financial resources, experience, organization, technical qualifications, skills, and facilities (see paragraphs (a) and (b) of this section) generally shall comprise a firm commitment or arrangement to obtain financial resources, experience, organization, technical qualifications, skills or facilities.

§ 30.304–4 [Amended]

Change first sentence to read:

"No grant shall be awarded to any applicant unless after adequate and appropriate evaluation a determination has first been made that the applicant is responsible within the meaning of §§ 30.304–2 and 30.304–3. Any applicant who is not determined to be responsible shall be notified in writing of such finding and of the basis therefor.

* * * * *

§ 30.602–1 [Amended]

Substitute the following for § 30.602–1:

EPA may withhold grant funds under the following circumstances:

(a) If a grantee has failed to comply with the program objectives, the grant award conditions, or reporting requirements set forth in the grant agreement, provided that such withholding will not exceed the minimum amount required to correct the grant deficiency and further that such withholding shall not exceed ten percent of the grant award amount, or

(b) If the grantee is indebted to the United States and collection of the indebtedness will not impair accomplishment of the objectives of any grant program sponsored by the United States.

Under such conditions, EPA may, upon reasonable notice (pursuant to Appendix A, General Grant Conditions numbers 4 and 5) inform the grantee that payments will not be made for costs incurred after a specified date until the conditions are corrected or the indebtedness to the United States is liquidated.

§ 30.603 [Amended]

Substitute the following for § 30.603 *Grant Related Income:*

Except as otherwise provided herein all program/project income earned (including, but not limited to, taxes, permit fees, license fees, special assessments, levies, fines, etc.) during the grant budget period shall be retained by the grantee and in accordance with the terms of the grant agreement, shall be added to funds committed to the program/project by EPA and the grantee and be used to further support eligible program/project objectives. Where funds cannot be used to further support eligible program/project objectives such funds shall be deducted from the total program/project costs for the purpose of determining the net costs on which the EPA share of cost will be based. In no case will EPA be entitled to a credit in excess of the total amount of the EPA share established in the grant agreement. Reasonable expense incurred by the grantee for the administration of program/project income shall be an allowable cost under the grant. For the purpose of this regulation, grant related income means gross income earned by the grant supported program/project.

§ 30.603–1 Proceeds from sale of real or personal property.

Income derived from the sale of real or personal property, either provided by EPA, or purchased in whole, or in part with EPA funds (see § 30.800–3) during the period of EPA support until final settlement (see § 30.802) shall be credited to the EPA grant payment in a proportion equal to the ratio of the EPA grant to total project costs. In the case of grant awards to State and local governments, however, the specific provisions governing the ownership, use, and distribution of property purchased in whole or in part with Federal funds shall be in accordance with the provisions of OMB Circular No. A–102, Attachment N. (Appendix D)

§ 30.603–2 Royalties received from copyrights and patents.

Royalties received from copyrights and patents during the grant period shall be handled as grant related income, except however, after termination or completion of the grant, the EPA share of royalties in excess of $200 received annually, unless otherwise specified in the grant agreement, shall be returned to EPA in the same proportion as the ratio of the EPA grant was to the total project cost.

§ 30.603–3 Interest earned on grant funds.

The State and any agency or instrumentality of a State shall not be held accountable for interest earned on grant funds, pending their disbursement for program/project purposes. All other grantees, including units of local government, shall be required to return to EPA interest earned on advances of grant funds.

§ 30.603–4 Income exceptions.

Fines and penalties levied as a result of court action due to program/project violations and which will become a part of court funds will not be considered program income.

§ 30.603–5 Receipt and expenditure of revenues.

EPA grantees shall be required to record the receipt and expenditure of all project revenues as part of grant project transactions.

§ 30.800–2 [Amended]

Add the following at the end of this section:

* * * * *

In the case of grant awards to State and local governments, the specific provisions governing the ownership, use, and distribution of property purchased in whole or in part with Federal funds shall be in accordance with the provisions of OMB Circular No. A–102, Attachment N. (Appendix D)

§ 30.800–3 [Amended]

Substitute the following for § 30.800–3:

Upon written approval by the Grants Officer prior to final accounting (see § 30.801), materials (a) may be sold by the grantee and the (1) proceeds of sale or (2) fair market value at the time of sale, whichever is greater, shall be paid to the United States in the proportion which EPA assistance bears to the actual allowable project cost, or (b) may be disposed of in any other manner by the grantee upon payment to the United States of such proportion of the fair market value at time of final accounting. In the case of grant awards to State and local governments, however, the specific provisions governing the ownership, use, and distribution of property purchased in whole or in part with Federal funds shall be in accordance with the provisions of OMB Circular No. A–102, Attachment N. (Appendix D)

Add the following new section:

§ 30.1000–20 In-kind contribution.

The value of a noncash contribution provided by (a) the grantee, (b) other public agencies and institutions, and (c) private organizations and individuals. An in-kind contribution may consist of charges for real property and equipment, and value of goods and services directly benefiting and specifically identifiable to the grant program.

Appendix A [Amended]

Section 2. Audits and records. Substitute the following:

* * * * *

2. Audits and records:

(a) The grantee shall maintain books, records, documents, and other evidence and accounting procedures and practices, sufficient to reflect properly (1) the amount, receipt and disposition by the grantee of all assistance received for the project, including both Federal assistance and any matching share or cost sharing, and (2) the total costs of the project, including all direct and indirect costs of whatever nature incurred for the performance of the project for which the EPA grant has been awarded. In addition, contractors of grantees shall also maintain books, documents, papers, and records which are pertinent to a specific EPA grant award. The foregoing constitute "records" for the purposes of this article.

(b) The grantee's facilities, or such facilities of contractors of grantees as may be engaged in the performance of the project for which the EPA grant has been awarded, and their records shall be subject at all reasonable times to inspection and audit by the Grants Officer, the Comptroller General of the United States, or any authorized representative, until completion of the project for which the EPA grant was awarded.

(c) The grantee and contractors of grantees shall preserve and make their records available to the Grants Officer, the Comptroller General of the United States, or any authorized representative (1) until expiration of 3 years from the date of the submission of the final expenditure report or, for grants which are awarded annually, from the date of the submission of the annual expenditure report, and (2) for such longer period, if any, as is required by applicable statute or lawful requirement, or by (i) or (ii) below.

(i) If this grant is terminated completely or partially, the records relating to the work terminated shall be preserved and made available for a period of 3 years from the date of any resulting final termination settlement.

(ii) Records which relate to (a) appeals under the "Disputes" clause of this grant, (b) litigation or the settlement of claims arising out of the performance of the project for which this grant was awarded, or (c) costs and expenses of the project as to which exception has been taken by the Grants Officer or any of his duly authorized representatives, shall be retained until such appeals, litigation, claims, or exceptions have been disposed of.

(d) Unless otherwise required by law, EPA will not place restrictions on grantees which will limit public access to grantee records except when records must remain confidential to prevent a clearly unwarranted invasion of personal privacy; or where specifically required by Executive Order or statute to be kept secret (e.g. Trade Secrets and Confidential Financial Information).

Substitute the following section:

§ 35.935–3 Bonding and insurance.

On contracts for the building and erection of treatment works (Step 3) exceeding $100,000, each bidder must furnish a bid guarantee equivalent to five percent of the bid price. In addition the contractor awarded either a design/construct contract or a construction contract for Step 3 must furnish performance and payment bonds, each of which shall be in an amount not less than 100 percent of the contract price. Construction contracts less than $100,000 shall be subject to State and local requirements relating to bid guarantees, performance and payment bonds. All contracts shall be subject to State and local requirements relating to construction insurance (e.g., fire and extended coverage, workmen's compensation, public liability and property damage, and "all risk" builders risk).

APPENDIX D

OFFICE OF MANAGEMENT AND BUDGET CIRCULAR A—102

ATTACHMENT G:

UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS-IN-AID TO STATE AND LOCAL GOVERNMENTS

Standards for Grantee Financial Management Systems 1. This Attachment prescribes standards for financial management systems of grant-supported activities of State and local governments. Federal grantor agencies shall not impose additional standards on grantees unless specifically provided for in other Attachments to this Circular. However, grantor agencies are encouraged to make suggestions and assist the grantees in establishing or improving financial management systems when such assistance is needed or requested.

2. Grantee financial management systems shall provide for:

a. Accurate, current, and complete disclosure of the financial results of each grant program in accordance with Federal reporting requirements. When a Federal grantor agency requires reporting on an accrual basis and the grantee's accounting records are not kept on that basis, the grantee should develop such information through an analysis of the documentation on hand or on the basis of best estimates.

b. Records which identify adequately the source and application of funds for grant-supported activities. These records shall contain information pertaining to grant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income.

c. Effective control over and accountability for all funds, property, and other assets. Grantees shall adequately safeguard all such assets and shall assure that they are used solely for authorized purposes.

V 38 - 151 AUG 7 73 XUM

d. Comparison of actual with budgeted amounts for each grant. Also, relation of financial information with performance or productivity data, including the production of unit cost information whenever appropriate and required by the grantor agency.

e. Procedures to minimize the time elapsing between the transfer of funds from the U.S. Treasury and the disbursement by the grantee, whenever funds are advanced by the Federal Government. When advances are made by a letter-of-credit method, the grantee shall make drawdowns from the U.S. Treasury through his commercial bank as close as possible to the time of making the disbursements.

f. Procedures for determining the allowability and allocability of costs in accordance with the provisions of Office of Management and Budget Circular No. A-87.

g. Accounting records which are supported by source documentation.

h. Audits to be made by the grantee or at his direction to determine, at a minimum, the fiscal integrity of financial transactions and reports, and the compliance with laws, regulations and administrative requirements. The grantee will schedule such audits with reasonable frequency, usually annually, but not less frequently than once every two years, considering the nature, size, and complexity of the activity.

i. A systematic method to assure timely and appropriate resolution of audit findings and recommendations.

3. Grantees shall require subgrantees (recipients of grants which are passed through by the grantee) to adopt all of the standards in paragraph 2 above.

ATTACHMENT N:

UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS-IN-AID TO STATE AND LOCAL GOVERNMENTS

PROPERTY MANAGEMENT STANDARDS:

1. This Attachment prescribes uniform standards governing the utilization and disposition of property furnished by the Federal Government or acquired in whole or in part with Federal funds by State and local governments. Federal grantor agencies shall require State and local governments to observe these standards under grants from the Federal Government and shall not impose additional requirements unless specifically required by Federal law. The grantees shall be authorized to use their own property management standards and procedures as long as the provisions of this Attachment are included.

2. The following definitions apply for the purpose of this Attachment:

a. *Real property.*—Real property means land, land improvements, structures and appurtenances thereto, excluding movable machinery and equipment.

b. *Personal property.*—Personal property means property of any kind except real property. It may be tangible—having physical existence, or intangible—having no physical existence, such as patents, inventions, and copyrights.

c. *Nonexpendable personal property.*—Nonexpendable personal property means tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more per unit. A grantee may use its own definition of nonexpendable personal property provided that such definition would at least include all tangible personal property as defined above.

d. *Expendable personal property.*—Expendable personal property refers to all tangible personal property other than nonexpendable property.

e. *Excess property.*—Excess property means property under the control of any Federal agency which, as determined by the head thereof, is no longer required for its needs.

3. Each Federal grantor agency shall prescribe requirements for grantees concerning the use of real property funded partly or wholly by the Federal Government. Unless otherwise provided by statute, such requirements, as a minimum, shall contain the following:

a. The grantee shall use the real property for the authorized purpose of the original grant as long as needed.

b. The grantee shall obtain approval by the grantor agency for the use of the real property in other projects when the grantee determines that the property is no longer needed for the original grant purposes. Use in other projects shall be limited to those under other Federal grant programs, or programs that have purposes consistent with those authorized for support by the grantor.

c. When the real property is no longer needed as provided in a. and b., above, the grantee shall return all real property furnished or purchased wholly with Federal grant funds to the control of the Federal grantor agency. In the case of property purchased in part with Federal grant funds, the grantee may be permitted to take title to the Federal interest therein upon compensating the Federal Government for its fair share of the property. The Federal share of the property shall be the amount computed by applying the percentage of the Federal participation in the total cost of the grant program for which the property was acquired to the current fair market value of the property.

4. Standards and procedures governing ownership, use, and disposition of nonexpendable personal property furnished by the Federal Government or acquired with Federal funds are set forth below:

a. *Nonexpendable personal property acquired with Federal funds.* When nonexpendable personal property is acquired by a grantee wholly or in part with Federal funds, title will not be taken by the Federal Government except as provided in paragraph 4a (4), but shall be vested in the grantee subject to the following restrictions on use and disposition of the property:

(1) The grantee shall retain the property acquired with Federal funds in the grant program as long as there is a need for the property to accomplish the purpose of the grant program whether or not the program continues to be supported by Federal funds. When there is no longer a need for the property to accomplish the purpose of the grant program, the grantee shall use the property in connection with other Federal grants it has received in the following order of priority:

(a) Other grants of the same Federal grantor agency needing the property.

(b) Grants of other Federal agencies needing the property.

(2) When the grantee no longer has need for the property in any of its Federal grant programs, the property may be used for its own official activities in accordance with the following standards:

(a) *Nonexpendable property with an acquisition cost of less than $500 and used four years or more.*—The grantee may use the property for its own official activities without reimbursement to the Federal Government or sell the property and retain the proceeds.

(b) *All other nonexpendable property.*—The grantee may retain the property for its own use provided that a fair compensation is made to the original grantor agency for the latter's share of the property. The amount of compensation shall be computed by applying the percentage of Federal participation in the grant program to the current fair market value of the property.

(3) If the grantee has no need for the property, disposition of the property shall be made as follows:

(a) *Nonexpendable property with an acquisition cost of $1,000 or less.*—Except for that property which meets the criteria of (2)(a) above, the grantee shall sell the property and reimburse the Federal grantor agency an amount which is computed in accordance with (iii) below.

(b) *Nonexpendable property with an acquisition cost of over $1,000.*—The grantee shall request disposition instructions from the grantor agency. The Federal agency shall determine whether the property can be used to meet the agency's requirement. If no requirement exists within that agency, the availability of the property shall be reported to the General Services Administration (GSA) by the Federal agency to determine whether a requirement for the property exists in other Federal agencies. The Federal grantor agency shall issue instructions to the grantee within 120 days and the following procedures shall govern:

(i) If the grantee is instructed to ship the property elsewhere, the grantee shall be reimbursed by the benefiting Federal agency with an amount which is computed by applying the percentage of the grantee's participation in the grant program to the current fair market value of the property, plus any shipping or interim storage costs incurred.

(ii) If the grantee is instructed to otherwise dispose of the property, he shall be reimbursed by the Federal grantor agency for such costs incurred in its disposition.

(iii) If disposition instructions are not issued within 120 days after reporting, the grantee shall sell the property and reimburse the Federal grantor agency an amount which is computed by applying the percentage of Federal participation in the grant program to the sales proceeds. Further, the grantee shall be permitted to retain $100 or 10 percent of the proceeds, whichever is greater, for the grantee's selling and handling expenses.

(4) Where the grantor agency determines that property with an acquisition cost of $1,000 or more and financed solely with Federal funds is unique, difficult, or costly to replace, it may reserve title to such property, subject to the following provisions:

(a) The property shall be appropriately identified in the grant agreement or otherwise made known to the grantee.

(b) The grantor agency shall issue disposition instructions within 120 days after the completion of the need for the property under the Federal grant for which it was acquired. If the grantor agency fails to issue disposition instructions within 120 days, the grantee shall apply the standards of 4a(1), 4a(2)(b), and 4a(3)(b).

b. *Federally-owned nonexpendable personal property.*—Unless statutory authority to transfer title has been granted to an agency, title to Federal-owned property (property to which the Federal Government retains title including excess property made available by the Federal grantor agencies to grantees) remains vested by law in the Federal Government. Upon termination of the grant or need for the property, such property shall be reported to the grantor agency for further agency utilization or, if appropriate, for reporting to the General Services Administration for other Federal agency utilization. Appropriate disposition instructions will be issued to the grantee after completion of Federal agency review.

5. The grantees' property management standards for nonexpendable personal property shall also include the following procedural requirements:

a. Property records shall be maintained accurately and provide for: a description of the property; manufacturer's serial number or other identification number; acquisition date and cost; source of the property; percentage of Federal funds used in the purchase of property; location, use, and condition of the property; and ultimate disposition data including sales price or the method used to determine current fair market value if the grantee reimburses the grantor agency for its share.

b. A physical inventory of property shall be taken and the results reconciled with the property records at least once every two years to verify the existence, current utilization, and continued need for the property.

c. A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft to the property. Any loss, damage, or theft of nonexpendable property shall be investigated and fully documented.

d. Adequate maintenance procedures shall be implemented to keep the property in good condition.

e. Proper sales procedures shall be established for unneeded property which would provide for competition to the extent practicable and result in the highest possible return.

6. When the total inventory value of any unused expendable personal property exceeds $500 at the expiration of need for any Federal grant purposes, the grantee may retain the property or sell the property as long as he compensates the Federal Government for its share in the cost. The amount of compensation shall be computed in accordance with 4a(2)(b).

7. Specific standards for control of intangible property are provided as follows:

a. If any program produces patents, patent rights, processes, or inventions, in the course of work aided by a Federal grant, such fact shall be promptly and fully reported to the grantor agency. The grantor agency shall determine whether protection on such invention or discovery shall be sought and how the rights in the invention or discovery—including rights under any patent issued thereon—shall be disposed of and administered in order to protect the public interest consistent with "Government Patent Policy" (President's Memorandum for Heads of Executive Departments and Agencies, August 23, 1971, and Statement of Government Patent Policy as printed in 36 FR 16889).

b. Where the grant results in a book or other copyrightable material, the author or grantee is free to copyright the work, but the Federal grantor agency reserves a royalty-free, nonexclusive and irrevocable license to reproduce, publish, or otherwise use, and to authorize others to use the work for Government purposes.

ATTACHMENT O: UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS-IN-AID TO STATE AND LOCAL GOVERNMENTS

PROCUREMENT STANDARDS

1. This attachment provides standards for use by the State and local governments in establishing procedures for the procurement of supplies, equipment, construction, and other services with Federal grant funds. These standards are furnished to insure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive orders. No additional requirements shall be imposed by the Federal agencies upon the grantees unless specifically required by Federal law or Executive orders.

2. The Standards contained in this Attachment do not relieve the grantee of the contractual responsibilities arising under its contracts. The grantee is the responsible authority, without recourse to the grantor agency regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into, in support of a grant. This includes but is not limited to: disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authority as may have proper jurisdiction.

3. Grantees may use their own procurement regulations which reflect applicable State and local law, rules and regulations provided that procurements made with Federal grant funds adhere to the standards set forth as follows:

a. The grantee shall maintain a code or standards of conduct which shall govern the performance of its officers, employees, or agents in contracting with and expending Federal grant funds. Grantee's officers, employees or agents, shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. To the extent permissible by State or local law, rules or regulations, such standard shall provide for penalties, sanctions, or other disciplinary actions to be applied for violations of such standards by either the grantee officers, employees, or agents, or by contractors or their agents.

b. All procurement transactions regardless of whether negotiated or advertised and without regard to dollar value shall be conducted in a manner so as to provide maximum open and free competition. The grantee should be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

c. The grantee shall establish procurement procedures which provide for, as a minimum, the following procedural requirements:

(1) Proposed procurement actions shall be reviewed by grantee officials to avoid purchasing unnecessary or duplicative items. Where appropriate, an anlysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(2) Invitations for bids or requests for proposals shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement, and when so used the specific features of the named brand which must be met by offerors should be clearly specified.

(3) Positive efforts shall be made by the grantees to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts to be performed utilizing Federal grant funds.

(4) The type of procuring instruments used (i.e., fixed price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.), shall be appropriate for the particular procurement and for promoting the best interest of the grand program involved. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(5) Formal advertising, with adequate purchase description, sealed bids, and public openings shall be the required method of procurement unless negotiation pursuant to paragraph (6) below is necessary to accomplish sound procurement. However, procurements of $2,500 or less need not be so advertised unless otherwise required by State or local law or regulations. Where such advertised bids are obtained the awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the grantee, price and other factors considered. (Factors such as discounts, transportation costs, taxes may be considered in determining the lowest bid.) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the grantee. Any or all bids may be rejected when it is in the grantee's interest to do so, and such rejections are in accordance with applicable State and local law, rules, and regulations.

(6) Procurements may be negotiated if it is impracticable and unfeasible to use formal advertising. Generally, procurements may be negotiated by the grantee if:

(a) The public exigency will not permit the delay incident to advertising;

(b) The material or service to be procured is available from only one person or firm; (All contemplated sole source procurements where the aggregate expenditure is expected to exceed $5,000 shall be referred to the grantor agency for prior approval.)

(c) The aggregate amount involved does not exceed $2,500;

(d) The contract is for personal or professional services, or for any service to be rendered by a university, college, or other educational institutions;

(e) The material or services are to be procured and used outside the limits of the United States and its possessions;

(f) No acceptable bids have been received after formal advertising;

(g) The purchases are for highly perishable materials or medical supplies, for material or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental or research work, for supplies purchased for authorized resale, and for technical or specialized supplies requiring substantial initial investment for manufacture;

(h) Otherwise authorized by law, rules, or regulations.

Notwithstanding the existence of circumstances justifying negotiation, competition shall be obtained to the maximum extent practicable.

(7) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, or accessibility to other necessary resources.

(8) Procurement records or files for purchases in amounts in excess of $2,500 shall provide at least the following pertinent information: justification for the use of negotiation in lieu of advertising, contractor selection, and the basis for the cost or price negotiated.

(9) A system for contract administration shall be maintained to assure contractor conformance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely followup of all purchases.

4. The grantee shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts and subgrants:

a. Contracts shall contain such contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contracts terms, and provide for such sanctions and penalties as may be appropriate.

b. All contracts, amounts for which are in excess of $2,500, shall contain suitable provi-

V 38 151 AUG 7 73 XUM

sions for termination by the grantee including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

c. In all contracts for construction or facility improvement awarded in excess of $100,000, grantees shall observe the bonding requirements provided in Attachment B to this Circular.

d. All contracts and subgrants in excess of $10,000 shall include provisions for compliance with Executive Order No. 11246, entitled, "Equal Employment Opportunity," as supplemented in Department of Labor Regulations (41 CFR, Part 60). Each contractor or subgrantee shall be required to have an affirmative action plan which declares that it does not discriminate on the basis of race, color, religion, creed, national origin, sex, and age and which specifies goals and target dates to assure the implementation of that plan. The grantee shall establish procedures to assure compliance with this requirement by contractors or subgrantees and to assure that suspected or reported violations are promptly investigated.

e. All contracts and subgrants for construction or repair shall include a provision for compliance with the Copeland "Anti-Kick Back" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR, Part 3). This Act provides that each contractor or subgrantee shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The grantee shall report all suspected or reported violations to the grantor agency.

f. When required by the Federal grant program legislation, all construction contracts awarded by grantees and subgrantees in excess of $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) and as supplemented by Department of Labor regulations (29 CFR, Part 5). Under this Act contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less often than once a week. The grantee shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The grantee shall report all suspected or reported violations to the grantor agency.

g. Where applicable, all contracts awarded by grantees and subgrantees in excess of $2,000 for construction contracts and in excess of $2,500 for other contracts which involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR, Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work day of 8 hours and a standard work week of 40 hours. Work in excess of the standard workday or workweek is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health and safety as determined under construction, safety, and health standards promulgated by the Secretary of Labor. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

h. Contracts or agreements, the principal purpose of which is to create, develop, or improve products, processes or methods; or for exploration into fields which directly concern public health, safety, or welfare; or contracts in the field of science or technology in which there has been little significant experience outside of work funded by Federal assistance, shall contain a notice to the effect that matters regarding rights to inventions, and materials generated under the contract or agreement are subject to the regulations issued by the Federal grantor agency and the grantee. The contractor shall be advised as to the source of additional information regarding these matters.

i. All negotiated contracts (except those of $2,500 or less) awarded by grantees shall include a provision to the effect that the grantee, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific grant program for the purpose of making audit, examination, excerpts, and transcriptions.

j. Each contract of an amount in excess of $2,500 awarded by a grantee or subgrantee shall provide that the recipient will comply with applicable regulations and standards of the Cost of Living Council in establishing wages and prices. The provision shall advise the recipient that submission of a bid or offer or the submittal of an invoice or voucher for property, goods, or services furnished under a contract or agreement with the grantee shall constitute a certification by him that amounts to be paid do not exceed maximum allowable levels authorized by the Cost of Living Council regulations or standards. Violations shall be reported to the grantor agency and the local Internal Revenue Service field office.

k. Contracts and subgrants of amounts in excess of $100,000 shall contain a provision which requires the recipient to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act of 1970. Violations shall be reported to the grantor agency and the Regional Office of the Environmental Protection Agency.

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Light Duty Trucks and Diesel-Powered Vehicles

V 38-151 AUG 7 73 XUM

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Light Duty Diesel Regulations for 1975 and 1976 Model Year Vehicles

On October 4, 1972 (37 FR 20914) EPA proposed that light duty diesel-powered vehicles meet the statutory standards for 1975 and 1976 model year light duty gasoline-fueled vehicles. The proposal also contained modifications to the existing analytical and measurement portions of the 1975 model year constant volume sampler (CVS) test procedures for gasoline-fueled vehicles to allow diesel-powered vehicles to be tested on that procedure for prototype certification purposes. Comments on that proposal have been received and analyzed and the final regulations are promulgated as set forth below.

One change to the regulations from the proposal was a revision of the format from that proposed in order to conform to the recodification of the motor vehicle regulations published in the FEDERAL REGISTER on November 15, 1972 (37 FR 24250). Subpart B, Emission Regulations for New Diesel Light Duty Vehicles, has been added and contains all the general provisions, standards, and test procedures applicable to diesel-powered light duty vehicles.

Other changes to the regulations reflect the adoption of comments to the proposal. These changes were to correct errors in the proposal, to make the testing procedure as similar as possible to that for gasoline-fueled vehicles, and to improve instrumentation techniques.

Part 85 of Chapter 1, Title 40 of the Code of Federal Regulations as applicable to 1975 and later model year diesel-powered light duty vehicles is amended below and is effective on Sept. 6, 1973.

Dated: July 27, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart B—Emission Regulations for New Diesel Light Duty Vehicles

Sec.
85.101 General applicability.
85.102 Definitions.
85.103 Abbreviations.
85.104 General standards; increase in emissions; unsafe conditions.
85.105 Hearings on certification.
85.106 Maintenance of records; submittal of information; right of entry.
85.175–1 Emission standards for 1975 model year vehicles.
85.175–2 Application for certification.
85.175–3 Approval of procedure and equipment; test fleet selections.
85.175–4 Required data.
85.175–5 Test vehicles.
85.175–6 Maintenance.
85.175–7 Mileage accumulation and emission measurements.
85.175–8 Special test procedures.
85.175–9 Test procedures.
85.175–10 Diesel fuel specifications.
85.175–11 Vehicle preconditioning.
85.175–12 Dynamometer driving schedule.
85.175–13 Dynamometer procedure.
85.175–14 Three-speed manual transmissions.
85.175–15 Four-speed and five-speed manual transmissions.
85.175–16 Automatic transmissions.
85.175–17 Engine starting and re-starting.
85.175–18 Sampling and analytical system.
85.175–19 Information to be recorded.
85.175–20 Analytical system calibration and sample handling.
85.175–21 Dynamometer test runs.
85.175–22 Chart reading.
85.175–23 Calculations (exhaust emissions).
85.175–24 through 85.175–27 [Reserved]
85.175–28 Compliance with emission standards.
85.175–29 Testing by the Administrator.
85.175–30 Certification.
85.175–31 Separate certification.
85.175–32 Addition of a vehicle after certification.
85.175–33 Changes to a vehicle covered by certification.
85.175–34 Alternative procedure for notification of additions and changes.
85.175–35 Labeling.
85.175–36 Submission of vehicle identification numbers.
85.175–37 Production vehicles.
85.175–38 Maintenance instructions.
85.175–39 Submission of maintenance instructions.
85.176–1 Emission standards for 1976 model year vehicles.

AUTHORITY: Sec. 202(b) and 206 of the Clean Air Act, as amended (42 U.S.C. 1857f–1(b) and 1857f–5).

Subpart B—Emission Regulations for New Diesel Light Duty Vehicles

§ 85.101 General applicability.

The provisions of this subpart are applicable to new diesel light duty motor vehicles.

§ 85.102 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of title II of the Clean Air Act, 42 U.S.C. 1857 f–1 through f–7, as amended by Public Law 91–604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided,* That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(4) "Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

(5) "Light duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at 6,000 pounds GVW or less or designed primarily for transportation of persons and having a capacity of 12 persons or less.

(6) "Vehicle curb weight" means the actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with § 85.175–5(g).

(7) "Loaded vehicle weight" means the vehicle curb weight of a light duty vehicle plus 300 pounds.

(8) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicles.

(9) "Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 85.175–5(a).

(10) "Engine-system combination" means an engine family-exhaust emission control system-fuel evaporative emission control system (where applicable) combination.

(11) "Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

(12) "Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

(13) "Tank fuel volume" means the volume of fuel in the fuel tank, prescribed to be 40 percent of nominal tank capacity rounded to the nearest whole U.S. gallon.

(14) Zero (0) miles means that point after initial engine starting (not to exceed 10 miles of vehicle operation or 1 hour of engine operation) at which normal assembly line operations and adjustments are completed.

(15) "Calibrating gas" means a gas of known concentration which is used to establish the response curve of an analyzer.

(16) "Span gas" means a gas of known concentration which is used routinely to set the output level of an analyzer.

(17) "Oxides of nitrogen" means the sum of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

(18) "Useful life" means a period of use of 5 years or 50,000 miles, whichever first occurs.

(19) "Scheduled maintenance" means any adjustment, repair, removal, disassembly, cleaning, or replacement of vehicle components or systems which is performed on a periodic basis to prevent part failure or vehicle malfunction.

(20) "Unscheduled maintenance" means any adjustment, repair, removal, disassembly, cleaning, or replacement of vehicle components or systems which is performed to correct a part failure or vehicle malfunction.

§ 85.103 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lowercase:

Accel.—Acceleration.
ASTM—American Society for Testing and Materials.
C.—Centigrade.
C.f.h.—Cubic feet per hour.
CO_2—Carbon dioxide.
CO—Carbon monoxide.

Conc.—Concentration.
C.f.m.—Cubic feet per minute.
Cu. in.—Cubic inch(es).
Decel.—Deceleration.
F.—Fahrenheit.
Gal.—U.S. gallon(s).
Gm.—Gram(s).
GVW—Gross Vehicle Weight.
HC—Hydrocarbon(s).
Hg—Mercury.
Hi.—High.
HP.—Horsepower.
ID—Internal diameter.
Lb.—Pound(s).
Lb.-ft.—Pound-feet.
Min.—Minute(s).
Ml.—Milliliter(s).
M.p.h.—Miles per hour.
Mm.—Millimeter(s).
Mv.—Millivolt(s).
N_2—Nitrogen.
NO—Nitric oxide.
NO_2—Nitrogen dioxide.
NO_x—Oxides of nitrogen.
No.—Number.
P.p.m.—Parts per million by volume.
P.s.i.—Pounds per square inch.
P.s.i.g.—Pounds per square inch gauge.
R—Rankine.
R.p.m.—Revolutions per minute.
S.A.E.—Society of Automotive Engineers.
Sec.—Second(s).
Sp.—Speed.
SS—Stainless steel.
V.—Volts.
Vs.—Versus.
WOT.—Wide open throttle.
Wt.—Weight.
'—Feet.
''—Inches.
°—Degrees.
%—Percent.

§ 85.104 General standards; increase in emissions; unsafe conditions.

(a) (1) Every new motor vehicle manufactured for sale, sold, offered for sale, introduced or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to sections 85.175–2 through 85.175–4 and 85.175–29 through 85.175–34 of this subpart.

(b) (1) Any system installed on or incorporated in a new motor vehicle to enable such vehicle to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such vehicle without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicles subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles in accordance with good engineering practice to ascertain that such test vehicles will meet the requirements of this section for the useful life of the vehicle.

§ 85.105 Hearings on certification.

(a) (1) After granting a request for a hearing under § 85.175–30, the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing have not been fixed by the Administrator under § 85.175–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(b) (1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under § 85.175–30, together with any accompanying material, the request for a hearing and the supporting data submitted therewith and all documents relating to the request for certification, including the application for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The appeal file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d) (1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial, and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f) (1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 85.106 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall establish and maintain the following adequately organized and indexed records:

(1) Identification and description of all vehicles for which testing is required under this subpart.

(2) A description of all emission control systems which are installed on or incorporated in each vehicle.

(3) A description of the procedures used to test such vehicles.

(4) Test data on each emission data vehicle which will show its emissions at 0 and 4,000 miles.

(5) Test data on each durability vehicle which will show the performance of the systems installed on or incorporated in the vehicle during extended mileage as well as a record of all pertinent maintenance performed on the vehicle.

(b) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such vehicle relevant to the control of crankcase, exhaust, or evaporative emissions, issued by the manufacturer for use by other

V 38-151 AUG 7 73 XUM

manufacturers, assembly plants, distributors, dealers, and ultimate purchasers: *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall permit officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the manufacturer:

(1) To enter, at reasonable times, any premises used during the certification procedures for purposes of monitoring tests and mileage accumulation procedures, observing maintenance procedures, and verifying correlation or calibration of test equipment, or

(2) To inspect, at reasonable times, records, files, and papers compiled by such manufacturer in accordance with paragraph (a) of this section.

A separate notice shall be given for each such inspection, but a separate notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

§ 85.175–1 Standards for exhaust emissions.

(a) (1) (i) Exhaust emissions from 1975 model year vehicles shall not exceed:

(*a*) *Hydrocarbons*. 0.41 grams per vehicle mile.

(*b*) *Carbon monoxide*. 3.4 grams per vehicle mile.

(*c*) *Oxides of nitrogen*. 3.1 grams per vehicle mile.

(ii) For those manufacturers who have been granted a suspension of the standards specified in paragraph (a) (1) (i), the following standards for exhaust emissions from 1975 model year vehicles shall apply:

(*a*) *Hydrocarbons*. 1.5 grams per vehicle mile.

(*b*) *Carbon monoxide*. 15 grams per vehicle mile, except that the standard shall be 9.0 grams per vehicle mile for vehicles to be sold or offered for sale in the State of California.

(*c*) *Oxides of nitrogen*. 3.1 grams per vehicle mile.

(b) The standards set forth in paragraph (a) of this section refer to the exhaust emitted over a driving schedule as set forth in § 85.175–9 through § 85.175–23 and measured and calculated in accordance with those procedures.

§ 85.175–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle shall be made to the Administrator by the manufacturer, and shall be kept current and accurate by amendment.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed mileage accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.175–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the mileage accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.175–5.

§ 85.175–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such vehicles tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the vehicle for extended mileage, as well as a record of all pertinent maintenance performed on the test vehicles.

(b) Emission data on such vehicles tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 miles and 4,000 miles of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.175–1 and the data derived from such tests.

(d) A statement that the test vehicles with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any vehicle tested, the vehicle shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.175–5 Test vehicles.

(a) (1) The vehicles covered by the application for certification will be divided into groupings of vehicles whose engines are expected to have similar emission characteristics. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center to center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air-cooled or water-cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves and the valve sizes (within a ⅛-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(3) Engines identical in all the respects listed in subparagraph (2) of this paragraph may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(i) The bore and stroke.

(ii) The surface to volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in subparagraphs (2) and (3) of this paragraph, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(b) Emission data vehicles:

(1) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system-combinations. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to transmission type, fuel system, and inertia weight class.

(3) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options and axle ratios.

(4) If the vehicles selected in accordance with subparagraphs (2) and (3) of this paragraph do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(c) Durability data vehicles:

(1) A durability data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system and inertia weight class.

(2) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(d) For purposes of testing under § 85.175–7(g) the Administrator may require additional emission data vehicles and durability data vehicles identical in all material respects to vehicles selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles selected shall not increase the size of either the emission data fleet or the durability data fleet by more than 20 percent or one vehicle, whichever is greater.

(e) Any manufacturer whose projected sales of new motor vehicles subject to this subpart for the 1975 model year is less than 2,000 vehicles may request a reduction in the number of test vehicles determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission data or durability data vehicle selected under paragraph (b) or (c) of this section and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar vehicle for which certification has previously been obtained.

(g) (1) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included, if required by the Administrator, in the curb weight computation for each vehicle available with that option in the engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. In the case of mutually exclusive options, only the weight of the heavier option will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence emissions, then such items of optional equipment shall actually be installed, unless specifically excluded by the Administrator, on all emission data and durability data vehicles in the engine family on which the option is intended to be offered in production. Optional equipment that can reasonably be expected to influence emissions are the air conditioner, power steering, power brakes, and other items determined by the Administrator.

(3) Optional equipment that can reasonably be expected to influence emissions which is utilized on 33 percent or less of the vehicle in the engine family shall not be installed on any vehicle in the engine family unless specifically required under this section.

§ 85.175–6 Maintenance.

(a) (1) Scheduled maintenance on the engine, emission control system, and fuel system of durability vehicles shall be performed only under the following provisions and shall be specified in the manufacturer's maintenance instructions furnished to the ultimate purchaser of the motor vehicle.

(i) One major engine tuneup to manufacturer's specifications may be performed no more frequently than every 12,500 miles provided that no tuneup may be performed after 45,000 miles of scheduled driving.

rated horsepower per cubic inch of displacement) major engine tuneups may be performed at 12,000, 24,000, and 36,000 miles (±250 miles) of scheduled driving. Other maintenance intervals may be used if approved in advance by the Administrator. A major engine tuneup shall be restricted to the following:

(*a*) Adjust low idle speed.

(*b*) Adjust valve lash if required.

(*c*) Adjust injector timing.

(*d*) Adjust governor.

(*e*) Clean and service injector tips.

(*f*) Adjust drive belt tension on engine accessories.

(*g*) Check engine bolt torque and tighten as required.

(ii) Injectors may be changed if a persistent misfire is detected.

(iii) Normal vehicle lubrication services (engine and transmission oil change and oil filter, fuel filter, and air filter servicing) will be allowed at manufacturer's recommended intervals.

(iv) Readjustment of the engine idle settings may be performed only if there is a problem of stalling at stops.

(v) Engine idle speed may be adjusted at the 5,000-mile test point.

(vi) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on durability vehicles shall be performed only with the advance approval of the Administrator.

(2) Where the Administrator agrees under § 85.175–7 to a mileage accumulation of less than 50,000 miles for durability testing, he may modify the requirement of this paragraph.

(b) Adjustment of engine idle speed may be performed once before the 4,000 mile test point on emission data vehicles. Any other engine emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, or replacement on emission data vehicles shall be performed only with the advance approval of the Administrator.

(c) Repair to vehicle components of the durability or emission data vehicle, other than the engine, emission control system, or fuel system, shall be performed only as a result of part failure or vehicle system malfunction or with the advanced approval of the Administrator.

(d) Complete emission tests (see §§ 85.175–9 to 85.175–23) shall be run, unless waived by the Administrator, before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.175–4.

(e) If the Administrator determines that compenent failure or repairs performed have resulted in a substantial change to the engine-system combination, the vehicle shall not be used as a durability or emission data vehicle.

(f) The use of instruments, tools, or emission tests to identify malfunctioning, maladjusted, or defective engine components is not allowed unless specifically authorized by the Administrator.

§ 85.175–7 Mileage accumulation and emission measurements.

The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this

V 38 - 151 AUG 7 73 XUM

part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 85.175–13(d), the manufacturer may elect to conduct the respective emission data vehicle test at the inertia weight corresponding to the higher loaded vehicle weight.

(a) Emission data vehicles: Each emission data vehicle shall be driven 4,000 miles with all emission control systems installed and operating. Emission tests shall be conducted at zero miles and 4,000 miles.

(b) Durability data vehicles: Each durability data vehicle shall be driven with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of this procedure. Complete emission tests (see § 85.175–10 through § 85.175–23) shall be made at the following mileage points: 0, 5,000, 10,000, 15,000, 20,000, 25,000, 30,000, 35,000, 40,000, 45,000, and 50,000.

(c) All tests required by this subpart to be conducted after 5,000 miles of driving for durability vehicles and 4,000 miles for emission data vehicles must be conducted at any accumulated mileage within 250 miles of each of those test points.

(d)(1) The results of each emission test shall be supplied to the Administrator immediately after the test. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) shall be air posted to the Administrator within 24 hours (or delivered within three working days). In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.175–4. Where the Administrator conducts a test on a durability vehicle at a prescribed test point, the results of each test will be used in the calculation of the deterioration factor.

(d)(2) The results of all emission test results shall be recorded and reported to the Administrator using three significant figures. These numbers shall be rounded in accordance with the "Rounding-Off Method" specified in ASTM E 29–67.

(e) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero mile test data to the Administrator and make the vehicle available for such testing under § 85.175–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(f) Once a manufacturer begins to operate an emission data or durability data vehicle, as indicated by compliance with paragraph (e) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 85.175–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(g)(1) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(2) The test procedures (§§ 85.175–9 to 85.175–23) will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(3) The data developed by the Administrator for the engine system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer the Administrator's data shall be used in the determination of deterioration factors.

(h) Emission testing of any type with respect to any certification vehicle other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

§ 85.175–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.175–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of diesel light duty vehicles with the standards set forth in § 85.175–1.

(a) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for analysis of diesel exhaust hydrocarbon and subsequent analysis of other specific components by prescribed techniques. The test applies to vehicles equipped with catalytic or direct flame afterburners, other control systems or to uncontrolled vehicles and engines. All test phases are conducted with an ambient temperature range between 68° and 86° F.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles. The test consists of engine startups and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. Using a constant volume (variable dilution) sampler, a proportional part of the diluted exhaust gas is analyzed continuously for hydrocarbons and an additional proportional part of the diluted exhaust gas is collected in a bag for subsequent analysis of the other components.

(c) Except for component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Component malfunction or failure shall be repaired in accordance with § 85.175–6.

§ 85.175–10 Diesel fuel specifications.

(a) The diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The fuels may contain nonmetallic additives as follows: Cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(b) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1–D	Type 2–D
Cetane	D 613	48–54	42–50
Distillation range	D 86		
IBP, °F		330–390	340–400
10-percent point, °F		370–430	400–460
50-percent point, °F		410–480	470–540
90-percent point, °F		460–520	550–610
EP, °F		500–560	580–660
Gravity, °API	D 287	40–44	33–37
Total Sulfur, percent	D 129 or D 2622	0.05–0.20	0.2–0.5
Hydrocarbon composition	D 1319		
Aromatics, percent		8–15	27 (Min.)
Paraffins, Naphthenes, Olefins		Remainder.	Remainder.
Flashpoint, °F. (minutes)	D 93	120	130
Viscosity, Centistokes	D 445	1.6–2.0	2.0–3.2

(c) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in service accumulation. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1–D	Type 2–D
Cetane	D 613	48–54	42–55
Distillation range	D 86		
IBP, ° F		330–390	340–410
10-percent point, ° F		370–430	400–470
50-percent point, ° F		410–480	470–540
90-percent point, ° F		460–520	550–610
EP, ° F		500–560	580–660
Gravity, ° API	D 287	40–44	33–40
Total Sulfur, percent	D 129 or D 2622	0.05–0.20	0.2–0.5
Flash point, ° F. (minute)	D 93	120	130
Viscosity, Centistokes	D 445	1.6–2.0	2.0–3.2

(d) Other Petroleum Distillation Fuel Specifications:

(i) Other petroleum distillate fuels may be used for testing and service accumulation provided they are commercially available, and

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service, and

(iii) Use of a fuel listed under paragraphs (b) and (c) of this section would have a detrimental effect on emissions or durability, and

(iv) Written approval from the Administrator of the fuel specifications was provided prior to the start of testing.

(e) The specification range of the fuels to be used under paragraphs (b), (c), and (d) of this section shall be reported in accordance with § 85.175–2(b)(3).

§ 85.175–11 Vehicle preconditioning.

Vehicles to be tested for compliance with the exhaust emission standards of this part shall be preconditioned as follows:

(a) The fuel tank of the test vehicle shall be drained and charged with the specified test fuel, § 85.175–10(b), to the prescribed "tank fuel volume," defined in § 85.102. The vehicle manufacturer shall provide additional fittings and adapters, as required to accommodate a fuel drain at the lowest point possible in the tank as installed on the vehicle. Test fuel, when charged to the tank shall be at ambient temperature, § 85.175–9(a).

(b) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of §§ 85.175–12 to 85.175–17 except that the engine need not be cold when starting the run on the dynamometer and only a single trip of 7.5 miles shall be run. The test vehicle may be used to set dynamometer horsepower, if necessary.

(c) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand for a period of not less than 12 hours prior to the dynamometer test.

§ 85.175–12 Dynamometer driving schedule.

(a) The dynamometer driving schedule to be followed consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates. The driving schedule is defined by a smooth transition through the speed vs. time relationships listed in Appendix I to this part. The time sequence begins upon starting the vehicle according to the startup procedure described in § 85.175–17.

(b) The speed tolerance at any given time on the dynamometer driving schedule prescribed in Appendix I to this part or as printed on a driver's aid chart approved by the Administrator is defined by upper and lower limits. The upper limit is 2 m.p.h. higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 m.p.h. lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as occur when shifting manual transmission vehicles) are acceptable provided they occur for less than 2 seconds on any one occasion. Speeds lower than those prescribed are acceptable provided the vehicle is operated at maximum available power during such occurrences. Further, speed deviations from those prescribed due to stalling are acceptable provided the provisions of § 85.175–17(d) are adhered to.

§ 85.175–13 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12 hour soak and a "hot" start test with a 10 minute soak between the two tests. Engine startup, operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with air to a constant volume and a portion is sampled continuously during each test. Diesel hydrocarbons are analyzed continuously, with manual or electronic integration, during each test. The composite (flow integrated) samples collected in bags are analyzed for carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of dilution air is analyzed for hydrocarbon, carbon monoxide and oxides of nitrogen.
